Records Branch feels that serious consideration should be afforded these suggestions relating to destruction of files by auxiliary offices in view of the fact that (1) several field offices have submitted relatively the same idea (2) from records management standpoint, highly destrable in that maintenance of duplicate

records would be decreased (3) complete file available at office of origin (4) would save a tremendous volume of filing space and equipment throughout the field.

Prior to the final consideration of these suggestions the comments of the Investigative Division, the Domestic Intelligence Division, the Administrative Division, and the Training and Inspection Division should be secured as to the relative merits of these suggestions. Consideration should also be given to conducting a survey of a representative number of field offices to determine the potential problems, if any, which might be created if such a prodecure were placed into effect and the observations of these offices as to the adoption of such a procedure. In the event these suggestions are favorably considered, archival authority has already been secured for the destruction of files maintained in the field.

RECOMMENDATION:

That the comments of the Investigative Division, Domestic Intelligence Division, Administrative Division, and the Training and Inspection Division be secured prior to the final consideration of these suggestions.

ADDENDUM: 11-9-59 JWM:llb

Suggestion presently being considered to lower retention period of all files in the field from twenty to fifteen or ten years. Pending outcome of this suggestion, no further consideration is recommended at this time regarding above suggestions.

Destruction of Bureau Property

Reference is made to SAC Letter 59-43, C, wherein we requested observations and suggestions regarding ways to strengthen the Bureau's Records Management Program.

Several suggestions have been received concerning the submission of Personnel Status Forms. These suggestions are as follows: (1) By letter dated August 21, 1959, the SAC, Butte, suggested that the personnel status form (FD-285) be maintained as the top serial in the personnel file along with the employee's salary and assignment changes form (FD-189) and each subsequent change in the personnel status of the employee be posted on the FD-285. The SAC proposed that when a birth or death is reported, that the field could prepare the proper form for transmittal to the Bureau and post the pertinent information on the FD-285 in the field file. He indicated that once a year each employee could be contacted for any other changes on the FD-285 (as is done at present on the vocation record form) and the Bureau could be advised by routing slip of such changes which could be posted to the FD-285 in the Bureau personnel file. He proposed that office of preference changes could also be posted in this manner. The SAC felt that when an employee marries or a great many changes have been made on the original FD-285, a new one could be prepared and the original could be filed as a serial. The SAC pointed out that the adoption of this suggestion would materially reduce the number of items serialized in file both in the field and at the Seat of Government. In addition, the posting of information relating to births, deaths and office of preference changes on the FD-285 in the field would further reduce filing time. The SAC indicated that a review of one personnel file in the Butte Office revealed there were 15 copies of FD-285 and the other forms used to report births, deaths and office of preference changes, all of which could have been consolidated on one copy of FD-285. (2) By letter dated August 10, 1959, the SAC, Savannah, recommended that the personnel status form be submitted only when changes occur instead of on a periodic basis. (3) By letter dated August 5, 1959, the SAC, Albuquerque, also recommended that personnel status forms be submitted only when changes occur.

ORIGINAL FILED IN

RECORDS BRANCH OBSERVATIONS:

This suggestion is highly desirable from a records management standpoint. The adoption would save a substantial amount of employee time in preparing the form and in the subsequent processing and filing of the form, both in the field and at the Seat of Government. Under the present procedure, when a new form is received for filing at the Seat of Government, the previous form is destroyed. It would appear from the Butte suggesti on that the field does not have this authority and retains the previous form. The Records Branch feels that these suggestions have merit, however, the comments of the Administrative Division, which is responsible for the preparation and handling of these forms, should be secured prior to the final consideration of this suggestion.

RECOMMENDATIONS:

1. That this memorandum be referred to the Administrative Division for their comments prior to the final consideration of this suggestion.

2. This memorandum be referred to the Training and Inspection Division for review.

(See addendum page 3)

ADDENDUM BY TRAINING AND INSPECTION DIVISION: AGG:jmp 9-8-59

On at least ten occasions in past two years consideration has been given to suggestions similar to those presented here. All have been rejected on recommendation of Administrative Division or because of prior consideration on basis that information required by Personnel Status Form is essential and many employees would forget to advise of changes if they were not required annually to go back over each question. While submission of the form on an annual basis appears justified, we see no reason why the field could not be authorized to destroy the prior copy of the form each time a new one is submitted. This is now done at the Bureau and we recommend it be authorized for the field. If approved, Administrative Division should prepare instructions for the field.

Memorandum to Mr. McGuire
Re: JAPANESE BALLOON LANDINGS - GENERAL

APPROPRIATE: FWS:hcf 11/30/59

Bulky exhibit consists of six folders of photographs of Japanese balloons and bombs found in the U.S. from 1944 to 1945. Some of the photographs were furnished by Army and Navy. Others were taken by Bureau agents. Copies of the folders were distributed to [redacted] In 1955 bulky exhibit was reviewed and at that time contained two sets of above-described folders. Recommended and approved one set of folders be destroyed. (Belmont to Boardman memo 7/6/55; 65-54413-1581) Bulky exhibits not indexed and contains no information of present or future investigative value. b7D

RECOMMENDATIONS:

1. From standpoint of investigative value it is recommended this exhibit be destroyed. However it is believed the views of the Crime Records Division should be obtained (prior to destruction) as to whether exhibit should be retained as item of future news; historical or research value.

2. Route to Crime Records Division.

SUBJECT: SUGGESTION: #147-60
Submitted by SA [redacted] b6 b7C
Seattle Field Office
X Destruction of

SUGGESTION: Destroy files in 15, 26, 45, 52, 70, 103 and 149 (False Report) classifications when all of the following conditions exist:

1. UNSUB cases where no suspects are developed.
2. Loss of property involved is less than $5,000.
3. Statute of Limitations has run (5 years).

PRESENT PROCEDURE: Files and records in field division may be destroyed after they become 20 years old (Part II, Section 3, Page 13, Manual of R & R).

ADVANTAGES STATED: Provides more space for records. Approximately 120 drawers are now utilized by the Seattle Division for storing closed cases in the above classifications. It is estimated that at at least 8 drawers would be available immediately if files were destroyed under these rules, and at least 4 drawers per year would be available each year thereafter.

OBSERVATION: The views of the New York, Cleveland, Detroit, Kansas City, San Francisco, and Miami field divisions were solicited in this regard and reflect that Detroit, Cleveland, and Kansas City have surveyed their files in this category and recommend the suggestions not be adopted because the cost would exceed the savings attained. The New York, Miami, and San Francisco offices concur in the opinion that the cost of employee time would be great in comparison to the good accomplished, but feel that the program would be beneficial if allowed to be implemental as personnel becomes available. The San Francisco office recommends adoption of the suggestion in spite of cost involved because of space need.

The Training and Inspection Division recommends that this suggestion not be adopted. The surveys conducted reflect that the files falling within the prescribed group consists for the most part of two to four serials and the excessive clerical time necessary to cull their files in order to insure that

Reference is made to SAC Letter 59-43, (C), wherein we requested suggestions to strengthen the Bureau's Records Management Program.

By letter dated 9-17-59, the SAC, New York, indicated that there are numerous cards in their indices which relate to file numbers of a system used prior to the present classification system and for the most part, these cards are not supported by files. The SAC proposes that cards of this type be destroyed as they are encountered.

RECORDS BRANCH OBSERVATIONS:

The suggestion has merit and should be adopted. From a records management standpoint, indices should be continually purged of obsolete material. No purpose is served in keeping an index card which is not supported by the original file material. There is attached hereto a proposed letter to the SAC, New York, authorizing the destruction of index cards of the type described in this suggestion.

RECOMMENDATION:

That the attached letter be forwarded to the SAC, New York, authorizing the destruction of suggested material.

ALL INFORMATION CONTAINED HEREIN IS UNCLASSIFIED DATE 8-10-82 BY SP4ELW/RE

Re SAC Letter 59-43, C, which requested suggestions and observations for strengthening the Records Management Program.

The SAC, Los Angeles, suggested the destruction of file material contained in 62-0 after it becomes five years old. Further, the SAC proposed that index cards be prepared summarizing the correspondence so destroyed and indicating the disposition of such material. These cards would then be filed in the field office index. According to the SAC, the 62-0 file presently occupies 36' 10" of cabinet space in the Los Angeles office.

RECORDS BRANCH OBSERVATIONS:

Current Bureau regulations permit the destruction of field office file material after it becomes 20 years old. The material placed in file 62-0 is normally nonspecific in nature and, of course, cannot be properly placed in any other file classification. In connection with the SAC's suggestion, the Records Branch does not believe it practical to create a record by typing an index card summarizing pertinent information and on the other hand destroying a piece of correspondence.

Several suggestions have been received concerning a reduction in the retention period of field office file material. These are being handled by separate memorandum. If adopted, the file material referred to by the SAC Los Angeles will be included and space saved through outright reduction.

RECOMMENDATION:

No further action.

Re: SUGGESTION #124-60

Reference is made to SAC Letter 59-43 (C) wherein we requested suggestions to strengthen the Bureau's Records Management Program.

In connection with this program, the SAC, Baltimore, submitted a suggestion made by supervisor James C. Dunlap, who pointed out that the Baltimore Office received from the Second Army Headquarters, Fort Meade, Maryland, a list of absentees who have returned to military control. Dunlap stated that until 1952 upon receipt of such a list, a teletype was sent to the Bureau concerning each absentee with the contents of the teletype as follows: [redacted] FUDE. Provost Marshal, Headquarters, Second Army, Fort Meade, Maryland, advised subject returned to military control 8-29-51, Fort Knox, Kentucky. Indices negative. Information only." Dunlap pointed out the teletype was indexed and filed in 42-0 (Deserter-General) and he presumed the other offices that cover Army Headquarters might follow the same procedure as the Baltimore Office. Dunlap suggests that such serials and index cards be removed and destroyed since they are of no value.

b6
b7C

OBSERVATIONS:

This suggestion has merit from a records management standpoint inasmuch as it would involve the destruction of material of no value to the Baltimore Office and possibly to other field offices, thus saving space and gaining the use of file equipment.

The Investigative Division has advised that the serials mentioned by Baltimore are of no value from investigative standpoint and are duplicated in Bureau files. The Investigative Division recommends that the suggestion be adopted.

SUBJECT: TEST SPECIMEN FILE

DESTRUCTION OF BUREAU PROPERTY GENERAL

The Test Specimen File consists of bullets and cartridge cases from all weapons fired in the Laboratory and test specimens received from contributors. In addition an index card filed by file number and an index card filed by caliber is maintained for each weapon represented by test specimens in this file. The file has been in existence since 1932. It fills two filing cabinets and in the near future will require additional cabinets unless the size of the file is restricted.

It is believed that the tests in this file which are over fifteen years serve no useful purpose and will be of little or no further value for reference purposes. For this reason and to conserve space it is believed that these older specimens should be destroyed.

RECOMMENDATION:

(1) That test specimens in Test Specimen File which are fifteen years old and older be destroyed. | Started 12/3/59 R

(2) That fifteen-year-old specimens be destroyed on an annual basis in the future during the month of January. | Tickler Set for Jan. 1960 Started 12/3/59 R

(3) That the index cards representing the tests destroyed also be removed from the file and destroyed. | Started 12/3/59 R

TO : SAC, Honolulu

FROM : Director, FBI

SUBJECT: RECORDS MANAGEMENT PROGRAM (CG-2000)

ALL INFORMATION CONTAINED HEREIN IS UNCLASSIFIED DATE 8-10-82 BY SP4ELW/rte

DESTRUCTION OF BUREAU PROPERTY

Reference is made to SAC Letter 59-49, (G), wherein we requested suggestions to strengthen the Bureau's Records Management Program.

In connection with the above program, the SAC, Honolulu, has submitted three suggestions relating to the destruction of material maintained in field office files. These suggestions are as follows: (1) The SAC suggests that complaint form (FD-71) be destroyed when a communication is sent to the Bureau, another field office, the U. S. Attorney, or any other outside agency, incorporating data in the complaint form. The SAC indicated that destruction should not take place until the case is closed. (2) The SAC suggests that when results of investigations by an auxiliary office are transmitted to the office of origin by letter, the office of origin be permitted to destroy the letter after the contents are incorporated into a report. (3) The SAC suggests that informative letters, airtels, or other communications sent to the Bureau or other offices be destroyed when a case is closed, providing the contents are set out elsewhere in the file, report, memorandum or other communication.

66-3286-1
NOT RECORDED
126 NOV 10 1959

RECORDS BRANCH OBSERVATIONS:

Records Branch recommends that the above three suggestions not be adopted. Prior to the destruction of the material cited above, it would be necessary to compare this material against the report or other communication prepared in order to insure that the information contained therein is identical. This would be an unwieldy administrative operation and the time taken to conduct the comparison would more than offset any advantage which would be derived by the destruction of the material. It is pointed out that many times the information maintained in a complaint form, transmittal letter, airtel, or other communication is not completely set out in a subsequent report or communication thus necessitating a close comparison prior to destruction.

RECOMMENDATION:

That these suggestions not be adopted.

SUBJECT: [redacted] b7D
INTERNAL SECURITY - ARGENTINA

Destruction of Bureau Property

The Records Section has made available bulky exhibits received from subject in 1943 for review and for a determination as to whether they should be retained or destroyed. Subject, an Argentine citizen, was [redacted] until June, 1943, and served as [redacted] committee charged with the duty of [redacted] on the part of the Axis powers. In mid 1943 the committee was in considerable disfavor with the existing government in Argentina as the committee's reports had been considerably pro-Allied. [redacted] was a confidential informant of the Bureau's representatives in Argentina, although he did not know their true identity. [redacted] expecting possible arrest, left Argentina and arrived in U. S. on [redacted] He was brought to the U. S. by the [redacted] for the purpose of social research.

Prior to subject's departure from Argentina, he presented certain documents to [redacted] in Buenos Aires, with the request that the American Embassy send the documents to the U. S. by a safe means. This was apparently done as [redacted] feared he would have difficulty in carrying the documents out of Argentina. The Legat was of the opinion that [redacted] intended to use the information in the documents as material for a book or magazine articles which he probably planned to have published in the U. S. [redacted] request for the [redacted] was refused and the documents were reproduced on microfilm and the film was forwarded to the Bureau by the Legal Attache on 10/23/43. The Legat stated the Embassy had suggested that prints be made and copies furnished to the Department of State and to the Office of Naval Intelligence (ONI) and to Assistant Chief of Staff for Intelligence (ACSI). On 11/11/43 copies of the [redacted] documents were made available to the Department of State, ONI and ACSI.

66-3286-
NOT RECORDED
170 NOV 9 1959

The documents apparently pertained to investigations conducted by the Argentine congressional committee. The documents are comprised of Photostats of the original document in Spanish and several copies of the translation of each document and they pertain to pro-Axis groups and activities in Argentina. Since there is a possibility at some later date Mr. [redacted] might desire a return of this material, it is felt same should not be destroyed. Since there are several copies of each

Re SAC Letter 59-43, C, which requested suggestions and observations for strengthening the Records Management Program.

The SAC Los Angeles by letter 8-21-59, proposed that certain files created during World War II now be disposed of. He listed the following material in this category: Army and Navy Flimsies, Coast Guard Identification Reports of Suspected Selective Service Delinquents, Applications for Return of Contraband, Japanese Permission to Travel During War, List of Japanese Repatriated to Japan, Alien Enemy Disposition of Property and Immigration Clearance letters. The SAC indicated that this material is of no significance at the present time in the Los Angeles office.

RECORDS BRANCH OBSERVATIONS:

The above suggestion has merit from a records management standpoint because it would result in the destruction of material of no current value. Material similar in nature to some of the items set out by the SAC has been destroyed at the Seat of Government. For example, the travel control files established during World War II have been destroyed.

RECOMMENDATION:

For referral to the Training and Inspection Division.

SUBJECT: FREDERICK EMERSON PETERS
ITSP
87-6840

DESTRUCTION OF BUREAU RECORDS - GENL

This case consists of 706 serials and 16 file sections. Peters was a check passer with a criminal record of over fifty years. During his check passing career, Peters used hundreds of aliases.

On 7-27-59, Peters died of a cerebral hemorrhage at New Haven, Connecticut. Since Peters is dead there is no logical reason from Records Branch standpoint to retain index cards on all aliases. Many of the names used by Peters are of the common variety such as Taylor, Moore, Grant, etc. Accordingly, this file presents a continuing problem for employees engaged in work on the Name Check Program and deindexing of aliases will save unnecessary work. The case involving Peters is properly indexed under his true name and such cards will remain in the index.

ORIGINAL FILED IN 87-6840

RECOMMENDATION:

That all index cards representing aliases used by Peters be removed from the index and destroyed.

DESTRUCTION OF CLOSED FIELD FILES

Bureau Property

In the interests of improved records management and in order to save more space and equipment at an earlier date, the Bureau is again considering a reduction in the period of time closed files are retained before they are destroyed in our divisional offices. You will recall the last time this occurred was in May of this year when the period of retention was reduced from 25 to 20 years, apparently without difficulty. For your additional information, if all files over 10 years old were destroyed now, the field could dispose of an estimated 3,500,000 files; if all over 15 years old were destroyed, 1,500,000 files could be disposed of. These files now occupy approximately 7,000 five-drawer file cabinets.

Before a decision is made, all offices receiving a copy of this letter should carefully survey from now until 12-15-59 the use of files between 10 and 15 years old and between 15 and 20 years old. Within these two age brackets, you are instructed to tabulate the total number of file checks according to those made for (1) outside agencies and (2) those made for our own purposes in Bureau investigations. It is theorized that if the period of retention is in fact reduced, outside agencies can be advised of the limited nature of the field indices name checks and be referred to the Seat of Government for a more complete check. Accordingly, it is believed desirable to separately total this type of indices search during the survey period. In connection with name checks and file reviews of the balance of these files for Bureau investigations, you are to objectively evaluate their immediate importance to field operations in relation to the continued availability of this information in files that will be retained at the Seat of Government.

In setting forth the number of times these files are referred to in the two age categories, you are requested to parenthetically estimate the total number of files in each group. This is necessary in order for the Bureau to develop a ratio between the actual number of files and the number of times they are checked.

Re: Destruction of Closed Field Files
66-3286

Your observations and a specific recommendation as to whether the period of retention of field files can be reduced to (1) 10 years, (2) 15 years, or (3) remain as is (20 years) should be forwarded to the Bureau marked for the attention of the Records Branch not later than December 21, 1959.

Note: On 11-16-59 the Executives Conference, attended by Messrs. Tolson, Mohr, Trotter, Parsons, Clayton, Tamm, Belmont, and Waikart for McGuire, unanimously approved the recommendation of the Files and Communications Division that a survey of 10 field offices be conducted preparatory to reconsidering the present retention period of closed field office files for 20 years.

See memorandum L. E. Short to Mr. McGuire, 11-10-59, JWM:llb, re: RECORDS MANAGEMENT

RECORDS MANAGEMENT

ALL INFORMATION CONTAINED
HEREIN IS UNCLASSIFIED
DATE 8/10/82 BY SP4 ELW/ATC

Under the Bureau's current Records Management Program several suggestions have been received from the field regarding the possible destruction of zero (General) and double zero (Policy) files throughout the field. Suggestions ranged from destruction of both files after 5 or 10 years following careful screening, to permanently maintaining them. Comments and observations were obtained from appropriate divisions relative to this matter, which are set forth as follows:

ZERO FILES. Records Branch recommends destruction of this material in the field after a reasonable time. Investigative Division feels this material can be destroyed after a period of 10 years. Both feel this material would be of little value to the field after an extended period of time. The Domestic Intelligence Division feels that material in security classifications is of considerable value and should be retained indefinitely.

The Training and Inspection Division agrees with the Domestic Intelligence Division that zero files in security classifications should be retained indefinitely as this material is of considerable value. While screening and destruction of material in criminal and applicant-type matters, which information is generally negative or inconsequential might be desirable, considerable confusion is foreseen unless specific guidelines applicable to the entire field are formulated. Without them, there would be as many opinions as there are reviewers. Unless such guidelines can be established no change in the present rules for retaining zero file material in these classifications is recommended.

1 - Files and Communications Division, (Records Branch)
1 - 66-3286 (Destruction of Records)

PCY:dlh
(4)

66-3286
NOT RECORDED
126 NOV 23 1959

53 NOV 24 1959

DOUBLE ZERO FILES. Records Branch and Domestic Intelligence Division recommend permanent retention. Investigative Division recommends careful screening and destruction of less valuable material after 10 years. Training and Inspection Division feels that double zero files which are the policy files in the various classifications, are of definite value to the field and should be permanently retained. These files generally represent no real problem for space and in addition are periodically reviewed in the field for the purpose of removing surplus or unnecessary material. A detailed review of these files after an extended period of time would not be necessary or practicable.

RECOMMENDATIONS:

1. That there be no change in the existing rules for the permanent retention of zero and double zero files.

2. That this memorandum be referred to the Records Branch of the Files and Communications Division for information.

Destruction of Bureau Property - General

Re memorandum from Short to Mc Guire dated 4-27-59 recommending that Bulky Exhibit 61-7560-297 be reviewed and decision rendered as to retention or disposition of the material. Bulky exhibit consists of ninety-six enclosures which is conglomeration of copies and Photostats of news articles, magazines, pamphlets, and programs relating to the activities of the German-American Bund in the United States, particularly of an anti-Semitic nature, furnished via New York letter 12-10-37, which itemizes bulky exhibit. These items are indexed on the aforementioned New York letter; however, there is no indexing on the bulky exhibit itself. There is no indication of what use, if any, was made of these items; no foreseeable use if retained; no obligation to return to anyone; and no reasonable possibility that destruction will eliminate from our files data to which we might have to refer in the future.

ALL INFORMATION CONTAINED HEREIN IS UNCLASSIFIED DATE 8-10-82 BY SP4 ELW/rtc

O Destruction of Bureau Property - approved

In 1943 subject was a German employee at the Spanish Embassy in Ecuador. On 11-23-43 he was arrested by representatives of the Ecuadoran Government on charges of engaging in espionage for the German Government and was turned over to U.S. authorities in Ecuador for deportation. When arrested he had numerous documents in his possession and our representative in Ecuador was allowed to make photographs of these documents. A single photographic copy of each document in subject's possession was sent to the FBI Laboratory for processing. These documents consisted of numerous photographs of airplanes of German origin; aerial photographs of unidentified cities; photographs of individuals who appear to be Germans; a photograph of a map; and photographs of 40 handwritten pages pertaining to the ancestry of Wendell Willkie. The FBI Laboratory found no codes, ciphers or concealed messages in this material. A copy of these photographs was maintained in the FBI Laboratory. Serials 36 of instant file dated 10-10-46 from Mr. Long to Mr. Harbo attached the Laboratory file containing these photographs and pointed out the file should be maintained as an enclosure in the instant file.

The contents of Serial 36 appear to be identical with the material described in Serial 31 of the instant file. This serial is a Laboratory report indicating a negative examination of the material and pointing out that 2 copies of these photographs were enclosed for the National Defense Division for review. The enclosures to Serial 31 were destroyed as a result of an approved recommendation of 12-13-45 since it appeared the material was of no value to the Bureau. The instant enclosure which is the Bulky Exhibit to Serial 36 is a copy of that previously destroyed and at this time appears to be of no value for the Bureau. There is no obligation to return these photographs to anyone; the photographs are not indexed; and their destruction would not eliminate from our files any data which we might have to refer in the future. Bureau's file does not indicate what happened to the subject after his internment at Camp Kennedy, Texas, in 1943.

Memorandum to Mr. Belmont
Re: MAX RUEFF (MUELLER)

RECOMMENDATION:

With respect to the request contained in memorandum Eames to McGuire 6-4-59 that the Bulky Exhibit to Serial 36 of instant file be reviewed for retention or disposition, it is recommended that this Bulky Exhibit be destroyed. Since the FBI Laboratory recommended retention in 1946 it is recommended its concurrence be obtained prior to destruction.

ALL INFORMATION CONTAINED
HEREIN IS UNCLASSIFIED
DATE 8-10-82 BY SP4 ELW/pls

Reference is made to SAC Letter 59-43 (C) wherein we requested suggestions to strengthen the Bureau's Records Management Program.

In connection with this program, the SAC, Phoenix, pointed out that file fronts, when they accumulate, take quite a bit of space. The present rule is to destroy them only after the file is twenty years old at which time the file number and date destroyed are placed on a list in front of the classification showing which files have been destroyed. The SAC feels that this rule could be extended to apply to all files that are destroyed or consolidated since a quick referral to the list would serve the same purpose as finding a file cover standing alone in the file.

The Manual of Rules and Regulations, Part II, Section 3, page 13, requires that when files are destroyed, the file front should be retained and written on it should be the reason for destruction unless the file has become twenty years old and is being destroyed. If this is the case, a list of files destroyed is placed at the beginning of the classification.

RECORDS BRANCH OBSERVATIONS:

The above suggestion is not recommended for adoption. When files are destroyed after twenty years, destruction consists of large groups of files in numerical sequence and a list in the front of the classification showing which files have been destroyed is practical. When files are destroyed or consolidated on an individual basis, it is our feeling that a list at the beginning of the classification is not practical and would require a longer time to review to determine if the file has been destroyed or consolidated, particularly as the size of the list increases. Furthermore, maintaining such a list for individual files destroyed at the beginning of each classification would necessitate a check in two places to determine if an individual file has been destroyed, (1) in file sequence where file is normally filed, and (2) at the beginning of the classification.

RECORDS MANAGEMENT
(66-18966)

CLASSIFIED
DATE 8-10-82 BY SP4 ELW/rtc

Reference is made to SAC Letter 59-43 (C) wherein we requested suggestions to strengthen the Bureau's Records Management Program.

In connection with this program, the SAC, Cincinnati, has suggested that the field be permitted to destroy files after ten years in the interest of alleviating space and maintenance problems throughout the field. The SAC points out that if the Bureau doubts the wisdom of destroying files after ten years, that consideration be given to immediate destruction of files fifteen years old and after a few months, during which period experience will show no problem has been encountered, the Bureau may revise the retention period to ten years.

The Manual of Rules and Regulations, Part II, Section 3, page 13, item 8, permits field offices to destroy files after they become twenty years of age.

PREVIOUS BACKGROUND:

Based on a memorandum from Mr. Tamm to Mr. Tolson, dated 4-22-59, (66-3286-825) the Executives Conference unanimously recommended a reduction in the retention period of files throughout the field from twenty-five years to twenty years. This was done in the interest of alleviating space problems in the field and reducing requests for file equipment.

FILES AND COMMUNICATIONS DIVISION OBSERVATIONS:

The Files and Communications Division feels that the suggestion to destroy files prior to the present twenty year retention period has considerable merit from a records management standpoint and is the real solution to space and maintenance problems in the field. The recent reduction in the retention period from twenty-five years to twenty years was a step in the right direction from a records management standpoint but as

JWM:llb

Bureau Record | 66-3286-
NOT RECORDED
176 NOV 25 1959

62 DEC 1 1959
168

ORIGINAL FILED IN 66-3286-

reflected by the following figures showing the number of cases closed during the fiscal years 1940 - 1949, it will be 1962 before the field really reaps any benefit from a space standpoint:

Fiscal Year	Case Closed
1940	79444
1941	157699
1942	385722
1943	525833
1944	489303
1945	432771
1946	284758
1947	317383
1948	528464
1949	466770

Based on the above figures, if the retention period is reduced now to fifteen years the field would be able to destroy over one and one-half million files. If the retention period is reduced to ten years, the field would be able to destroy over three and one-half million files. As shown by these figures, a further reduction in the retention period of field files now would result in a tremendous savings in space and equipment, and it is our feeling that this advantage would outweigh any possible problems that may be caused by the shorter retention period of files. Archival authority has previously been secured to destroy all field files, and a twenty year retention period is a requirement imposed by the Bureau.

The Files and Communications Division proposes that this suggestion be presented to the Executives Conference to determine if the Bureau will consider a further reduction to fifteen or ten years in the retention period of field files at the present time. If the Bureau approves further consideration, a survey should be conducted of a representative number of field offices regarding the advantages of this suggestion and the potential problems, if any, which might be created prior to the final consideration of this suggestion.

RECOMMENDATIONS:

1. That the Files and Communications Division present this suggestion to lower retention period of field files to fifteen or ten years to the Executives Conference to determine if the Bureau at the present time will approve further consideration.

2. If the Bureau approves further consideration, a survey should be conducted of a representative number of field offices regarding the advantages of this suggestion and the potential problems, if any, which might be created, prior to final consideration of the suggestion.

SUBJECT: PROPOSED CHANGES IN MANUAL OF RULES AND REGULATIONS

ALL INFORMATION CONTAINED HEREIN IS UNCLASSIFIED DATE 8-10-82 BY SP4ELW

It is believed desirable to incorporate into the Manual of Rules and Regulations the attached instructions pertaining to the Current Intelligence Analysis (Cinal).

The proposed instructions are not new, except for provision relating to destroying copies of Cinal letter after three years, having been previously issued to the field in various SAC letters. The proposed instructions involve no policy changes.

RECOMMENDATION:

That the proposed additions to the Manual of Rules and Regulations concerning the Cinal letter be approved and forwarded to the Training and Inspection Division for appropriate action.

PROPOSED CHANGES IN MANUAL OF RULES AND REGULATIONS

The following additions (all new) should be made to Part II, Section 8:

N. CINAL (CURRENT INTELLIGENCE ANALYSIS) LETTER

1. The purpose of the Cinal letter is to disseminate each week to high-level officials of the Executive Branch of the Government and to other agencies having responsibilities in the internal security field a concise, up-to-date picture of developments in the intelligence field.

2. Material to be submitted for use in the Cinal letter includes information pertaining to:

   a. The Communist Party, USA
   b. Communist front groups
   c. Marxist splinter groups
   d. So-called "hate" groups
   e. Timely issues of international interest

ALL INFORMATION CONTAINED HEREIN IS UNCLASSIFIED DATE 8-10-82 BY SP4 ELW/ste

3. Information being forwarded for inclusion in the Cinal letter should be submitted:

   a. By airtel
   b. Under the substantive case caption, bearing the subcaption "CINAL."

      (1) Except for items of an intelligence nature regarding current topics of international interest (see 2, e, above), which should be submitted under the substantive caption without the subcaption "CINAL."

q. Philadelphia
r. Pittsburgh
s. Portland
t. St. Louis
u. San Diego
v. San Francisco
w. Seattle
x. Washington Field

5. Each office receives at least one copy of the Cinal letter, which is to be retained in the office files and which may be destroyed after three years if of no value. Those offices receiving multiple copies are to destroy the extra copies within one week of receipt, except the New York Office, which may retain two copies.

6. Dissemination

a. Each Legal Attache should insure that the dissemination of Cinal information is handled under the prevailing rules for dissemination of classified information to foreign agencies, and that adequate protection is afforded Cinal information in accordance with the classification set forth on each Cinal.

b. Page 1 of the Cinal letter now bears the statement: "This document is loaned to you by the FBI, and neither it nor its contents are to be distributed outside the agency to which loaned."

c. Before the Legal Attaches' copies of the Cinal letter are sent from the Bureau, the material contained therein is reviewed, and the items which may be discussed with foreign sources by the Legal Attaches are marked with asterisks. The items which do not have an asterisk are not to be discussed with foreign sources.

d. Selected items from the Cinal letters may be discussed by the Legal Attaches with the U. S. Embassy and intelligence representatives where they are assigned, but the letter itself is not to be disseminated to these persons.

e. The Legal Attache, [redacted], is permitted to disseminate one copy of each Cinal letter to [redacted] b7D

The following addition should be made to Part II, Section 3, D, 8, e page 14

(35) Current Intelligence Analysis (CINAL) letter

L. E. SHORT

RECORDS MANAGEMENT
Bufile 66-18966

ALL INFORMATION CONTAINED
HEREIN IS UNCLASSIFIED
DATE 8-10-82 BY SP4 ELW/rte

Reference is made to SAC Letter 59-43, Paragraph C, wherein we requested suggestions and observations to strengthen the Bureau's Records Management Program.

By memorandum from Tamm to Tolson dated July 15, 1959, the Training and Inspection Division suggested that (1) files concerning investigations of a "nonrecidivist nature" such as Federal Tort Claims Act, Jury Panel Investigations, Miscellaneous Civil Suits and War Risk Insurance could be destroyed entirely within two years after the claim is settled by court decision or otherwise on the basis that the subject of the investigation is very unlikely to be involved in a subsequent case of this nature, and even if he was, there is little value in the earlier file. It was also suggested that (2) in connection with those subjects who are approaching an age where people no longer commit Federal crimes, that consideration be given to placing on the front file cover of each criminal file at the time the file is closed the year of closing and the subject's age in that year. There could then be a predetermined age for destroying criminal files, so that when any subject reaches that age, the entire file could be thrown away unless it has shown some activity during the previous five years. Referenced memorandum indicated that this predetermined age might be different for different types of crime, based on a study to determine "an experience factor." For example, confidence men remain active in their "profession" much longer than bank robbers.

RECORDS BRANCH OBSERVATIONS:

Because of the Bureau's Name Check Program which in many instances requires dissemination of criminal as well as security type information or any derogatory information concerning the subject of the name check or in many cases relatives of the subject, we have never considered the "outright" destruction of any files wherein the Bureau has conducted an investigation. In those cases where we have destroyed the original investigative file, the contents of the file are placed on microfilm prior to destruction of the original material.

1 66-3286 -
NOT RECORDED
128 NOV 17 1959

62 NOV 19 1959

Bureau Record Destruction

Up to this time, we have not placed on schedule for destruction any of our investigative files. Investigations of a "nonrecidivist nature" as referred to above could conceivably be placed on schedule and considered for destruction after a specified period of time has elapsed from the time the investigation is closed. In line with this suggestion and in the interest of strengthening our records management, the Records Branch proposes that consideration be given to the destruction of those files falling into this category which contain no derogatory information, after an established period of time has elapsed. Upon the conclusion of the investigation, the substantive supervisor could make a determination whether the file contained information which should be permanently retained or could be subsequently destroyed and so advise the Records Branch. We could then set these files up on schedule to be destroyed after the establish period of time has elapsed. Of course, archival authority would have to be secured prior to the destruction of this type of material.

In regard to the destruction of criminal files (suggestion #2), all criminal files are microfilmed after ten years and the original files are destroyed. This results in a considerable savings in space and at the same time permits us to retain a permanent record of the complete investigation which is available for review and dissemination.

Records Branch feels that suggestion number one has some merit and proposes that consideration be given to the destruction of those files containing no derogatory information (to be determined by substantive supervisor when case closed) after established period of time has elapsed.

Inasmuch as these suggestions relate to destruction of Bureau files and indirectly to availability of information for dissemination, it is recommended that this memorandum be referred to the Investigative Division and the Domestic Intelligence Division for their comments prior to the final consideration of the proposed suggestions.

RECOMMENDATION:

1. That the comments of the Investigative Division and Domestic Intelligence Division be secured prior to the final consideration of these suggestions.

2. That this memorandum be referred to the Training and Inspection Division for review.

Memorandum to Mr. McGuire
RE: RECORDS MANAGEMENT
Bufile 66-18966

ADDENDUM: September 9, 1959

Comments of the Domestic Intelligence Division:

Relative to suggestion number 1, this Division opposes the outright destruction of any Bureau investigative file even though the file may be of a "nonrecidivist nature" and contain only non-derogatory data. These files may contain background information or other information of value which would be pertinent in handling a request concerning an individual received from the Director, the White House, the Attorney General, etc., or they may contain information of value concerning individuals involved in a current investigation. In other instances, information in these files might be used to establish an identification or to eliminate other references. Rather than the outright destruction of files, this Division recommends that the practice of microfilming certain categories of the files after a specified lapse of time be continued.

Relative to suggestion number 2, this Division concurs with the comments of the Records Branch that criminal files should continue to be microfilmed after ten years and the original files destroyed.

DRR:fjb

DECLASSIFICATION AUTHORITY DERIVED FROM:
FBI AUTOMATIC DECLASSIFICATION GUIDE
DATE 03-10-2011

Memorandum to Mr. McGuire
RE: RECORDS MANAGEMENT
Bufile 66-18966

ADDENDUM: September 24, 1959

Comments of the Investigative Division

1. Suggestion that files of nonrecidivist nature be destroyed entirely within two years after final settlement by court decision or otherwise has some merit. Nonrecidivist matters handled by this division fall principally in following: False Claims (Civil), Renegotiation Act (Civil), Lands Division Matters, Miscellaneous - Civil Suit, War Risks Insurance, National Service Life Insurance, Court of Claims, Ascertaining Financial Ability, Alien Property Custodian Matters, Federal Tort Claim Act and Admiralty Matters.

Under existing policy field office files are destroyed after they become 20 years old. If Bureau files are destroyed in accordance with the suggestion, copies of reports would be available in field offices and possibly in Department files; however, such files would not be immediately available for review. Copies of such items as Bureau memoranda and certain Bureau correspondence might not be available at all.

At times the Department or a U. S. Attorney will request "Ascertaining Financial Ability" investigations some years after final settlement in False Claims (Civil), Miscellaneou Civil Suit, Federal Tort Claim Act cases, Admiralty Matters, etc. While the Bureau's investigative file would ordinarily have information pertinent to such investigations, the Bureau could obtain copies of field office files and could possibly obtain copies of reports from the Department, but this would be a time consuming and probably a costly process.

2. This division concurs with comments of the Domestic Intelligence Division and the Records Branch that criminal files continue to be microfilmed after 10 years and the original files destroyed.

SUBJECT: UKRAINIAN TERRORISTS
INTERNAL SECURITY (UKRAINIAN)

O Destruction of Bureau Property - general

On 2-28-42 [redacted] furnished the Bureau a list of reported Ukrainian terrorists. After each name are descriptive data including background information and his reported subversive activities. On 2-15-42 Henry Field of the Office of Coordinator of Information and Henry W. Rodney, Special Agent, United States Secret Service, furnished a list of names and addresses of individuals whom they believed to be Ukrainian terrorists and suspects. Memorandum 5-23-42 from Flinn to Mumford pointed out that the information furnished by Field and Rodney was carefully reviewed and in each instance where the individual was in the U.S. investigation was conducted. Flinn is his memorandum also pointed out that the names furnished by Field and Rodney were identical with those furnished by [redacted] on 2-28-42. Flinn's memorandum which is Serial 108 of instant file pointed out that the information received from [redacted] and the information furnished by Field and Rodney "are kept together so that the File Section, following its examination, can determine which is the easier to index." Actually the information furnished by Field and Rodney is in instant file as Serial 102X. The enclosure to Serial 108 which we were requested to review and render decision as to retention or disposition consists of a number of index cards on which appear exactly the same data as in the aforementioned [redacted] memorandum. There appears to be no reason why the cards which do not appear to be indexed in our general indices should be retained since actually they are duplications of information already indexed. Their destruction would not take from our files any data which we might have to refer in the future.

November 23, 1959

To: Director, FBI	From: (Suggester's name)	Division of Assignment: Four

SUGGESTION

X PURGING OF

That all "67" Field Office files be reviewed for the purpose of purging certain types of mail over 5 years old. For example: requests for application blanks, lists of home addresses and telephone numbers, office of preference lists, or anything of no permanent value. (See samples flagged in attached file.)

ALL INFORMATION CONTAINED HEREIN IS UNCLASSIFIED DATE 8-10-82 BY SP4 ELW/rte

Current practice or rule (Include manual citation as well as facts)

No material is ever purged from these files. It should be noted that administrative memoranda contained in "67" Field Office Inspection files is purged after 5 years.

Advantages of suggestion and annual savings (include basis for estimate)

1. Save space in file cabinets.

2. Destruction of Bureau property

REC-19 66-3286-849

REPORT WRITING -
FD-302s and OF-10s
DESTRUCTION OF COPIES
(BUREAU RECORDS)

Page 11c, Section 3, Part II, Manual of Rules and Regulations, in part is as follows:

"(2) Copies of inserts, FD-302s, and OF-10s used in connection with report writing and in excess of the required number needed for copies of reports as specified in Part II, Section 9, of this manual may be destroyed when they have served the purpose for which prepared."

In view of the fact that numerous reports are typed daily which include inserts, FD-302's and OF-10s prepared by the submitting office and by various auxiliary offices and inasmuch as a number of these reports include as many as 30 different FD-302s and OF-10s and inserts, and in some instances more than 100 of such items, the following procedure is being followed whenever reports are written and it is necessary to destroy extra copies of inserts, FD-302s and OF-10s:

The notation, "Extra copies of pages 1 through 20 of this report have been destroyed", followed by the date of destruction and initials of employee, will appear on the FD-263 of one of the file copies of the report containing the FD-302s, etc. In connection with the above, consideration has been given to the fact that the Manual of Rules and Regulations now permits the transmittal of FD-302s and OF-10s from office to office by routing slip.

Whenever a case is closed without the submission of an investigative report, the originals of the FD-302s and OF-10s will be serialized in the Memphis file. In addition, one carbon copy of each of the FD-302s and OF-10s also will be serialized in the Memphis file. One carbon copy of investigative inserts

L. E. SHORT

RECORDS MANAGEMENT
(SC-189066)

DATE 8-10-82 SP4ELW/pte

Reference is made to SAC Letter 59-43 (C) wherein we requested suggestions to strengthen the Bureau's Records Management Program.

By memorandum to you dated 10-21-59, I set forth a suggestion from the SAC, Los Angeles, proposing that certain files created during World War II be disposed of. Several similar suggestions have been received concerning the destruction and consolidation of certain other files and material created during World War II. These suggestions are as follows: (1) By letter dated 8-24-59, the SAC, Denver, suggested that consideration be given to the destruction of certain files created during World War II which contain information of no current value. He pointed out as examples, files relating to "FBI Survey of Japanese Relocation Centers", files consisting of filmsics furnished by Army Intelligence (G-2) in the early 1940's, files relating to "German Funds" and other similar type files. The SAC also indicated that he feels the "Communist Party, U.S.A." reports prepared in the early 1940's, which were furnished to each office, could be destroyed inasmuch as the information pertinent to each division has usually been abstracted and placed in individual case files. The SAC feels that files mentioned above and similar type files could be destroyed by auxiliary offices inasmuch as information contained therein is of no current use. (2) By letter dated 10-2-59, the SAC, Knoxville, suggested that the field be authorized to destroy quarterly intelligence summaries issued during World War II. He pointed out that the Knoxville Office has four file drawers of these summaries dating from December, 1940, to August, 1945, and these summaries are of little or no use to the Knoxville Office. (3) By letter dated 10-7-59, the SAC, Salt Lake City, suggested that the field be given authority to consolidate the Alien Enemy Control files (German Bund files) in the interest of conserving space. (4) By letter dated 10-14-59, the SAC, Kansas City, suggested that the Bureau consider authorizing the destruction of routine German security-type matters which were created during World War II. The SAC feels that these files could be destroyed without loss of any important security type information.

ORIGINAL FILED IN

Memo L. E. Short to Maguire 10-27-59
Re: Records Management
(66-18966)

RECORDS BRANCH OBSERVATIONS:

These suggestions have merit from a records management standpoint inasmuch as their adoption would result in the destruction throughout the field of material of no current value. Material similar in nature to some of these items has been destroyed at the Seat of Government.

Several suggestions have already been submitted and are being considered concerning the destruction of files by field offices prior to the present twenty-year retention period. In the event the field is authorized to destroy files prior to the present twenty-year retention period, the above-suggested files would be covered and would be destroyed. In the event the Bureau does not lower the retention period from the present twenty-year requirement, Records Branch feels that consideration should be given to the destruction of files similar to the type listed above. Inasmuch as these suggestions relate to the destruction of files throughout the field, they should be referred to the Training and Inspection Division for further consideration.

RECOMMENDATION:

That these suggestions be referred to the Training and Inspection Division for further consideration.

ADDENDUM: JWM:llb 11-6-59

Suggestion presently being considered to reduce retention period of field office files from twenty to fifteen or ten years. If retention period reduced, these files would fall in the category of files which could be destroyed now. No further action recommended at this time regarding destruction of these files pending outcome of suggestion regarding reduction in retention period of all files in the field.

L. E. SHORT

RECORDS MANAGEMENT
(66-18966)

ALL INFORMATION CONTAINED
HEREIN IS UNCLASSIFIED
DATE 8-10-82 BY SP4ELW/pte

Reference is made to SAC Letter 59-43 (C) wherein we requested suggestions to strengthen the Bureau's Records Management Program.

Several suggestions have been received regarding the possible destruction of zero (General) and double zero (Policy) files throughout the field. These suggestions are as follows:

(1) By letter dated 9-17-59 the SAC, New York, suggested that in the interest of saving space, the field be given authority to destroy zero files in classifications not of security nature at the end of ten years. The SAC also feels that under a carefully supervised program, the zero files of some classifications could be destroyed after five years, and specifically mentioned the 67 (Bureau Applicant) classification.

(2) By letter dated 9-24-59 the SAC, Denver, suggests that zero files and double zero files ten years old or older in all classifications could be destroyed without loss of material information or instructions to field office. He states that if the Bureau does not feel that this should pertain to all classifications, that the zero files in the 25 (Selective Service) and 67 (Bureau Applicant) classifications could be destroyed when ten years old.

(3) By letter dated 9-29-59 the SAC, Portland, suggested that all double zero files in each classification be destroyed after five years. He points out that these files are presently being maintained on a permanent basis.

RECORDS BRANCH OBSERVATIONS

Consideration is already being given to the destruction of 25-0 and 67-0 files (per memos to you dated 9-8-59 and 9-11-59). As pointed out previously, the Records Branch feels that material maintained in zero files is of little value to the field and could be destroyed after a reasonable period of time. Inasmuch as the double zero files are the policy files concerning the various classifications, the Records Branch feels that this file should continue to

be permanently retained. Since these suggestions relate to the destruction of files throughout the field, they should be referred to the Investigative Division and the Domestic Intelligence Division for comments and to the Training and Inspection Division for final consideration.

RECOMMENDATION:

(1) That this memorandum be referred to the Investigative Division and the Domestic Intelligence Division for comments concerning the above suggestions.

(2) That memorandum be referred to the Training and Inspection Division for final consideration.

DOMESTIC INTELLIGENCE DIVISION ADDENDUM:

October 20, 1959

Domestic Intelligence Division agrees with Records Branch that double zero files should be permanently retained inasmuch as they set forth the policy concerning the particular classification. The zero files in security classifications do contain some material which is of questionable value, but they also contain a considerable volume of material which is of substantial value and which could not be destroyed without real loss. There is no time limit after which this information ceases to be of value. Any effort to remove a part of the information in the zero files would raise questions as to the materiality of each individual item considered and it is believed that the complexity of such an effort would present a task so difficult as to be almost insurmountable. We, therefore, recommend against the destruction of zero files in the security classifications.

JJH:baw

ADDENDUM October 22, 1959

RECORDS MANAGEMENT - SUGGESTION
TO DESTROY FIELD ZERO (GENERAL)
AND DOUBLE ZERO (POLICY) FILES

COMMENTS AND RECOMMENDATIONS OF INVESTIGATIVE DIVISION

With regard to the zero (general) files, it is realized that much of this material is negative or inconsequential and has no value for retention as permanent Bureau records. At the same time, quite often these files will contain substantial derogatory information concerning an individual. While this information did not result in a Bureau investigation, it would have value from an intelligence standpoint, either criminal or security, as the case may be. Much of this material would not be available in the Bureau central records here in Washington.

As to double zero (policy) files in the field, it would appear that a similar situation exists. Much of the material in these field office files has no current value; however, many policy changes result from field problems and no doubt details concerning the background and facts which relate to such policy matters would be found in the field policy files. It is felt that whereas much of the material in field zero and double zero files could be destroyed, it would not be wise to do so without screening the material involved.

It is recommended that consideration be given to authorizing the field to review zero and double zero files after the material becomes ten years old and to thereafter destroy that material determined through the review to have no value as permanent records.

JBE:sp
-3-

COMMENTS AND RECOMMENDATIONS OF TRAINING AND INSPECTION DIVISION:
PCY:mcc 11/16/59

ZERO FILES. Training and Inspection Division agrees with Domestic Intelligence Division that zero files in security classifications contain material of considerable value, which because of its very nature should be retained indefinitely. In criminal and applicant-type classifications where much of the material is negative or inconsequential; Investigative Division recommends careful screening and destruction of material having little value after 10 years.

While screening and destruction of material in criminal and applicant-type would be desirable from a records management point of view, considerable confusion is foreseen unless specific guidlines applicable to the entire field are formulated. Without them, there would be as many opinions as there are reviewers. Unless such guidlines can be established, this division recommends no change in the present rules for retaining zero file material in these classifications.

DOUBLE ZERO FILES. Domestic Intelligence Division recommends permanent retention. Investigative Division recommends careful screening and destruction of less valuable material after 10 years. This division feels that policy files after 10 years are of little current value to the field and should be destroyed. Any questions of prior policy if and when they arise could be resolved in the field by communicating with the Bureau where these files would be permanently retained.

RECOMMENDATION:

That this matter be referred for final determination to the Records Branch, which has primary responsibility for analyzing such matters.

MR. MC GUIRE 10-29-59

L. E. SHORT

RECORDS MANAGEMENT
(66-18966)

ALL INFORMATION CONTAINED
HEREIN IS UNCLASSIFIED
DATE 8-10-82 BY SP4 ELW/rte

In accordance with Mr. Tolson's request, there is set forth below additional data concerning a suggestion, presently being considered as a result of our Records Management Program, that all 25-0 (Selective Service Act - General) serials over ten years old be destroyed as well as the majority of 25 (Selective Service Act) cases where investigation disclosed delinquency was not willful and files are over ten years old. For purposes of clarity, data regarding the 25-0 files and the 25 files as a whole are separated below:

DATA REGARDING 25-0 FILES:

The 25-0 file maintained at the Seat of Government consists of 4,335 serials and occupies three file cabinet drawers. 3,611 of these serials occupying 2 and 3/4 file cabinet drawers are ten years old or older. Destruction of this material over ten years old at the Seat of Government would result in savings of space and equipment but of even more importance, would result in destruction of material of little reference value to Bureau thus eliminating the necessity to review this material when name checks are conducted.

Destruction of 25-0 material throughout the field would undoubtedly result in similar benefits to the field offices.

Records Branch recommends that 25-0 material ten years old or older and all references to this material be destroyed both at the Seat of Government and in the field.

DATA REGARDING 25 FILES:

In the 25 classification maintained at the Seat of Government, a total of 447,539 files occupying 499 five drawer file cabinets have been opened to date. Of this amount, 309,714 files occupying 277 five drawer file cabinets are ten years old or older.

(Continued on Page 2)

66-3286-

NOT RECORDED
170 DEC 11 1959

62 DEC 21 1959

DOCUMENT COPY FILED

In an effort to determine approximately what percentage of these files would relate to investigations which disclosed that the delinquency was not willful, we have reviewed 100 files interspersed throughout the 25 classification. This review reflected that in only four cases was the subject prosecuted based on a willful violation. Applying this ratio to the 309,714 files ten years old or older, we would be able to destroy 90 per cent of these files or 297,325 files and would gain 265 five drawer file cabinets and the space of these cabinets. Here again, the most important savings to the Bureau would be realized by the destruction of the material, thus eliminating a substantial volume of work created by the necessity to review these files when name searches are conducted.

Destruction of 25 files ten years old or older throughout the field would obviously result in a tremendous savings in space and equipment in the field and would also result in a substantial savings in file review work. Records Branch feels that destruction of these files would have very little, if any, effect on the day-to-day operations of the field offices.

Records Branch recommends that all 25 files ten years old or older in which investigation discloses that delinquency was not willful and all references to these files be destroyed both at the Seat of Government and in the field. In the event this destruction is approved, it will be necessary to secure Archival approval for destruction of files at the Seat of Government. We already have Archival authority to destroy files maintained in the field.

RECOMMENDATIONS:

1. That all material ten years old or older maintained in 25-0 files and all references to this material be destroyed both at the Seat of Government and in the field.

2. That all 25 files, ten years old or older in which investigation disclosed that delinquency was not willful, and all references to these files be destroyed both at the Seat of Government and in the field. In the event this recommendation is approved, Archival authority will have to be secured prior to the destruction of files at the Seat of Government. We already have Archival authority to destroy files throughout the field.

(Continued on Page 3)

RECOMMENDATIONS: (Con't)

3. In connection with Recommendation #2 above, as an alternative proposal in the event the Bureau feels that we should keep a record of the individual cases, Records Branch recommends that files be destroyed and index cards relating to the files be retained.

ADDENDUM: 11/10/59 QT:HD

EXECUTIVES CONFERENCE CONSIDERATION:

The Executives Conference on 11/9/59, Messrs. DeLoach, McGuire, Rosen, Belmont, Clayton, Parsons, Trotter, Mohr & Tamm being present, unanimously recommended: (1)that all material ten years or over maintained in 25-0 files and all references to this material be destroyed both at the Seat of Government and in the field.

(2) that all 25 files ten years old or older in which investigation disclosed delinquency was not willful and all references to these files be destroyed, be destroyed both in the field and at the Seat of Government.

(3) that, in the event these recommendations are approved, archival authority will have to be obtained for destruction of files at the Seat of Government, it being noted we have authority to destroy files throughout the field.

SUBJECT: SUGGESTION #271-40
SUBMITTED BY [redacted]
DESTRUCTION OF

Mrs. [redacted] Supervisor of the Personnel Records Unit, has suggested that the Records Branch be authorized to destroy certain types of mail from field office files when the mail is over five years old. She has attached a section of the New York Field Office file and marked appropriate samples which are described as "housekeeping records" by the National Archives. It is conservatively estimated that the destruction of this material would save three five-drawer file cabinets. b6 b7C

The adoption of Mrs. [redacted] suggestion would be beneficial to the Bureau from a records management standpoint. The mail in question is of no value and its destruction would conserve needed space, reduce repair cost and facilitate file reviews.

RECOMMENDATIONS:

1. That the above suggestion be adopted.

DESTRUCTION OF BUREAU PROPERTY

2. That the suggestion be referred to the Training and Inspection Division for review and acknowledgment. No recommendation is being made for a cash award since Mrs. [redacted] is the Supervisor of the Personnel Records Unit and would normally be expected to make suggestions for the improvement of her unit. b6 b7C

EX-124 REC-19 66-3286-850

23 DEC 11 1959

(4)
Enclosures

1 - Personnel file of Mrs. [redacted] (Sent separately)

See Addendum of the Administrative Division P. 3.

(See Addendum page 2)

58 FEB 9 1960

ADDENDUM BY TRAINING AND INSPECTION DIVISION: RWB:jmp 11-4-59

Training and Inspection Division feels that the views of the Administrative Division should be obtained before final action is taken on this suggestion since the mail which is proposed to be destroyed was sent to file by them. Accordingly it is recommended that this memorandum be referred to the Administrative Division for their recommendation. Attached is a thank you letter to Mrs. [redacted] for approval.

b6
b7C

(over)

ADDENDUM OF ADMINISTRATIVE DIVISION DCM:dpm 11-9-59

When instant memorandum was received in Administrative Division, there were no samples of mail to be destroyed after they had reached the age of 5 years, as memorandum indicated. Accordingly, Mrs. [redacted] was contacted, and she brought Section 12 and Section 16 of the New York Field Office file and marked serials of the type she suggests be destroyed after they are 5 years of age. As examples, there was a letter dated 1-25-38 reflecting the stenographic and typing grades received by New York employees during the quarterly conference. Likewise, a letter of 1-20-38 reflected the same thing. Also, a letter of 12-13-37 which in whole stated there was enclosed a list of SA applicants in the New York District to be interviewed and examined by the SAC, New York at the earliest possible date. Another letter reflected the examination grades of agents at a quarterly conference at a quarterly technical conference. Another letter set forth the names of agents to be interviewed and another was a memorandum for Mr. Tamm reflecting errors of field divisions in reports for the month of May, 1937. Other correspondence related to applicants to be interviewed and the number of interviews outstanding, as well as correspondence reflecting the division of stenographers in the New York Office.

b6
b7C

It certainly seems that mail of this type could be destroyed after it is 5 years old because it is essentially administrative correspondence of an informative nature and would not have to be referred back to from time to time. More important our views have recently been requested in connection with a proposal for improved records management by having a memorandum of a distinctive color clearly marked at the bottom to show that it is for informative purposes only and would not be filed after its purpose has been served. If information of the type set forth above is placed on informative memoranda and not filed after its purpose has been served, it will, in effect, cure the problem that Mrs. [redacted] has recognized in making her suggestion.

b6
b7C

RECOMMENDATION:

Accordingly, it is recommended that Mrs. [redacted] suggestion be approved with the proviso that a responsible agent supervisor in both Records Branch and Administrative Division approve the particular serials purged in order that no information which might have to be referred back to at some future date is destroyed.

SUBJECT: SUGGESTION #271-60
Submitted by Mrs. [redacted]
Files and Communications Division

ALL INFORMATION CONTAINED HEREIN IS UNCLASSIFIED DATE 8/10/82 BY SP4 SLW/ltr

b6
b7C

SUGGESTION: That the Records Branch be authorized to destroy certain types of mail from field office files when the mail is over five years old. The mail to be destroyed includes letters from the field requesting application blanks, listings of home address and telephone numbers of Bureau personnel, office of preference listings, et cetera. The mail is essentially administrative correspondence of an informative nature and would not have to be referred back to from time to time.

CURRENT PRACTICE: No material is ever purged from the field office files.

OBSERVATIONS: If the suggestion is adopted it will save much needed file cabinet space. The Administrative Division recommends that the suggestion be adopted with the proviso that a responsible agent supervisor in both the Records Branch and Administrative Division approve the particular serials purged in order that no information which might be of value at a later date is destroyed.

It is felt that this is an excellent proposal since it will conserve space. Training and Inspection Division agrees with the views of the Administrative Division. Files and Communications Division should insure that an agent supervisor consults with Administrative Division as indicated before any serials are destroyed so that important data is not destroyed. Mrs. [redacted] suggestion was acknowledged by letter dated 11-5-59.

RECOMMENDATIONS: (1) That the attached letter to Mrs. [redacted] be approved advising that her suggestion has been adopted.

EX-124 REC-19 66-3286-857

b6
b7C

23 DEC 1959

(2) That this memorandum be referred to the Files and Communications Division so that this proposal is carried out as outlined above.

SUBJECT: ALBANIAN ACTIVITIES IN THE U.S.
IS - AL
Destruction of Bureau Property - general

Memo Short to McGuire 1-29-60 requested bulky exhibit to serial 163, instant file, be reviewed for retention or destruction. Bulky exhibit was reviewed by SA W. D. Stewart on 2-2-60.

This bulky exhibit consists of newspapers and magazines, dated between 1949 and 1951, printed in the French and Albanian languages. A review of the English summary of the above-mentioned material reveals that articles contained therein extol Albanian internal progress in fields of agriculture, construction, and hydroelectric development; laud Russia; and denounce anticommunist countries. The above-mentioned material, which contains nothing of an intelligence interest to the Bureau, was forwarded to the Bureau by WFO via letter 4-30-51. It was furnished WFO on 4-17-51 by [redacted] naturalized in 1942. [redacted] name, prior to its being changed in court, was [redacted] When he wrote to his parents in Albania, he used last name of [redacted] Bulky material was mailed to him in Washington, D. C., from Paris, France, without explanation, probably to induce him to return to Albania. Material furnished Bureau for its interest. No obligation to return. No indexing done re material. No foreseeable use if retained.

SUBJECT: DON MARTIN LUIS DRAGO
SUBVERSIVE ACTIVITIES - J
DESTRUCTION OF BUREAU PROPERTY GENL

Bulky Exhibit File Number: ~~100-111258-74~~

We are in the process of reviewing all bulky exhibits in order that we may dispose of those which serve no further purpose. Inasmuch as many of the bulky exhibits pertain to inactive cases and are occupying badly needed space, it is requested that the appropriate substantive supervisor review the above-listed bulky exhibit and render a decision as to its retention or disposition. A notation as to the decision reached may be placed on this memorandum. The memorandum should be returned to the Filing Unit of the Records Branch, Room 1113, Identification Building, for filing in the case file.

RECOMMENDATION:

That captioned bulky exhibit be reviewed and a decision rendered as to the retention or disposition of the material.

58 JAN 15 1960

ADDENDUM, TRAINING AND INSPECTION DIVISION, RWB/KWW:mgj/mbk, 2-3-60

This Division recommended that this material be destroyed under the guidance of a Special Agent supervisor of the Domestic Intelligence Division since it is felt that the decision concerning what material falls within the five conditions should be made by a Special Agent who is familiar with the security aspects of the Bureau's work. Since the Domestic Intelligence Division feels this responsibility can be properly discharged by an Agent supervisor in the Files and Communications Division, this Division has no objection to such a procedure as long as responsibility is fixed upon an Agent supervisor. Assistant Director McGuire advises that the Files and Communications Division would be able to destroy this material as outlined in the five conditions listed.

RECOMMENDATION:

That the material in question be destroyed by the Files and Communications Division in accordance with the five conditions as set forth in their original suggestion.

Memorandum to Mr. McGuire
Re: DON MARTIN LUIS DRAGO

ADDENDUM: HJJ:dmd 1-6-60

On 12-12-41, ONI advised it had received report indicating Japanese Consul Toshito Sati and Argentine Consul Martin Luis Drago, both of San Francisco, had been extremely friendly during the preceding sixty days. State Department authorized discreet investigation of Drago to determine if engaged in espionage or other activities inimical to security of U.S.

Investigation did not disclose any particular friendliness between Japanese Consul and Argentine Consul, although it was developed that he had indicated pro-Axis and anti-American sympathies. During the investigation 89 exhibits were submitted to the Laboratory for examination. These exhibits were envelopes, letters, cards, memoranda and various papers mailed to Martin Luis Drago, Argentine Consul, San Francisco. Laboratory examination revealed nothing of value. Photographic copies of the material were retained in Laboratory file and originals and translations were returned to substantive supervisor. No indication of disposition of originals and translations by supervisor.

On 1-30-45, State Department advised investigation could be terminated unless for some reason Bureau wanted to continue. Investigation was finally terminated in October, 1945.

By memorandum 11-19-46, Laboratory file was incorporated into main case file as enclosure behind file to serial 74, the bulky exhibit under consideration for retention or disposition.

RECOMMENDATION:

Neither the investigation nor the material submitted for Laboratory examination revealed anything of value. Material in bulky exhibit has no evidentiary value. Laboratory has indicated that it has no objection to destruction of bulky enclosure (serial 74) with the notation "Retain Lab Work Sheets."

Domestic Intelligence Division concurs in recommendation to destroy bulky exhibit 100-11253-74, except for Laboratory work sheets.

By memorandum Short to McGuire dated 11-19-59, it was requested that bulky exhibit 64-28705-24 be reviewed for determination as to disposition or retention. This exhibit has been reviewed and contains a copy of a registration list of Germans in Chile who voted in the 1938 Plebiscite concerning the annexation of Austria. This list was secured from the German Archives in Chile and forwarded to Bureau by Legal Attache, Chile, by memorandum dated 10-15-45. It was requested that a negative of this material be secured and this would be forwarded to the Military Attache at the American Embassy in Santiago. By memo 1-4-46 a negative of this material and the original material were returned to the Legat in Santiago, Chile, for return to the German Archives and the film placed at the disposal of the Military Attache.

It is noted that a report was prepared dated 5-21-46 from photographs of all important material contained in the Archives of the former German Embassy in Santiago, Chile. Copies of this report were furnished to the State Department and there are copies of the report in the file which have been indexed.

Since anything of value in connection with this exhibit has been incorporated in a report, the retention of the photographs is not necessary and it is recommended this exhibit be destroyed.

SUBJECT: PAUL MERKER
INTERNAL SECURITY - C
DESTRUCTION OF BULKY EXHIBIT

Memorandum of Mr. Short to Mr. McGuire dated 9/15/59 requested that bulky exhibit, file number 100-49516-87, be reviewed for the purpose of determining whether it should be retained or destroyed.

Subject had 20 years membership in German Communist Party and advocated collaboration with Soviet Union at time of Weimar Republic. He went to Mexico in 1941 where he became prominent in the leadership of the "Alemania Libre" (Free Germany) and maintained correspondence with leading communists in other countries. He was a passenger on the Russian ship SS "Gogol", which arrived Honolulu, 5/7/46 enroute to Vladivostok, Russia.

Letter from SAC, Honolulu 7/31/46 (serial 90) enclosed the entire reel of movie film which had been taken of certain individuals involved in captioned case by Lieutenant Harold Hughes, DIO, USN, Honolulu, and ASAC, J. Sterling Adams during stay of SS "Gogol" at pier 27 during May, 1946. Individual frames from this reel of movie film had been clipped and enclosed with the report of Special Agent Richard C. Crane 6/24/46 at Honolulu (serial 87). It appears that the reel of film is only additional frames of individuals whose photographs are already contained as an exhibit in the file proper. The names of these individuals have been indexed and it is recommended that these be retained in the main file as presently is the case; however, no forseeable use of the reel of movie film is seen if retained. It has not been indexed and there is no reasonable possibility its destruction would eliminate from our file data which we might have to refer in the future.

ORIGINAL COPY FILED IN 100-49516-87

RECOMMENDATIONS:

NOT RECORDED
NO DEC 14 1959

That the reel of movie film that comprised the bulky exhibit to serial 90 of captioned file be destroyed since it is actually the bulky exhibit in question in lieu of that which is referred to in serial 87.

DENATURALIZATION PROCEEDINGS - G
Destruction of Bureau Property

By memorandum to McGuire from Short dated 11-19-59 it was requested that bulky exhibit 100-94542-94 be reviewed for determination as to disposition or retention.

This case was closed by Chicago report 10-30-44 pursuant to USA, Chicago, advice that successful denaturalization proceedings could not be sustained. On 9-14-48 Chicago sought Bureau authority to destroy exhibits in this case. Bulet 9-23-48 instructed Chicago to obtain written authorization from USA as to method of disposal of the exhibits. Chicago let 1-25-49 advised USA, Chicago, under date of 1-14-49 advised "You are authorized to destroy or otherwise dispose of all exhibits maintained by you in any manner you see fit." By Bulet 2-24-49 Chicago was advised that inasmuch as subject was national president of the Friends of New Germany in 1934 and 1935, it did not appear advisable to destroy exhibits in the case at that time and they should be forwarded to Bureau. It was felt subject might later become involved in German activities. He did not.

1. Exhibit consists of four 25-foot spools of film containing negatives of photos taken by Kansas City Office of material received from a confidential source. (Translator's comments re above have been placed in file.)

2. Photograph of application made by [redacted] b6 b7C

3. Photographs of subject.

4. Samples of [redacted] and the subject's handwrit.

5. Copy of article appearing in "Chicago Sun" of 7-28-42.

6. Pamphlets and articles in leaflets advertising the appearances of subject.

ALL INFORMATION CONTAINED HEREIN IS UNCLASSIFIED DATE 8-10-82 BY SP4 HELW

Memo 4-24-59 Short to McGuire requested bulky exhibit to serial 22, instant file, be reviewed for retention or disposition. This bulky exhibit consists of one Photostat each of a membership book of a cash journal record book, of pages of a visitor's book and of Ordnungs Dienst attendance and record book, all of the San Francisco local of German-American Bund.

(1) The originals from which Photostats were made by San Francisco of the above-described contents of the bulky exhibit were obtained by agents of the San Francisco Office on January 5, 6, 1942, in connection with an authorized search of a locker formerly maintained by the Friends of New Germany at the California Hall, Turk and Polk Streets, San Francisco.

(2) No obligation to return above-mentioned Photostats of records which were made of original records by San Francisco Office which retained original records in its file. San Francisco furnished Bureau and USA, San Francisco, with Photostats of these records.

(3) Photostats furnished Bureau for its information.

(4) No indexing was done re the Photostats of the above-described records.

(5) No foreseeable use if retained. The entire contents of these exhibits are set out in serial 22 of this file.

(6) Destruction of the above-described Photostats will not eliminate anything from our files which would be of any interest later.

RECOMMENDATION:

That the above-described Photostats contained in bulky exhibit 102-1-48-22 be destroyed.

By letter dated November 12, 1959, Benjamin Mandel, Research Director, Internal Security Subcommittee, forwarded to Assistant Director C. D. DeLoach typewritten copies of names contained in Photostats of cash books of World Tourists, Inc., from March, 1929, to September, 1939. World Tourists was a Soviet-sponsored travel agency headed by Jacob Golos, who died in 1943. Golos was identified by Elizabeth Bentley as her Soviet espionage superior until the time of his death, in 1943. The lists furnished by Mr. Mandel contain approximately 4,000 names and there is no identifying data furnished with the names. In some instances only the last name appears and in many instances an initial appears for the first and middle name of the individual listed in the cash books of World Tourists. Mr. Mandel advised that the Internal Security Subcommittee has Photostats of these books and that the Bureau may make copies if it is desired to do so.

The original source of the cash books of World Tourists apparently was the Department of State. The records of World Tourists were subpoenaed in 1940. At the time, the organization and Jacob Golos were charged with violation of the Registration Act. It is from these records that the State Department determined that a number of communists were obtaining passports that were being paid for through Communist Party funds. From a review of the list of names furnished by Mr. Mandel it has been determined that many of the names are the same as those of well-known security subjects on whom the Bureau has previously conducted investigations. There is, however, no identifying data with the names appearing on the lists and it is therefore not possible to definitely state that the names on the lists furnished by Mr. Mandel are identical with those of known security subjects.

Furthermore, the appearance of a name on the lists does not necessarily mean that the person had subversive connections or that the person actually traveled to Russia. For this reason no definite conclusion can be drawn in so far as the purpose of the contact of the individual with World Tourists is concerned.

We have consulted the Record Section for an opinion as to the value of indexing these names and it appears that an indexing project would involve considerable time and expense with no particular value

61-7574

to be derived from the indexing because of the lack of identifying data. Furthermore it is noted that the lists cover the years 1929 through 1939 and that in all probabilities a considerable number of the persons whose names appear in the early records of World Tourists are now deceased.

In the event we desire to refer to the cash books of World Tourists in connection with any investigation we would want to check the original record, if it was available, and in the absence of the original record we would want to examine the Photostats which are available in the files of the Senate Internal Security Subcommittee according to Mr. Mandel's letter of November 12, 1959.

RECOMMENDATION:

In view of the above, it is felt that no useful purpose will be served by maintaining the typewritten lists furnished by Mr. Mandel, and it is, therefore, recommended that the lists of names from the cash books of World Tourists be destroyed.

Re memorandum from Short to McGuire dated 4/24/59 recommending that Bulky Exhibit 65-37233-1743 be reviewed and decision rendered as to retention or disposition of the material. This case involves use of double agent and Bureau-controlled radio communications with German Intelligence during World War II. Jorge Jose Mosquera, a citizen of Argentina, born 6/30/95, went to Germany in 1924, and engaged in business. At the beginning of World War II he began espionage activities for the Germans and in 1941 he was sent to Uruguay to obtain information about the United States and transmit it to Germany. Mosquera received training in codes and communications from the Germans. On arriving in Uruguay, Mosquera contacted the US Embassy there and it was arranged with the Bureau to have him come to the United States. He arrived in the United States in November, 1941, and was operated as a double agent by the Bureau, with radio communication established with Germany. The last radio contact with control station operated by his German principals was on 5/1/45; his services were terminated 9/30/45; and case closed. (S) U

Bulky consists of approximately 500 photographs of correspondence obtained from the files of Otto Albert Christian Hagen, which correspondence covered period of 1933 to 1939 between Hagen and Hans Blum of Remy and Company, Hamburg, Germany, one of subjects in this case; submitted with Philadelphia letter 3/2/44. Hagen advised during interview that his relations with Blum and with Remy and Company were purely business. The files in Hagen's office were reviewed and photographs taken with Hagen's permission at time of interview, which was conducted for purpose of ascertaining information regarding Blum and his activities. This was one of several interviews conducted with contacts of Blum in order to determine whether he was in the U. S. subsequent to 1937, and whether he was in the U. S. about July, 1939. (S) U

Employee assigned to (Division)
HONOLULU

It is suggested a survey be made at the Bureau to establish which sections of SAC letters over five years old are no longer applicable or are covered in the Manual of Rules and Regulations or the Manual of Instructions, that a list be prepared and sent to the Field offices which will permit the destruction of these serials in the double zero files.

C

Present practice or rule (include manual citation as well as facts)

Maintain double zero files permanently. (No Bureau instruction exist for the destruction of double zero files.)

Advantages of suggestion

It is believed over half of the serials in the double zero files could be destroyed, which would save many man hours and space in the field.

Description of List: The German Armed Forces (Die Deutsche Wehrmacht) IS-G, 65-48824-52

The attached listing of names has been called to our attention by personnel engaged in Name Check work. They advise that the frequency of reference to this listing causes unnecessary work because insufficient information is available to effect an identification. In an effort to streamline procedures and eliminate unnecessary reference to this data, it is proposed that the material be de-indexed through removal of the cards from the Bureau's indices.

It is requested that the appropriate substantive supervisor review the above listed file reference to determine if any reason exists for retention of the indexing on this listing of names. A notation advising of the decision reached may be placed on this memorandum. The memorandum should be returned to the Correlation Unit of the Records Branch, Room 6309 IB.

RECOMMENDATION:

For referral to appropriate substantive division.

SUBJECT: GERMAN AMERICAN BUND
AMERIKA-DEUTSCHES VOLKSBUND
INTERNAL SECURITY - G

Destruction of Bureau Property - General

Memo 4-24-59 Short to McGuire requested bulky exhibit to serial 179, instant file, be reviewed for retention or disposition. This bulky exhibit consists of seven official rubber stamp seals of the German American Bund. In connection therewith, the following is noted:

(1) Only reference to stamps is in serial 179 (memo English to Hanratty 1-23-46) which indicates they were obtained from New York unit of the Bund.

(2) No obligation to return rubber stamps.

(3) No apparent use of these stamps was made by Bureau.

(4) No indexing was done re stamps.

(5) No foreseeable use if retained.

(6) Destruction of these stamps will not eliminate anything from our files which would be of any interest later.

RECOMMENDATION:

That seven rubber stamp seals of the German American Bund contained in bulky exhibit 102-1-54-179 be destroyed.

SUGGESTION

Index Cards referring to SAC Letters and Bureau Bulletins over three years old be destroyed as encountered.

Destruction of Bureau Property - Gen

RECORDED - 34
NOV 23 1959

Current practice (include manual citation as well as facts)

Manual of Rules and Regulations, Part II, Section 3, P.14, e (7) and (25) provides for the destruction of SAC Ltrs. & Bur. Bulletins when three years old.

Advantages of suggestion and annual savings (include basis for estimate)

It would provide for a systematic purging of cards from the indices no longer of value due to the destruction of material to which the cards refer. This would eliminate obsolete and valueless material in line with the Bureau's Records Management Program.

RE: DESTRUCTION OF SELECTIVE SERVICE ACT (25) FILES

Reference is made to my memorandum to you dated 10-29-59 which recommended that all Selective Service Act (25) files, ten years old or older in which investigation disclosed that delinquency was not willful, and all references to these files be destroyed both at the Seat of Government and in the field. I indicated that in the event this recommendation was approved, Archival authority would have to be secured prior to the destruction of these files at the Seat of Government. We already have Archival authority to destroy field files.

This matter has been considered by the Executives Conference who recommended the destruction of these files. Mr. Tolson approved this recommendation.

There is attached hereto a memorandum to the Department of Justice transmitting the required number of copies of Standard Form 115 (Request for Authority to Dispose of Records) with the request that these forms be transmitted to the National Archives for the purpose of securing the necessary Archival authority prior to the final destruction of this material. Several 25 files are attached for transmittal to the National Archives illustrating the type of material we desire to destroy.

RECOMMENDATION:

That the attached memorandum to the Department of Justice including the required number of copies of Standard Form 115 (Request for Authority to Dispose of Records) and sample files be approved and forwarded to the Department.

Subject on 2-21-45 was found guilty in Federal Court, Newark, New Jersey, for obstructing the war effort of the U.S. and the Censorship Law (Title 40 Sections 102 and 105, and Title 50, Sections 618 Appendix USC). Actually our investigation indicated he had acted as an agent of the German Government and that his missions in the U.S. were to aid German saboteurs landing in this country and to disseminate German propaganda. He was sentenced to 12 years but was released on 2-3-51. During the Bureau's investigation (1942-1945) intercept coverage between the subject and persons abroad resulted in voluminous letters being furnished the Bureau through National Censorship. Photographs were made of these letters and the originals returned to National Censorship.

Memorandum Eames to McGuire 5-29-59 requested that this bulky exhibit be reviewed and a decision rendered as to retention or disposition thereof. The originals of these photographs when received at the Bureau were processed for evidence of espionage character. These examinations were negative. The photographs were not indexed. There appears to be no foreseeable use for these photographs and their destruction would not eliminate from our files data which we might have to refer in the future. It does not appear that any of these photographs or the originals thereof were of evidentiary value at the time of subject's trial and at present they do not appear to be of evidentiary or historical value.

RECOMMENDATION:

That the exhibit to Serial 659 of instant file be destroyed.

SUBJECT: SUGGESTION # 300-60
SUBMITTED BY [redacted]
Destruction of Bureau Property

[redacted], Supervisor of the Personnel Records Unit, has suggested that the Records Branch be authorized to destroy (1) the 69 sections of Division and Seat of Government (SOG) "Overtime" files (closed since 1945), and (2) the 22 sections of SOG Division "Organization" files (closed since 1955) presently maintained in the Personnel Records Section. Destruction of

b6
b7C

Attached are the Knoxville and Memphis Divisions Overtime files and the Identification Division and Domestic Intelligence Division Organization files as samples. It is conservatively estimated that the destruction of these 91 sections of files would save one four-drawer file cabinet.

As far as the Records Branch is concerned, the contents of these files are of no value and the adoption of Mrs. [redacted] suggestion would be beneficial to the Bureau from a records management standpoint inasmuch as these files occupy valuable space that is sorely needed. The material in these files is described as administrative type records not requiring archival authority for destruction.

b6
b7C

RECOMMENDATIONS:

1. That the above two-part suggestion be adopted.

REC-50 66-3286-854

2. That the suggestion be referred to the Training and Inspection Division for review and acknowledgment prior to referral to the various Seat of Government Divisions for their comments.

grade, and salary. A spot check of these lists discloses they were submitted for the most part on a monthly basis during the early 1940s. There likewise appears to be no reason for continuing to maintain these old organization lists since they have been inactive since 1943 and do not appear to have any value at this time.

RECOMMENDATION:

That the suggestion to destroy these files be favorably considered for the reason set out above.

11-23

ADDENDUM BY TRAINING AND INSPECTION DIVISION: RWB:jmp 12-3-59

It is agreed that suggestion should be adopted. It is felt that the material should be reviewed by a responsible Agent Supervisor in the Administrative Division before it is destroyed and the Administrative Division agrees. This is the same manner in which similar projects have been carried out in the past. Mrs. [redacted] proposal was acknowledged by letter dated 11-19-59. b6 b7C

RECOMMENDATIONS: 1. That the attached letter of commendation be sent to Mrs. [redacted] for her alertness in making this proposal.

12/3

2. That this memo be referred to the Files and Communications Division for the carrying out of the suggestion.

I agree EPC 12/4

SUBJECT: SUGGESTION #300-60
SUBMITTED BY [redacted]
Destruction of Bureau Property

The Training and Inspection Division has requested views of the Administrative Division concerning the captioned suggestion that the Records Branch be authorized to destroy (1) the 69 sections of Division and Seat of Government "Overtime" files (closed since 1955) and (2) the 22 sections of SOG Division "Organization" files (closed since 1943) presently maintained in the Personnel Records Section.

There appears to be no reason why the "Overtime" files referred to should continue to be retained. These files have been closed since 1955 and consist mainly of agent overtime reports submitted by the various divisions in 1950, 1952 and 1953 before the Fringe Benefits Act providing payment to agents for overtime became effective. The figures in the overtime reports have been posted to the personnel files of the various agents and copies of the overtime reports are maintained in the Personnel Briefing Unit and for inclusion in permanent briefs as they are brought up to date. Any claims by former agents for overtime compensation based on overtime performed during the period covered by these reports would now be barred by the Statute of Limitations since all of this overtime was performed more than six years ago (the last report covers the month of April, 1953.) The files in question do not contain any other monthly overtime reports submitted since February, 1955 in connection with the Fringe Benefits Act. Overtime reports submitted under the Fringe Benefits Act are not sent to file, the original being maintained in the Voucher-Statistical Section and a copy in the Personnel Briefing Unit. In some instances the old "Overtime" files in question contain correspondence to and from the field in early 1955 relating to administrative matters connected with submission of initial overtime reports under the Fringe Benefits Act. However, the overtime reports themselves are not kept in these files and the correspondence mentioned is administrative in nature and not basic policy material. No apparent reason exists for continuing to retain any of the overtime reports or correspondence of the type contained in these old "Overtime" files.

With respect to the SOG Division "Organization" files referred to, these files have been closed since 1943 and contain lists of personnel assigned to the various SOG Divisions, broken down by position,

SUBJECT: DESTRUCTION OF BUREAU PROPERTY
GENERAL

In connection with the review and destruction of bulky enclosures, the Photographic Laboratory and the Records Section are also engaged in a program for the destruction of certain photographic negatives of original Laboratory and Latent Fingerprint evidence. Such negatives are being considered for destruction if they relate to cases which have been inactive for ten years. At the present time, there are photographic negatives in the following approximate numbers of matters inactive for ten years which fall in the following classifications of cases handled in the Domestic Intelligence Division:

Classification	Character	Number Inactive
2	Neutrality Matters	11
3	Overthrow or Destruction of Government	1
64	Foreign Miscellaneous	273
65	Espionage	1870
97	Registration Act	27
98	Sabotage	2935
100	Security Matters	4518
105	Nationalistic Tendency	139
117	Atomic Energy Act	3

These negatives, files, and pertinent exhibits will, of course, be furnished to the Domestic Intelligence Division personnel in substantially the same volume that the regular bulky exhibit reviews have been furnished.

In addition to the usual considerations in connection with the review of bulky exhibits, cases of national interest or those cases in which life sentences could be imposed were excepted from routine destruction. (66-3286-815)

REC- 75 66-3286-856

Review of photographic negatives is handled in the same manner by the substantive desk and by the Laboratory or Latent Fingerprint Section as are the regular bulky exhibits. However, it should be

66-3286

LW:skm
(7)

58 DEC 22 1959

ALL INFORMATION CONTAINED HEREIN IS UNCLASSIFIED DATE 8-10-82 BY SP4 ELW/rtc

15 DEC 16 1959

pointed out that reviewing Agents may find instances where a bulky exhibit consisting of photographic prints in a particular case has been destroyed at sometime in the past under the bulky exhibits program on the basis that the prints were no longer necessary because the photographic negatives from which the prints had been made were on file and new prints could be made up if the necessity ever arose. Reviewing Agents should, therefore, before authorizing destruction of photographic negatives, make certain that prints of those negatives have not been destroyed at some prior time on the understanding that the negatives would remain on file. In making this check reviewing Agents should bear in mind that the serial to which the negatives pertain may not be the serial to which the photographic prints were an enclosure.

ACTION:

For your information.

OPTIONAL FORM NO. 10

UNITED STATES GOVERNMENT

Memorandum

TO : MR. McGUIRE DATE: 1-5-60

W.C. Sullivan
Tele. Room
Gandy

While discussing another matter with Mr. Hardee Allen of the National Archives he advised that the Civil Service Commission had submitted a request for authority to destroy nonderogatory applicant investigations and related papers after 90 days total retention. I asked him if this request included the Standard Form 79 which we furnish to the Civil Service Commission when we conduct security investigations. He said he thought that the request included the file and all supporting records.

I have since discussed this matter with Carlton Gloyd and others in the Civil Service Commission and have been advised that the Standard Form 79 is to be retained permanently under existing policy. Form 79 and a similar form, which sets out the name of applicants investigated by the Civil Service Commission, are retained in an index referred to by the Commission as their master indices. Security investigation files are destroyed after 30 years under approved disposal schedules and officials in both the Civil Service Commission and the National Archives feel certain that the request will be approved to permit the destruction of nonderogatory files which reflect the results of investigations by Civil Service Commission investigators after 90 days retention.

This is submitted for your information and no further action is necessary.

SUBJECT: 35 MM MICROFILM FOUND
MIAMI, FLORIDA, 6-22-56
DOUGLAS AIRCRAFT COMPANY
[redacted] - INFORMANT
ESPIONAGE - X

b6
b7C
b7D

Destruction of Bureau Property

Miami let 7-2-56 furnished captioned film which was found 6-22-56 by [redacted], aged 12, in Miami, and turned over to Miami Office by his father. This film portrays what appears to be blueprints of aircraft design bearing markings of Douglas Aircraft. Co. advised that the film did not contain classified information and actually pertained to shop drawings of the B-26 aircraft. Memo Short to McGuire 12-3-59 requested that this film which comprises the bulky exhibit to serial 4 of instant file be reviewed and a decision rendered as to its retention or destruction. Actually, the film has no value and there appears to be no need to return it to the finder. Its destruction would not eliminate from our files data to which we might have to refer in the future and there appears to be no foreseeable use if it is retained. It is not indexed.

RECOMMENDATION:

That the bulky exhibit to serial 4 of instant file be destroyed.

SUBJECT: UNAUTHORIZED DISCLOSURE OF CLASSIFIED DATA IN ARTICLE ENTITLED "MISSILE NAVY WITH 47 ROCKET SHIPS 1961 GOAL," BY "CHICAGO TRIBUNE" ESPIONAGE - X

AEC 8-21-56 advised that captioned article contained info classified Secret - Restricted Data. The article pointed out that the data contained therein were obtained from testimony before the Senate Armed Services Subcommittee on Air Power and that this subcommittee had prior to public release deleted more than 80 per cent of the testimony of certain individuals for security reasons. Pursuant to our request, AEC furnished the 23-volume report of afore-mentioned subcommittee. This comprises the bulky exhibit to serial 2 of instant file. AEC also pointed out that the classified information included in the article did not appear to come from this report as claimed in the article. Department declined prosecution in this case.

Memo Short to McGuire 12-3-59 requested the instant bulky exhibit be reviewed and a decision rendered as to its retention or disposition. It is noted the exhibit is a copy of the hearings before the subcommittee issued by the United States Government Printing Office, Serial Number 76922. It is of no further use in the instant case, which is closed, and it has not been indexed. Its destruction would not remove from our files information to which we might have to refer in the future and at any rate another copy can easily be obtained from the U.S. Government Printing Office. There is no foreseeable use for this exhibit, if retained. There is no obligation to return this exhibit to AEC.

RECOMMENDATION:

That the exhibit to serial 2 of instant file be destroyed.

Reference made to memo L. E. Short to Mr. McGuire 12/22/59 captioned as above which recommended that bulky exhibit relating to serial 57 of 100-332879 be reviewed and decision rendered as to retention or disposition of the material.

Bulky exhibit in point consists of 77 exhibits submitted to Bureau in conjunction with prosecutive summary report prepared on above organization 8/4/55 at Los Angeles. Exhibits are Photostats, originals retained by Los Angeles.

Prosecutive summary report forwarded to Department 8/18/55. By letter dated 12/23/55. Department advised report reviewed for purpose of determining if sufficient evidence existed to support a petition to the Subversive Activities Control Board requiring captioned orgainization to register as a Communist-front organization. Department advised it determined there was insufficient evidence to support a petition against captioned organization at that time (12/23/55). Department stated further review would be undertaken as additional reports concerning the organization were received. Four reports were submitted subsequent to that date, the last being a closing report 12/18/57 which disclosed organization dissolved. The other reports contained little or no information concerning the organization's activities inasmuch as plans were being formulated to disband it.

Observations: Possibility of Department petitioning Subversive Activities Control Board re captioned organization appears remote. Inasmuch as Los Angeles has originals of exhibits, there is no need for Bureau to retain Photostats since it creates duplicate filing.

Recommendation: That bulky exhibit be destroyed.

SUBJECT: POLISH INTELLIGENCE ACTIVITIES
IN THE UNITED STATES
INTERNAL SECURITY - PO

DESTRUCTION OF BUREAU PROPERTY GENERAL

By memorandum 12/21/59, Short to McGuire, it was requested that the bulky exhibit to Serial 100-350264-1021 be reviewed and a decision be made concerning its retention or disposition.

b7D

The bulky exhibit consists of 17 items published by the Polish Government furnished by [redacted] on 9/6/51. Eight are in the Polish language and nine are in English. They were forwarded to the Bureau as examples of literature and propaganda disseminated by the Polish Consulate, Chicago. They cover such topics as Poland's economy and political structure, Polish-German relations, anti-State activity of the West in Poland, and strongly urge the "peace" theme. A review of this material indicates that it is of no present intelligence or operational significance. It appears to be of no value to the Central Research Section.

RECOMMENDATION:

Done 1/7/60 That the bulky enclosures to Serial 100-350264-1021 be destroyed. If approved, forward to Files and Communications Division for appropriate action.

Bulky Exhibit File Number: 100-407502-5

We are in the process of reviewing all bulky exhibits in order that we may dispose of those which serve no further purpose. Inasmuch as many of the bulky exhibits pertain to inactive cases and are occupying badly needed space, it is requested that the appropriate substantive supervisor review the above-listed bulky exhibit and render a decision as to its retention or disposition. A notation as to the decision reached may be placed on this memorandum. The memorandum should be returned to the Filing Unit of the Records Branch, Room 1113, Identification Building, for filing in the case file.

RECOMMENDATION:

That captioned bulky exhibit be reviewed and a decision rendered as to the retention or disposition of the material.

INTERNAL SECURITY - C

Bulky Exhibit File Number: 100-295537-75

1730

We are in the process of reviewing all bulky exhibits in order that we may dispose of those which serve no further purpose. Inasmuch as many of the bulky exhibits pertain to inactive cases and are occupying badly needed space, it is requested that the appropriate substantive supervisor review the above-listed bulky exhibit and render a decision as to its retention or disposition. A notation as to the decision reached may be placed on this memorandum. The memorandum should be returned to the Filing Unit of the Records Branch, Room 1113, Identification Building, for filing in the case file.

RECOMMENDATION:

That captioned bulky exhibit be reviewed and a decision rendered as to the retention or disposition of the material.

Re memorandum from L. E. Short to Mr. McGuire dated 10/28/59, regarding a San Diego suggestion that the retention period of Form FD 283 (FM Radio Station Log), which is now destroyed after one year, be changed to permit destruction after 30 days.

Destruction of Property

Communications Section has indicated it has no interest in these logs. The Laboratory considered the San Diego suggestion acceptable. The Training and Inspection Division requested the views of both the Investigative and Domestic Intelligence Divisions in this regard. The Domestic Intelligence Division saw no necessity for retaining the logs as their destruction would be permissive on the part of the SAC rather than mandatory.

From an investigative and evidentiary standpoint FM Radio Station Logs as currently maintained serve only to corroborate information that is available through other primary sources. Their destruction after 30 days upon the authority of the SAC on a permissive basis would appear to have no adverse effect upon criminal and related operations in the field. It is felt, however, that any instructions in this regard should include the proviso that in unusual cases or where circumstances should dictate the SAC may authorize the retention of these Radio Station Logs for an appropriate period of time. Pertinent portions of the FM Radio Station Logs retained would then be included as a 1-A exhibit to the investigative file and their ultimate destruction would depend upon the status of the case involved.

ORIGINAL FILED IN 66-159666-

ADDENDUM by Training and Inspection Division: AG:ag 12-17-59

We are of opinion FM Radio Station Logs (Form FD 283), copy of which is attached, could be destroyed on monthly basis in field after retention thirty days. Consideration has been given to their possible use in recording instructions to Agents by a field supervisor and their availability should the instruction later be checked for some reason; however, the form does not require and its instructions in the Manual of Instructions do not require that the message be recorded. Too, in major cases, offices keep an independent running log. Further, in interest of security of our communications, radio messages are normally terse or merely Agent whereabouts messages or discontinue messages etc. Log would still be available for thirty days re these. There is no required uniformity among field offices re entry of the message. The form answers normal needs for the day's traffic, and is also used by field offices as basis for monthly traffic summary report to Bureau. In larger offices where there is heavy radio-car traffic these logs accumulate rapidly.

RECOMMEND: Field be permitted to destroy Log on monthly basis after thirty days old.

If approved, Training and Inspection Division will handle pertinent Manual of Rules and Regulations and Manual of Instructions revision to so permit.

RECORDS MANAGEMENT
(66-18966)

ALL INFORMATION CONTAINED
HEREIN IS UNCLASSIFIED
DATE 8-10-82 BY SP4 ELW/PC

By memorandum dated September 8, 1959, from L. B. Short to Mr. McGuire captioned as above it was reported that the Files and Communications Division had received various suggestions toward the Streamlining of the Bureau's Record Management Program. Several suggestions related to Selective Service matters and referenced memorandum listed five suggestions requesting the Investigative Division's reply to each. They are:

(1) The SAC Savannah suggested that only one copy of reports in Selective Service Act cases be submitted to the Bureau except for the initial report and the closing report.

At the present time, the Manuals require the submission of two copies of all Selective Service reports including Conscientious Objector reports except in Public Law cases wherein the Manual requires the submission of five copies of the report. (Under the old 1940 Act only one copy of reports is necessary.) It was previously proposed by the Investigative Division that only one copy of all routine reports (not including Conscientious Objector or Public Law cases) be submitted to the Bureau with the exception of the closing report. At the time this proposal was submitted, the Training and Inspection Division was of the belief that this would make too many exceptions and that for sake of uniformity two copies of all reports were to be submitted. Notwithstanding the above, the Investigative Division recommends that only one copy of all reports except Public Law and Conscientious Objector cases be forwarded to the Bureau with the exception of the closing report. The vast majority of the approximately 3600 pending Selective Service cases would fall in the

MAIL ROOM ☐ TELETYPE UNIT ☐

ORIGINAL COPY FILED IN

category of necessitating only one copy of a report except the closing report.

(2) SAC Philadelphia suggested that Bureau consider having the field handle SSA-48 cases without submitting a report to the Bureau except SSA Fugitive cases and Conscientious Objectors.

Investigative Division recommends that this suggestion not be approved inasmuch as National Headquarters of Selective Service has requested one copy of every closing report in Selective Service cases which are used by them for various surveys in addition to the statistical data. In addition, the Bureau always wants reports reflecting statistical accomplishments, convictions, apprehensions, and recoveries. These statistics would be missed if the SAC suggestion were to be adopted.

(3) SAC Charlotte suggests Bureau reconsider suggestion by their assistant chief clerk to the effect that all 25-0 serials over ten years old be destroyed and that the majority of the 25-[illegible] cases consisting mainly of cases where investigation disclosed that the delinquency was not willful and the files are over ten years old also be destroyed.

Investigative Division concurs with this and recommends that all Selective Service investigative files wherein the delinquent was not willful and is over ten years old be destroyed. Investigative Division also recommends that the 25-0 serials over ten years old be destroyed. The reason for this recommendation is that the majority of these cases are opened shortly after the subject is eighteen years of age and has failed to register, has been picked up as a "no card" case or has failed to show up for induction at approximately age 22½ years. In all of these cases the subject's delinquency

has been removed and he has been inducted into the armed forces or has been deferred as a military reject. In these cases after ten years the subject would in every case be beyond the age of twenty-six years which is the maximum age of induction and the Investigative Division does not feel as though the retention of these type records would be of any useful value in the future.

In considering the adoption of this suggestion, it should also be borne in mind that while these nonwillful Selective Service investigative files do contain some background information regarding the subject, this same basic background information can be secured by the Bureau if necessary at any time in the future from the original Selective Service files which are maintained by the local draft boards. Also, it is believed that after the elapse of ten years the usefulness of this background information will be remote.

(4) SAC Los Angeles recommends that all 25-0 files be destroyed prior to 1948.

This suggestion is comparable to No. 3 above but is not as broad and consequently Investigative Division suggestion under No. 3 above would more than include the suggestion by the SAC in Los Angeles.

(5) SAC Los Angeles suggested that all Selective Service files prior to 1948 be destroyed in "no card" cases.

This suggestion also ties into suggestion No. 3 above but it is believed that No. 3 is even broader in that the time element as ten years rather than cases prior to 1948.

The above recommendations by the Investigative Division if approved should be considered as applying to all of the field offices as well as to the Seat of Government.

Memorandum to Mr. Rosen
Re: Records Management
(66-18966)

RECOMMENDATIONS:

(1) That referenced memorandum which is attached and instant memorandum be forwarded to the Domestic Intelligence Division for their comments and suggestions.

(2) That this memorandum and referenced memorandum along with the comments of the Domestic Intelligence Division be referred to the Training and Inspection Division for review and appropriate action.

Memorandum to Mr. Rosen
RE: RECORDS MANAGEMENT
66-18966

ADDENDUM: September 24, 1959

Comments of Domestic Intelligence Division

The following comments pertain to the suggestions regarding Selective Service matters and are being set out numerically as they are set forth in instant memorandum.

(1) The Domestic Intelligence Division concurs with the comments of the Investigative Division relative to this suggestion.

(2) This Division concurs with the comments of the Investigative Division and it should be stated that these reports might also contain information of interest to outside agencies and would be disseminated to those outside agencies in the event a request was received concerning the individual involved.

(3) Relative to this suggestion, this Division opposes the outright destruction of any Bureau investigative file even though the file contains only nonderogatory data. The files proposed for destruction by this suggestion may contain background information or other information of value which would be pertinent in handling a request from the Director, the White House, the Attorney General, an outside agency, etc., or they may contain information of value concerning individuals involved in a current investigation. In other instances, information in these files might be used to establish an identification or to eliminate other references. Rather than the outright destruction of files in the category mentioned, this Division recommends that consideration be given to microfilming said files after a specified lapse of time as is presently done in certain criminal categories.

(4) It is believed that the comments set forth above under (3) are applicable to this suggestion.

(5) It is believed that the comments set forth above under (3) are applicable to this suggestion.

OBSERVATIONS:

The suggestions in this memorandum basically are similar to suggestions concerning the destruction of nonderogatory files of a "nonrecidivist nature" commented upon by this Division in a

DRR:rjb

memorandum to Mr. McGuire captioned "Records Management" on 9-9-59. Both memoranda propose the outright destruction of files containing only background information of a nonderogatory nature after the files reach a certain age. This Division has opposed this outright destruction for the reasons stated above and has in each instance recommended that the files be placed on microfilm. It is recognized that there is a considerable cost factor involved and it is believed that prior to the submission of additional memoranda along the same basic lines but involving other categories of files, the question should be considered in Executive Conference as to whether the savings which would result from the destruction of the files would outweigh the value to the Bureau of retaining these files for the reasons stated.

ADDENDUM: RAM:mst 12/30/59

This exhibit is comprised of documents concerning the meeting of the III Conference of American States, International Labor Organization, which was held 4/1-17/46, at Mexico City. They concern the agenda and official activities of the conference. A report concerning the conference covering the participation of communist and communist front organizations at the meeting was submitted by Mexico. The material was not indexed.

RECOMMENDATION:

Since the pertinent information concerning the participation of subversive groups in the conference was included in a report and since the exhibit contains only the official activities of a UN sponsored group, the Domestic Intelligence Division recommends that this exhibit be destroyed.

During March, 1954, the Buffalo Office, through [redacted] obtained photographs of material in the possession of Karachunsky who was at that time active in a leadership capacity in the Communist Party Underground. The film was developed by the New York Office and one copy of each photograph was forwarded to the Bureau and to the Albany and Buffalo Offices. New York retained a copy of each photograph and returned to Buffalo the three rolls of film. The enclosure was never indexed at the Bureau.

Subject is currently a Security Index subject of the New York Office, and was active in the Communist Party as late as 1957. Information was received in 1958 that he was no longer a member of the Communist Party; however, he was uncooperative with Bureau Agents when approached for interview in March, 1959.

RECOMMENDATION:

It is recommended that the bulky exhibit be destroyed.

The material was furnished to appropriate offices for evaluation, dissemination to proper files, and indexing, and serves no [illegible] in the Bureau.

Trotter
W.C. Sullivan
Tele. Room
Holloman
Gandy

We are about completing microfilming old record cards for individual contributors from 1930 through 1956. This was previously approved and will save a tremendous amount of file space.

In the years gone by we have posted annually the crime reporting data of contributing cities to a "10-year record card" for each city in order to review that and pick up cases of extreme fluctuation in reported crimes to form the basis of correspondence to determine the reason. We no longer need to do that because we have these comparisons made from tabulating cards by the Voucher-Statistical Section in a much more convenient fashion. The "10-year record cards" occupy nearly two file cabinets of space. They are large cards, 10 by 16 in size, and posting them takes approximately 80 man days per year.

Since the pertinent data are on microfilm and the "10-year record cards" are no longer needed for year-to-year comparisons we can see no need to continue to post them or retain the cards we have.

RECOMMENDATION:

If you have no objection we will destroy our present supply of posted "10-year cards" and will refrain from posting such cards in the future.

ADDENDUM, PAGE TWO

DOMESTIC INTELLIGENCE DIVISION

ADDENDUM December 18, 1959

This file concerns an antiwar, anti-British and anti-Semitic propaganda circular entitled "An Open Letter to President Roosevelt From the Christian Mothers of America," copies of which were mailed on 8-28-42 from the New York City area to the White House, Congressmen, Federal judges, journalists, clergymen and Government officials. All copies were identical in content. Copies received by various recipients were furnished the Bureau and sent to the FBI Laboratory for examination. Investigation failed to identify the author of the circular and the case was closed on authority of the Department on 3-6-44.

The bulky exhibit is the Laboratory file maintained on this matter. The Laboratory has determined there is no further need for the bulky enclosure material other than original worksheets and one photograph each of the incoming material which has been separated by the Laboratory and placed in a separate envelope. The Laboratory suggests the destruction of the remainder of the enclosure but asks for the concurrence of the Domestic Intelligence Division.

The Statute of Limitations has run against any action in this matter and all letters were identical, several copies of which are in the case file. The Domestic Intelligence Division, therefore, has no objection to the disposal of the Laboratory file in accordance with the recommendation of the Laboratory.

Office Memorandum • UNITED STATES GOVERNMENT

TO : Mr. A. H. Belmont

DATE. December 16, 1959

FROM : Mr. S. B. Donahoe

SUBJECT HUNGARIAN ACTIVITIES IN THE U.S.
IS - HU
Destruction of Bureau Property - Gen.

Records Section requested review of 100-89-11-28, a bulky enclosure, to determine if the enclosure could be disposed of.

Enclosure consists of 6[illegible] issues dated 1948-1949 of the procommunist Hungarian-language newspaper "Magyar Jovo," together with brief translations of articles therein of possible security interest. Publication went out of business in 1953. These issues were obtained through fictitious subscription by New York Office. There has been no prosecution in this case, none is foreseeably anticipated, and if ever necessary other means would be used to introduce issues of this paper for evidentiary purposes.

The translations, which are indexed and should be retained, consist of editorial comments from a procommunist Hungarian viewpoint on the political and public issues of the time, comments concerning Hungarian emigre activities in the U.S., etc.

RECOMMENDATION:

Since these newspaper issues are of no current or foreseeable future value, it is recommended they be destroyed. The indexed translations should be retained for informative purposes.

SUBJECT: MEXICO - GENERAL
Destruction of Bureau Property

Bulky Exhibit File Number: 64-2700-2201

We are in the process of reviewing all bulky exhibits in order that we may dispose of those which serve no further purpose. Inasmuch as many of the bulky exhibits pertain to inactive cases and are occupying badly needed space, it is requested that the appropriate substantive supervisor review the above-listed bulky exhibit and render a decision as to its retention or disposition. A notation as to the decision reached may be placed on this memorandum. The memorandum should be returned to the Filing Unit of the Records Branch, Room 1113, Identification Building, for filing in the case file.

RECOMMENDATION:

That captioned bulky exhibit be reviewed and a decision rendered as to the retention or disposition of the material.

ADDENDUM: RAM:jlw 12/8/59

This exhibit is the film of various documents photographed by a confidential informant at three cities in Mexico in September, 1942. The film was developed, material was translated and copies of the translation are maintained in the case file. Only one item pertains to a Bureau investigation and copies of the pertinent item is maintained in that file.

RECOMMENDATION:

Since Bufiles already contain the substance of the exhibit and since the one substantive case involved was closed during World War II and there is no possibility of a further need for the film, the Domestic Intelligence Division recommends destruction of this exhibit.

In connection with our present program for destroying extra copies of material so only originals are filed, a suggestion by Miss [redacted], coordinator of the Checking Unit, has been received to extend this procedure to the machine copy of outgoing teletypes. Copies of incoming teletypes are already destroyed under approved procedures before going to file. It was observed in this regard there is one copy retained 90 days in the Communications Section for the incoming and 30 days for outgoing messages. Consequently, the control for verification purposes in the event a particular message is questioned at some later date seems to be adequate.

This suggestion deals exclusively with the machine copy of each outgoing message and if adopted, it would permit the Checking Unit to destroy the pink machine copy prior to forwarding the yellow to file. It is not believed the filing of this copy adds anything to the record, and as previously indicated, the other copy available for 30 days should resolve questions that might arise later. Thus, the following recommendations.

RECOMMENDATION:

(1) In view of the above, it is recommended that this suggestion be given favorable consideration so that the Records Branch will be permitted to destroy the pink or machine copy of all outgoing teletype messages before filing the yellow copy.

(2) It is also recommended that the instant memorandum be referred to the Training and Inspection Division for their attention and appropriate action.

INFORMATION CONTAINED HEREIN IS UNCLASSIFIED DATE 8-10-82 BY SP4ELW/ptc

ADDENDUM BY TRAINING AND INSPECTION DIVISION: AGG:jmp:lnm 12/8/59

Training and Inspection Division does not concur in the recommendation that Records Branch be permitted to destroy the pink or machine copy of all outgoing teletype messages before filing the yellow file copy. A true copy of the message sent would not be on record and there would be no means to check if there is a discrepancy in the message. For example in a Laboratory examination on a gun if the incorrect serial number is put in the teletype to a Police Department there would be no means to determine the serial number given although the yellow reflects the correct number. Inasmuch as we would not have any proof of the outgoing message this suggestion should not be adopted.

RECOMMENDATION:

That this proposal not be adopted because of the disadvantages indicated above.

We spell out digits to prevent juxtaposition of numerals when cutting tape and running off page limited copy for proofing prior to transmission. Although rare, it is humanly possible to have a complete omission of a word and the error slip in proofing prior to transmission. In an isolated instance should this happen the disadvantage of the suggestion is obvious.

UNITED STATES
ATOMIC ENERGY COMMISSION
WASHINGTON 25, D. C.

DEC 10 1959

Honorable J. Edgar Hoover, Director
Federal Bureau of Investigation
U. S. Department of Justice
Washington 25, D. C.

Attention: Mr. Joseph M. Fitzgerald
Liaison Representative

Dear Mr. Hoover:

We are in the process of developing procedures for the orderly disposal of personnel security files such as files of deceased persons and others whose return to the AEC program is remote. In other cases it would involve disposing of duplicate copies which are no longer of value.

Inasmuch as the investigative reports, memoranda, letters and other communications are on loan from the Federal Bureau of Investigation to the AEC, your approval is requested for the destruction of such material.

Both classified and unclassified material will be destroyed in accordance with the procedures for the destruction of classified government documents and appropriate records will be maintained of the material destroyed.

Sincerely yours,

J. A. Waters, Director
Division of Security

SUBJECT: ~~X~~ RECORDS MANAGEMENT -
~~X~~ DESTRUCTION OF OBSOLETE
INDEX CARDS

During the past year we were fortunate in being able to destroy more obsolete index cards than new cards put into our master indices. 1,204,649 new cards were filed. However, we removed and destroyed 1,288,331, a net gain of 83,682 cards.

This is a rare accomplishment, having occurred only once before during the year 1957 when we destroyed 64,408 more cards than were filed.

For many reasons the purging of obsolete references from our master indices is one of our primary and continuing objectives in line with good records management procedures. Beyond any actual savings in space and equipment, there are incalculable benefits of faster, more accurate and efficient indices searches. These savings are thus projected through the Bureau's whole operation wherein fewer files are handled and reviewed not only in the Records Branch but by the entire supervisory staff at the Seat of Government.

ACTION:

Informative.

SUBJECT: DESTRUCTION OF BUREAU APPLICANT PERSONNEL FILES

On 6-16-55, the Executives Conference approved destruction of Bureau applicant personnel files over 10 years old wherein no investigation was conducted and no derogatory information was reflected therein. By memorandum dated 11-20-59, I proposed destruction program be expanded to include Bureau applicant personnel files over 10 years old wherein investigations have been conducted but no derogatory information developed. If proposal adopted approximately 14,781 files could be destroyed now and an additional number each year hereafter. No Archival authority necessary since files of this type throughout Government service are on a general schedule permitting destruction.

Domestic Intelligence Division has no objections provided the index cards relating to the files to be destroyed are retained, but stated these index cards should reveal the name, birth date, and birthplace together with a notation as to the date the applicant-type investigation was completed and the fact that no derogatory information was developed. These index cards would enable the Bureau to know that an applicant was investigated and no derogatory information developed in case any question arises at some future date. The Administrative and Investigative Divisions concur with the proposal as modified by the provision of the Domestic Intelligence Division that the index cards be retained as indicated. The Investigative Division noted this would not cause any duplication of previous investigation inasmuch as the Bureau applicant index card would be picked up on a search and, when ordering investigation in a current applicant case, all field offices involved would be advised that Bureau files reflect a prior Bureau applicant investigation. The field would review their files in the prior investigation and incorporate the results of prior investigation in the current reports bringing the investigation up to date. Mr. Mohr noted this proposal should be taken up at Executives Conference where pros and cons can be carefully considered.

RECOMMENDATION:

That the Executives Conference consider the desirability of authorizing the Records Branch to destroy Bureau applicant personnel files over 10 years old wherein investigations have been conducted but no derogatory information developed. If proposal approved, the index cards relating to these files will be retained as indicated above.

SUBJECT: DESTRUCTION OF BUREAU APPLICANT PERSONNEL FILES

Tolson
Belmont
DeLoach
McGuire
Mohr
Parsons
Rosen
Tamm
Trotter
W.C. Sullivan
Tele. Room
Holloman
Gandy

On 6-16-55, the Executives Conference granted approval for the Records Branch to destroy Bureau applicant personnel files over 10 years old wherein no investigation was conducted and no derogatory information was reflected therein (67-80000-1823). Since that date we have destroyed 173,655 files in this category. The related abstracts and index cards have also been destroyed. This program has enabled us to save a large amount of expensive filing equipment and valuable expansion space, thus making it possible to contain the Personnel Records Unit in the same space for a number of years. Space is again becoming a problem.

In line with efforts to strengthen the Bureau's Records Management Program, it is proposed that the Records Branch be authorized to expand the Bureau applicant personnel file destruction program to include Bureau applicant personnel files over 10 years old wherein investigations have been conducted but no derogatory information developed. It is estimated that this would enable us to destroy approximately 14,781 Bureau applicant personnel files now and an additional number each year hereafter. No Archival authority is necessary. Files of this type throughout Government service are on a general schedule permitting destruction at any time.

It is realized that Bureau applicant investigative reports are sometimes referred to in connection with the Name Check Program. However, inasmuch as the files in the category proposed for destruction would be 10 years old and contain no derogatory information, their retention for this purpose alone is questionable.

REC- 96 66-3286-860

Inasmuch as this suggestion relates to the destruction of Bureau applicant personnel files and to the availability of information for dissemination (favorable only), it is recommended that this memorandum be referred to the Administrative Division, the Domestic Intelligence Division, and the Investigative Division for their comments prior to the final consideration of this proposal.

DESTRUCTION OF BUREAU RECORDS GEN L

RECOMMENDATIONS:

(1) That the Records Branch be authorized to destroy Bureau applicant personnel files over 10 years old wherein investigations have been conducted but no derogatory information developed.

(2) That this memorandum be referred to the Administrative Division, the Domestic Intelligence Division and the Investigative Division for their comments prior to the final consideration of this proposal.

Memorandum to Mr. McGuire
Re: Destruction of Bureau Applicant
Personnel Files

ADDENDUM: November 24, 1959

The Domestic Intelligence Division concurs with the suggestion of the Files and Communications Division that Bureau applicant personnel files over ten years old, when investigations have been conducted and no derogatory information developed, be destroyed. Similarly, there is no objection to the destruction of abstracts pertaining to these investigations. It is believed, however, that index cards concerning the destroyed files should be retained. This is necessary because of the following:

(1) Under the Bureau's Name Check Program, a requesting agency submitting a name check to the Bureau has in almost all instances checked the files of other governmental agencies. In those cases where we have previously disseminated reports of Bureau applicant investigations over ten years old to these other agencies, a reply of "No record" to the requesting agency would be inconsistent with information already in its possession and the requesting agency would undoubtedly recheck with the Bureau.

(2) In many instances, a requesting agency has previously been furnished Bureau applicant reports over ten years old. Should they resubmit a request on the same individual an answer of "No record" would be inconsistent with the answer previously given that agency.

(3) A request might be received from the Director, the Attorney General, or other highly placed Government official wherein there is knowledge on the part of the requestor that an individual has been the subject of a Bureau applicant investigation. Under these circumstances, we should be able to state that the person has been so investigated.

To adequately overcome the above problems, the index card retained should reveal the name, birth date, and birthplace of the person investigated together with a notation as to the date the applicant-type investigation was completed and the fact that no derogatory information was developed.

DMDRR:fjb

ADDENDUM OF ADMINISTRATIVE DIVISION 11-25-59 DCM:jkp WST per WSH

Administrative Division concurs in the recommendation of the Domestic Intelligence Division. Applicant files as old as ten years are of little value should a supplemental investigation have to be conducted in case the applicant should reapply. A full investigation would be necessary and the index card would clearly indicate that the previous investigation disclosed no derogatory information.

This Division is on record as having favored destruction of applicant files this old when similar suggestions of this type had been made.

RECOMMENDATION:

Accordingly, it is recommended that the Administrative Division concur in the suggestion of the Files and Communications Division as modified by the recommendation of the Domestic Intelligence Division.

This should be taken up at E.C. when Inspection Reports can be conferred considered.

DCM
11/27

Memorandum to Mr. McGuire
Re: Destruction of Bureau Applicant
Personnel Files

12/24/59

ADDENDUM OF EMPLOYEES SECURITY SECTION, INVESTIGATIVE DIVISION

Consideration has been given by the Employees Security Section to the suggestion of the Records Branch that Bureau applicant files be destroyed after a ten-year period in those cases in which no adverse information was developed. The Employees Security Section wishes to submit the following observations regarding this suggestion:

(1) Under the provisions of Executive Order 10450 in cases involving sensitive positions, it is required that a full field investigation be conducted, generally by the Civil Service Commission (CSC). As part of its investigation, CSC requests a name check of Bureau and other Government agencies and Bureau is obliged to furnish all pertinent information in its files to CSC. In cases where applicant-type cases have been conducted and reports prepared, copies of such reports are furnished to CSC.

(2) Information contained in previously conducted applicant-type investigations is utilized by the Bureau in conducting current investigations and it is often not necessary to duplicate prior investigation since available reports can be disseminated.

(3) We would have no knowledge of dissemination of reports. If these files are destroyed, then the only record as to dissemination made of them would likewise be destroyed. Destruction of these records would eliminate any possible evidence the Bureau had properly fulfilled its obligation to furnish available information to interested agencies.

(4) The suggestion raises the issue as to who will be responsible for deciding that a given case does not contain derogatory and/or disloyal allegations. What would appear to be trivial material at this time could very well be a highly pertinent fact in a future investigation.

CDC:lmc

Memorandum to Mr. McGuire
Re: DESTRUCTION OF BUREAU APPLICANT PERSONNEL FILES

SPECIAL INQUIRY SECTION

ADDENDUM OF INVESTIGATIVE DIVISION

December 1, 1959

The Investigative Division concurs with the recommendation for the destruction of Bureau Applicant files, over ten years old, where investigation was conducted but nothing derogatory developed.

Occasionally we receive a request from another governmental agency to conduct an applicant-type investigation of an individual who has previously been investigated as a Bureau applicant. These situations fall into two categories:

(1) Where the individual was hired by the Bureau
(2) Where the individual was not hired

In category 1, the other governmental agency is usually furnished with a summary memorandum reflecting the individual's Bureau service and the investigation is brought up to date from the date of the termination of Bureau service. In category 2, the old Bureau applicant file is reviewed. If the reports are suitable for dissemination they are furnished to the requesting agency and the field brings the investigation up to date. If the reports are not suitable for dissemination the field incorporates the results of the prior investigation in the current reports and brings the investigation up to date. In dealing with the instant suggestion we are concerned only with cases in category 2.

Due to the infrequency wherein we receive requests in category 2, it is felt that if the index cards (which are to be maintained) contain sufficient identifying data, there is no objection to the destruction of such files. We would pick up the index card on our search at the Seat of Government. When ordering the current applicant case, all field offices involved would be advised that Bureau files reflect a prior Bureau applicant investigation. They would be instructed to review their files in the prior investigation and bring the current investigation up to date. They would also be instructed to incorporate the results of the prior investigation in the current reports. Since the suggestion proposes only for the destruction of such files at the Seat of Government and not in the field, there would not be any duplication of the previous investigation.

SFC:kkn

This was based on memo for Executive Conf discussion 11/25/59 wherein Adm. Division heretofore expressed a favorable reaction. I am now advised there is a need for the reports. see memo 12/28/59 favoring retention 12/28 JK

See Addendum of Employees Security Section, page 6.

Memorandum to Mr. McGuire
Re: DESTRUCTION OF BUREAU APPLICANT
PERSONNEL FILES

12/28/59

ADDENDUM OF SPECIAL INQUIRY SECTION, INVESTIGATION DIVISION

The Special Inquiry Section has given consideration to the proposal to destroy Bureau applicant files over ten years old in which investigation has developed nothing derogatory. Many people seek other Government employment and are investigated by either the Civil Service Commission or the FBI and consequently, the reports in these files will be significant. They can be utilized for dissemination purposes and, of course, the information would be of interest to the other Government agency, even though it was not derogatory.

The Special Inquiry Section could function without these files, but they do have some value, particularly if the FBI was called upon to bring up to date the old investigation.

The Special Inquiry Section concurs with the comments of the Employees Security Section and would, therefore, prefer not to have the files destroyed.

W.C. Sullivan
Tele. Room
Holloman
Gandy

The Executives Conference of 12-21-59, consisting of Messrs. Mohr, Trotter, Tamm, Parsons, DeLoach, McGuire, Belmont, Rosen, and Clayton, was advised by Mr. McGuire that on June 16, 1955, the Bureau approved destruction of Bureau applicant personnel files over ten years old wherein no investigation was conducted and no derogatory information was reflected therein. A suggestion by Mr. W. G. Eames of the Files and Communications Division has been made proposing the destruction program be expanded to include Bureau applicant personnel files over ten years old wherein investigations have been conducted but no derogatory information developed. If this proposal is approved, approximately 14,781 files could be destroyed now and an additional number each year hereafter. No Archival authority is necessary since files of this type throughout Government service are on general schedule permitting destruction.

The Conference was advised that the Domestic Intelligence Division had no objection provided the index cards relating to the files to be destroyed are retained and that the cards reveal the name, birth date, and birth place, together with a notation as to the date the applicant-type investigation was completed and the fact no derogatory information was developed. Mr. Belmont concurred that this was the view of his division as the index cards so prepared would enable the Bureau to know that an applicant was investigated and no derogatory information developed in case any question arises at some future date. He stated no inconsistency would develop on future name check requests received on a person on whom dissemination had previously been made as the form would be sent back with a notation "no derogatory information developed in previous investigation."

Mr. Mohr advised that as a matter of theory he felt all investigation of personnel applicants should be kept as there might arise at some future date need to disseminate even nonderogatory information to the Civil Service Commission (CSC) or elsewhere. He advised Civil Service had an index card on each investigation of personnel we ordered and at some future date might

#139

11 DEC 31 1959

THREE

TWO

request copies of any investigative report. (This refers to Standard Form 79, two copies of which are furnished by the Bureau to CSC on each applicant investigation ordered. This form was adopted by CSC in 1953 on the basis of Executive Order 10450 dated 4-27-53 covering security of Government employees and is not involved in old Bureau applicant cases now ten years old. Civil Service now has pending before Archives, according to Hardy Allen of CSC, a request to destroy after 90 days all applicant records of CSC on persons not hired. We do not know, however, if the CSC index of Form 79's is included.) Mr. Mohr also pointed out that if original copies were destroyed at the Bureau, copies of these reports in the field might at some future time also be authorized for destruction and, further, that no criteria are indicated as to what is to be considered nonderogatory, nor who is to decide what is a favorable investigation or who is qualified to make such a decision. Since the Bureau is origin in Bureau applicant cases, destruction of old investigations at Bureau would be decentralization and records remaining would be spread in numerous field files. Mr. Mohr also felt there might be criticism if favorable investigations are purged on old cases, yet unfavorable files retained. Microfilming would not serve any useful purpose as there would be nothing to disseminate if the files were destroyed and all we had were microfilm copies.

The Investigative Division favors retention of these reports as the Employees Security Section, when requested by CSC for a name check, furnishes all pertinent information in Bureau files to CSC, including old applicant-type cases. Also, such old reports are used in current investigations making duplication of old reports unnecessary and, further, if destroyed these records would make it impossible for the Bureau to properly prove it fulfilled its obligation to furnish available information to interested agencies. Additionally, the Investigative Division feels what may now be considered trivial information could be highly pertinent in a future investigation. The Special Inquiry Section feels while it could function without these files, that such files have value if the FBI is called upon at some future date to bring old investigations up to date.

The majority of the Conference, consisting of Messrs. Mohr, Trotter, Tamm, Parsons Rosen, Clayton, and DeLoach opposed adoption of Mr. Eames' suggestion on the basis that all investigations of personnel should be kept regardless of the reasons why they were not hired.

(over)

Executives Conference Memorandum
Re: Destruction of Bureau Applicant Personnel Files Ten Years Old

The minority, consisting of Messrs. McGuire and Belmont, favored the destruction of investigative files on Bureau applicants where no derogatory information was developed on the basis that little use is ever made of this information and that if a person ever reapplied in view of the length of time since the earlier investigation the applicant would have to be investigated again up to date.

Respectfully,
For the Conference

SUBJECT: SUGGESTIONS #394-60
400-60

SUBMITTED BY MISS [redacted] b6 b7C
FILES AND COMMUNICATIONS DIVISION

SUGGESTIONS: 1. That the Correlation Unit be granted authority to purge names appearing on visit request forms from the Government Purchasing Commission of the Union of Soviet Socialist Republics. (This file contains 113 sections.)

2. That authority be given to Records Branch to destroy Transcript of Record on Richmond, Virginia, Police Department.

CURRENT PRACTICE: Rules in the Files and Communications Division do not grant authority for the purging of such material

With regard to the purging of names appearing on visit request forms, the name of the applicant applying for admission to the United States to visit various manufacturing plants is generally listed with one or two initials and the last name and no further identifying information. The Files and Communications Division is in favor of adopting this suggestion since there is no information in this file to identify these individuals. By eliminating these cards from the indices it will save time in referring to these names in searches. The Domestic Intelligence Division is opposed to the adoption of this suggestion because the form does indicate that an individual of that name was in the United States on the dates indicated. The form also lists the type of identification utilized by the individual which in many instances are State Department identification cards. From an investigative standpoint the potential of the names being indexed on these forms in assisting to identify former, current, or future Soviet intelligence agents is too great to permit the purging of the indices.

With respect to Miss [redacted] proposal to destroy Transcript of Record on Richmond, Virginia, Police Department, the Files and Communications Division is in favor of the destruction of these fingerprint records because the originals are maintained in the Identification Division. This file occupies approximately one and three-fourths drawers and contains mainly copies of identification records and transients. The submission of these reports was discontinued in September, 1943. The Identification Division has no objection to

Destruction of Bureau Property.

RE: SELECTIVE SERVICE ACT (25) GEN
INVESTIGATIVE REPORTS

In connection with our Records Management Program, you will recall that the Executives Conference approved the destruction of nonprosecutive Selective Service Act cases over ten years old in both the Field and the Seat of Government (66-18966-514). Archival authority was not necessary for field implementation of this program and appropriate instructions have been issued to the field. However, it was necessary to request specific authority from Archives for Seat of Government destruction. This has been done (66-18966-507) and we expect final approval for handling at the Seat of Government from the present session of Congress that has just started. 66-19087-34

Collateral to the above, consideration was also given to decreasing the number of copies of investigative reports currently being submitted to the Bureau in Selective Service Act cases. The Investigative Division recommended (66-18966-477XB) that only one copy of all reports (two copies presently required) except Public Law cases (five copies required) and Conscientious Objector cases (two copies required) be submitted to the Bureau with the exception of the closing report which would still necessitate two copies. The Domestic Intelligence Division concurred with this recommendation. The Training and Inspection Division has also concurred with the recommendation and recommended that the Files and Communications Division prepare appropriate instructions (66-18966-470).

There is attached an appropriate manual revision to effect the recommended changes in the number of copies of Selective Service Act reports being submitted to the Bureau.

SUBJECT: SAMUEL JAMES SOULE
INTERNAL SECURITY - R

ALL INFORMATION CONTAINED HEREIN IS UNCLASSIFIED EXCEPT WHERE SHOWN OTHERWISE.

Classified by SP8BTG/CAL 2-13-90 211847
Declassify on: OADR

~~CONFIDENTIAL~~

By memorandum dated 12/18/59 from Mr. Short to Mr. McGuire, a bulky exhibit (serial 141) in the file on Samuel James Soule, was referred to the Espionage Section for review in order to determine whether the exhibit could be destroyed. (C) [redacted] Copies of this material were made available to the Seattle Office by the Bureau by letter dated 2/28/48. Investigation in this case ultimately showed that money was being transferred out of China by Morris I. Soulevitch, brother of the subject, through religious organizations and, as a result, Samuel James Soule was assessed taxes and penalties by the United States Government in 1953 in the amount of $33,000. Extensive investigation has failed to show any espionage activities insofar as the subject is concerned.

b1

OBSERVATIONS: Destruction of Property - Gen'l

This material has served its purpose insofar as the previous investigation is concerned. Should it become necessary to introduce the material as evidence at any future time, (C) [redacted] in order to establish a proper chain of evidence.

166-3286
NOT RECORDED
133 DEC 30 1959

RECOMMENDATION:

In view of the above, it is recommended that the exhibit be destroyed and that this memorandum be forwarded with the exhibit to the Filing Unit of the ~~Records~~ Branch, Room 1113, Identification Building.

SECURITY MATTER - G

Bulky Exhibit File Number: 100-130527-66

We are in the process of reviewing all bulky exhibits in order that we may dispose of those which serve no further purpose. Inasmuch as many of the bulky exhibits pertain to inactive cases and are occupying badly needed space, it is requested that the appropriate substantive supervisor review the above-listed bulky exhibit and render a decision as to its retention or disposition. A notation as to the decision reached may be placed on this memorandum. The memorandum should be returned to the Filing Unit of the Records Branch, Room 1113, Identification Building, for filing in the case file.

RECOMMENDATION: DESTRUCTION OF BUREAU PROPERTY FOE VL

That captioned bulky exhibit be reviewed and a decision rendered as to the retention or disposition of the material.

Re memo from L. E. Short to Mr. McGuire dated 10/28/59, requesting observations of Laboratory Division regarding San Diego suggestion to change period of retention of Form FD 283 (FM Radio Station Log) from the present one year requirement to thirty days.

The Laboratory has previously agreed to the retention of Form FD 283 for a period of one year for various reasons which have since been nullified by the use of other administrative devices. For instance, faulty operation of any part of the FM radio system is now recorded in the equipment maintenance logs rather than in the FM station log. Interference on the Bureau FM radio frequencies is now reported immediately on FD-276 (Radio Interference Report) instead of relying on the station log. Therefore, insofar as the Laboratory is concerned, the San Diego suggestion is acceptable.

The only reason the Laboratory sees for the retention of the FM station log form for a period longer than thirty days would be that the SAC or an Inspector might have occasion to use the log as an administrative check on movements of or instructions given to Agents. This possible use would fall within the realm of the Training and Inspection Division's desires.

ACTION: None. For the information of Training and Inspection Division.

1 - Mr. McGuire (Attention: Mr. Short)

Reference is made to SAC Letter 59-43 (C) wherein we requested suggestions to strengthen the Bureau's Records Management Program.

By letter dated 9-28-59, the SAC, San Diego, suggested that the retention period of Form FD-283 (FM Radio Station Log), which is now destroyed after one year, be changed to permit destruction after thirty days.

The Manual of Rules and Regulations, Part II, Section 3, Page 15, Item I-2, authorizes the destruction of this Log on a monthly basis when one year old if of no further value.

RECORDS BRANCH OBSERVATIONS:

The suggestion has merit from a records management standpoint in that it would result in a reduction in the retention period of material presently being retained throughout the field. Inasmuch as the supervision of material relating to FM Radio Stations throughout the field is handled by the Laboratory, this suggestion should be referred to that Division for observations prior to final consideration.

COMMUNICATIONS SECTION HAS NO INTEREST IN THESE LOGS. 10/29

RECOMMENDATIONS:

1. That the observations of the Laboratory Division be secured regarding the above suggestion prior to final consideration.

2. That this suggestion be referred to the Training and Inspection Division for review.

SUBJECT: Destruction of Bureau Property
ALIEN ENEMIES DEPORTED FROM LATIN AMERICA
INTERNED IN THE UNITED STATES
ESPIONAGE - GERMANY

Memorandum from Mr. Short to Mr. McGuire dated 11/19/59 requested review of bulky exhibit of serial 561 of captioned file.

This exhibit consists of approximately 353 prints made from negatives furnished with Legat, Guatemala, letter of 6/25/45 (serial 538) which contained biographical information and photographs of German deportees and repatriates made available by the Guardia Civil of Guatemala City. All of the information contained therein is in the Spanish language and no translation has been made.

Copies of these negatives were made at the request of Legat, Guatemala, and furnished to him and to ONI, Washington, D. C. Memorandum of Mr. Carson to Mr. Ladd dated 9/10/45 forwarded this exhibit to the Records Section to index each name which was done noting, however, that the information contained in these prints was largely a duplication of information which had previously been secured. In view of this no foreseeable use of this exhibit is seen if retained, and there is no reasonable possibility destruction would eliminate from our files data to which we might have to refer to in the future.

RECOMMENDATION:

That the bulky exhibit of serial 561 of captioned file be destroyed.

SUBJECT: HITLER JUGEND (HITLER YOUTH ORGANIZATION)
INTERNAL SECURITY - GERMANY
DESTRUCTION OF BUREAU PROPERTY

Memorandum from Mr. Short to Mr. McGuire dated 12/18/59 requested review of bulky exhibit of serial 35 of captioned file to determine if it should be destroyed or retained.

This exhibit consists of a copy of a book entitled "The Hitler Jugend" (The Hitler Youth Organization) prepared by the Supreme Headquarters Allied Expeditionary Force Evaluation and Dissemination Section, G-2, (Counter Intelligence Subdivision) and is considered a basic handbook on the Hitler youth movement. This book contains information pertaining to the historical background, development, organization, conscription, training, and other phases of this youth movement. This material was made available to Special Agent S. W. Reynolds by Lt. Colonel B. P. Haynes in December, 1944, for possible interest of this Bureau. This book is classified "~~Confidential~~" and bears serial number 84227.

Considerable indexing of the names of leaders and officials of this organization has been made, however, no identifying data regarding them is available. There is no obligation to return this exhibit, and it was furnished to the Bureau for information purposes. No foreseeable use if retained in Bureau files is seen of this exhibit. There is no reasonable possibility destruction would eliminate from our files data to which we might have to refer to in the future.

RECOMMENDATION:

That bulky exhibit of serial 35 of captioned file be destroyed.

SUBJECT: COMMUNIST PARTY OF SPAIN
SECURITY MATTER - C

Destruction of Bureau Property - Gen.

Reference is made to memorandum from Short to McGuire dated 12/16/59 which recommended that bulky exhibit 100-163705-116 be reviewed and decision rendered as to retention or disposition of material. Bulky consists of submission slips from the U. S. Office of Censorship covering communications during 1942 and 1943 of Antonio Mije Garcia, described as leader of Spanish communists in Mexico, whose name had been placed on the General Watch List. (X) (U)

Antonio Mije Garcia was born in Spain 9/24/05. He was a member of the Spanish Communist Party (PCE) before the establishment of the Spanish Republic and was also a member of the Party Central Committee (PCC) before 1931. He was trained at the Leninist School of the Comintern and was part of Spanish delegation to VII Congress of Communist International. From 1936 to 1937 (during Spanish Civil War) he was PCE representative to War Department. From 1937 until end of the war (1939) he was member of Political Bureau of PCC. At end of the war he went to Mexico and was important director of PCE affairs. In 1946 he went to France where he was member of Politburo of PCE in France. In 1950 he was exiled from France as communist and eventually left France clandestinely for Rumania. In 1953 he reportedly was back in France. In 1954 he reportedly was member of Central Committee of PCE, elected at the 5th Party Congress held in early November, 1954, in Paris, France. In 1955 he reportedly visited USSR. Latest information received concerning Mije

b1

(S) [redacted] was one of three individuals who went to France to institute the "new line" which the Soviets had decided to follow with the Spanish exile groups. At that time, the Foreign Division of the Communist Party of the Soviet Union was renewing its efforts to establish united fronts among various Spanish emigrant groups and within the antiregime underground movements inside Spain. Mije is not of current interest to Bureau. (No main file - approximately 150 references on Mije.)

Done 2/9/60 Bulky material was placed in file and never indexed. There is no indication as to what use this particular material was made by the Bureau; appears to be of no foreseeable use; and no need to return to original source.

MARTIN KENNETH TYTELL
TYPEWRITING EXPERT
DESTRUCTION OF Useless Property - General

With a letter dated 1/27/60, the New York Office forwarded to the FBI Laboratory six reels of a monitored broadcast over station WOR, New York, from 12:00 M to 5:00 A. M., 1/23/60, in a program billed as "Hiss Case Expert on the Air." On the panel were JULES B. ST. GERMAIN (phonetic) and BEN ISKOWICZ (phonetic), with "LONG JOHN" NEBEL acting as moderator.

The featured guests were introduced as MARTIN KENNETH TYTELL, a document analyst and typewriter expert, a man who sprang to national prominence in 1951 in the ALGER HISS case, and his wife, PEARL TYTELL, a handwriting expert and forgery expert. Both were also featured in an article appearing in the February, 1960, issue of CORONET magazine.

Brash, arrogant, and with a "private eye" complex, 46 year-old MARTIN TYTELL stated he had appeared as an expert in court many times in both civil and criminal cases. About 1951 he spent a year in reconstructing a Woodstock typewriter which duplicated the typing of the Woodstock typewriter used in preparing the so-called Baltimore pumpkin papers in the ALGER HISS case. Only [redacted], a Boston document expert, had the "guts" to confirm his work in this case; everyone else refused to do so because of the hysteria which prevailed at that time. This established, he claimed, that any typewriter can be duplicated, a job he said he could perform in 3 or 4 days provided he had access to the machine itself. He would do this by making casts of the type faces, then he would realign the type bars, and the resulting typewriting would be so well duplicated that the experts could not tell them apart.

MARTIN TYTELL went on to say that he visited all the important crime detection laboratories in the world, including Scotland Yard, the Irish Police, the Post Office Department, and the Veterans Bureau. Of

those in this country, he had special praise for the Veterans Bureau, which he said hired most of its people from the FBI because the FBI does not give civil service status. But the best in the world, he said, is the one at Wiesbaden, West Germany, where they use IBM computers in connection with their typewriting examinations. He plans to go there to write a thesis and to complete his studies in preparation for his doctorate. The FBI Laboratory was never mentioned.

MARTIN TYTELL's enthusiasm carried him so far as to say that he could identify the typist of any document, even if an electric typewriter had been used. The panel was noticeably skeptical of this claim.

PEARL TYTELL stated that she had appeared in court as an expert many times. Most of the questions were directed to her, and she appeared to handle the matter reasonably well. During the interview, members of the panel handed her a series of handwriting tests, but she refused to give a positive answer on the ground that the standards were inadequate. When confronted with the question of why experts sometimes appeared on opposite sides of an issue, she responded that "in many cases there is room for a difference of opinion." She claims to have learned her profession by working with [redacted], and by observing details during the conduct of her practice. b6 b7C

Both stated that they had conducted two courses in document examination in the graduate school of public administration at New York University, for which three credits were allowed. The first such course was given in 1955. Both discussed numerous cases in which they apparently conducted most of the field investigations, too. Except for the HISS case, none was identifiable with any of the Bureau's cases.

The FBI was mentioned in some three instances, but never in a derogatory manner.

The six reels of tape covering this broadcast are in the custody of SA Fred M. Miller who audited them. They will remain in his custody until authority to destroy them is received.

RECOMMENDATION: That the six reels of tape be retained for 60 days, and that they be destroyed after that time.

Reference is made to memorandum from Short to McGuire dated 12/18/59 which recommended that bulky exhibit 100-181575-33X be reviewed and decision rendered as to the retention or disposition of material. Bulky consists of two copies each, translated from the French language, of following reports made available in 1945 by [Major Jacques Chevallier, Head of the Counter-Intelligence, French Military Mission, Washington, D. C.:] (S) (U)

"Vichy Correspondence - Far East"
"Vichy Correspondence - American Labor Disturbances and Reactions"
"Vichy Correspondence - Activities in Canada, Central America, Great Britain, Mexico, Panama and South America"
"Vichy Correspondence - [illegible] War and Political Activities" (S) (U)

These reports were obtained unofficially by [Major Chevallier] with the cooperation of the Washington Field Office prior to turning over the old Vichy Chancery to the French representatives in 1945. This correspondence reveals that the Vichy Government was very active in reporting all pertinent information of a military, naval, economic and sociology nature prior to America's entry into World War II and to the breaking of relations between this country and the Vichy Government. [Chevallier] also furnished this material to French Counter-Intelligence in Paris. (S) (U)

The material in the bulky has been indexed. However, there is no indication as to what use this particular material was made by the Bureau; appears to be of no foreseeable use; and no need to return to the original source.

SUBJECT: SUGGESTION 349-60
SUBMITTED BY MRS. [redacted]
FILES AND COMMUNICATIONS DIVISION

b6
b7C

"Destruction of Bureau Property - General"

Original suggestion in this matter was that foreign language publications presently occupying twenty 5-drawer file cabinets in Publications Section of Filing Unit be destroyed based on fact they were (1) old, (2) in a foreign language, (3) untranslated, (4) not indexed and (5) never called by Agent Supervisors.

In my memo to you 12/22/59 it was pointed out extensive research, title by title, to determine reason for acquisition of this material and necessity for retention would be required to make firm determination as to destruction which would be expensive and time-consuming. It was felt that destruction was warranted based on five conditions itemized above and it was so recommended.

Memo Malone to Mohr 1/21/60 represents final consideration of suggestion and recommends destruction on basis of five conditions noted but with proviso that responsible Agent Supervisor in Domestic Intelligence Division review material prior to destruction.

It appears reasonable to conclude that material was reviewed by responsible Supervisor at time of acquisition and since not translated apparently it was of little use, if any. It is respectfully pointed out that without translation proposed review of this material by a responsible Agent Supervisor would not be practical. These publications include over 130 different types in different languages ranging in date from 1919 to 1955. Any practical review to assure data of value was not destroyed would require summary translations of each publication by Cryptanalysis-Translation Section, subsequent review by number of Agent Supervisors familiar with varied subject matters and extensive tracing of reasons for acquisition. Much of it was received on unsolicited basis. On the basis of five conditions in suggestion itself, which emanated from and was endorsed by Records Branch, it is not believed expense involved in such a review is justified.

66-3286

RECOMMENDATION: Recommend the provision for individual review be reconsidered by Training and Inspection Division.

ESPIONAGE - G

Property Destruction of Bureau

Re memorandum Mr. Short to Mr. McGuire dated 11/19/59 which recommended that bulky exhibit 64-29373-39 be reviewed and a decision rendered as to the retention or disposition of the material contained in the above bulky exhibit. It is to be noted that re memo bears notation that "Laboratory has no objection to destroying bulky enclosure (serial 39) except Lab. worksheets should be retained in file."

Above bulky exhibit contains approximately 75 Photostats of letters with Photostats of envelopes in which these letters were mailed. Bulky also contains Lab work sheets on these letters and envelopes. The above Photostats were forwarded to the Bureau by our representative in Buenos Aires, Argentina, in 1944 and 1945 and were obtained by our representative as a result of arrangements made with two confidential informants in Buenos Aires to intercept all mail addressed to Post Office Box 1527 in that city. Above letters are in German and Spanish languages and cover letters transmitting Photostats of these letters to the Bureau contain English translations of portions of some of these letters. They were submitted for cryptographic and document examination by the Laboratory. File reveals that Heinrich G. Homann, managing editor of firm which was closely connected with all Nazi activities in Argentina, was receiving mail through above-mentioned Post Office box in Buenos Aires. Mail was addressed to subject. Bufile in this matter reveals subject was dentist in Buenos Aires and investigation conducted revealed no derogatory information concerning subject. Homann became fugitive from justice in Argentina subsequent to his being up for deportation from that country. (S) (U)

Above Photostats not indexed. There is no foreseeable use for them if retained and no reasonable possibility that their destruction will eliminate from Bufiles data to which we might have to refer in future.

INTERNATIONAL LITERATURE
SECURITY MATTER - C

Bulky Exhibit File Number: 100-352562-20

We are in the process of reviewing all bulky exhibits in order that we may dispose of those which serve no further purpose. Inasmuch as many of the bulky exhibits pertain to inactive cases and are occupying badly needed space, it is requested that the appropriate substantive supervisor review the above-listed bulky exhibit and render a decision as to its retention or disposition. A notation as to the decision reached may be placed on this memorandum. The memorandum should be returned to the Filing Unit of the Records Branch, Room 1113, Identification Building, for filing in the case file.

RECOMMENDATION:

That captioned bulky exhibit be reviewed and a decision rendered as to the retention or disposition of the material.

ADDENDUM: DOMESTIC INTELLIGENCE DIVISION February 3, 1944

This bulky exhibit consists of two rolls of microfilm taken in 1944 at the New York Public Library of certain copies of "International Literature," a Russian publication. The film covers 38 issues of the magazine during the period 1934-42.

A check with the Publications Section, Records Division, discloses that they are maintaining in their files prints of the microfilm with respect to all issues which were photographed at the New York Public Library. No prosecutive action involved or contemplated.

RECOMMENDATION:

Inasmuch as photographs of these issues of "International Literature" are on file in the Publications Section, which fact is indicated on the pertinent serial on the Bureau file, it is recommended the microfilm being retained as bulky exhibit 100-232562 serial 20, be destroyed.

DENATURALIZATION PROCEEDINGS - G
DESTRUCTION OF BUREAU PROPERTY

Memorandum Short to McGuire 1-11-60 referred bulky exhibit 100-35806-147 to this Division for review and disposition. Exhibit consists of 3 sets of photographic copies of voluminous miscellaneous personal and business papers, correspondence with relatives, attorneys and stockbrokers, income tax returns, address books, working notes on chemical formulas, proposed wills and burial instructions, pages from foreign language dictionaries, certificates of service in German army prior to and during World War I, and similar material, a great deal of which is in the German language. Material was obtained during investigation and eventual arrest of subject 5-3-43, and submitted to Bureau Laboratory for translation and comparison in connection with handwriting and typewriting examination. Original data was returned to Pittsburgh Office for possible use in subject's trial. At trial on sedition charges 6-1-43, subject pled guilty, was sentenced to 10 years in prison, fined $5,000, and the case was closed 8-25-44.

RECOMMENDATION:

There is no foreseeable value to this material and no future use can be anticipated. It is recommended that this entire bulky exhibit be destroyed. The Laboratory agrees with this disposition.

Destruction of Bureau Property

Re memo Mr. Short to Mr. McGuire, 12/14/59, which recommended that bulky exhibit 100-157268-30 be reviewed and a decision rendered as to the retention or disposition of this bulky exhibit.

It is to be noted that the above bulky has been reviewed by the Laboratory and the Laboratory noted on re memorandum, "Laboratory has no objection to destruction of bulky exhibit (serial 30) except Laboratory worksheets which should be retained in file."

Above bulky contains Photostats of approximately 50 letters and Laboratory work sheets pertaining thereto. Letters are in English, French, and German languages. They were not indexed and examination of letters in English language indicates that they deal with business transactions. The above letters were directed from addresses in Venezuela and Argentina to Berne, Switzerland, and vice versa. File in this matter indicates address in Switzerland to which majority of above letters were directed was "drop" utilized by Germans. b7D

Majority of above Photostats were received from Office of Censorship, Washington, D. C., in 1944 and 1945 for examination by Lab. Bulky also contains Photostats of material received from [redacted] which material was returned to [redacted] after examination by Lab.

It is not believed that the above Photostats would be utilized in the future nor is there any reasonable possibility that destruction of these Photostats would eliminate any material from our files to which we might have to refer at future date. As noted above, Photostats not indexed.

ALL INFORMATION CONTAINED
HEREIN IS UNCLASSIFIED
DATE 8-10-82 BY SP4 ELW/rks

RECOMMENDATION:

That Photostats in above bulky exhibit be destroyed and that Laboratory work sheets contained in bulky be maintained.

ESPIONAGE - SPAIN

O Destruction of Bureau Property - General

Reference is made to memorandum from Short to McGuire 12/18/59 which recommended that bulky exhibit 100-198702-36 be reviewed and decision rendered as to retention or disposition of material. Bulky consists of Photostat of case history prepared by Censorship, Miami, Florida, relating to subject, including resume of his activities from time of birth (1887) to 1943, and brief biographical sketches of associates, furnished Bureau 1944. The names contained in this case history have been indexed.

Subject born Barcelona, Spain, 11/3/87; studied political economy at University of Berlin; received Doctor of Law Degree at University of Madrid in 1910. He arrived in U.S. for permanent residence 10/12/43. He was described as internationally prominent businessman having wide circle of contacts in government, business and cultural fields and was renowned authority on subject of economics. He professed to be anti-fascist, but allegations had been made that he supported Franco during Spanish Civil War; however, as of 1944 he reportedly was in favor of restoration of monarchy. [redacted] advised that in 1940 subject was reported to have worked with Germans in Barcelona for several years although he cooperated with [redacted] in 1941 and had often been source of useful information to [redacted] was ostensibly favorable to Allied cause and not pro-Franco; however, he was characterized as very clever individual and somewhat of intriguer. When subject was interviewed at Miami before Security Panel Board in October, 1943, he denied Falangist sympathies although he admitted an acquaintanceship with Franco. He further stated he was never active politically with Franco nor had he ever advised him concerning economics or financial matters. Subject was interviewed by Bureau 1944 at which time he advised he was member of moderate liberal party in Spain, that he had represented this party in Parliament from 1931 until 1936, fled from Spain at outbreak of Spanish Civil War and claimed to be no longer active in Spanish politics. Case closed since 1944.

b7D

There is no indication as to what use this particular material was made by Bureau; it appears to be of no foreseeable use; and no need to return to Censorship, the original source.

SUBJECT: GEORGE J. RUCHERT, was.
ALIEN ENEMY CONTROL - GERMANY
Destruction of Bureau Property

By memo Short to McGuire dated December 18, 1959, it was requested that bulky exhibit 100-181338-30 be reviewed for determination as to disposition or retention. Investigation of this case instituted February, 1943, on info that subject was attempting to recruit persons for purpose of assassinating prominent Jews in American public life, some of whom being Governor Herbert Lehman, Justice Felix Frankfurter and Mayor LaGuardia (sic). Subject was interned as enemy alien on August 8, 1944, and was released December 5, 1945, at direction of AG. This exhibit is a booklet prepared by FBI Laboratory consisting of Photostats of anonymous letters and cards written by subject to prominent individuals containing anti-Semitic statements and threats to harm the recipients. It was used as a ready reference for Lab and was not indexed and Lab recommends its destruction. The original evidence is retained in files of Lab.

66-3286 -
NOT RECORDED

SUBJECT: INSTITUTE OF PACIFIC RELATIONS (IPR)
ESPIONAGE - R

Memorandum Short to Mc Guire 1/11/60 requested bulky exhibit to serial 825 of this file be reviewed and a decision rendered as to its retention or disposition. This bulky exhibit consists of 261 Photostats of IPR documents, the originals of which were loaned to us by the McCarran Committee in 1951. After Photostats were made, the originals were returned to the Committee. A review of these documents indicated that we had previously received copies of them as a result of our review of IPR documents conducted during May and June of 1950 at the home of [redacted] Lee, Massachusetts. No use was made of these Photostats in 1951 or since, and there appears no logical reason for their retention. They are not indexed, and their destruction would not eliminate from our files information to which we might have to refer in the future. In this regard it is noted that they are duplicates of documents already in file.

DESTRUCTION OF BUREAU PROPERTY

This memorandum has been prepared for the purpose of explaining Espionage Section concurrence in disposal of bulky exhibit, Serial 14. This bulky exhibit consists of photographic prints representing documents seized from subject by Travelers' Censorship at Brownsville, Texas, 1/5/45. Documents were examined by the Laboratory for secret writing and cryptographic significance, and handwriting and typewriting were checked against the National Security File without effecting an identification.

Herwitz, a candy salesman from New York whose wife and family resided in Brookline, Massachusetts, had spent considerable time in Mexico with Constancia de la Mora, a Spanish loyalist refugee who was employed by the Soviet Embassy in Mexico City. There were indications that Herwitz had a very personal interest in her. The correspondence obtained by Censorship related primarily to two situations, (1) the difficulties Herwitz had with the other members of his candy firm, Alfred Jurzykowski and Alfred Schenker and (2) correspondence regarding Constancia, who was attempting to get a visa to enter the United States. In this regard, some efforts were being made by a New York communist attorney, Jacob B. Aronoff.

For the completion of the file in this matter, it should be recorded that Aronoff is deceased, De la Mora was killed in an automobile accident in Guatemala in 1950, Alfred Schenker apparently died in the Winter of 1957-1958, and Jurzykowski pleaded guilty in 1957 to an indictment charging him with attempted evasion of [illegible] income taxes and in 1953 was residing in Brazil where he had taken out Brazilian citizenship. There are no current references in Abraham Herwitz in Bureau files; however, it is probable that Abraham Herwitz is dead. His wife's name was shown as Frances Oniell Herwitz of Brookline, Massachusetts, at the time he [illegible] States, 1/5/45.

Re: Abraham Herwitz

In the case entitled "Lenton Morrill, Departmental Applicant, U.S. District Judge, New Jersey," the report of Special Agent Lawrence J. Quinn dated at Boston [illegible] (77-77424-35) shows that Frances Herwitz, nee Morrill, also known as Mrs. Abraham Herwitz of Brookline, Massachusetts, the sister of the departmental applicant, took over a commodity company in 1954 upon the death of her husband.

RECOMMENDATION:

Since the documents represented by the photographic prints do not have value as evidence and the principals to which they refer are of no further interest to the Bureau, the Laboratory Section has no objection to disposal of this bulky exhibit.

SUBJECT: JOSEPH WOODROW WEINBERG
IS - R
PERJURY

Memo Short to McGuire 12-22-59 requested bulky exhibit to Serial 255 instant file be reviewed and a decision rendered as to its retention or disposition.

Subject, in testimony before HCUA in May, 1949, advised he had never met Steve Nelson prior to 1949. CIC had previously advised that on 8-17-43 its agents connected with Manhattan Engineer District conducted surveillance on subject and observed him meeting with Nelson, Bernadette Doyle, another Communist Party functionary, and others. We instituted perjury investigation re subject. Pursuant to Department's request San Francisco obtained an enlarged map illustrating routes followed by Nelson and Doyle on the occasion of the 8-17-43 meeting and also showing route taken by Doyle on the occasion of a 9-15-43 meeting with Weinberg. In addition there was transmitted a map showing an area surrounding Doyle's home which was visited by Weinberg 6-10-43. The originals of these maps were sent to Department and Photostats retained in Bufiles. These Photostats comprise bulky exhibit to Serial 255 of instant file. They are not indexed. Since Weinberg was acquitted of perjury charge their appears to be no use for this exhibit if retained and its destruction would not remove from our files information to which we might have to refer in the future.

RECOMMENDATION:

That bulky exhibit to Serial 255 of instant file be destroyed.

ALL INFORMATION CONTAINED HEREIN IS UNCLASSIFIED DATE 8/19/82 BY SP4 ELW/rcs

During World War II the Sicherheitsdienst, known as the S.D., was the Security Service for the German Nazi Party. Originally subject organization was principally concerned with political matters of interest to, or concerning, the Nazi Party and its members; however, the subject organization branched out into the fields of espionage and counterespionage, entering into competition with the Abwehr, the traditional German intelligence service.

In conjunction with the Bureau's SIS program and related responsibilities concerning internal security during World War II, a control file was opened concerning subject organization. This file also encompassed data re other German foreign intelligence organizations and data relating to German internal police matters.

Memo Short to McGuire 1/19/60 requested bulky exhibit to serial 288, instant file, be reviewed for retention or destruction. Bulky exhibit was reviewed by SA W. D. Stewart on 1/26/60.

This bulky consists of memorandums and other correspondence, bearing dates between 5/41 and 11/32 in the German language, found in the personal files of Walter Schellenberg, Commandant of the Reichsicherheitshauptant (RSHA), a German counterespionage group, affiliated with subject organization. The above-mentioned material was forwarded to the Bureau by cover letter 6/8/45 from Frankfurt, Germany, by SA Frederick Ayer, Jr., and it was translated at the Bureau. No obligation to retain material, which was not indexed and was furnished for information. A review of this material fails to reveal any information of an intelligence nature which would now be of any value to the Bureau and its retention in Bufiles would serve no useful purpose. 66-3286-

INFORMATION IN ID 4 REMAINS UNCLASSIFIED PER E.O. 12958 SP8 BTS/SCL 4-30-97 211.845

During World War II the Sicherheitsdienst, known as the S.D., was the Security Service for the German Nazi Party. Originally, subject organization was principally concerned with political matters of interest to, or concerning the Nazi Party and its members; however, the subject organization branched out into the fields of espionage and counterespionage, entering into competition with the Abwehr, the traditional German intelligence service.

In conjunction with the Bureau's SIS program and related responsibilities concerning internal security during World War II, a control file was opened concerning subject organization. This file also encompassed data re other German foreign intelligence organizations and data relating to German internal police matters.

Memo Short to McGuire requested bulky exhibit to Serial 385, instant file, be reviewed for retention or destruction. Bulky exhibit was reviewed by SA W. D. Stewart on 1/22/60.

This bulky exhibit consists of one roll of film forwarded to the Bureau for developing via letter 3/20/46 from Legat, London. The film contains photographs of Situation Report Number 8 entitled "AMT VI of the RSHA GRUPP VI C" dated 2/28/46. The film was made available to Legat, London, by the SSU, War Department. Bulet to Legat, London, 4/25/46, Serial 385 of instant file, advised the Legat that above-described film was overexposed and was illegible to a large degree and that the Legat should obtain a legible copy of the above-mentioned Report since this Report seemed to deal with activities of the German Intelligence Service. Legat, London, letter 5/16/46 transmitted a printed copy of the above-described Report which is filed with Legat letter 5/16/46 in instant file, Serial 387.

No obligation to return film which serves no useful purpose in our files. No indexing was done re film.

NOT RECORDED

SUBJECT: SICHERHEITSDIENST
ESPIONAGE - G

During World War II the Sicherheitsdienst, known as the S.D., was the Security Service for the German Nazi Party. Originally subject organization was principally concerned with political matters of interest to, or concerning the Nazi Party and its members; however, the subject organization branched out into the fields of espionage and counterespionage, entering into competition with the Abwehr, the traditional German intelligence service.

In conjunction with the Bureau's SIS program and related responsibilities concerning internal security during World War II, a control file was opened concerning subject organization. This file also encompassed data re other German foreign intelligence organizations and data relating to German internal police matters.

Memo Short to McGuire 1-12-60 requested bulky exhibit to serial 25 (Parts I and II), instant file, be reviewed for retention or destruction. This exhibit was reviewed by SA W.D. Stewart on 1-20-60 and found to contain in Parts I and II three rolls of German propaganda film from which two sets of prints were prepared and thirteen books in German relating to such topics as German police law, criminology, international crime, international police cooperation, and the organization of intelligence services. The books and films were obtained by the Legat in Lisbon, Portugal, from the office of Dr. Erich Schroeder, head of the Gestapo in Portugal who worked under the cover of Police Attache in the German Mission prior to its closing. These books and films were furnished Bureau by letter 8-31-45 by Legat, Portugal, for the Bureau's interest. There is no obligation to return the books or films. No indexing was done re these items; they are of no foreseeable use if retained; and nothing of value would be eliminated from our files by their destruction to which we may wish to refer to in the future. The films were forwarded with the idea that they were of no security value but Bureau may wish to use pictures for preparation of exhibits from time to time. Pictures are of a propaganda nature, glorifying the German army and are of no use to Bureau and apparently have never been used by the Bureau.

SUBJECT: ABWEHR - GERMANY

Memorandum Short to McGuire dated 12-4-59 requested review of bulky exhibit of Serial 61 of captioned file to determine if it should be retained or destroyed.

This exhibit consists of 11 folders of Photostats made from 2 rolls of microfilm furnished to the Bureau by Colonel R. L. Hopkins, MIS, who had received them from Captain E. Bondy of G-2, European Theater in December, 1945. This microfilm was given to Laboratory and 2 copies were made of the data contained therein, one copy being retained in Bufiles and the other copy furnished to MIS along with the original microfilm.

These records consist of personal files of former agents of Abwehr Nebenstelle, Bremen and of the files concerning Dr. Paul Kuhner. It is in the German language and no translation of these records has been made nor has the information been indexed.

In view of this, it is believed there is no reasonable possibility its destruction would eliminate from our files data to which we might have to refer in the future. There appears to be no foreseeable use of this exhibit if retained.

RECOMMENDATION:

That bulky exhibit of Serial 61 of instant file be destroyed.

This file also encompassed data re other German foreign intelligence organizations and data relating to German internal police matters.

Memo Short to McGuire 1-12-60 requested bulky exhibit to serial 107, instant file, be reviewed for retention or destruction. This exhibit was reviewed by SA W.D. Stewart on 1-20-60 and found to contain issues dated in 1943 of the German Criminal Police Journal which is the official publication of the German Criminal Police. The above-referred-to issues are in the German language. They were obtained by SA F.A. Fletcher, Washington, D.C., in April, 1944, from Lt. Col. J. F. Perry, Counterintelligence Branch, G-2. There is no obligation to return this material which was not indexed and which was furnished to the Bureau for its information concerning activities of the German Security Police whose head was also head of captioned organization. At the time this material was furnished the attached Bureau memo recommended "no action." This material is of no foreseeable use if retained. Nothing would be eliminated from our files to which we might have reason to refer to in the future.

1. This bulky exhibit consists of two copies of a Weekly Intelligence Summary No. 23 dated 12-20-45, distributed 1-7-46 by Headquarters, United States Forces, European Theater, Office of the Assistant Chief of Staff, G-2. Bulky also ~~contains one roll~~ of film of photographs of the above-mentioned Weekly Intelligence Summary No. 23. This roll of film was developed at the Bureau and the above-mentioned copies of the Weekly Intelligence Summary No. 23 were prepared from it. Bureau received film via letter 1-16-46 from Legat, London, who received film from Lt. Winston M. Scott, SSU, War Department. This intelligence report deals primarily with general economic and political conditions existing within the various zones of occupied Germany during 12-45 and within other European countries for same periods. The report also reveals statistics re the arrests of counterintelligence personnel, SD agents included, for the periods of 3-16-45/11-29-45 and 11-30-45/12-6-45.

2. There is no obligation to return the above-mentioned film.

16 JAN 27 1960

3. The film was sent to the Bureau for general intelligence purposes and it was reviewed for material of specific interest.

ESPIONAGE - SPAIN - GERMANY

Destruction of Bureau Property - Gen.

Reference made to memorandum from Short to McGuire dated 12/8/59 which recommended that bulky exhibit 65-47053-83 be reviewed and decision rendered as to retention or disposition of material. Bulky consists of case history on subject prepared by Censorship, Miami, Florida, and furnished to Bureau January, 1943. Case history includes photographs of subject, history of his activities and biographical sketches of his contacts. None of this material indexed. Bulky also contains three sheets of press dispatch, each sheet bearing caption "Agencia EFE Madrid," in foreign language, typewritten and blurry; examined Cryptographic-Document Section of Laboratory. Lab advised no objection to destruction of afore-mentioned material.

Subject, described as Spanish fascist, had been EFE Spanish News Agency correspondent in Guatemala from March, 1942, to October, 1944, when he returned to Spain. Gist of his dispatches had been of such nature that State Department had indicated he ought not to be allowed to continue his journalistic activities in this hemisphere. After his return to Spain, subject advised an Associated Press correspondent in Madrid that he was then (1945) residing with his family in Barcelona Province, Spain, writing a book on life of Adolf Hitler. Since his return to Spain, he had been unable to secure permission from Spanish press authorities to continue his profession as newspaperman. He protested he had always been pro-Allied and when working in Berlin, Germany, as newspaper correspondent, he was able to be of assistance to British and American Embassies there. This has been closed case since 1945.

There is no indication as to what use was made of this particular material by Bureau; appears to have no foreseeable use; and no need to return to Censorship, the original source.

MEXICO SUBVERSIVE ACTIVITIES - G (S) (U)
Destruction of Bureau Property - Gen.

Bulky exhibit 100-72924-792 submitted for evaluation and possible destruction, consists of 5 Laboratory examinations conducted 1943-1944 of various documents concerning the Free Germany Movement (FGM) (communist) in Latin America submitted by Legats. Cryptanalysis-Translation and Document Sections have no objections to destruction of these enclosures provided Laboratory worksheets are retained. (S) (U)

The documents are as follows: (S) (U)

1. 9-21-43 item. Photographic copies of personal correspondence dated August, 1943, and translations thereof written by individual connected with FGM. Correspondence obtained through mail cover. No significant data noted. (S) (U)

2. 9-18-43 item. Two letters (originals) taken from American Embassy files, Mexico City, submitted as known handwriting specimens of several individuals connected with the FGM. Transmittal letter requested these documents be preserved for return to Embassy if it ever became necessary to do so. (S) (U)

3. 2-10-44 item. Photograph of typewritten letter and envelope of FGM publishing house submitted by Legat, Mexico City. No current significance. (S) (U)

4. 2-14-44 item. Photographic copies of envelope and letter in German language obtained by Legat from confidential source in Mexico City which was written by Guatemalan resident to FGM, Mexico. Of no current pertinence. (S) (U)

5. 5-24-44 item. Photographic copies of envelope and letter in Spanish language submitted by Mexico City for Laboratory examination in connection with investigation of FGM. (S) (U)

Destruction of Bureau Property -

Memo Short to McGuire dated November 16, requests bulky exhibit 100-477-30 be reviewed for determination as to retention or disposition.

This bulky has been reviewed and consists of photographic copies of letters and notes in German language which were developed by the Bureau from film sent to Bureau from Philadelphia Office, the film having been taken by agents of the Philadelphia Office in connection with the investigation of subject. Copies of the prints, as well as the film, were sent to the Philadelphia Office. This material has never been indexed. The Laboratory conducted an examination of this material and nothing of pertinence was developed. A translation of the prints was made and it was determined that it was correspondence which was chiefly of a personal nature and otherwise completely innocuous.

Subject was a German refugee who lost his position as a professor at Heidelberg University, Heidelberg, Germany, in [illegible] and secured appointment as visiting professor at the University of Pennsylvania and taught there 1938 to 1940. We received info that he may be engaged in espionage; however, our investigation never substantiated this. He was taken into custody as an alien enemy in Philadelphia on December 10, 1941. On [illegible], the AG ordered his parole, which order was [illegible] and the alien enemy was repatriated. If living, subject would be 83 years of age.

[illegible] recommended this exhibit be destroyed. [illegible] Laboratory [illegible]

SUBJECT: CHARLES SCHOTT
INTERNAL SECURITY

Destruction of Bureau Property

Bulky Exhibit File Number: 100-120139-3

By letter dated 6/29/42, New York Office furnished to Bureau letters and communications in German language taken from subject who arrived in U.S. on 6/1/42 on the M/S "Drottningholm." These letters and communications were taken from subject by U.S. Customs authorities in New York who made them available to the New York Office. New York requested the material be appropriately translated to see if the material is of interest to Bureau. A summary translation was made and the originals returned to New York so they could be returned to U.S. Customs authorities. Photographic copies of the material were retained by Bureau in a bulky exhibit.

The material taken from subject consisted of letters to subject from friends and relatives in Germany. Nothing of significance was contained in this material to warrant investigation.

RECOMMENDATION:

Inasmuch as the bulky exhibit contains photographs of material in possession of U.S. Bureau of Customs and in view of insignificance of the material, it is recommended that the bulky exhibit be destroyed.

Re memorandum from L. E. Short to Mr. McGuire dated 10-28-59 and memorandum from Mr. Millen to Mr. Parsons dated 11-9-59 regarding a San Diego suggestion that the retention period of Form FD 283 (FM Radio Station Log) which is now destroyed after one year be changed to permit destruction after 30 days.

Communications Section stated it has no interest in these logs. The Laboratory considered the San Diego suggestion acceptable. The Training and Inspection Division requested the views of the Investigative and Domestic Intelligence Divisions as to any necessity for retaining logs containing information pertaining to activities in [redacted] cases for a longer period of time.

It is the view of the Espionage, National [redacted] Intelligence, and Internal Security Sections, which handle major cases in the Domestic Intelligence Division, that destruction of FM Radio Station Logs [redacted] 30 days, since any necessary data [redacted] major cases would appear in the surveillance logs maintained in such cases or would appear elsewhere [redacted] It is noted that destruction would be permissive rather than mandatory and in an unusual situation, the [redacted] office concerned could, if the needs of the case required, retain a log for longer than 30 days.

ALL INFORMATION CONTAINED HEREIN IS UNCLASSIFIED DATE 8/19/82 BY [redacted]

ACTION:

It is suggested this be referred to the Training and Inspection Division.

SUGGESTION: Miss [redacted], a GS-5 employee assigned to the General Index Unit of the Records Branch, has suggested through the Streamlining Committee that authority be given for Records Branch to destroy Transcript of Record on Richmond, Virginia, Police Department "transients". (32-17337).

PRESENT PROCEDURE: This file which occupies approximately one and three-fourths drawers contains mainly copies of identification records on transients. The keeping of statistics and the submission of these reports was discontinued in September, 1943.

CONCLUSIONS: Records Branch is in favor of the destruction of these fingerprint records as the originals are maintained in the Identification Division. The serials in the file referring to the statistics of this program will be maintained.

RECOMMENDATIONS:

1. Favorable.

Suggestion involves destroying copies of identification records which were prepared prior to 1943 on a survey of transients in Richmond, Virginia.

As suggestion points out, the originals of the Identification records are in the Identification Division files.

The Identification Division sees no objection in destroying these duplicate transcripts which are filed in Bureau file #32-17337 in the Records Section.

RECOMMENDATION:

Refer Training and Inspection Division to record the above views of the Identification Division.

SUBJECT: HEINRICH KARL STAHL, aka.
REGISTRATION ACT

Memorandum from Short to Mc Guire dated 12/18/59 requested review of bulky exhibit of serial 33 of captioned file to determine if it should be retained or destroyed.

This exhibit consists of two folders containing photographic copies of correspondence furnished the Bureau by the warden of the Federal Correctional Institution, Sandstone, Minnesota, in 1943. They were furnished in accordance with instructions for the handling of correspondence of prisoners convicted of espionage, sabotage, and failure to register as foreign agents.

This exhibit was examined by the Laboratory for evidentiary purposes; however, nothing of value was noted. There is no obligation to return this exhibit, and the Laboratory has noted on 12/18/59 that it has no objection to the destruction of this exhibit. No indexing has been made and no foreseeable use is seen for this exhibit if retained in Bureau files. There is no reasonable possibility that destruction would eliminate from our files data to which we might have to refer in the future.

Recommendation:

That the bulky exhibit of serial 33 of captioned file be destroyed.

RECORDS MANAGEMENT
(66-18966)

As you will recall, in connection with our Records Management Program, we received the following suggestions from the field recommending the destruction or consolidation of various categories of files throughout the field:

(1) Memo Short to McGuire dated 9-11-59 (66-18966-520) sets forth several suggestions received recommending consolidation of security type files. Present authority permits field to destroy all extra copies of serials which are not needed and no further action is considered warranted in connection with this suggestion.

(2) Memo Short to McGuire dated 9-16-59 (66-18966-397) sets forth several suggestions relating to destruction of files by auxiliary offices.

(3) Memo Short to McGuire dated 9-16-59 (66-18966-399) sets forth suggestions to destroy files in the 18 (May Act) and 82 (War Risk Insurance) classifications after ten years.

(4) Memo Short to McGuire dated 10-19-59 (66-18966-511) sets forth several suggestions regarding the destruction of 0 (General) and 00 (Policy) files throughout the field.

(5) Memo Short to McGuire dated 10-21-59 (66-18966-480) sets forth suggestions recommending destruction of certain files created during World War II.

(6) Memo Short to McGuire dated 10-27-59 (66-18966-479) sets forth several other suggestions recommending disposition of certain files created during World War II.

Memo Short to McGuire January 27, 1960
Re Records Management
(66-18966)

Inasmuch as a suggestion was also being considered which would reduce the retention period of all field files from the present twenty year period, we recommended the above-listed suggestions be held in abeyance pending the outcome of this suggestion. In connection with this suggestion a survey was conducted of a representative number of field offices to determine if it was feasible to reduce the retention period of field files. By memorandum to Mr. Mohr dated 1-19-60 you set forth the results of this survey and after consultation with the Investigative Division and the Domestic Intelligence Division, who after being apprised of the results of the field survey, strongly recommended no change in the current twenty year retention period for field files, it was recommended that no further consideration be given at this time to reducing the retention period of field files. Accordingly, no further action is recommended in connection with the above suggestions relating to the destruction of various categories of files maintained throughout the field prior to the present twenty year retention period.

RECOMMENDATION:

For record purposes.

SUBJECT: SICHERHEITSDIENST
ESPIONAGE - G

Destruction of Bureau Records - General

During World War II the Sicherheitsdienst, known as the S.D., was the Security Service for the German Nazi Party. Originally subject organization was principally concerned with political matters of interest to, or concerning the Nazi Party and its members; however, the subject organization branched out into the fields of espionage and counterespionage, entering into competition with the Abwehr, the traditional German intelligence service.

In conjunction with the Bureau's SIS program and related responsibilities concerning internal security during World War II, a control file was opened concerning subject organization. This file also encompassed data re other German foreign intelligence organizations and data relating to German internal police matters.

Memo Short to McGuire 1/12/60 requested bulky exhibit to serial 256, instant file, be reviewed for retention or destruction. This exhibit was reviewed by SA W. D. Stewart on 1-21-60 and found to contain 136 photographs and related negatives of German S.S. men and other officials who formed Adolf Hitler's retinue on his visit to Italy in 1938. These photographs along with a list of the names relating to individuals in the photographs were furnished to the Bureau via letter 2/20/45 by Legat, Rome, who obtained same on 2/20/45 from Vincenzo Gentile, personal secretary to the Minister of the Interior. These photographs were sent to the Bureau for its information and at the time of the receipt of the above-mentioned material from Legat, Rome, the list of 136 names was indexed. No foreseeable use of photographs if retained as they are of no value now to Bureau. There are no memos in file which previously have authorized the destruction of these photographs providing the negatives were retained; therefore, both can be destroyed.

There are attached hereto letters from S. A. Andretta, Administrative Assistant to the Attorney General, dated January 25 and January 26, which advised that our requests for permission to dispose of records have been approved by the Joint Committee on the Disposition of Executive Papers.

The request referred to in Mr. Andretta's letter of January 25 gives us permission to destroy letters from individuals advising us of the location of pigeons with leg bands and transmittal letters submitting lists of names and addresses of residents of the United States and Latin America who corresponded with Axis prisoners of war during the early part of World War II.

Mr. Andretta's letter of January 26 reports the committee's approval for the destruction of Selective Service Records in which the investigation disclosed that the delinquency was not willful or no aggravated circumstances involved and no prosecutive action taken. Approval is granted to destroy these records after they are ten years old.

The destruction of these records will be accomplished at the earliest possible date consistent with the availability of personnel. You will be advised as to our progress.

SUBJECT: DESTRUCTION OF OLD PHOTOGRAPH NEGATIVES

By memorandum dated 10-7-58, Mr. W. D. Griffth furnished to Mr. D. J. Parsons (66-3286-815) the circumstances surrounding a storage problem in the Photographic Laboratory and at the same time, outlined certain action to correct the situation. The plan, which was approved later with certain exceptions, provided that all negatives be destroyed without further supervisory review after ten years inactivity based on checks of abstracts by the Records Branch.

The Administrative Division completed the task of listing all file numbers taken from the negatives to be considered under this program and the Records Branch has since reviewed the pertinent abstracts for purposes of indicating those cases ten years old and inactive. As a result of this review and subsequent action by the Investigative Division, the negatives for the criminal cases have been withdrawn and destroyed. Thus, the recommendation the Domestic Intelligence Division approve similar action in connection with the negatives in their cases under the subversive classification.

The Domestic Intelligence Division in 1958 recommended that all cases under their supervision be subject to supervisory review prior to the destruction of these negatives. However, in view of the fact we are only working with negatives, all originals of these photographs are in file and in the event additional prints of any one individual are needed, the original can be used for reproduction purposes. It is believed also the file review work by the supervisor of such a large number of files will create many problems for both the Records Branch as well as the Domestic Intelligence Division.

EX

REC-41 66-3286-866

20 FEB 16 1960

RECOMMENDATION:

Thus in view of the fact no original material is being disturbed by this suggestion, it is recommended the Domestic Intelligence Division reconsider and approve for destruction all negatives ten years old and inactive.

Bureau Property - Destroyed

To recommend the destruction of a bulky exhibit. (X)

By memo dated 2/4/60 from Mr. Short to Mr. McGuire, it was requested that bulky exhibit file number 100-374183-119 be reviewed to determine if it should be destroyed or retained. (X)

The bulky exhibit was submitted to the Bureau by letter of New York Office dated 6/7/51 captioned as above. The title of this case has been changed and is now "Donald Duart Maclean; Guy Francis DeMoncy Burgess, Espionage - R." The exhibit consists of 424 photographs of personal possessions of one Gustav Glueck which were made available to the New York Office by an anonymous source on 2/10/48. These photographs were submitted in 1951 when it was determined that among them was an address book of Glueck which contained the name and address of Donald Maclean. (X)

In addition, Glueck was friendly with Martha Dodd Stern, subject in the Mocase, and also had been contacted by Boris Morros in Vienna in 1951 in Glueck's official capacity as a banker. (X)

No information connecting Glueck with the espionage operations of Maclean or the Sterns was developed. When the New York Office forwarded these photographs, it was stated they were one set of photographs indicating that another set was in the possession of the New York Office. New York Office advised the names contained therein had been indexed in its indices. Supervisor handling the Mocase advised these items are of no further interest in that case. Glueck is now residing in Austria. (X)

MANUAL/RULES AND REGULATIONS

DESTRUCTION OF FILES IN BUREAU PROPERTY
CLASSIFICATION 25,
SELECTIVE SERVICE

PRESENT REGULATIONS:

Part II, Section 3D, 8b, of the Manual of Rules and Regulations provides for the destruction of the following classification 25 (Selective Service) files when 10 years old:

Zero files and the index cards relating thereto.

Files in which investigation disclosed delinquency was not willful and the index cards relating thereto.

Part II, Section 3D, 8, of the Manual of Rules and Regulations provides that when files are destroyed, except the 20-year-old files, the file fronts are to be retained, writing thereon the reason for their destruction. In connection with the destruction of 20-year-old files, a list of the files destroyed and the date thereof is to be kept at the beginning of each classification.

INQUIRY FROM WASHINGTON FIELD OFFICE (WFO):

By letter dated 2-4-60, WFO requested permission to destroy, when 10 years old, all 25 cases in which other offices are office of origin, because the majority of 25 cases in that office originated in other offices and WFO has no way of determining whether or not the delinquency was willful. WFO also suggested that the reason for destruction be placed on the file front of a consolidated volume beneath the file numbers; e.g.,

25-11210 - 25-11250

All files destroyed with the exception of the enclosed per Manual of Rules and Regulations.

Memo to Mr. Mohr
Re: Manual Rules and Regulations

Destruction of files in Classification 25, Selective Service

OBSERVATIONS:

The question raised by WFO will be a common one to all field offices. This matter has been discussed with the Files and Communications Division and it is of the opinion that field offices should be allowed to destroy all 25 files in which they are not office of origin or the office of prosecution when these files are 10 years old. The Investigative Division and the Training and Inspection Division have no objections to such destruction and agree with the opinion of the Files and Communications Division. Further, it is felt that the reason for destruction should be shown on the file front of a consolidated volume as proposed by WFO. This procedure will allow for the destruction of file fronts which in turn will be a savings in space.

RECOMMENDATIONS: (1) That the enclosed letter be sent to WFO granting permission to destroy all 25 files in which they are not office of origin or the office of prosecution when they are 10 years old and to make the appropriate notations on the file front of a consolidated volume.

(2) That the enclosed revision for the Manual of Rules and Regulations providing for the destruction of these files as set forth above and the notation on the file front of a consolidated volume be approved.

Five metal base records, which are enclosures to File 100-32785, were approved for destruction by memorandum which is serial 311 of the above file and are now available for destruction. Additionally, the Records Branch has twenty metal base records of music that were used by the Records Branch before the present Muzak system was installed. These, too, should be destroyed. The above records are available in Room 7264, Justice Building.

In view of the fact that the Records Branch does not have facilities for the appropriate destruction of these records, it is requested that the Laboratory Division make appropriate disposition of the records.

RECOMMENDATION:

That this memorandum be referred to the Laboratory Division for their attention and appropriate action.

SUBJECT: SUGGESTION # 592-60
RECORDS BRANCH STREAMLINING COMMITTEE

b6
b7C

SUGGESTION: Mr. [redacted], a GS-5 employee assigned to the Correlation Unit, Records Branch, has suggested through the Streamlining Committee that while Purge Clerks assigned to the Correlation Unit are reviewing files with the objective in mind to delete obsolete references, they should also process the file according to the rules of the copy destruction project and destroy all unnecessary copies. by Purge Clerks

PRESENT PROCEDURE: Purging files of obsolete references and destroying excess copies in files are two separate and distinct operations.

CONCLUSIONS: Records Branch is not in favor of adopting this suggestion since the Purge Clerk is a GS-5 employee making the purging of references an expensive operation. Even though this operation is expensive, the renovation that is accomplished in the General Index is more than worth the expense as it is lasting and will save money for a period of years. Copy destruction is handled by GS-4 clerks and to make it a thorough operation must be handled systematically, whereby adopting the suggestion would cause it to be a spotty operation. In addition, having Purge Clerks do copy destruction work would cause their productivity to decrease sharply which would slow down the rehabilitation of the General Index.

RECOMMENDATIONS:

1. Unfavorable

SUBJECT: RECORDS DISPOSAL MATTERS
Destruction of Bureau Property - Gen.

By memorandum dated February 12, 1960, Mr. S. A. Andretta, Administrative Assistant to the Attorney General, forwarded a draft of a proposed General Records Schedule for the Bureau's comments. Everette O. Allredge, Assistant Archivist of the United States, noted in his letter transmitting the proposed schedule to Andretta that "The opinion of the Federal Bureau of Investigation will also be appreciated." The proposed schedule includes all types of security and protective service records. Most of the records covered are of the instruction or housekeeping variety and are proposed for destruction in from one to three years. Item #6 however, covers top secret document accounting and control files for which destruction is proposed 10 years after documents represented by forms are downgraded, transferred or destroyed. These records consist of registers reflecting accountability for top secret documents and indicate the identity of individuals receiving, dispatching or destroying such documents. It is noted that Archives suggests that these records which they describe as accountable records be retained for a greater length of time to insure their availability for investigative purposes in determining final disposition of the documents. These records, of course, would be valuable to the Bureau in investigating leaks of information in other Governmental agencies.

Item #23 consists of personnel security clearance case files including investigative reports and related papers covering investigations under Executive Order 10450 and prior orders. Archives has recommended each agency receive permissive authority to destroy these files 30 years after date of last action. In justifying the 30-year retention period, Archives points out that the results of the investigation is summarized in employee's official personnel folder if he is employed by the Government and that much of the information contained in the files is in the form of allegations of a confidential nature. As a result of the confidential nature of the contents they note that there is no potential

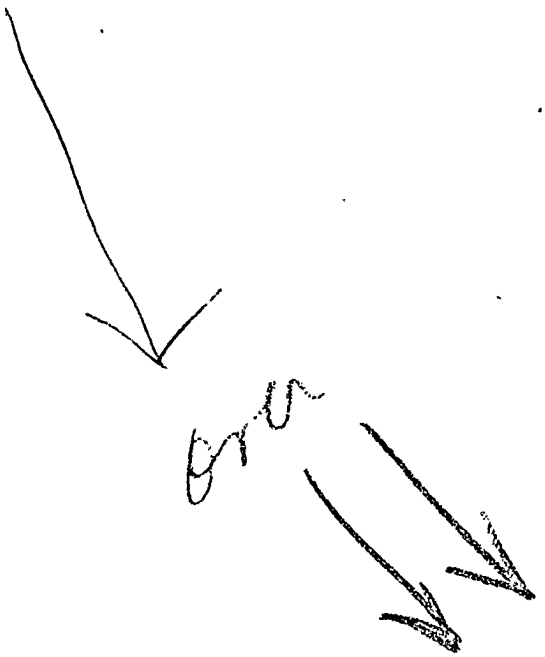
historical value to the records and conclude that 30 years is a sufficiently long period to satisfy the administrative need for which the record was created. It appears that the retention periods as proposed are reasonable and that we should interpose no objection to their submission to the appropriate congressional committee since there is a dire need for records storage space throughout the Government service.



A proposed letter to Andretta is attached and should be approved by the Domestic Intelligence and General Investigative Divisions.

RECOMMENDATION:

That the attached letter be sent to S. A. Andretta, Administrative Assistant to the Attorney General.

See addendum on attached pages.

Addendum Memo Eames to McGuire 2-18-60
Re: Records Disposal Matters

ADDENDUM: 2-23-60

Mr. Stanley and Mr. Coleman of the General Investigative Division have suggested that the Department be reminded of pertinent portions of Executive Order 10450 and the Federal Personnel Manual which limit the storage of facilities of records referred to under Item 23 of the proposed General Records Disposal Schedule.

Section 9 (c) of Executive Order 10450 provides as follows: "The reports and other investigative material and information developed by investigations conducted pursuant to any statute, order, or program described in section 7 of this order shall remain the property of the investigative agencies conducting the investigations, but may, subject to considerations of the national security, be retained by the department or agency concerned. Such reports and other investigative material and information shall be maintained in confidence, and no access shall be given thereto except, with the consent of the investigative agency concerned, to other departments and agencies conducting security programs under the authority granted by or in accordance with the said act of August 26, 1950, as may be required for the efficient conduct of Government business."

The Federal Personnel Manual, Chapter I-2, page 5, under the caption Agency Custody of Reports and Other Investigative Material Received From the Commission, interprets Section 9 (c) of Executive Order 10450 as follows: "This material may be retained by the employing agency until the person investigated is separated from the agency for any reason (resignation, transfer, removal, etc.), or it may be returned to the Commission as soon as it has served its purpose in the agency.

When retained by the employing agency, such reports and material must be maintained in confidence in accordance with the provisions of Executive Order 10450. If classified information is involved, the requirements of Executive Order 10501, with respect to safeguarding official information in the interests of the defense of the United States, should be met also. Such investigative reports and material will not be made a part of the Official Personnel Folder. They will not be included in any files disposal schedule of the agency, and may be recalled by the Commission at any time. Therefore, they should be maintained by the agency where they are readily available for return to the Commission upon request."

Addendum Memo Eames to McGuire 2-18-60
Re: Records Disposal Matters

The General Investigative Division also proposes that the Bureau interpose no objection to the storage of material set out in Item 23 in Federal Records Centers so long as only the agency storing the material has access to it. These instructions have been referred to in the attached letter to the Department.

Mr. Sizoo of the Domestic Intelligence Division has reviewed the provisions of the proposed General Records Schedule and advised that his division has no objection to the schedule.

Mr. S. A. Andretta
Administrative Assistant Attorney General

February 23, 1960

Director, FBI

66-3286-

RECORDS DISPOSAL MATTERS

C

The proposed General Records Disposal Schedule pertaining to security and protective services records was received with your letter of February 12, 1960, and has been reviewed.

It is assumed that the proposed schedule will supersede the restrictions on the storage and disposal of personnel security clearance case files imposed on the agencies by Executive Order 10450 as interpreted by the Federal Personnel Manual. These regulations are found in Section 9 (c) of Executive Order 10450 and chapter I-2, page 5, of the Federal Personnel Manual.

This Bureau interposes no objection to the storage of the material described under Item 23 in the Federal Records Centers providing only the agency storing the material has access to it. The remaining provisions of the proposed schedule appear to be reasonable and this Bureau has no objection to their adoption.

SUBJECT: FREE GERMAN COMMITTEE
INTERNAL SECURITY - GERMANY

Reference is made to memorandum from Short to McGuire dated 2-17-60 which recommended that bulky exhibit 100-249323-18 be reviewed and decision rendered as to retention or disposition of material. Bulky consists of six copies each of two volumes (Volume 3 "Free Germany - Memorandum" and Volume 4 "Free Germany - Biographies and Appendices"), consisting of over 800 pages, relating to Free Germany (Freies Deutschland) and biographical data regarding individuals connected therewith, prepared 5-25-45. The first 300 pages set out data relating to the organization; the last 500 pages set out biographical data concerning those German immigrants who took flight from Germany and were known to have taken residence in the USSR where they remained during the World War II years. It was noted that substantially all were identified with the German Communist Party. Many were acknowledged to have initiated the Free Germany Movement in the Soviet Union. The volumes have been indexed in Publication Files and it is believed desirable to retain one copy of each volume for future reference purposes.

RECOMMENDATION: Destruction of Bureau Property

It is recommended that one copy each of Volume 3 and Volume 4 of "Free Germany" described above be retained and that the other five copies of each be destroyed.

ADDENDUM DOMESTIC INTELLIGENCE DIVISION March 3, 1960

This bulky exhibit consists of a security survey report of the Big Inch and Little Big Inch pipeline facilities conducted by the Department of the Army in early 1951. These pipelines extended from Texas to New York and the report is, therefore, necessarily large and bulky.

Similar security survey reports on various plants and facilities have been furnished to interested offices by Army, however, these reports are not normally as bulky as the one on these pipelines. Offices have been authorized to destroy these security survey reports when they have become outdated and no longer of any value.

Instant report is now nearly nine years old, is outdated and does not appear to be of any further value to the Bureau. Through Liaison, we determined from Major James Nix, Assistant Chief of Staff for Intelligence, Department of the Army, on 3-2-60, that the survey of the above facilities was conducted every two years, the latest survey having been made in 1959.

RECOMMENDATION:

Since the continued retention of the bulky exhibit consisting of a survey conducted in 1951 does not serve any worthwhile purpose to the Bureau, it is recommended that it be destroyed.

Memorandum

TO: Mr. A. H. Belmont

DATE: February 26, 1960

FROM: Mr. S. B. Donahoe

SUBJECT: GERMAN ESPIONAGE ACTIVITIES IN US
any O DESTRUCTION OF BUREAU PROPERTY

Memorandum Short to McGuire 2-16-60 requested review of bulky exhibit of Serial 407 of captioned file to determine if it should be retained or destroyed.

This exhibit consists of leather bound albums containing pictorial charts prepared by the Cartographic Section showing the organizational structure of German activities for various regions of the U.S. and their connections to the Nazi Party.

These charts are dated 12-4-41, however, they were not ready for distribution until several months following the outbreak of World War II. By then the data was obsolete and due to fast changing conditions they became of practically no value. These exhibits have not been indexed. There is no foreseeable use if retained and there is no reasonable possibility their destruction would eliminate from our files data to which we might have to refer in the future.

RECOMMENDATION:

That bulky exhibit of Serial 407 of captioned file be destroyed.

SUBJECT: DOMINICAN ACTIVITIES IN THE UNITED STATES
IS - DOMINICAN REPUBLIC

DESTRUCTION OF BUREAU RECORDS GENL

Re memorandum Mr. Short to Mr. McGuire 2/23/60 which recommended that bulky exhibit 100-237194-814 be reviewed and a decision rendered as to its retention or disposition.

Above bulky consists of 25 copies of various issues of "CARIB" dating from 5/58 to 6/59. "CARIB" is published in the Dominican Republic by the "Caribbean Anticommunist Research and Intelligence Bureau." This publication is a highly slanted one of a pro-Trujillo nature and generally contains a number of articles denouncing various critics and opponents of the Dominican Republic. The above copies of "CARIB" were received on 8/18/59 by WFO from [redacted] Chief Warrant Officer, United States Marine Corps, retired. [redacted] resides Annandale, Virginia. He was contacted by WFO on Bureau instructions after he had written a letter to the Bureau advising of the receipt of the above copies of "CARIB" through the mail on 7/27/59. Upon interview [redacted] was unable to advise as to reason for his receiving the above copies and he made them available to the Bureau for whatever disposition was deemed appropriate.

b6
b7C

The above copies of "CARIB" have not been indexed, there is no indication that we have any obligation to return them to [redacted] and it is not believed that their destruction would eliminate from our files data to which we might have to refer in the future. Copies of "CARIB" are regularly submitted by NYO for Bureau's information.

RECOMMENDATION:

Done 3/11/60 That above copies of "CARIB" presently maintained in bulky exhibit 100-237194-814 be destroyed.

SUBJECT: ABRAHAM BROTHMAN
SECURITY MATTER - C

DESTRUCTION OF BUREAU RECORDS GENL

To recommend destruction of certain bulky exhibits in this case.

Brothman was born 8/15/13 in New York City and is a chemical engineer. Elizabeth Bentley and Harry Gold, admitted Soviet agents, advised they acted as espionage contacts of Brothman, picking up blueprints for delivery to their Soviet superiors. Brothman was convicted of obstruction of justice in 1950 and served a 2-year sentence in U. S. Penitentiary, Atlanta.

An examination of the bulky exhibit 100-365040-569 shows it consists mainly of Photostats of handwriting of Brothman and Miriam Moskowitz, Brothman's partner, and copies of Laboratory reports. The originals have been returned to the field office.

This exhibit includes results of examinations of the following items:

(1) Business card on reverse side of which Harry Gold wrote his instructions for meeting Brothman. The Laboratory was requested to determine the age of the card and identify the writing as that of Harry Gold. The card was returned to the field.

(2) Photostats of material found in the search of Gold's house which allegedly included Brothman's handwriting was examined and no conclusion was reached.

(3) Photostats of handprinting of Brothman and Moskowitz from registration cards of hotels in Europe. Positive identifications were made and Photostats returned to the field.

(4) Documents received from Rufert Chemical Company, Connecticut, which contained the handwriting of subject. Photographs were made and the originals returned to the field.

This memorandum recommends that the bulky exhibit to Serial 5853 of instant file be destroyed.

Memorandum Short to McGuire 2/26/60 recommended that the above-mentioned bulky exhibit be reviewed and a decision rendered as to its disposition. This exhibit consists of a film containing exposures of a typewritten manuscript of 118 pages prepared by Vincent Godfrey Burns, a public lecturer who in 1954 at the time he allowed us to make these photographs, was connected with the University of Wisconsin. The manuscript prepared by Burns attempted to prove that Lattimore was subversive. When this film was developed, a copy of the manuscript was furnished the Department. Previously the manuscript was summarized in a Milwaukee report dated 4/22/54 in this case. The Milwaukee Office, which made the photographs with the permission of Burns, returned the original manuscript to him and there is no need for us to furnish the instant film to any one. It is not indexed. Actually the manuscript prepared by Burns was based in its entirety on public source information, and, from our standpoint, there was nothing new contained therein. It is of no value at the present time and its destruction would not remove from our files data to which we might have to refer in the future. In fact, the information is repeated elsewhere in this file.

RECOMMENDATION:

That the bulky exhibit of Serial 5853 be destroyed.

ESPIONAGE - R

Destruction of Bureau Property

This memorandum recommends retention of bulky exhibit to Serial 1035 of instant file.

Memorandum Short to McGuire 3/2/60 recommended that above-mentioned bulky exhibit be reviewed and decision rendered regarding disposition thereof. This exhibit consists of Photostats of 200 IPR documents.furnished the Bureau on 12/3/51 by the McCarran Committee. Upon receipt, these documents were reviewed and were found to consist for the most part of letters and memoranda between officials of the IPR. The review indicated no logical leads existed. There is no need to furnish these Photostats to anyone and they are not indexed.

RECOMMENDATION:

All of these documents at the present time appear to have no value. It is noted that the captioned organization is, however, most controversial and may again be the subject of much publicity. Accordingly, it is possible the material contained in the instant exhibit may be of some value in the future. This, plus the fact that the originals of these documents were returned to the IPR by the McCarran Committee, indicates that the documents comprising this bulky should be retained. It is so recommended.

6 Destruction of Bureau Property

This memorandum recommends that the bulky exhibit to Serial 1153 of instant file be destroyed.

In our investigation of Lattimore in an effort to prove that his writings followed the Communist Party line, the New York Office in 1950 obtained from the Overseas News Agency, New York City, the file containing the columns Lattimore wrote for this outfit during the period 1945-49. New York made Photostats of these columns and returned the files to the Overseas News Agency. We furnished a set of the Photostats to the Department on 4/27/50. We also reviewed each column and any leads resulting therefrom were run out. This exhibit was not indexed. There appears to be no need to retain this public source information which, of course, may if needed in the future be obtained at the Library of Congress. Destruction of this exhibit would not eliminate from our files information to which we might have to refer in the future. There is no present value in these columns.

RECOMMENDATION:

That the bulky exhibit to Serial 1153 be destroyed.

This memorandum recommends that the bulky exhibit to serial 4414 of instant file be destroyed.

Memo 2-26-60 from Short to McGuire requested afore-mentioned exhibit be reviewed to determine its disposition. During instant investigation we made Photostats of documents maintained in the Department of State for the period 12/36-9/37 relating to the political situation existing between the Chinese communists and the Chinese nationalists. At the time this was important as corroborating evidence indicating Lattimore in his writings followed the Communist Party line. In 1955 the Supreme Court knocked out four of the counts in the indictment against Lattimore as result of which the Department decided not to prosecute. Our investigation of Lattimore was closed in 1955. One set of these Photostats was furnished to the Department and another was maintained as the instant bulky enclosure. There is no need to retain these Photostats and their destruction will not eliminate from our files data to which we might have to refer in the future. They are not indexed. Additional Photostats, if ever needed, of course, can be made from the permanent records maintained by State Department.

RECOMMENDATION:

That the bulky exhibit to serial 4414 be destroyed.

This memorandum recommends destruction of the bulky exhibit to Serial 351. Memorandum Short to McGuire 3/4/60 recommends the above-mentioned exhibit be reviewed for the purpose of making a recommendation as to its disposition.

This exhibit consists of Photostats of 51 communications received from the office of the late Senator Joseph McCarthy during March, 1950. These communications for the most part are letters from citizens throughout the United States and contain allegations not only against Lattimore but against numerous other individuals. At the time these were received in the Bureau, copies were given to appropriate sections and indicated action was taken. They are not indexed and they need be furnished to no one. These Photostats appear to be of no value at the present time and their destruction would not eliminate from our files information to which we may have to refer at sometime in the future.

RECOMMENDATION:

That the bulky exhibit to Serial 351 of this file be destroyed.

ADDENDUM 3/17/60:

This bulky exhibit consists of photographs of the minutes of meetings of various bodies of this union during 1941 and 1942. These photographs were submitted by San Francisco 6/11/43 and their source is not indicated. A set of the photographs was furnished the New York Office, office of origin, 7/2/43. The purpose in retaining a set of the photographs at the Bureau is not apparent, as they are not indexed either as to the names of individuals or contents. Our active investigation of the communist infiltration of this union was closed in 1952.

The retention of this material appears to serve no conceivable purpose now or in the future. It is recommended that this bulky exhibit be destroyed.

This is in response to your memorandum dated March 1, 1960 addressed to Malcolm R. Wilkey, Assistant Attorney General, Criminal Division, concerning the disposition of various exhibits pertaining to the captioned organization. You are advised that there now appears to be no necessity for the retention of this material, and the Bureau may therefore dispose of it.

FROM S. B. Donahoe

SUBJECT: GERMAN EMBASSY
WASHINGTON, D. C.

O Destruction of Bureau Property - gen'l

Memorandum from Mr. Short to Mr. McGuire dated 3/11/60 requested review of bulky exhibit of Serial 864 to determine if it should be retained or destroyed.

This exhibit consists of wax and ink impressions taken of the metal seals and rubber stamps respectively, which were found in the former German Embassy, Washington, D. C., by Washington Field Office in 1946. These impressions were submitted to the Bureau to be included in the Bureau's collection.

This exhibit has not been indexed. The Laboratory has advised it is of no value to them. This exhibit has no foreseeable use if retained and there is no reasonable possibility its destruction would eliminate from our files data to which we might have to refer to in the future.

RECOMMENDATION:

Bulky exhibit of Serial 864 of captioned file be destroyed.

To:	From: (Suggester's name)	Division of Assignment
Director, FBI	[redacted]	ALBANY

SUGGESTION That as an economy and space saving measure, when 66 files and certain other classifications are destroyed, according to Manual of Instructions each year, on the basis of one yr. old or three yrs. old, the file fronts and backs be destroyed at that time also. It appears that by placing a long hand notation on the current volume being retained to the effect that previous sections have been destroyed on such and such a date per Manual of Instructions, it would answer the same purpose and also give additional needed file space.

Destruction of Bureau Property Gen'l

Current practice or rule (Include manual citation as well as facts) Current practice is to retain the empty file front and back.

Advantages of suggestion and annual savings (include basis for estimate) No way to estimate the annual savings as it would vary from office to office and be governed by the amount of material that would be destroyed thereby giving more file space.

ALL INFORMATION CONTAINED HEREIN IS UNCLASSIFIED DATE 8-6-82 BY SP4ELW1 Cal

Disadvantages of suggestion None apparent.

Destruction of Bureau Property - Gen'l.

Reference is made to my memorandum dated 1-27-60 wherein Mrs. [redacted] a GS-5 employee assigned to the Correlation Unit of the Records Branch, suggested that a form be prepared, which form would be used as an error slip in connection with the copy destruction project.

The use of this form was tried for a thirty-day period and since the copy destruction project is only in effect when employees are available, it was determined that this form was not used frequently enough to justify designation of a permanent Records Branch form.

RECOMMENDATIONS:

1. That the form not be adopted.

2. For referral to the Training and Inspection Division for appropriate action.

SUBJECT: NATIONAL SOCIALIST GERMAN WORKERS PARTY (NSGWP)
INTERNAL SECURITY - GERMANY

Destruction of Bureau Property

Reference is made to memorandum from Mr. Short to Mr. McGuire dated March 17, 1960, which recommended that bulky exhibit number 100-25208-39 be reviewed and a decision rendered as to its retention or disposition.

Above bulky exhibit contains ten copies of the translated version (German to English) of the organization book (610 pages) of the NSGWP (Nazi Party) and one copy of a book (71 pages) which contains the "Uniforms and Insignia" of the NSGWP. The above book was published by the Central Publishing House of the NSGWP, Munich, Germany, and was translated and reproduced at the Bureau. Copies of the translated version were furnished to all Bureau offices via Bureau letter of December 18, 1942. Copies of the translated version were also furnished to certain outside agencies.

The extensive organization of the NSGWP is explained in detail in the above-mentioned book. The German version was distributed in Germany to a limited number of Nazi Party members and particularly the political leaders of the Party for their use in Party administration and instructions. Party rules precluded the taking of the book outside Germany. Bureau file on the NSGWP indicated that, insofar as it was known to the Bureau, the book as of 1942 had not been translated into any other language prior to the work done by the Bureau.

In view of the value of the above book for research purposes and background material on the Nazi Party, it should be maintained in our files.

166-3286
NOT RECORDED
141 MAR 29 1960

RECOMMENDATIONS:

1) That one copy of the organization book of the NSGWP be maintained and that the other nine copies of the book be destroyed.

13 MAR 28 1960

2) It is further recommended that the book "Uniforms and Insignia" of the NSGWP, which is also maintained in the above bulky exhibit, be retained.

SUBJECT: SUGGESTION # 644-60
RECORDS BRANCH STREAMLINING COMMITTEE

b6
b7C

SUGGESTION: Miss [redacted], a GS-8 employee assigned to the Consolidation Unit, Records Branch, suggested through the Streamlining Committee that the file entitled, "Discrepancies in Findings of Document Examiners", (80-99), which contains 3,052 serials be reviewed and processed for destruction of all serials which are duplicates of serials filed in main case files.

CONCLUSIONS: The above-mentioned file was originally opened in 1935 as a control file for a double and triple check system utilized in the Laboratory. Under the use of this system, if the examiners failed to agree on the identification of the specimens, the most conservative report would be forwarded to the field. The use of the file was discontinued in 1946 at which time the policy with regard to handwriting examinations was revised and the Laboratory returned to the one examiner system. In 1955 on authority of the Laboratory, this file was purged of all index cards. The far majority of the serials in this file are duplicates with the original memorandum filed as a recorded piece of mail in the various case files concerned. Records Branch is of the opinion that this file has served its purpose and that the duplicate serials in this file could be destroyed. If permission is granted to destroy this material, original memoranda would not be destroyed. Since this matter directly concerns the Laboratory Division, this memorandum is being forwarded to them for their comments. If permission is granted to destroy this material, Archival authority is not required.

SUBJECT: DESTRUCTION OF BUREAU RECORDS

SUGGESTION #644-60
SUBMITTED BY [redacted]
FILES AND COMMUNICATIONS DIVISION

b6
b7C

SUGGESTION: That the file entitled "Discrepancies in Findings of Document Examiners" which contains slightly in excess of three thousand serials be reviewed and processed for destruction of all serials which are duplicates of serials filed in main files.

The file in question was originally opened in 1935 as a control file for a double and triple check system utilized in the Laboratory. In 1955, on the authority of the Laboratory, index cards were purged with regard to this file.

Mr. Waikart, Files and Communications Division, is in favor of destroying the duplicate serials and advised that archival authority is not required to destroy this material. Mr. Griffith, Laboratory, Division, reviewed the files and agreed that the duplicate serials should be destroyed since the material has served its purpose.

This Division feels that it is undesirable to maintain duplicate copies of any communications if they are not serving a useful purpose because of the great need for file space and accordingly recommends that this suggestion be adopted. It is felt that the material should be reviewed by a responsible Special Agent Supervisor in the Files and Communications Division before it is destroyed to insure that only duplicate material is deleted from file.

Miss [redacted] suggestion was acknowledged by letter dated 3/2/60.

RECOMMENDATION: That the suggestion be adopted and that the attached letter of appreciation be sent to Miss [redacted]

a check in amt indicates this was done 8/29/67 mcm

SUGGESTION #644-60
SUBMITTED BY [redacted]
FILES AND COMMUNICATIONS DIVISION

ADDENDUM BY FILES AND COMMUNICATIONS DIVISION TCH:gbh 3-25-60

File 80-99 entitled "Discrepancies in Findings of Document Examiners" which has been approved for purging by this memorandum contains 3,052 serials. It is noted that instructions from the Training and Inspection Division are "It is felt that the material should be reviewed by a responsible Special Agent Supervisor in the Files and Communications Division before it is destroyed to insure that only duplicate material is deleted from files."

Under present renovation programs of the Bureau's files, the Executives Conference has approved the processing of 310,000 Selective Service files for destruction as well as approving the destruction of copies of correspondence contained in Bureau files. Grade GS-5 employees are presently reviewing and destroying the files in the 25 classification and, when personnel are available, GS-4 employees are processing one-half million files in the 100 and 65 classifications for destruction of copies. Adequate safeguards have been established, such as 100 per cent check of work, to insure that this work is being completed correctly.

The file in question is no more important than the above-mentioned work which is handled by the clerical employees without a serial by serial review by a Special Agent Supervisor of the Files and Communications Division.

The above programs, of course, are closely followed and under the direct supervision of a Special Agent Supervisor in the Files and Communications Division.

Unless advised to the contrary, the above-mentioned file will be handled in this manner.

OK. To handle this way pursuant to what we discussed 3/29/60 KWM

ESPIONAGE - G

Destruction of Bureau Property - Serv

Memorandum Short to McGuire, 12-10-59, referred bulky exhibit 65-54428-16 to the Laboratory and Domestic Intelligence Division for review and disposition. Exhibit consists of Laboratory worksheets dated January - March, 1945, covering Photostat copies of censored correspondence dated August - December, 1944, to and from subject, then located in prisoner of war camps in Germany; Photostats of handwriting specimens of subject's relatives in the U.S. obtained and submitted by New York Office for Laboratory comparison to insure genuiness of correspondence between subject in Germany and his relatives in U.S.; also the original of a letter dated 2-25-44 which subject received while in German prisoner of war camp from an unknown individual informing subject of his wife's physical condition, his wife being then in Italy. Subject turned this original letter over to a Bureau Agent during interview 2-21-45 upon his arrival in the U.S. as a repatriated citizen.

Except for the original item dated 2-25-44, referred to above, which was of no significance at the time of examination and is of no current significance, all of the other material in the enclosure consists of Photostats of no current value.

66-3286-

RECORDED

APR 1 1960

Investigation of subject was based on the appearance of his name on a list in the possession of German spies Gimpel and Colepaugh found at the time of their apprehension in the U.S. They had been furnished this list of American prisoners of war for the purpose of using their addresses as mail drops in forwarding information in secret writing to their German principals. There was no indication that the prisoners of war involved were aware that their names were being used by the German Intelligence Service. The brief investigation of subject conducted by the Bureau developed no indication he was connected in any way with German espionage.

3 APR 1 1960

RECOMMENDATION:

There is no foreseeable value to this material and no further use can be anticipated. It is recommended that this entire bulky exhibit be destroyed. Laboratory Sections which conducted examinations in this case have reviewed the material and advised that its further retention is not warranted.

DESTRUCTION OF BUREAU PROPERTY GENL

Reference is made to your memorandum dated March 11, 1960, in above captioned matter which requests decision as to whether bulky exhibit, file number 100-3-86-1616, should be retained or destroyed. This exhibit is a collection of anti-Nazi cartoons by Soviet artists distributed by VOKS, the Russian All-Union Society for Cultural Relations with Foreign Countries, and is directed against the Nazi regime under Hitler. These cartoons were forwarded to the Bureau in 1954 for any disposition deemed advisable. They are no longer of any use and it is recommended that this exhibit be destroyed.

RECOMMENDATION:

That bulky exhibit, file number 100-3-86-1616 be destroyed and referred to the Filing Unit of Records Branch for action.

Bulky Exhibit memorandum dated 2/17/60
from L. E. Short to M. McGuire

Subject: ARGENTINA COMMUNIST ACTIVITIES

ADDENDUM BY DOMESTIC INTELLIGENCE DIVISION. SBD:bcf 3/24/60

Bulky Exhibit File Number 64-2800-D-102 consists of:

1. A bound document, with table of contents, consisting of 138 pages, which sets forth information concerning communist activities in the territories of Formosa, Corrientes and El Chaco, Argentina, and specifically information concerning persons arrested for communist activity; the names of Communist Party members, communists, Bolsheviks and anarchists; police correspondence concerning communist activities; a chart of the Communist Party organization in Argentina during 1942; and the names of the members of the Communist Party in Buenos Aires.

2. Ten rolls of negatives which contain the original source material on which above document was based.

3. Photographic prints of above-mentioned negatives. It is noted information in the photographic prints appears in above-mentioned document.

According to the main file, the above information was obtained during 1943 and concerned communist activities in Argentina prior to that date. Information contained in the above-mentioned document was furnished to the Department of State, ONI, G-2, American Embassy in Buenos Aires, and the Office of Exports during 1943. The information in the document, which the exception of pages 102 through 109, is not contained in the main file. Furthermore, none of the information in the document has been indexed.

The information in this exhibit is quite old and since it is in the hands of the State Department and the U.S. Embassy in Buenos Aires it is available at the points where it should be primarily utilized. It is not believed that any foreseeable use by FBI would justify expense of indexing this material now when it has not heretofore been utilized by us.

RECOMMENDATION:

Recommend this exhibit be destroyed.

Addendum to memo Short to McGuire 3/16/60 GCM:prg 3/21/60
Re: CAPTURED GERMAN DOCUMENTS
65-48824-307

This bulky exhibit, 65-48824-307, consists of two copies (Photostats) of captured German documents obtained by the Bureau in 1946 from Camp Ritchie, Maryland. The original documents were returned to Camp Ritchie 2/29/46 The information in this bulky exhibit is said to be from the files of "AMT VI of the Reichssicherheitshauptamt" and deals exclusively with Iran. It is written in German language and consists of approximately 350 pages. There has been no indexing. A one-page summary translation of the material accompanying the documents indicates this bulky exhibit is actually a monograph on Iran drawn up in 1941 by the general staff of the Soviet Russian Army and appears to have been designed primarily in connection with military operations in the Iranian area. It contains only passing remarks concerning the political aspirations of the Soviet military expedition in Iran at that time. This summary indicates nothing which would be of either investigative or historical interest to the Bureau warranting the retention of this bulky exhibit.

Recommendation:

It is recommended that this bulky exhibit, 65-48824-307, be destroyed.

ADDENDUM EHM:ew 4-13-60

Memorandum dated 1-30-45 from I. W. Conrad to E. P. Coffey requests liaison to secure captioned German documents numbered 528 through 532, 537, 543, 573 and 599 identified as Washington Mirs, captured German documents, Accession List #5 dated 12-14-44. The bulky exhibits involved are filed as enclosures to this serial.

Attached is translation summary of these documents dated 4-5-60 indicating they represent a file of correspondence maintained by secretary-treasurer of German Community Center (branch of German Labor Front) in Lyon, France, covering period 6-36 to 11-38. The correspondence concerns dues collected, expenses, enrollment of members, transfer of members, requests for equipment, etc.

This material is not indexed, is not of current interest, concerns German activities in France in late 1930's and is of not investigative interest or intelligence value to FBI. Recommended this material be destroyed if the Laboratory Division concurs.

Enclosure

Lab concurs with destruction,

SUMMARY FROM GERMAN

Part I of the enclosures to 65-48824-11 consists of a file of incoming and outgoing correspondence maintained by the Secretary-Treasurer of the German Community Center in Lyon, France. This correspondence covers the June 1936 - November 1938 period.

The German Community Center of Lyon was a branch of the German Labor Front organizing Germans living abroad. In each country, the German Community Centers were responsible to a central office known as the Country Group Center. As a matter of fact, most of the correspondence contained in this file is between the Community Center in Lyon, France, and the Group Center in Paris, France.

The correspondence is concerned with such items as the dues collected from the members of the German community, the expenses of the Community Center (itemized and deducted from the monthly remittances of the dues collected), enrollment of new members, transfers of members from one Center to another, back dues, request for a new typewriter, request for an automobile, establishment and coverage of a health insurance plan including a dental care plan, etc.

A small number of letters are from the parent organization in Berlin. They are concerned with such items as a Summer Travel Plan at reduced rates for the Germans in foreign lands to spend their vacations in the home country, the announcement that the Country Group Leader was promoted to a new post and another man was appointed to fill the vacancy, congratulations to the local Secretary-Treasurer for a job well done stating that he had been granted - as an award for his performance - a book entitled: "We Help the Fuehrer," etc.

Among the items of a miscellaneous nature, the file includes receipts of parcel post shipments, letters to German nationals soliciting them to join the organization, etc.

ENCLOSURE

8-6-82 BY SP4 ELW

ENCLOSURE

6-3286

the
Part II of/enclosures to 65-48824-11 consists of similar material dating back to 1930.

Even more than the previous file, it reflects the organizational efforts to set up the German Community Center. In earlier years, the name was German Local Group.

The material is of the same nature and description as in the previous file.

It would seem that these two files are due to the diligence of the Secretary-Treasurer of the German Community Center of Lyon, France, Mr. WILHELM or WILLY REICHENBACH.

Director, FBI		Louisville

SUGGESTION

It is suggested that Unknown Subject (26) twenty-six Classification cases be destroyed five (5) years after date of Closing or RUC'ing.

Closed cases in the twenty-six classification can not be located through the indices, at the present time, after five years because of the five year rule regarding destruction of index cards of motor, serial, and license numbers.

Destruction of Bureau Property -

Current practice or rule (Include manual citation as well as facts)

At the present time the twenty (20) year rule prevails, regarding destruction of this classification, whereas the index cards on motor numbers, serial numbers, and license numbers in this classification

Advantages of suggestion

may be destroyed after five (5) years, Part II, Sec. 3, page 5, 6c, Manual of Rules and Regulations (Destruction of Index Cards.)

Space needed for Closed filing is a serious problem and through the destruction of this classification, approximately ten, five-drawer filing cabinets could be utilized for other classifications in this office alone. The cost of additional filing cabinets needed for Closed files in this classification would be greatly reduced.

ALL INFORMATION CONTAINED HEREIN IS UNCLASSIFIED DATE 8-6-82 BY SP4 EW/cal

66-3286-

NOT RECORDED
141 APR 14 1960

23 APR 4 1960

Disadvantages of suggestion

None

Annual Savings (Show basis for estimate)

The present cost of each filing cabinet utilized for closed files is $62.50. If ten cabinets of closed twenty-six classification cases could be destroyed, a savings of $625.00 could be realized through the use of these cabinets for current closed cases, and would not necessitate the purchase of additional filing cabinets for this classification.

(The use by the United States of my suggestion shall not form the basis of a further claim of any nature by me, my heirs, or assigns upon the United States)

SUBJECT: CALIFORNIA PEACE OFFICERS ASSOCIATION

Description of Mail: Copies of outgoing form letter dated 12/31/37 directed to members of California Peace Officers Association enclosing copies of addresses made by the Director in 1937. (94-1-180-64 through 662)

The attached mail has been called to our attention as having no apparent reference value. In an effort to streamline procedures and eliminate unnecessary reference to this data it is proposed that the material be de-indexed through removal of the cards from the Bureau's indices, and the mail be destroyed. Since this mail is administrative in nature, Archival authority for its destruction is not necessary.

It is requested that the appropriate substantive supervisor review the material referred to above to determine if any reason exists for its retention. A notation advising of the decision reached may be placed on this memorandum. The memorandum should be returned to the Correlation Unit of the Records Branch, Room 6309 IB.

RECOMMENDATION:

For referral to Crime Records Division.

Destruction of Bureau Property

Reference is made to memorandum from Kayne to Donahoe 10-1-59 recommending that bulky exhibits 65-31524-120X14 and 65-31524-121 relating to captioned organization be retained. 120X14 consists of translations of the membership and records of captioned organization made up from pictures taken at its national headquarters at 626 Fifth Avenue, New York City on 12-16, 17, 18, 19-41, by Bureau agents. 121 consists of photographs of records of captioned organization taken on 1-5-42. None of this material was indexed and no apparent use indicated; however, by memorandum 5-4-54 Department advised that all exhibits regarding this matter were to be retained by the Bureau pending further advice from the Department at the conclusion of litigation regarding constitutionality of rules of procedure promulgated by the Attorney General under Executive Order 10450.

Therefore, recommendation was made to retain exhibits.

On 3-18-60, pursuant to request from Bureau, Department advised that there appears to be no necessity for the retention of this material and the Bureau may therefore dispose of it.

ACTION:

It is recommended that bulky exhibits 65-31524-120X14 and 65-31524-121 be destroyed.

DATE: 5-23-60

FROM : L. E. SHORT

SUBJECT: Destruction of Bureau Property
SUGGESTION SUBMITTED BY
[redacted]
GS-5, General Index Unit
EOD 7-6-53

b6
b7C

SUGGESTION: Mr. [redacted] has suggested through the Records Branch Streamlining Committee that a program be started to go through the 62 classification files which are twenty years old or older to destroy files that do not come under the Bureau's jurisdiction.

ADVANTAGES: Mr. [redacted] points out that by eliminating old files, cabinet space would be saved as well as space in the index.

CONCLUSIONS: An extensive rehabilitation program has been in effect in the Records Branch for an extended period of time. At the present time, files in the Selective Service classification are being reviewed, and those which do not reflect willful violation are being destroyed. From surveys conducted by the Records Branch, it has been established that the 62 classification (Miscellaneous) is not particularly productive from the standpoint of rehabilitation work. [redacted] in his suggestion, states that files more than twenty years old should be destroyed. This work could not be utilized as a general criterion, and extensive review work would be necessary in order to establish ground rules in such a destruction program. Inasmuch as Records Branch has in effect an aggressive Records Management Program, and in view of the fact that survey work has been done in all classifications, no further action is contemplated at this time in connection with this suggestion.

b6
b7C

ACTION: Mr. [redacted] has been orally thanked for submitting this suggestion and a copy of this memorandum is being placed in his personnel file so that his interest in the Records Branch suggestion program might be noted.

RECOMMENDATION:

For information.

TO : MR. MC GUIRE DATE: 4-6-60

FROM : F. W. WAIKART

SUBJECT: DESTRUCTION OF SELECTIVE SERVICE CASES (25 CLASSIFICATION)

By letter dated 3-30-60, SAC Mason, Cincinnati, made a number of observations concerning the Bureau's operations. One suggestion involved the possible streamlining of the method of destroying Selective Service files over ten years old, by not first reviewing the files and not removing the related index cards from the indices. He presumably has in mind arbitrarily destroying all Selective Service files as they become ten years old without evaluation as to contents. Other matters mentioned by Mason are being handled separately.

PRESENT PROCEDURE:

At the present time, closed Selective Service Act cases over ten years old are being destroyed if the subject involved (1) has not willfully violated the law or (2) is not a conscientious objector. In addition, we retain (3) dual character cases and (4) certain other non-routine cases that because of their unusual nature should not be destroyed. This necessarily involves a review of each case file to determine the nature of the violation and also, in the event it can be destroyed, a further review to see what names have been indexed in order that the index cards relating thereto may be purged from the indices. This procedure is being followed both in the field and at the Seat of Government.

OBSERVATIONS:

At the Seat of Government, this program has been very effective to date. Thus far we have reviewed 26% of the Selective Service files, resulting in a savings of 176 file cabinet drawers of space and the destruction of 80,436 index cards. We feel that the most important phase of the savings is removal of obsolete references from our indices. The savings in unnecessary indices searching is incalculable, plus the fact that we are saving a very substantial amount of space in our file cabinets. The program is necessarily expensive, as observed by SAC Mason. He estimates an expenditure of 6.25 man-days to save one square foot of space. We apparently have been a little more effective at the Seat of Government inasmuch as our expenditure is computed at

1 APR 21 1960

ORIGINAL FILED IN 25-[illegible]

5.81 man-days per square foot of file space saved. It is again reiterated that the important savings, however, is in the purge of index cards both in the field and at the Seat of Government. While no direct savings can be computed, it has been our experience for many years that even one unnecessary index card in the indices creates much additional work in searching and subsequent file reviewing, all of which can be eliminated once the card is identified and destroyed.

RECOMMENDATION:

That this valuable rehabilitation program continue, both in the field and at the Seat of Government, as personnel is available to assign to it. An appropriate letter to Mason is attached.

ADDENDUM BY TRAINING AND INSPECTION DIVISION; (CHP:ejw) 4-7-60.

During the Cincinnati inspection from January 16, 1960, to February 5, 1960, it was determined that the project of review of selective service files for destruction would require 50 days to complete. The purging of the indices cards of these old files would require 18 days to complete. The SAC was instructed by the Inspector to complete these projects at the earliest opportunity and that when extra personnel in the Chief Clerks Office became available (the addition of such personnel was recommended by the Inspector) the project of purging the indices should be completed. A poll of the Inspectors has indicated that offices recently inspected felt this to be a worthwhile project and no particular problems were being experienced. ASAC McAndrews, Washington Field, stated that office felt the project to be worthwhile and the experience of WFO to date has been that one drawer out of every four is being made available for other use by the project. It is therefore believed that the project should continue as originally formulated and that the attached letter should be sent to SAC Mason so instructing him.

TO : MR. MC GUIRE

DATE: 3-29-60

FROM : L. E. SHORT

SUBJECT: SUGGESTION #739-60
RECORDS BRANCH STREAMLINING COMMITTEE
Destruction of Bureau Records - Gen'l

SUGGESTION: Mrs. [redacted] a GS-8 employee assigned to the General Index Unit, Records Branch, has suggested through the Streamlining Committee that index cards in the following categories be purged from the General Indices: (1) Organizations such as American League for Peace and Democracy; American Slav Congress; American Student Union; American Youth Congress; Civil Rights Congress; Southern Negro Youth Congress; Workers Alliance; Workers School. (2) Newspapers such as New Masses; New Republic; Worker. (3) Unions such as Teamsters Union; United Steel Workers of America; International Union of Mine, Mill and Smelter Workers. Mrs. [redacted] points out that with outdated indexing procedures in years past, each of the above names were automatically indexed each time they appeared on the mail regardless of the information concerning these names.

b6
b7C

CONCLUSIONS: Records Branch is in favor of adopting this suggestion. Thousands of reference cards are now in the General Indices pertaining to these names other than main files that might appear on these names.

On February 15, 1954, the Executives Conference approved the destruction of index cards on Communist Party, Communist Political Association, Daily Worker, Young Communist League, United Electrical Radio and Television Workers of America, and others under the same conditions that exist for the names listed in this suggestion. (66-3286-561). If such a suggestion as proposed were adopted, Records Branch would assign an employee who is familiar with the rules of indexing and general contents of files to go through the cards and eliminate those which would not be indexed under present indexing procedures. This could be accomplished without referring to the files but when necessary to make sure no index card of value would be destroyed the file would be reviewed. There may be some instances where the preparation of a Correlation summary would be more beneficial and under these instances this would be done.

FROM : J. F. Malone

ALL INFORMATION CONTAINED HEREIN IS UNCLASSIFIED DATE 8-6-82 BY SP4 CLK/ca

SUBJECT: SUGGESTION #729-60
SUBMITTED BY MRS. [redacted]
FILES AND COMMUNICATIONS DIVISION

b6
b7C

SUGGESTION: That certain index cards in the following categories be purged from the General Index. (1) Organizations such as American League for Peace and Democracy; American Slav Congress; American Student Union; American Youth Congress; Civil Rights Congress; Southern Negro Youth Congress; Workers Alliance; Workers School. (2) Newspapers such as New Masses; New Republic; Worker. (3) Unions such as Teamsters Union; United Steel Workers of America; International Union of Mine, Mill and Smelter Workers.

This suggestion has been previously acknowledged by letter from the Director. o Destruction of Bureau Records - General

ADVANTAGES: By adopting this suggestion, thousands of reference cards now in the index pertaining to these names other than main files that might appear on these names would be eliminated, making available needed space. Under old indexing procedures each of the above organizations were automatically indexed as a "see reference" every time they appeared on correspondence regardless of the information contained in the communication. For example, a communication which indicated that an individual was associated with any of the aforementioned organizations, two index cards were prepared. One card would be indexed under the name of the organization and would also indicate the individual's name. The other card would be indexed under the name of the individual and would also indicate the name of the organization with which he was affiliated. This, of course, has resulted in numerous index cards in the index which are not necessary. The old indexing procedures were changed in approximately 1949. Under current procedure only one index card would be prepared indexed under the name of the individual concerned and reflecting his association with the organization.

REC-80 66-3286-875

EX-117

8 MAY 26 1960

CONCLUSIONS: The index cards to be destroyed would only be "see reference" cards and in no case will a main file card be destroyed. For example, index cards which are indexed under the name of an organization, newspapers and unions referred to above which were prepared under old indexing procedures which indicate that a certain individual was associated with one of these concerns will be destroyed. The index card which is indexed by the name of the individual will, of course, be maintained. Any index cards which list only the name of the organization will necessitate a review of the references to determine the feasibility of maintaining the card. In this connection the Records Branch will consult the interested division if it

RWB:meh (2) Enclosure

1 - Branch

is questionable as to whether the card should be maintained. The Records Branch pointed out that they would assign an employee who is familiar with the rules of indexing to eliminate those cards which would not be indexed under present indexing procedures. I feel the project should be under the supervision of a responsible agent supervisor in the Files and Communications Division. Mr. McGuire presented this suggestion to the Executives' Conference of 5/2/60 consisting of Messrs. Tolson, Mohr, Parsons, Clayton, Ingram, DeLoach, McGuire, Malone, Belmont, Callahan, Evans, Sizoo, Wick, Tamm and Trotter and they unanimously approved this suggestion.

RECOMMENDATIONS: 1. That this suggestion be adopted and that the attached letter of appreciation be sent to Mrs. [redacted]

b6
b7C

2. Upon approval of recommendation #1, that this memorandum be referred to the Files and Communications Division for appropriate action.

SUBJECT: HRVATSKI DOMOBRAN, also known as
Croatian Home Defenders
REGISTRATION ACT
Destruction of Bureau Property

Purpose of this memorandum is to recommend destruction of the bulky exhibit (64-21371-14x52) consisting of 16 boxes of material collected during investigation of the above organization, 1941-1944. The organization was investigated during this period inasmuch as it was reportedly profascist in character and possibility existed that it might have incurred an obligation under the Foreign Agents Registration Act of 1938, as amended.

On 11/5/43 the material, mentioned above, was submitted to the Department for review in connection with our request for an opinion relative to the organization. By letter 9/23/44 the Department returned the material and advised that it was not entertaining any prosecution. It requested the material be retained by the Bureau since there may be efforts to revive the organization after World War II.

On 6/16/55 a letter was again sent to the Department requesting advice as to whether the material may be destroyed. The Department advised on 7/27/55 that since some of the material related to Croatian activities in the U.S., it may be of value in the event action was taken by the Department against the Croatian Fraternal Union before the Subversive Activities Control Board.

In 10/58 the organization was reactivated, and we opened an investigation to determine whether it might be in violation of the Foreign Agents Registration Act of 1938, as amended. On 2/23/60 the Department advised that a review of the matter did not appear sufficient to support a determination of an agency relationship. By letter 3/8/60 we requested the Department to advise whether the 16 boxes of material could be destroyed. By letter 5/20/60 the Department advised that it has no objection to the Bureau handling the material in question as it deems appropriate. Material consists of personal papers, membership cards, correspondence and minutes of meetings.

166-3286
NOT RECORDED
141 JUN 2 1960

RECOMMENDATION:

It is recommended that the 16 boxes of material be destroyed inasmuch as they are of no value to the Bureau, and any attempt to return it to its original contributors would be time consuming and would involve excessive expense.

Dear Mr. [redacted]

Your suggestion that certain files in one of the Bureau's classifications be destroyed after five years was forwarded to me by your Special Agent in Charge. Careful consideration has been given to your proposal and it was decided that it would not be to the Bureau's advantage to adopt it.

Although your proposal is not being adopted in this instance, I do appreciate the interest which prompted you to make this suggestion.

Sincerely yours,

b6
b7C

J. Edgar Hoover

MAILED 8
JUN 15 1960
COMM-FBI

1 - File of [redacted]
1 - SAC, Savannah - Idea not being adopted because files falling within the prescribed group consist for the most part of two to four serials and the excessive time necessary to cull files in order to insure that information of value is not destroyed is not commensurate with potential savings of space.

RWB:meh (Suggestion #882-60, dated 6/8/60)
(5)

NOTE: Suggests that all closed unknown subject cases in the 26 classification (Interstate Transportation of Stolen Motor Vehicles) be destroyed when 5 years old. Surveys were conducted by the Bureau in November, 1959, and indicated that we should not change our current rule with regard to files being destroyed for reasons indicated in note to SAC. A similar suggestion was considered on 4/8/60 and was no adopted for reasons indicated. In view of these factors it is not felt that this suggestion should be adopted.

To.	From: (Suggester's name)	Division of Assignment
Director, FBI	Clerk	SAVANNAH

SUGGESTION

It is suggested that all closed unknown subject cases in the twenty-six classification be destroyed when five years old. The index cards on all motor and serial numbers are destroyed when five years old thereby losing any reference to an unknown subject case which is indexed by motor or serial number. Approximately three hundred files in the twenty-six classification were checked in the Savannah Office representing three different periods, 1944-45, 1949-50 and 1953-54 in which it was found that approximately 33% of the files checked were unknown subject cases. Therefore, if this suggestion were adopted, it is felt that around 33% of all closed twenty-six cases more than five years old could be destroyed.

33

EXCEPTIONAL

JUN 13 1960

Current practice or rule (Include manual citation as well as facts)

Destroy twenty-six classification when 20 years old.

Advantages of suggestion and annual savings (include basis for estimate)

Advantage would be the saving of space, approximately 1/3 more space would be gained. Since unknown subject cases are easily identifiable they could be detected and destroyed with a minimum amount of file review. It is impossible for me to estimate the amount of savings to the government because the amount of space saved would depend on the number of 26 cases in each office.

TO : Mr. A. H. Belmont

DATE: June 21, 1960

FROM : Mr. J. F. Bland

SUBJECT: INTERNAL SECURITY - ESPIONAGE CONFERENCE
JUNE 9 - 10, 1960

STREAMLINING PROCEDURES - CHANNELIZING MEMORANDA

In accordance with recommendation contained in memorandum from Mr. Malone to Mr. Mohr dated June 6, 1960, the Conference considered the feasibility of destroying channelizing memoranda in individual case files after pertinent information contained therein had been incorporated into report.

Briefly, copies of reports from informants are directed to pertinent field office files while the original informant report is placed in the informant's control file. Numerous channelizing memoranda, particularly in large offices operating a large number of live informants, is presenting an increasingly critical space problem and demands for extra file cabinets.

The Conference, in discussing this problem, took cognizance of the fact that the individual case file may not be entirely complete by destroying these channelizing memoranda if all of the information contained therein is not put into reports and some of the information would not be pertinent to report in individual cases. However, it also took cognizance of the fact that the complete information contained in these channelizing memoranda and individual case files is contained in the informant's case file and available for use if needed. The Conference recommended in view of the growing space problem that two offices be permitted to destroy these channelizing memoranda on a trial basis for a period of six months for the purpose of determining if the benefits derived therefrom in the form of savings in space and file cabinets outweigh the disadvantages. The offices recommended for this experiment were San Francisco and Chicago.

These offices were instructed to submit specific recommendations as to the procedures to be utilized in the destruction of these channelizing memoranda.

Memo Bland to Belmont
RE: INTERNAL SECURITY - ESPIONAGE CONFERENCE
JUNE 9 - 10, 1960

STREAMLINING PROCEDURES - CHANNELIZING MEMORANDA

Procedures

(1) The current procedure with regard to filing the original informant report, the filing of the master channelizing memoranda in the informant file and the serializing of channelizing memoranda in the substantive case files will be continued as at present.

(2) The Agent, at the time he dictates the report, will prepare a memorandum addressed to the SAC itemizing the various memoranda reviewed and incorporated into the report and requesting the Chief Clerk's Office to destroy the serials itemized.

(3) Prior to destruction, the Agent's recommendations with respect thereto are to be reviewed and approved by the supervisor at the time he reviews and approves the report.

(4) Following destruction of the channelizing memoranda the Chief Clerk will so note on the memorandum. Thereafter, the memorandum will be filed in the case file as a permanent record of the serials destroyed.

(5) The reporting Agent will account for every one of the channelizing memoranda recommended for destruction in the substantive case file by showing the location, the file number and serial, of the original informant report or channelizing memoranda in the cover pages of the investigative report. (This would require the Agent to report or account for all the information reported by all sources concerning his subject.)

As noted previously herein, as a safeguard against the loss entirely of valuable information, the original informant report and/or master channelizing memoranda is always available in the informant report file.

RECOMMENDATION:

(1) That Chicago and San Francisco be authorized to destroy these channelizing memoranda following/reports on a trial basis of six months. submission of

(2) That after six months Chicago and San Francisco furnish a detailed analysis of the benefits derived, as well as any disadvantages noted.

(3) That if Chicago and San Francisco are inspected during this period, the inspectors thoroughly check the procedures and submit its observations as to whether the benefits gained from the destruction of these channelizing memoranda outweigh the disadvantages.

(4) Thereafter, the Bureau will consider the desirability of authorizing the destruction of channelizing memoranda on a field-wide basis.

(5) If you agree, there is attached a proposed letter to Chicago and San Francisco.

(SEE ADDENDUM ON PAGE 4)

FROM : J. F. Malone

SUBJECT: SUGGESTION #895-60
SUBMITTED BY [redacted]
FILES AND COMMUNICATIONS DIVISION

b6
b7C

SUGGESTION: That all index cards in the General Index prepared on the names Airport and Navy Base be destroyed when the subject appears on the same card. Destruction of Bureau Gen.

PRESENT PROCEDURE: Under out-dated Classifying rules when the name of the subject of a case appeared with the name of an Airport or Navy Base, such as in Theft of Government Property cases, an index card was made on the name of the subject, as well as on the Airport or Navy Base involved. Under current Classifying rules an index card is made on the name of the subject only and cards are not made on the Airport or Navy Base.

ADVANTAGES: An advantage to adopting this suggestion would be to purge the General Index of obsolete reference cards.

CONCLUSIONS: The Files and Communications Division recommends adoption of this suggestion since the index cards in question are not listed in current searches. They further recommend that if approved this suggestion could be expanded to include other similar index cards prepared on various Army installations such as Forts, Camps, and other Government reservations. Upon approval the cards destroyed will only be those where the name of the subject appears in the body of the card in addition to the name of the Airport, Navy Base, etc., upon which the card is prepared. On such cards as these it is known that a card on the subject is elsewhere in the index and the information will not be lost.

Mr. Rosen, Investigative Division, advises that the index cards as they are now maintained on Airport and Navy Bases are of no value to the Investigative Division as such and therefore their destruction would not affect investigative matters within the purview of his division. Mr. Rosen further states that since the adoption of this suggestion would result in a savings in space he recommends that it be adopted.

66-3286 -
RECORDED
1960

The Training and Inspection Division concurs with the recommendations of the Files and Communications Division and the Investigative Division that this suggestion be adopted for the reasons outlined above.

TO : Mr. A. H. Belmont

DATE: July 14, 1960

FROM : Mr. J. F. Bland

SUBJECT: DESTRUCTION OF BUREAU PROPERTY - STREAMLINING PROCEDURES - CHANNELIZING MEMORANDA General

Following recommendations of the Internal Security - Espionage Conference of June 9-10, 1960, Chicago and San Francisco were authorized by Bulet of June 22, 1960, to destroy channelizing memoranda in security cases following submission of reports. This destruction was authorized for a six-month period on a trial basis for the purpose of determining whether benefits derived therefrom outweigh the disadvantages.

Chicago has recommended the utilization of an office form to record the serials being destroyed. Chicago requested San Francisco's observations and subsequent Bureau approval of the form. Form is attached as Exhibit 1.

San Francisco feels that the rough draft notes of the Agent preparing the report listing the serials to be destroyed would be sufficient. San Francisco proposes to attach to the rought draft notes a short memorandum containing instructions to the Chief Clerk's Office to destroy those serials listed on the attachment thereto. See Exhibit 2 attached. San Francisco notes that to require a formal typed memorandum would entail considerable more typing time and could result in errors in the transposition of serial numbers, thus resulting in the destruction of the wrong serials. The Bureau agrees, however, feels that a sample form can be devised which would eliminate an attachment as suggested by San Francisco and, thus, eliminate the possibility of the attachment becoming lost or destroyed. A proposed form is attached as Exhibit 3.

ACTION:

It is recommended that the proposed form (Exhibit 3) be adopted for the above purpose. If you agree, there is attached a proposed letter to Chicago and San Francisco containing as an enclosure a copy of the proposed form.

SUBJECT: SUGGESTION # 54-61
RECORDS BRANCH STREAMLINING COMMITTEE
DESTRUCTION OF BUREAU PROPERTY

SUGGESTION: Miss [redacted] a GS-6 employee assigned to the Consolidation Unit, has suggested through the Records Branch Streamlining Committee that Form FD-132 (Request for Approval of Local Police School and/or Assignment of Bureau Instructors) be retained in Bureau files for a period of three years and all such forms prior to that time be destroyed.

PRESENT PROCEDURE: These forms are submitted by Bureau field offices and are filed in 1-1152 as a "not recorded" piece of mail and retained indefinitely.

CONCLUSIONS: Records Branch is in favor of adopting this suggestion. This file contains over 30,000 serials, many of which are the above described forms. It is believed in the furtherance of good records management this form should be destroyed as there is no apparent use for it after a reasonable period of time has elapsed.

RECOMMENDATION:

(1) Favorable.

(2) For referral to the Training and Inspection Division for acknowledgment and their views concerning the suggestion.

Director, FBI August 24, 1960

Legat, Havana (66-0)

HAVANA OFFICE
ADMINISTRATIVE

For the information of the Bureau, the Havana office is presently undergoing a reorganization. Inasmuch as there are at the present time only one agent and one stenographer assigned to this office, we are giving up to the Embassy as of August 25, 1960, the space of room 106 which is approximately 500 square feet.

This office also is in the process of a file destruction program of a radical nature inasmuch as the Embassy is presently in Phase I of its Emergency Evacuation Plan which calls for the destruction or return to headquarters of all material not absolutely necessary for carrying out the immediate functions of the office. As the Bureau is aware, this office has had authority to destroy criminal cases closed over one year and security cases closed over three years. Under the present plan adopted by this office, all files which are not deemed absolutely essential for the operation of this office are being destroyed. It is to be noted that in reviewing files for destruction, care is taken to see that the Bureau is in possession of copies of material presently being destroyed. Of course, this will place some burden on this office with respect to name checks and it is anticipated that in the future the Havana office will request of the Bureau information on names which information was previously maintained in the Havana office files.

The Havana office is continuing to maintain its indices complete even where subject matter to which such indices refer has been destroyed. This indices will, therefore, serve as a means of determining that we did have some information on an individual or organization.

Destroyed by Bureau

Havana 66-0

Legat requests permission to sell to the higher bidder the following surplus property presently maintained in the Havana office:

IBM Typewriter, Serial No. 486750, very good condition
IBM Typewriter, Serial No. 1202109, Very good condition
Royal Typewriter, Serial No. HHP-5422620, fair condition

2 Filing cabinets, 4-drawer, legal size, bar lock attachment

The Havana office also is in possession of office equipment, such as staple removers, staple machines, hole punches, etc., which are noninventory items. Legat believes that a ready market can be found for sale of these items.

It is Legat's opinion that no attempt should be made to have the above property shipped from Havana to the United States at the present time due to the almost chaotic situation with respect to shipments from Cuba.

PLEASE ADVISE BY CABLE IF THE ABOVE MEETS WITH BUREAU APPROVAL.

SUBJECT: SUGGESTION #54-61
MISS [redacted]
FILES AND COMMUNICATIONS DIVISION
DESTRUCTION OF BUREAU PROPERTY

SUGGESTION: That Forms FD-132 (Request for Approval of Local Police School and/or Assignment of Bureau Instructors) be retained in Bureau files for a period of three years and all such forms prior to that time be destroyed.

PRESENT PRACTICE: These forms are presently being retained indefinitely and are filed in Bufile 1-1152 as a non-recorded communication. This file contains over 30,000 serials.

CONCLUSIONS: Mr. McGuire, Files and Communications Division, recommends that this idea be adopted since there is no apparent use for the material after a reasonable period of time has elapsed.

The Training and Inspection Division has no objection to adopting this suggestion with the proviso that forms should be retained if a communication was prepared in connection with the form. In some instances a letter is written in connection with the form to the field which relates to policy matters and since it is often necessary to refer to such policy in a period beyond three years such correspondence should not be destroyed and the incoming forms should also be retained. Since no useful purpose is served in retaining forms that do not have a copy of the Bulet attached thereto, we have no objection to the destruction of these forms after a three-year period.

SUBJECT: NEWSPAPER CLIPPINGS

DESTRUCTION OF BUREAU PROPERTY, GEN'L.

Present rule with regard to destruction of newspaper clippings creates a necessity for Records Branch to regularly return many clippings to prior recipients for determination as to whether clippings should be filed or destroyed. It is believed existing rule should be reconsidered.

Manual for Bureau Supervisors, page 11, sets forth certain rules prescribed by Records Branch. One rule is to effect that if newspaper clipping is not marked for filing and in the opinion of the Supervisor to whom the clipping is last routed it is not necessary to file it, the clipping should not be routed to the Records Branch. It is the responsibility of this Supervisor to mark the clipping "file" or destroy it. This rule was recently re-emphasized by memorandum to all Bureau officials.

The rule, however, creates a mandatory recontact problem in many instances. This is evidenced by the return to me by Records Branch on 8/24/60 of a number of newspaper clippings which had not been marked for file and yet had passed through this Section, had been initialed, and had reached the Records Branch. These clippings were returned to me as a result of recent system whereby each Division has set up liaison with Files and Communications Division to prevent recurrence of any undesirable practices in handling of mail.

Many of these clippings (samples attached) were initialed by Supervisors in this Section and were not marked for file either because they did not warrant it or because they duplicated prior material marked for file. The point is they could not be destroyed by the Supervisor in this Section at the time of review because the routing designated in the routing block had not been completed. In the instances noted, the clippings had been checked for Mr. Parsons, Mr. Belmont, and Mr. DeLoach in the routing block. The clippings were initialed for Mr. Parsons and Mr. Belmont and after reaching Mr. Belmont were routed to this Section since they pertained to work of this Section. They were in turn routed to appropriate Supervisors in this Section who initialed the clippings and would have destroyed them except that the routing block called for Mr. DeLoach to see them. Accordingly, they were thrown in outgoing mail to be routed to Mr. DeLoach. After they were initialed by or for Mr. DeLoach, they were apparently placed in outgoing mail and reached Records Branch.

ORIGINAL FILE IN

66-1892-706

Memorandum Mr. Donahoe to Mr. Belmont
Re: Newspaper Clippings

Under the existing rule, the Records Branch is going to continue to have recontact problems where the last Supervisor initials clipping before all Bureau officials checked in routing block see it. In such instances, the Supervisor could not destroy the clipping and the Manual rule does not call for the last Bureau official who sees it to destroy it if filing not warranted or indicated.

Apparently the necessity to return such clippings to the sections is considered a recurrent problem. It appears to me the most reasonable way to cure it is to change the cited rule so that the last initialing recipient (not necessarily the last Supervisor) can destroy the clipping if filing has not been previously noted and is not considered necessary by the last recipient. If all officials and Supervisors have initialed a clipping and no one has marked it for file, it should be possible for the last recipient to destroy it. * A good example of problem is fact that all of 73 clippings received in Section on one day (Saturday) must ultimately go to DeLoach if rule followed [illegible] return to DeLoach as recommended.

RECOMMENDATION:

Recommend Files and Communications Division consider revising cited rule so as to permit last initialing recipient, rather than the last Supervisor, to destroy clippings if filing not necessary. (Attachments can be destroyed after consideration completed.)

ADDENDUM OF FILES AND COMMUNICATIONS DIVISION 8-30-60

The above recommendation will make the Supervisors' Manual technically correct by changing the word "supervisor" to "official" or "recipient." We prefer the word "official" and an appropriate manual revision is attached. We have discussed this matter with Mr. DeLoach's division and in the future where they are the last ones to receive them they will destroy clippings that are not marked "file" if they do not themselves want them filed. They have been doing this in the past and attached samples must have slipped through.

FWW:bpr
(3)
Enclosure

(See page 3 for Addendum)

Memorandum Mr. Donahoe to Mr. Belmont
Re: Newspaper Clippings

ADDENDUM OF TRAINING AND INSPECTION DIVISION 9/1/60

It is felt that the word "supervisor" should remain in the manual at the point in question and the words "official or" be added thereto. In some instances, supervisors may not consider themselves officials and the initialing or the destruction of the clipping will still remain undone. By adding the words "official or," we will cover both supervisors and officials. Mr. Waikart of the Files and Communications Division agrees with this proposed change and the changes have been made on the enclosed proposed writeup.

FMB:wlm
(1)

August 30, 1960

PROPOSED CHANGE IN
MANUAL FOR BUREAU SUPERVISORS

Section 20, Part (10), Item (a), page 11 should be amended to read as follows:

(a) Newspaper clippings are not placed in file or retained unless they are marked "File" and initialed by an official or supervisor. The only exception to this is a clipping which bears a notation by the Director or an official of the Bureau. Clippings, etc., containing notations should be handled as current incoming mail and should not be permitted to remain in the "Hold" boxes of officials and supervisors. They should be reviewed, initialed, and forwarded promptly to the Records Branch for indexing, recording, and filing. The officials and supervisors responsible for particular subject matters should mark clippings "File" and add their initials preceded by the division number (5 - initials) whenever it is desired that a clipping be retained in the Bureau's files. If the newspaper clipping is not marked "File" and in the opinion of the official* to whom the clipping is last routed it is not necessary to file, the clipping should not be routed to the Records Branch. It is the responsibility of the official* to mark the clipping "File" or destroy it.

* or supervisor

NOTE: Based on memo Donahoe to Belmont, 8-26-60, Subject: Newspaper Clippings, with addendum, 8-30-60, FWW:bpr with addendum 9/1/60 FMB:wlm

TO : MR. CALLAHAN

DATE: 9/1/60

FROM : C. R. Davidson CRD

SUBJECT: FORM 3-87, REPORT OF PHYSICAL EXAMINATION

Destruction of Bureau

attached Treptow ltr 9-2-60 to Davidson from Bureau re destruction of Health Service records

Attached is a copy of form 3-87, Report of Physical Examination which form is utilized in the Health Service in connection with recording pertinent information from applicant physical examinations. This information is recorded at the time the physical examination is reviewed in the Health Service. It is then filed in the applicant drawer. When the employee enters on duty, this card is removed and used as a follow-up for necessary tests such as chest X ray, urinalysis and blood serology. Any abnormalities or contingencies are also listed on this card and the new employee is interviewed concerning same shortly after entry on duty. The card is then filed in the in-service section with individual treatment cards which reflect a chronological history of each treatment afforded an employee. These treatment cards are destroyed when an employee ceases active duty unless there is some reason for making it desirable to permanently retain these cards. The Report of Physical Examination card, form 3-87, is destroyed inasmuch as the original pre-employment physical report is in employees personnel file.

The Report of Physical Examination cards are of assistance during counseling employees on health problems and during emergencies and in many instances eliminate the necessity for calling the employees' personnel file.

As a rule, a history of value is not built up in less than two years except in unusual cases. These physical report cards bear notations concerning abnormalities noted by the physician. These are not transferred to the treatment card inasmuch as it is time consuming and is not necessary as long as the physical report card is attached.

Report of physical examination is not of much value after a two year period of time. Ordinarily the chronological history of treatments on employees Health Service treatment card gives sufficient background information on health matters over a two year period of time. There is no advantage in keeping the Physical Report form 3-87 more than two years.

RECOMMENDATION:

It is recommended approval be given to destroy all physical report cards over two years old.

Director, FBI	Mrs. [redacted]	Files & Communications

SUGGESTION

That file 1-1 (New Special Agents School) be reviewed for destruction of all memoranda or material which is obsolete and of no current value. Examples of type of material to be destroyed:

1. Material re agents attending schools of instruction.
2. Training school schedules and cancellations (with the exception of material placed in file in the past year).
3. Lecture material. (See serial 181 for type of material)

All material pertaining to policy or of a historical value should be retained.

Current practice or rule (Include manual citation as well as facts)

Mail currently being filed in that file

Advantages of suggestion and annual savings (include basis for estimate)

This file consists of 23 sections (approx. 2400 serials). Destruction of this material would be a saving of space in the Filing Unit and Numbering Unit.

Employee Suggestion
Submitted by [redacted]

COMMENTS:

Records Branch favors purge of this file since much of the mail contained in it is obsolete and would appear to be of no further value. Destruction of this type of mail is already authorized under the general records schedule and no further archival approval is required. Should the Training and Inspection Division agree with the suggestion, they may desire to recommend a cutoff date beyond which all mail would be reviewed for destruction.

RECOMMENDATION:

For referral to the Training and Inspection Division.

SUBJECT: MANUAL OF RULES AND REGULATIONS
DESTRUCTION OF INDEX CARDS FOR
FILE 67-0 IN THE FIELD

PROPOSAL: That index cards relating to the 67-0 files be destroyed when such files are destroyed.

PRESENT MANUAL REGULATIONS: Part I, Section 3D, 8f, (33), Page 15, of the Manual of Rules and Regulations provides that Bureau applicant material in 67-0 in the field may be destroyed on an annual basis when three years old if of no value.

Part II, Section 3C, 6, Page 5, of the Manual of Rules and Regulations permits destruction of the following index cards:

1. Index cards on motor numbers, serial numbers, license numbers or vehicle identification numbers and index cards on serial numbers for radios, televisions, and firearms and typewriters are to be destroyed as they are encountered when they are five years old.

2. Index cards relating to the 25 (selective service) files destroyed when ten years old under certain conditions.

3. Index cards on Bureau letters requesting name checks in Atomic Energy Act applicant cases (when the name check resulted negatively) may be destroyed when the Bureau letter is destroyed (which is periodically, not less than once a year) or the cards may be destroyed during regular check of indices.

OBSERVATIONS: At the time the destruction of the 67-0 files in the field was approved, no consideration was given to the destruction of the index cards relating thereto. It is felt that the field offices should be instructed to destroy such index cards, since it appears that no purpose is served by leaving the cards in the indices. The Files and Communications Division feels that the index cards in the field offices for the 67-0 files should be destroyed.

SUBJECT: DESTRUCTION OF NO. 3 CARDS

Bureau Property General

By memorandum 8-8-60, SAC New York suggests that the No. 3 Cards, which under present Bureau policy are kept for three years, be kept only one year.

SAC points out that because Special Agents now sign in and out on the No. 1 Register, the No. 3 Card is no longer an official payroll record; and that in three years the New York Office accumulates 800,000 No. 3 Cards which are kept in at least 36 separate cabinets and this creates a storage problem.

The use of the No. 1 Register to record both the sign-in and sign-out of Special Agents dates back to July, 1959, and was based on SAC Letter 59-43 dated 7-7-59. Prior to that time Special Agents signed in on a register but signed out on a No. 3 Card instead of on the sign-in register; thus, the No. 3 Card was an official payroll document and had to be kept like other such documents for three years.

Special Agents, though they sign in and out on the No. 1 Register, also show their time-in and time-out on the No. 3 Card. So long as the No. 1 Register shows both time-in and time-out, however, it is the basic payroll document. The No. 3 Card is primarily a "locator" device as it indicates where the Agent is to go each day and on which cases. It is also used to record the Agent's voluntary overtime, his time spent in the office, his time spent developing potential criminal informants, and his time spent developing potential security informants. The field offices prepare periodic reports on these items and forward them to the Seat of Government. These reports are kept for future reference, and it is not considered necessary to also keep for three years the No. 3 Cards on which they are based.

66-3286-
NOT RECORDED
17 AUG 19 1960

The No. 3 Cards have other uses. In isolated disciplinary cases where an issue arises as to just how an Agent spent his time on a certain day, the No. 3 Cards may be very pertinent. A No. 3 Card was consulted, for example, in the case of SAC Auerbach to ascertain if it showed attendance at firearms training, an employee having alleged that the SAC had not attended such training.

Memorandum, Davidson to Callahan
RE: DESTRUCTION OF NO. 3 CARDS

Also, the Inspectors check the No. 3 Cards and compare them with the No. 1 Registers, the investigative periods shown in investigative reports, and so on. Bureau Divisions are normally inspected annually, but not on exact anniversary dates. From this standpoint, if we are not to keep the No. 3 Cards for three years as we now do, we ought to keep them for at least two years.

RECOMMENDATION:

It is recommended that No. 3 Cards be kept for the current calendar year and the preceding calendar year, except that this system cannot begin to operate until three years following July, 1959, inasmuch as up until that time the No. 3 Cards were part of the basic payroll records and Federal regulations require their retention for three years. If you agree, the New York recommendation will be acknowledged and appropriate manual changes will be made.

FROM : J. F. Malone

SUBJECT: ~~DESTRUCTION OF INDEX CARDS IN FIELD~~ DESTRUCTION OF BUREAU PROPERTY - GEN

PROPOSAL: That index cards in field be destroyed when 20-year-old files are destroyed; when material in administrative files has been indexed, that index cards relating thereto be destroyed when such files are destroyed. (Authority for destroying files in 20 years instead of 25 years is SAC Letter 59-31 (B).)

PRESENT MANUAL REGULATIONS: Manual of Rules and Regulations, Part II, Section 3C, 6, provides for destruction of index cards: (1) On motor numbers, serial numbers, license numbers, or vehicle identification numbers and on serial numbers for radios, televisions, typewriters, and firearms as they encountered when 5 years old. (2) On Bureau letters requesting name checks in Atomic Energy Act Applicant Cases (when name check resulted negatively) when the Bureau letter is destroyed (which is periodically, not less than once a year) or during regular use of indices. (3) Relating to certain files destroyed in classification 25 (Selective Service) when 10 years old. (4) Relating to 67-0 (Bureau Applicant) files destroyed when 3 years old.

PROCEDURE IN RECORDS BRANCH: The Records Branch destroys index cards when certain files in classification 25 (Selective Service) are destroyed and when 67-0 (Bureau Applicant) files are destroyed. It does not destroy files when they are 20 years old; this regulation applies to the field offices only. The Records Branch destroys index cards for any material which has been indexed when the material is destroyed; no cards are maintained in the indices for any material which has been destroyed. When Bureau approval is secured to destroy certain material, the index cards are likewise destroyed.

OBSERVATIONS: The field has not been instructed to destroy index cards for files destroyed when 20 years old because the files here at the SOG are not destroyed. It was felt that if the field needed to know what a particular reference pertained to, it could check with the SOG and secure the necessary information. The supervisors in the Records Branch cannot recall that the field has ever requested information concerning a file which has been destroyed in the field (destruction of such files began approximately April, 1950); therefore, it does not seem that leaving the cards in the indices in the field serves any purpose. Such cards should be destroyed.

Memorandum to Mohr
RE: Destruction of Index Cards in Field
9/27/60

They occupy space which is costly. There will be savings in the time of personnel as a result of the destruction of such cards. Now time is wasted listing file numbers on search slips for files which have been destroyed and in attempting to pull such files. Searches can be made faster with less cards in the indices. The field can request a search of the Bureau indices at any time; and if we included a specific statement in the Manual of Rules and Regulations that files are not destroyed at the SOG when they are 20 years old, the field would be alerted to the fact that the SOG might have information on a particular subject.

The objection of the field to the destruction of these cards is getting the job done with the present personnel complement; however, if we do not start the destruction now, the job will be greater each year. It can be handled on a project basis and should be started now.

Enclosed are results of surveys conducted in the field and at the SOG regarding this proposal.

RECOMMENDATIONS: (1) That index cards be destroyed for files destroyed when they are 20 years old.
See memo 9/10/60 for Ex. Conf. action

(2) That index cards be destroyed for administrative files when any material in such files is indexed at the time the files are destroyed.
See memo 9/10/60 for Ex. Conf. action

(3) That a project be started to purge indices of all index cards relating to files already destroyed by referring to the lists of such files destroyed maintained at the beginning of each case classification.
See memo 9/10/60 for Ex. Conf. action

(4) If approved SAC Letter and Manual Changes will be proposed.
No SAC Letter necessary at this time. Manual change finally approved by Ex. Conf. & Inspector Training handled by

FROM : R. R. Roach

SUBJECT: DISPOSITION OF INDEX CARDS WHERE FILE DESTROYED (FIELD)
DESTRUCTION OF BUREAU PROPERTY - GEN

This is to report observations of Baltimore and Charlotte Offices regarding disposition of index cards where files are destroyed. Present rules, Manual of Rules and Regulations, Part 3, Section 2, paragraph 8, instruct:

1. Index cards to be kept for files over 20 years.

2. Index cards to be destroyed in connection with destruction of file over ten years old in the "25" classification.

Baltimore Office - Chief Clerk desires to destroy index cards at time file destroyed stating this would save a lot of time and extra work later on.

Charlotte Office - Chief Clerk recommends indices cards not be purged at time file destroyed. Feels should only remove index cards at time of consolidation or when checked by correlation clerk to see if identical. He reasons space saved is negligible for amount of time expended, pointing out purging of index cards is a separate operation from the destruction of files requiring the compilation of a list or by using main serials, which have to be checked to indices and cards pulled. He claims there is no present problem with searches and only one request has been made of the Bureau for serials where file destroyed.

As an example of the work involved, Chief Clerk of Charlotte points to "25" classification where a number of files have been destroyed. In these files the main serial or serials were kept to be used in pruging the indices. He estimates there is at least seven days work to remove the corresponding index cards. There are still 30 drawers of files in this classification to be considered for destruction.

OBSERVATION: The greatest concern over purging indices is personnel. This purging has been put into a project category, something to do when personnel available. Rather than handle on a stepped-up, day-to-day basis, it is held, hoping some windfall of clerks, etc., will resolve. Being held, it continues to pile up.

Memo for Mr. Moore
Re: DISPOSITION OF INDEX CARDS
WHERE FILE DESTROYED (FIELD)

This concern over assigning the task currently to personnel available does not take into consideration the increased number of index cards not supported by files. Negative references increase the clerk's work load. One search containing a negative reference is minimal as regards employee effort. But if there is a negative reference on each of a majority of searches the waste of employee time is multiplied by each such search. The waste is in clerk having to go to closed file section, finding file not there then checking the list at head of each classification to determine that file containing reference has been destroyed. The incidence of negative references will "snowball" with the continued destruction of files.

Our indices are becoming larger with less meaning. In all but smaller offices the indices can soon become unworkable, and even smaller offices will have to face this fact before long.

The longer destruction of indices is put off, the greater the project to bring it back into line.

At present, we maintain indices cards on files over 20 years but destroy cards for files in "25" classification where file is over 10 years old and can be destroyed. The files being destroyed in this classification are zero, non-willful violations and matters where office is not origin or prosecution. If we can purge index cards for these there appears justification to purge for all files destroyed on a consistent basis. In important cases, request for old background information can be made of the Bureau.

It is suggested additional information be obtained from several offices with regard to:

1. Handling on day-to-day basis
2. Effect on indices-incidence of negative references
3. Desirability of purging for all files destroyed
4. Field opinion based on other than immediate personnel factor

With good management of present available personnel, it is felt purging of indices could be brought into current status. For example, an office has destroyed files in "25" classification consistent with Bureau instructions. It is estimated it will take ten days to purge indices. One clerk working 2 hours a day could theoretically bring this to current status in eight weeks, and thereafter handle on a current basis.

ALL INFORMATION CONTAINED HEREIN IS UNCLASSIFIED DATE 8-6-82 BY SP4ELW/cal

SUBJECT: DESTRUCTION OF INDEX CARDS

DESTRUCTION OF BUREAU PROPERTY-GEN

SAC Letter 57-19 instructed the field that when files over 25 years are destroyed, index cards relating thereto should be marked with a stamp showing the file was destroyed and the year of such destruction. As a result of numerous inquiries and proposals to reconsider these instructions, the Training and Inspection Division conducted an extensive study of the proposals by seven field offices, made the results available to the Executives Conference, which on 1/22/58 recommended that the field no longer be required to stamp such cards and that the field be required to show on the list kept at the beginning of each classification the date the file was destroyed in addition to the requirement of listing the files destroyed. This procedure is now followed, and index cards on destroyed files are maintained in the general index and no notation is made on them that the file has been destroyed.

This matter has been given additional study by the Inspection Section. Chief Clerk Buist W. Swaim, of the Birmingham Office, who has been a Chief Clerk since 1941, strongly recommends that the current policy be continued, noting that considerable clerical time would be required to stamp or to remove index cards on destroyed files. To do either would require a complete searching of each serial in the file before the file may be destroyed, according to Swaim, resulting in an almost insurmountable problem, especially in small offices where personnel may not be readily available to handle such a project. He said the only real advantage of stamping or removing the cards would be in connection with daily searching, but pointed out this takes very little time and the amount of space saved in the indices as the result of removing the cards would be negligible. He believes the merits of the present policy greatly outweigh any possible advantage to be gained from a change in policy at this time.

The SAC, ASAC and Chief Clerk of the Detroit Office all oppose the destruction of index cards relating to files destroyed, citing the considerable amount of clerical time involved with the possibility existing of inexperienced clerical personnel destroying active, live index cards as well as those marked for destruction.

REC-11 66-3286-885

The Chief Clerk of the Baltimore Office expressed the opinion that it would be desirable to destroy index cards at the time the files are destroyed, stating this would save a lot of time and extra work later on if this operation were later required.

OCT 20 1960

INSERTED COPY FILED IN 66-3286-

Memo for Mr. Mohr
Re: DESTRUCTION OF INDEX CARDS

The Chief Clerk of the Charlotte Office recommends that the existing policy be continued and that indices cards not be pruged at the time files are destroyed. He believes the space to be saved by destroying cards is negligible and expressed the opinion that the big problem is personnel and he did not believe their utilization on this type project could be justified by the space obtained.

The SAC and Chief Clerk of the Washington Field Office readily see the advantage of destroying index cards at the time the related files are destroyed, but pointed out that the main problem is obtaining personnel for this project. They agreed that once the project is in a current status, it would not be too difficult for most offices to keep current. The SAC felt the destruction of index cards is desirable on a long-range basis although he did not think it was absolutely necessary at this time, especially in the smaller field offices.

Lester E. Short, Chief, Records Branch, Files and Communications Division, is strongly of the belief that index cards should be destroyed at the time related files are destroyed. He pointed out the tremendous success Bureau Headquarters has had in destroying index cards, noting that cards have been destroyed as fast as new cards are filed, therefore no additional index card filing space has been required in many years. He said the field may contend that if they retain the card, they can always say the Bureau would have the main file, but this is not always true and he recalls no instances in which the field has requested information in Bureau files which would have been in field copies of the same files which had been destroyed. He further said he felt that the need for space should be considered and felt that where filing space is needed, the field should be given the green light to proceed with the destruction of index cards on all files as they are destroyed.

OBSERVATIONS: While the destruction of index cards in most offices is no great problem at this time, we must take a long-range view and realize that our indices will grow tremendously in the future and have less meaning. If we don't destroy our index cards when we destroy our old files, there will be an ever-increasing number of instances where we look up index cards, seeking related files, only to find the files have been destroyed. The time to start correcting this situation is now -- not when the problem becomes acute! Although problems at the Seat of Government in purging indices are much greater than those in the field, the Files and Communications Division has proven over the years that it is highly advantageous to destroy the index cards as they destroy the files, resulting in no additional index card filing space needed in the past ten years inasmuch as cards are being destroyed as fast or faster than they are being added. Any system which has been found to work so well at the Seat of Government, should be made mandatory in the field.

Memo for Mr. Mohr
Re: DESTRUCTION OF INDEX CARDS

Admittedly, this will place added clerical burdens on the field, but once this project is brought into a current status, it is felt it can be kept current with minimum difficulty. This can be handled on a project basis, to be worked on whenever clerical demands might be slack. Agent personnel might also be utilized on an overtime basis, particularly to bring this into a current status. Some difficulty will be encountered in destroying index cards relating to files already destroyed, but many can be destroyed solely by file number, referring to the list at the beginning of each classification of those files which have already been destroyed. If this project is not initiated now, the problem will reach major proportions in many field offices within the next ten years.

RECOMMENDATIONS:

1. That the field be instructed to commence immediately a project to purge our field of all index cards relating to all files already destroyed, referring to lists of such files maintained at the beginning of each case classification.

2. That the field be instructed to commence immediately the destruction of all index cards relating to all files destroyed, henceforth, to keep this in a current status.

3. That this memorandum be referred to the Files and Communications Division for appropriate review, any additional observations, and the issuing of appropriate instructions to the field along with necessary manual and handbook changes.

Ex Conf. Oct. 3 favored only destruction of index cards when pertinent files were actually destroyed in the field in the future and only on a permissive basis. This also applies to index cards for administrative files. See Ex. Conf. memo of 10/3/60 "Destruction of Index Cards" Serial 66-3286-887

Ex. Conf. action Tasser on basis of memo to [illegible] 9/27/60 which actually was replaced this memo 9/20/60.

manual change handled by T+D

OPTIONAL FORM NO. 10

UNITED STATES GOVERNMENT

Memorandum

TO : MR. ROY K. MOORE

DATE: September 2, 1960

FROM : MR. R. E. RIGHTMYER

SUBJECT: DESTRUCTION OF INDEX CARDS
DESTRUCTION OF BUREAU PROPERTY-Gen'l

SAC letter 57-19 advised the field that when files over 25 years are destroyed the index cards relating thereto should be marked with a stamp showing that the file was destroyed and the year of such destruction.

As a result of numerous inquiries and proposals to reconsider these instructions, the Training and Inspection Division conducted an extensive study of the proposals by seven field offices and in 1958 the Executives Conference was requested to consider the following points:

1. Whether the procedure should be continued to require stamping such index cards.

2. Whether such index cards should be removed from the general index and destroyed.

3. Whether such index cards should remain in the general indices and not stamped as then required.

On 1/22/58 the Executives Conference recommended that the field no longer be required to stamp such cards and that the field be required to show on the list kept at the beginning of each classification the date the file was destroyed in addition to the requirement of listing the files destroyed. Appropriate changes in the Manual of Rules and Regulations, Part II, Section 3, Page 13, were thereafter effected.

Manual of Rules and Regulations, Part II, Section 3, Page 13, paragraph 8.a. states "Files and records in field divisions may be destroyed after they have become twenty years old. Keep at beginning each classification list of files destroyed and date destroyed." This memo will therefore consider the destruction of index cards for files over 20 years old.

REC- 31

EX-100

12 OCT 17 1960

ALL INFORMATION CONTAINED
HEREIN IS UNCLASSIFIED
DATE 8-6-82 BY SP4ELW/cal

57 OCT 18 1960

UNRECORDED COPY FILED IN 66-50894

OBSERVATIONS:

Index cards consume one inch of space per 100 cards, approximately, and 4500 cards make up an index card cabinet drawer. Any method which can be devised to purge the indices of unnecessary cards will result in a saving of space in the cabinet drawers and a saving of time-consumed searching through cards in the indices which have no bearing upon files in the office.

In the event destruction of index cards for files that have been destroyed is adopted, the problem will be generally centered around three groups of such cards now in the general index:

1. Cards already stamped showing file destroyed
2. Cards for files destroyed since stamping was discontinued
3. Cards for files currently being destroyed.

The destruction of cards in group 1. above does not constitute an acute problem since it will merely mean purging the index of all stamped cards on a project basis or during regular use of the indices by clerical personnel. The former system should be employed in preference to the latter, when time and personnel allow, since it would make the space formerly occupied by these cards available at the earliest opportunity whereas the latter system would be dependent upon a secondary observation of clerical personnel during regular use of the indices.

Destruction of cards in group number 2 and 3, however, poses a problem of somewhat different proportions. With respect to group 2 it would not be logical, in consideration of time spent and available clerical personnel, to engage in a project to determine the file numbers of all files destroyed since stamping of index cards ceased, then to arrange such file numbers in a logical order to allow a general purge of the indices. Such a project would be time-consuming and costly.

During inspection of the Detroit Office, two plans were offered for consideration which will be discussed below as plan A. and plan B. It should be noted that plan A. proposes no further action with respect to cards in group 2. above.

A. At the time when a file is selected for destruction, de-index cards will be prepared by clerical personnel on other-than-white 3x5 cards. These cards for the de-indexing process would then be alphabetized

and at suitable intervals clerical personnel would remove the index cards pertaining thereto from the general indices.

B. A numerical list of classifications showing the "range" of files destroyed would be maintained in the general indices available to all clerical personnel. Old cards can generally be recognized on sight, therefore, such cards could be selected from the indices on the basis of the file numbers falling within the "range" of destroyed files. These cards thusly-selected from indices would then be placed in a filing box maintained for that purpose and the indices unit supervisor, who would maintain a detailed list of files destroyed, would destroy the appropriate cards and return cards which should not be destroyed to the general indices. This system would depend upon a secondary observation of clerical personnel.

Chief Clerk [redacted] states that he is opposed to the destruction of index cards since the initial instructions relating to destruction of files in 1946 provided that the index cards be retained so future inquiries would allow identification of files concerned so that information could be obtained from the main file at the Bureau. In the event index cards are to be destroyed, [redacted] favors a systematic destruction of the cards as outlined in group A. above and states that the alternate proposal depends upon the alertness of clerical personnel to voluntarily locate such index cards during the process of other operations. He stated that only by the systematic destruction of such cards could any appreciable amount of space be made available in the cabinets at one time to show a real saving in space. b6 b7C

ASAC DISSLY pointed out that the former system for stamping index cards was discontinued since the time consumed was not justified. He added that it would entail the same amount of work to destroy index cards as it formerly took to stamp these cards and that such an operation is not justified. He remarked that in any de-indexing process the hazard exists that inexperienced clerical personnel will erroneously destroy current, live index cards.

SAC HOSTETTER stated that he is opposed to destruction of index cards due to the amount of work involved and that such a procedure would confuse clerical personnel by causing them to handle both active cards and cards for destruction.

RECOMMENDATION:

It is recommended that the observations above be considered along with the comments obtained during field inspections of other offices. It is suggested that if destruction of index cards is considered feasible, from results of these surveys, that consideration be given to installing a system, on a trial basis, in one or two representative offices so that cost studies relative to space and time saved could be made to determine the advisability of adopting a unified system of destruction of index cards for files destroyed.

SUGGESTION - DESTRUCTION OF BUREAU PROPERTY

It is suggested that file number 62-58216 be destroyed, microfilmed or purged. This file consists of longhand letters addressed to President Roosevelt and Mr. J. Edgar Hoover urging the United States to stay out of World War II, National Defense matters, and 5th column matters. This file covers seven cabinet drawers, with 59 sections, 9 enclosures behind file, (all longhand letters) and 31 sub A sections.

Destruction of files & National Defense matters

Current practice or rule (Include manual citation as well as facts)

These are all indexed but eliminated on all loyalty reviews.

Advantages of suggestion and annual savings (include basis for estimate)

There would be a savings of file reviewers' time, when necessary to check this file.

There would be a savings of seven file cabinet drawers.

Several thousand cards can be destroyed in the General Index.

Savings: Unable to determine.

SUBJECT: DESTRUCTION OF NO. 3 CARDS
REVISION OF MANUALS

Destruction of Bureau Property

On the suggestion of the New York office, the Bureau recently decided that No. 3 Cards should be kept for two years instead of three because they are not ordinarily an official payroll record any more as they once were, and they become a bulky storage item creating a problem in large offices like New York.

There is one situation where the No. 3 Card might be a payroll record because it might be the only document reflecting sign-in and sign-out data. This is the case where an employee is in another field division for more than 24 hours for the purpose of testifying. Under Bureau regulations he now submits a No. 3 Card in lieu of a daily report. It is felt that rather than promulgating a rule that all No. 3 Cards be destroyed after two years except the No. 3 Card executed by an employee who is in another field division more than 24 hours for the purpose of testifying, it would be better to have such an employee execute a daily report. Daily reports, which have the character of a payroll record, are all kept for three years, which is the government requirement as to payroll records. Requiring the testifying Agent to submit a daily report instead of a No. 3 Card would cover the payroll record angle and otherwise be just as satisfactory as having him submit a No. 3 Card.

TO : Mr. Tolson

DATE: October 3, 1960

FROM : The Executives Conference

SUBJECT: DESTRUCTION OF INDEX CARDS

BUREAU PROPERTY - GEN'L

On September 28, 1960, the Executives Conference considered a suggestion proposing that when files over 20 years old are destroyed in the field the corresponding index cards should be destroyed. Under the present procedure, the index cards are retained in the field office.

The Executives Conference, consisting of Messrs. Tolson, Mohr, Parsons, Belmont, Callahan, Malone, Rosen, Waikart, Wick, Tamm, Trotter, Clayton and Ingram, was of the unanimous opinion that the field should be advised that in the future it will be permissible to destroy index cards at the time the files are destroyed, consistent with the manpower available to effect this procedure.

RECOMMENDATION:

That the enclosed change for the Manual of Rules and Regulations be approved.

PROPOSED CHANGES IN MANUAL OF RULES AND REGULATIONS

Part II, Section 3c6, of the Manual of Rules and Regulations should be amended by adding the following new material as items g and h. The present letters g and h should be relettered to "i" and "j."

g. Index cards relating to files which are destroyed when they are 20 years old may be destroyed, consistent with the manpower available to do so.

h. When material in administrative files has been indexed and such files are destroyed, the index cards relating thereto may be destroyed, consistent with the manpower available to do so.

Based on memorandum from Executives Conference to Mr. Tolson, dated 10-3-60, re: DESTRUCTION OF INDEX CARDS, JFM:sjw:lh.

DESTRUCTION OF BUREAU RECORDS-GEN'L

SUBJECT: SUGGESTION #149-61
SUBMITTED BY MRS. [redacted] b6 b7C
FILES AND COMMUNICATIONS DIVISION
DESTRUCTION OF NATIONAL DEFENSE PROGRAM

SUGGESTION: That file number 62-58216 be destroyed, microfilmed or purged.

This suggestion has previously been acknowledged by letter from the Director.

CURRENT PRACTICE: The material to which Mrs. [redacted] has reference is currently indexed but is eliminated on all loyalty reviews by the Records Branch.

ADVANTAGES: Mrs. [redacted] b6 b7C listed the following advantages to be realized by adopting her suggestion.

1. There would be a savings of file reviewer's time when necessary to check this file.

2. There would be a savings of seven file cabinet drawers.

3. Several thousand cards can be destroyed which are now maintained in the General Index.

CONCLUSIONS: Mr. Waikart, Files and Communications Division, feels that this suggestion has merit from a records management standpoint, and pointed out that adoption would result in substantial savings in space and arrangement of subsequent reviews. Mr. Sizoo, Domestic Intelligence Division, and Mr. MacLennan are both in favor of destroying all sections of this file and the thousands of index cards now maintained in the indices.

The file to which Mrs. [redacted] b6 b7C has reference consists of letters addressed to President Roosevelt and the Director urging that the United States stay out of World War II and also contains miscellaneous correspondence and newspaper clippings regarding National Defense. File uses 7 cabinet drawers of space and consists of 59 sections, 9 enclosures behind file (all longhand letters) and 31 sub A sections.

78 DEC 22 1960

Memo to Mr. Mohr
Re: SUGGESTION #149-61

Several sections of this voluminous file have been checked by the Domestic Intelligence Division which indicated that the file was originally opened in 1940 when the White House began referring to us for action messages being received in much volume from citizens addressing themselves to President Roosevelt. The last piece of correspondence from the file is dated 7/19/53. Although originally opened for the purpose of handling the references from the White House, the file became a receptacle for various pieces of miscellaneous correspondence addressed to the Director and for newspaper clippings. In some cases, it was noted the correspondence was anonymous. It was also noted that one sub A section of the file that was examined consisted of newspaper clippings which did not give any indication of having been indexed.

Mr. Wick, Crime Records Division, has no objection to the destruction of the file and related index cards. The Training and Inspection Division feels that from the age of the material contained in this file and the nonspecific nature of the material in it, the maintenance of this file serves no useful purpose and accordingly, is in favor of its destruction.

RECOMMENDATIONS:

1. That file 62-58216 be destroyed together with the related index cards and that the attached letter of commendation be sent to Mrs. [redacted] b6 b7C

2. Upon approval of recommendation 1, that this memorandum be referred to the Files and Communications Division for necessary action.

Mailed. Letter with his letter & letter card. Card + index Cards.

SUBJECT: DESTRUCTION OF APPLICANT-TYPE PERSONNEL FILES
Destruction of Bureau Property General

Reference is made to my memorandum dated 6-23-60 wherein authority was granted to destroy certain applicant-type personnel files and index cards pertaining thereto dated prior to June 30, 1952.

This is to advise that this project, which was undertaken during the summer months to make full utilization of summer employees assigned to the Personnel Records Unit, has been completed.

This project was undertaken to completely renovate the 156,000 applicant personnel files that were on hand at the beginning of the summer. All files were renovated to make them more adaptable to the shelf filing system recently installed. 63,567 files were reviewed and 40,059 files were destroyed. In addition, as a result of this project, 41,731 index cards were destroyed. This project resulted in the destruction of approximately 26% of the applicant-type personnel files which greatly alleviated the crowded condition they were in at the beginning of the summer.

This entire program was very capably supervised by Mrs. [redacted] of the Personnel Records Unit. Mrs. [redacted] had 14 summer employees assigned to her throughout the summer months and on occasions had as many as 26 employees under her supervision at one time. The average number of employees working on the project throughout its existence was 16.5 employees.

b6
b7C

REC-22 66-3286-889

EX-102

OCT 24 1960

Mrs. [redacted] handled her assignment for the summer in an outstanding manner and greatly improved the efficiency of the Personnel Records Unit by the diligent effort she put forth in completing this project as expeditiously and accurately as possible.

Personnel action deleted. See original.

DATE: 9-27-60

FROM : DIVISION STREAMLINING COMMITTEE

SUBJECT: SUGGESTION NUMBER 149-61

DESTRUCTION OF BUREAU PROPERTY

b6
b7C

Comment of Domestic Intelligence Division (DID) was requested regarding suggestion (copy enclosed) of Mrs. [redacted] of Files and Communications Division. She suggested destroying, microfilming or purging file 62-58216. This file consists of letters addressed to President Roosevelt and the Director urging U.S. to stay out of World War II, and also contains miscellaneous correspondence and newspaper clippings regarding national defense and 5th Column matters. File uses seven cabinet drawers of space and consists of 59 sections, 9 enclosures behind file, (all longhand letters) and 31 sub A sections.

From a check of several sections of this voluminous file, including one sub A section, it is indicated that the file was originally opened in 1940 when the White House began referring to us for action messages being received in much volume from citizens addressing themselves to President Roosevelt. The last piece of correspondence in the file is dated July 19, 1953. Although originally opened for the purpose of handling the references from the White House, the file became a receptacle for various pieces of miscellaneous correspondence addressed to the Director and for newspaper clippings. In some cases, it has been noted the correspondence was anonymous. It is also noted that the one sub A examined consisted of newspaper clippings which did not have any indication of having been indexed. Destruction of file authorized

While it can be definitely ascertained just how much use is made by DID of this file, it is noteworthy that by prior arrangement references to it are not listed on any searches of name check forms going to the Name Check Section nor on Loyalty Forms handled by the Employees Security Section, Investigative Division. From the age of the material contained in this file and the non-specific nature of the material contained in it, it is felt that as far as DID is concerned, the maintenance of this file serves no useful purpose. It is noted, however, that replies sent out on correspondence referred from the White House invariably assured the correspondent

that his information was being made a matter of official record in Bureau files. It is felt the Bureau need no longer feel bound by this to maintain this old correspondence and if so, it is believed the suggestion has definite merit and should result in substantial savings in space and time in eliminating need to review references to it.

It may be that Crime Records would have occasion to make use of material in this file, and accordingly it is believed the comments of that Division should be obtained prior to the taking of final action on the above suggestion.

RECOMMENDATION:

That this memorandum recording DID action in favor of destroying all sections of this file and the incidental thousands of index cards be forwarded to the Training and Inspection Division (Suggestion Desk) with the further suggestion that views of Crime Records Division also be obtained prior to final decision on this suggestion.

Agreeable with Name check section

ADDENDUM: MAJ:ijj 10-3-60 The above-outlined procedure is agreeable to the Correspondence and Tours Section and the Crime Research Section of the Crime Records Division.

SUGGESTION

I suggest that the approximately 690 names appearing in Bureau File # 100-344835-223-46 on pages 43 through 57 be de-indexed by removing the cards from the General Indices.

The above list contains the names of approximately 690 members of the UNITED CANAL WORKERS. No background or identifying data is given regarding any of the members. The UNITED CANAL WORKERS was formed on 7 May 1950 and expired on 28 October 1950. A large number of the members of this union were alien to the Canal Zone. Many of the names are very common. Due to the commonness of some of the names and the limited information, it would be difficult to cover a lead on many of the names contained in the subject list.

Current practice or rule (Include manual citation as well as facts)

The list of names is completely indexed.

Advantages of suggestion and annual savings (include basis for estimate)

(1) There will be a savings of space in the General Indices.

(2) Name Searching Analysts will not have to analyze the information on the subject cards when they have a name search on a name similar to those listed in the above file.

(3) Time will be saved in the File Review Unit inasmuchas the above references will not be listed and therefore will not have to be reviewed.

Disadvantages of suggestion

None known.

b6
b7C

(The use by the United States of my suggestion shall not form the basis of a further claim of any nature by me, my heirs, or assigns upon the United States. I understand that I will be considered for any justified award only if my suggestion is adopted within two years after submission.)

Recommendations and Comments of Division Head:

May 7, 1950, in the Canal Zone and expired on October 28, 1950. No identifying information is listed concerning any of the members other than their assignment in the Canal. In view of the lack of identifying information, it is difficult from a review standpoint to determine if any of these names are pertinent to any name check requests. From this standpoint, the names are susceptible to de-indexing, and suggestion is recommended favorable for adoption from a records management standpoint. Inasmuch as the information contained in this file may be of interest to the Domestic Intelligence Division, it is recommended that the comments of that division be secured prior to considering this suggestion for adoption.

DATE: 10-14-60

FROM : DIVISION STREAMLINING COMMITTEE

SUBJECT: SUGGESTION NUMBER 183-61

ALL INFORMATION CONTAINED HEREIN IS UNCLASSIFIED DATE 8-10-82 BY SP4CLW/cal

In response to request from Training and Inspection Division for comments of Domestic Intelligence Division (DID) regarding above suggestion, Committee is opposed to its adoption at this time.

b6
b7C

Suggestion, by [redacted] of Files and Communications Division, is that approximately 690 cards on names in pages 43 through 57 of serial 46 of 100-344835-223, on United Canal Workers (UCW) be removed from General Index. [redacted] points out UCW existed only from 5/7/50 to 10/28/50; many members of union were alien to Panama Canal Zone; many names are very common; and, due to common nature of names and limited identifying data, it would be difficult to cover leads based on them. He points out purging of cards would save space and also time spent in listing and reviewing references on search slips. Files and Communications Division looks favorably on suggestion from records management standpoint.

Committee opposes adoption of suggestion at this time after review of file and discussion with Nationalities Intelligence Section. Situation with respect to Canal Zone has been increasingly sensitive of late with more trouble expected due to agitation in Panama to oust U.S. from full control of Canal. We have reports of plans for violence against U.S. forces on 11/3/60, including possible sabotage of canal and locks. File covers period 1946-51 and reflects information, primarily from Army, showing U.S. concern over union efforts to organize about 20,000 alien Canal Zone workers, mostly Panamamians and Jamaicans. Communist-led United Public Workers of America (UPWA) were most actively organizing until they were barred from Canal Zone in 1950 after being expelled from Congress of Industrial Organizations for following Communist Party line. Left wing leadership of UPWA local in Canal Zone then formed UCW to hamper right wing organization efforts and did (though short-lived itself) succeed in creating so much confusion among alien Canal Zone employees that right wing union was able to organize only a small fraction of them. Names proposed to be purged represent members of left wing UCW.

Division Streamlining Committee to Belmont
RE: SUGGESTION NUMBER 183-61

While it is true many names are quite common, there is some identifying data and it is believed we could, if need arose in a specific situation, develop more information. Furthermore, space saved by purging would be less than one file drawer, based on usual figure of 800-1000 index cards per drawer. Time saved by purging cannot be estimated, however, listing and checking of references to these names has evidently not been a pressing problem as file is not on list of those eliminated automatically on name check searches due to meager identifying data.

As long as present unrest continues in Panama it is felt index cards have sufficient potential value to warrant retention.

RECOMMENDATION:

That this memorandum recording DID opposition to adoption of suggestion at this time be forwarded to Training and Inspection Division, Suggestion Desk.

Files and Communications

SUGGESTION

If a notation appears on a page in the body of a communication, which is suitable for/or has been disseminated, it is suggested that a clean copy of that page be retained and the remainder of the copy destroyed.

If a notation should appear on a page in a copy which does not appear in the original, it is suggested that the page on which the notation appears be retained.

It is also suggested that original copies (those copies which are first from the typewriter and prepared individually without the aid of carbon paper) be removed from file if there is no other reason for their being retained.

Destruction of Bureau Property

Current practice or rule (Include manual citation as well as facts)

Copy Destruction Working Guide, Page 1, Rule 7-c.
"All notations on copies must also appear on originals. If copies contain notations not on originals, the notations must *(continue on Page 2)*

Advantages of suggestion and annual savings (include basis for estimate)

If this suggestion is adopted it will allow more copies to be removed from the files. This will make available more space, than is now available, for more current Bureau files. The annual additional saving to the Bureau will be in the form of additional filing space. The monetary saving will have to be computed on the basis of the cost of the copy project and the additional space saved if this suggestion is adopted.

ORIGINAL COPY FILED IN 66-3286-5

Employee Suggestion from [redacted] b6 b7C 10/27/60

Current Practice or rule (continued)

either be copied on the original and placed in quotes to identify them as having been transferred from copy, or if desirable for some reason save an extra copy containing the notations. If writing is legible transfer initial, otherwise keep copy."

Original or first copies of other serials and communications are retained only because they are of original type, being the first copies off the typewriter.

RWB

ADDENDUM BY TRAINING AND INSPECTION DIVISION, RWB:meh, 11/4/60.

This suggestion relates to the Records Branch copy destruction project. This project consists of reviewing files for the purpose of destroying needless copies of material. In those instances where action has been taken on the copy of a communication such action, initials, etc., are transferred to the original communication and the copy is destroyed. Mr. [redacted] in connection with this project proposes that the copies with the notation be retained and that the original be destroyed. As indicated in the attached comments of the Files and Communications Division it would not be desirable nor feasible for the Bureau not to have in all instances the original of the communication. The Training and Inspection Division is of the opinion that this idea is impractical and accordingly is of the opinion that a letter of acknowledgment from the Director is not justified in this instance.

RECOMMENDATION: b6 b7C

That Mr. [redacted] be orally thanked by his Special Agent supervisor with regard to this matter and advised of the reasons for not adopting this suggestion.

Suggestion Transmittal

11/8 11/7

Suggestion submitted by [redacted] b6 b7C 10-31-60

On 10-28-60 the Records Branch Streamlining Committee met to consider the suggestion submitted by [redacted]. Mr. [redacted] suggestion discusses the rules in existence in connection with the copy destruction program. One of the regulations in handling the work of this program is that all notations regarding any action taken concerning the serial involved that appear on a copy must be transferred to the original and retained. Mr. [redacted] suggestion indicates that we should retain the page on which these action notations appear, substituting them for the original which could be destroyed. b6 b7C

The Streamlining Committee is not in favor of adopting this suggestion since it would require these clerical employees to disassemble these reports and substitute pages. This is highly undesirable since the Bureau should retain every page of the original report or communication. In addition the danger exists in the substitution of pages that other pages of the original could be destroyed by error after it had been taken apart. This type of thing does not appear on voluminous reports but appears more frequently on teletypes and airtels, and any space that would be saved by adopting Mr. [redacted] suggestion is negligible.

RECOMMENDATION:

(1) Unfavorable.

(2) For referral to the Training and Inspection Division for their attention and appropriate action.

FOOD AND AGRICULTURE ORGANIZATION
(62-82323)

62-82323-1. List of persons notified to the State Department under the International Organizations Immunities Act. (Inclusive and up-to-date as of 11/1/46)

Description of List:

The attached listing of names has been called to our attention by personnel engaged in Name Check work. They advise that the frequency of reference to this listing causes unnecessary work because insufficient information is available to effect an identification. In an effort to streamline procedures and eliminate unnecessary reference to this data it is proposed that the material be de-indexed through removal of the cards from the Bureau's indices.

It is requested that the appropriate substantive supervisor review the above listed file reference to determine if any reason exists for retention of the indexing on this listing of names. A notation advising of the decision reached may be placed on this memorandum. The memorandum should be returned to the Correlation Unit of the Records Branch, Room 6309 IB.

There are other similar lists in the files on the various international organizations listed in the cover memo, some inclusive through a different date. The lists were separated according to organizations, and were indexed and filed in the appropriate case files. Approval is requested to de-index all similar lists.

FROM : J. F. Malone

SUBJECT: SUGGESTION #183-61
SUBMITTED BY CLERK [redacted]
FILES AND COMMUNICATIONS DIVISION

b6
b7C

SUGGESTION: That approximately 690 names appearing in Bufile 100-344835-223-46 on pages 43 through 57 be deindexed by removing the cards from the General Indices.

ADVANTAGES: Mr. [redacted] listed the following advantages to be gained by adopting this idea: 1. There will be a saving of space in the General Indices. 2. Name searching Analysts will not have to analyze the information on the subject cards when they have a name search on a name similar to those listed in the above file. 3. Time will be saved in the File Review Unit since such references would not be listed, and, therefore, would eliminate the review of this material.

CONCLUSIONS: SA L. E. Short, Files and Communications Division, pointed out that from the standpoint of good records management they are in favor of adopting this suggestion.

The names referred to in this suggestion relate to members of the United Canal Workers Union which was formed in 1950 in the Canal Zone and expired during the same year. No identifying information is listed in our files concerning any of the members other than their assignment in the Canal. In view of the lack of identifying information, it is difficult from a review standpoint, to determine if any of these names are pertinent to any name check requests.

This matter has been studied by the Domestic Intelligence Division and Mr. Sizoo approved the recommendation that this suggestion not be adopted. It was pointed out that the situation with respect to the Canal Zone has been increasingly sensitive, as of late, with more trouble expected due to agitation in Panama to oust United States from full control of Canal. They pointed out that we have reports for plans of violence against the United States including possible sabotage of Canal and locks. The referenced file cover period 1946 - 1951 and reflects information, primarily from the Army, showing U. S. concern over union efforts to organize about 20,000 alien Canal Zone workers.

DESTRUCTION OF PROPERTY - GENL

Memo for Mr. Mohr
re: Suggestion #183-61

Communist-led United Public Workers of America (UPWA) were most actively organizing until they were barred from the Canal Zone in 1950 after being expelled from Congress of Industrial Organizations for following Communist Party line. Left wing leadership of UPWA local in Canal Zone then formed United Canal Workers (UCW) to hamper right wing organization efforts and did succeed in creating so much confusion among alien Canal Zone employees that right wing union was able to organize only a small fraction of them. Names proposed to be purged represent members of the left wing UCW. The Domestic Intelligence Division further pointed out that while it is true many names are quite common, there is some identifying data and it is believed we could, if need arose, in a specific situation, develop more information. Furthermore, space saved by purging would be less than one file drawer. It is their opinion that as long as present unrest continues in Panama the index cards have sufficient potential value to warrant retention.

The Training and Inspection Division is in complete agreement with the views and recommendation of the Domestic Intelligence Division.

b6
b7C

RECOMMENDATION: That this suggestion not be adopted. Upon approval, no further action is necessary since Mr. [redacted] has been previously thanked by letter from the Director with regard to this matter.

SUGGESTION

Destruction of Bureau Property -

At the time an Applicant, Criminal and Selective Service case is RUC'd or Closed all carbon copies of each serial be destroyed before the file is placed in the closed files section.

Current practice or rule (Include manual citation as well as facts)

Carbon copies of Applicant, Criminal and Selective Service cases are destroyed and consolidated after they have been closed for 6 months.

Advantages of suggestion and annual savings (include basis for estimate)

It would be practical to destroy carbon copies of each serial at the time the file is closed as it would make cabinet space readily available and would also expedite the consolidation of files at the expiration of the 6-month period.

At the time of the visit of NIKITA KHRUSHCHEV to the United States in September, 1959, the Laboratory supervised the taking of pictures of the arrival of KHRUSHCHEV and his party as well as other parties arriving at Andrews Air Force Base during the period of KHRUSHCHEV's visit.

The Laboratory has in storage numerous negatives made during this visit of KHRUSHCHEV. Prints from all of the negatives were furnished to the National Security Agency at the time. The negatives are of no further value to the Laboratory and should be either placed in permanent storage, or destroyed.

ACTION:

That the Domestic Intelligence Division advise the Laboratory whether above-described negatives may be destroyed or should be placed in permanent storage.

ADDENDUM
DOMESTIC INTELLIGENCE DIVISION

ETT:cgw 11-17-60

These negatives would not appear to have substantial value for future reference purposes and it is recommended that they be destroyed.

RECORDS MANAGEMENT - JUNE MAIL

~~CONFIDENTIAL~~

INSPECTOR E. C. WILLIAMS: Space within the Espionage Section, Room 2704 specifically, has been set aside to house certain files classified Confidential using as a flag for special treatment the Bureau's code word "JUNE." There are approximately 57 file drawers of material falling into this category. (#) U

After a spot examination of some of the material contained in these files it was determined a considerable volume had no lasting value, could be treated as administrative type correspondence, and should be purged. The mail in question appeared to fit into the category of correspondence spelled out in the specifications approved by a memorandum from the Department of Justice to the Bureau dated 12-15-50 (66-3286-443). This authority, granted upon request from the Bureau, approves the disposal of certain administrative type mail. The instructions in part read as follows: "Administrative correspondence with the field offices relating to, but not restricted to, subjects such as case status and follow-up letters, etc."

As a further means of conserving space, it is felt certain of the older files included in Room 2704 could be considered for microfilming. Completely inactive mail, at least ten years old, and referred to infrequently should be the criterion or guide followed before starting this program. It is felt with careful preparation and planning a continuing and effective system for reclaiming space in this fashion could be adopted. Therefore, the following recommendations are submitted for consideration and action: (#) U * FORM FD-143 TO BE PURGED WHEN TWO YEARS OLD

RECOMMENDATION:

(1) In line with the above it is recommended the Domestic Intelligence Division survey the files containing June mail and submit a plan for purging of material housed therein.

* "JUNE MAIL PURGE AUTHORIZATION

(2) Also, as an additional means of reclaiming space, it is recommended the benefits of microfilming material ten years old be considered. CRIMINAL

Comments of Assistant Director Belmont requested.

DESTRUCTION OF BUREAU RECORDS

EXCERPT FROM ORIGINAL FILED IN 67-147582-1

RECORDS MANAGEMENT - JUNE MAIL

CONFIDENTIAL

ASSISTANT DIRECTOR A. H. BELMONT: "June" mail procedure was instituted in 1949 for the specific purpose of handling mail relating to technical and microphone surveillances and other sensitive sources to limit knowledge of and access to such material. As a general rule, a "June" file contains correspondence dealing with surveys made for technical and microphone installations, proposed use, authorized use (including in most instances Attorney General authority for the installation), justification (forms FD-142 and FD-143), removal and in many instances technical problems connected with the installation. In addition, some of these files contain correspondence transmitting tapes of recordings to the Bureau and between field offices for translation purposes. One "June" file (66-2542) which occupies three file drawers contains mostly correspondence relating to statistical information as to the number of installations, mail covers, informants, etc., in all field offices. This material is furnished by the field to the Bureau periodically so that the Bureau may be aware of developments in the various field offices on a continuing basis.

With respect to technical and microphone surveillances, it is believed that we should have available the administrative history of each installation. Form FD-143, which is sent to the Bureau periodically, contains data submitted by the Field Office in justification for the continuation of the installation. Admittedly, this data should be incorporated elsewhere in the Bureau's files in investigative reports and it is, therefore, believed that purging the "June" files of all these forms which are two years old would not detract from the administrative history of the installation.

Likewise, correspondence transmitting tapes for translation would be purged. Per conversation with W. A. Branigan 12/6/60 F.B.I. Material is to be reviewed by Div. personnel - only Records Div. records. Records Branch will purge

There are approximately five thousand "June" files maintained in the Espionage Section. It is recommended that these "June" files be purged in line with the above by Records Division personnel. If you approve, the Espionage Section personnel will be instructed that hereafter in filing any justification forms (FD-143), they should insure that the form previously submitted two years prior has been destroyed and deserialized. This will be done on a continuing basis. Copies of correspondence transmitting tapes for translation will, in the future, not be accepted for filing and Espionage Section personnel will be so instructed, as will personnel of the Translation Section in the Laboratory.

DOMESTIC INTELLIGENCE DIVISION INSPECTION
NOVEMBER 18, 1960
WAB:hmm

CONFIDENTIAL

The Inspector has also recommended the benefits of microfilming criminal material ten years old. A spot check survey shows that there are not more than 1/2 dozen criminal files more than ten years old. Under the circumstances, it is not believed that enough space can be saved to justify the expense of microfilming; however, a tickler has been made so that on the Tenth of February each year we will consider the need for microfilming and will discuss this with appropriate Records Division personnel.

Employee Suggestion

Comments:

This suggestion recommends the destruction of certain administrative type material contained in file 1-28, entitled "Clerical Employee's Conferences, General." It is felt this suggestion has considerable merit and this type of material should have no value after a period of three years. Sound records management would dictate that this material should be destroyed after a retention period of three years. Archival authority is not required since the material referred to is administrative in nature.

RECOMMENDATIONS:

1. Favorable.

2. For referral to the Training and Inspection Division.

FROM : J. F. Malone

SUBJECT: SUGGESTION #275-61
SUBMITTED BY MISS [redacted]
AND MISS [redacted]
FILES AND COMMUNICATIONS DIVISION

b6
b7C

Bureau Property

SUGGESTIONS: That file 1-1152 and related subfiles for each field division be reviewed for destruction of correspondence related to statistics, results of schools, attendance, diplomas issued, expressions of appreciation, requests for and acknowledgment of supplies, et cetera.

ADVANTAGES: The advantages to adopting this suggestion would be the saving of space in the Filing Unit and in the General Index, Files and Communications Division.

CONCLUSIONS: Two suggestions previously approved for destroying Forms FD-132, which is the request for approval of local police school and/or assignment of Bureau instructors and for the destruction of certain material located in file 1-16, captioned "Police Training Schools", after a retention period of three years resulted in the submission of this suggestion. The captioned employees were assigned the duties of destroying the above mentioned material and have indicated by their suggestion that similar material located in file 1-1152 should also be destroyed after a retention period of three years.

SA Short, Files and Communications Division, is in favor of adopting this idea and SA Rogers, Inspector in Charge of the Police Training Unit, advised that he has no objection to the destruction of the material referred to above provided the Files and Communications Division is very cautious about purging communications from the file which contain names that were previously indexed. SA [redacted] Files and Communications Division, advised the Suggestion Desk that archival authority is not necessary for the destruction of the referenced material.

b6
b7C

Miss [redacted] and Miss [redacted] were previously thanked with regard to this matter and were informed that they would be advised if their idea was adopted.

TO : Mr. Mohr

DATE: 1/11/61

FROM : J. F. Malone

SUBJECT: SUGGESTION #276-61
Submitted by Mrs. [redacted]
Files and Communications Division

b6
b7C

SUGGESTION: That file 1-28, entitled "Clerical Employees Conferences, General" and subs (by Bureau field divisions) be reviewed for destruction of all memoranda or correspondence that is of no permanent value. Material pertaining to lectures and conferences through 1955, schedules for clerical training schools, lists of employees attending War Clerical Schools, etc., are listed as examples of the type of material to be destroyed.

OBSERVATIONS: Files and Communications Division states the suggestion has considerable merit and that this type of material should have no value after a period of three years. Supervisor L. E Short recommends this material be destroyed after a retention period of three years.

Training and Inspection Division has no objection to the destruction of this material. Certain material of this type, such as letters requesting films for use at clerical conferences in the field, is no longer being sent to file but is being destroyed by the Training and Inspection Division after it has served its purpose.

RECOMMENDATIONS: 1. That this suggestion be approved and that the Files and Communications Division be authorized to destroy administrative-type material of no permanent value contained in file 1-28 after a retention period of three years.

FROM : L. E. SHORT

SUBJECT: MEXICAN HONORARY COMMISSIONS
DESTRUCTION OF BUREAU PROPERTY

Description of Lists: 64-2-3,4,6,8,9,12,13,14,15,17,18,19,20,21,22. Lists of members and officers of various Honorary Commissions and brigades of the Blue Cross, and delegates of these organizations at conventions.

The attached listing of names has been called to our attention by personnel engaged in Name Check work. They advise that the frequency of reference to this listing causes unnecessary work because insufficient information is available to effect an identification. In an effort to streamline procedures and eliminate unnecessary reference to this data it is proposed that the material be de-indexed through removal of the cards from the Bureau's indices.

It is requested that the appropriate substantive supervisor review the above listed file reference to determine if any reason exists for retention of the indexing on this listing of names. A notation advising of the decision reached may be placed on this memorandum. The memorandum should be returned to the Correlation Unit of the Records Branch, Room 6309 IB.

ADDENDUM: DOMESTIC INTELLIGENCE DIVISION: HWL:bjs 2/6/61

During 1920-23, Mexican officials in United States, on authority of Mexican Government, organized Mexican Honorary Commissions and Brigades of the Blue Cross in the States of Texas, Arizona, New Mexico, and Oklahoma. The groups were ostensibly for the purpose of looking after the welfare of Mexican nationals in the United States. Investigation developed they actually served in gathering intelligence for the Mexican Government. Members were impressed that their first duty, under any and all circumstances, was to their fatherland. The investigation was closed in August, 1923, and the file is comprised of twenty-two serials which contain the names and places of residence of members with little or no identifying data.

The Records Branch suggests that the material be reviewed and deindexed through removal of the cards from the Bureau indices. The names and the information contained in the file are of no present value, and by now many of the members of the groups are undoubtedly deceased.

ACTION:

1. That Records Branch deindex material by destroying the index cards.

2. Since the information in file is of no value, all serials should be destroyed.

Rec'd. auth. necessary to destroy record material as further action at this time.

SUBJECT: TITLE 18, U. S. CODE, SECTION 3500
THE JENCKS ACT
REPORT WRITING

Destruction of Bureau Property - general

With the consent of the Department we adopted a post-Jencks procedure of permitting destruction of an Agent's investigative notes of interview with a potential Government witness after the Agent has prepared his FD-302, otherwise known as the Interview Report Form. We have recurrently checked the Criminal Division of the Department on this procedure and they have continued to tell us that they see no reason to change.

The latest pertinent development is that in Campbell v. U. S., decided January 23, 1961, the Supreme Court sent the case back to the trial court for a second look at the defense contention that it should have been given certain documents. In taking this action, however, the Court split five to four on the question whether the defense would be entitled only to documents presently in possession of the Government or documents which have ever at any time been in the Government's possession. The minority of four made it plain they believe that the defense is not entitled to any document except that presently in possession of the Government; whereas, the majority of five did not decide but hinted that if the Government has ever had a pertinent document in its possession and does not deliver that document up to the defense on demand at the trial then the testimony of the witness must be stricken. This could conceivably be carried so far as to require the Government to retain and produce, under appropriate circumstances, every scrap of paper they ever used to record a story of a witness, including the investigative notes of the Agent made during the interview.

We suggest that the question of destroying notes should again be taken up with the Department at this time.

Also, it is suggested that we raise to the Department the question whether the elapsed time of an Agent's interview with a potential Government witness should be made a matter of record. We warned the field nearly a year ago in SAC Letter 60-13(C) that trial judges, in determining whether a

memorandum of an interview is a "statement" of the witness within the terms of the act, would be asking Agents how long they interviewed the witness. The views expressed by the Court in the Campbell case make it clear that this question is going to be asked constantly of the Agents from now on. For example, to determine whether a report of interview with a witness is a "statement" within the meaning of the Jencks Act, the trial judge must have "the help of extrinsic evidence" to be obtained by questioning the Government Agent who interviewed the witness, and in discussing the key question whether the paper involved here was a "statement" it was observed that "In Palermo, the document was a 600-word summary of a 3-1/2 hour conference, which we held was clearly not a virtually verbatim transcript. 360 U.S., at 355, n. 12. The Interview Report here comes to slightly over 500 words. But the record is silent as to the duration of the interview." That makes the question sufficiently important to warrant asking the Department whether the elapsed time of interview should be recorded and, if so, whether that record should appear on the face of FD-302 (Interview Report Form) which the defense asks to see under the terms of the Jencks Act.

RECOMMENDATION:

That the attached letter be sent to Acting Assistant Attorney General, Criminal Division.

CONFIDENTIAL

(E) STREAMLINING PROCEDURES - CHANNELIZING MEMORANDA -- Numerous channelizing memoranda, particularly in large offices operating a large number of live informants, are presenting an increasingly critical space problem and demands for extra file cabinets.

In June, 1960, the Chicago and San Francisco Offices were authorized to destroy channelizing memoranda following submission of reports in security cases on an experimental basis to determine the feasibility of adopting this practice throughout the field.

DECLASSIFIED BY SP4 E W/cal
ON 8-10-82
Declassified Per Release Made in 1979 to Per/rn

Based upon the favorable results obtained in these offices, particularly in savings in file space and streamlining of case files, the Bureau is authorizing the destruction of these channelizing memoranda following submission of reports in both individual and organizational security cases.

BUREAU RECORDS - GenN

In devising procedures for the handling of this matter you should be guided by the following:

(1) The current procedure with regard to filing the original informant report, the filing of the master channelizing memoranda in the informant file and the serializing of channelizing memoranda in the substantive case files will be continued as at present.

(2) The Agent, at the time he dictates the report, will prepare a memorandum listing the channelizing memoranda to be destroyed by serial or serial scope and requesting the Chief Clerk's Office to destroy. The memorandum should indicate that pertinent information contained in the serials to be destroyed was incorporated in the report. It will not be necessary to set forth in this destruction memorandum the file and serial number of original informant reports or master channelizing memoranda as this information will be listed in the cover pages to the report. In the case of multiple volumes, the destruction memorandum should be prepared by the Agent in sufficient numbers so that one copy will appear in each volume of the multiple volume file being stripped.

(3) Prior to destruction, the Agent's recommendations with respect thereto are to be reviewed and approved by the Supervisor at the time he reviews and approves the report.

(4) Following destruction of the channelizing memoranda the Chief Clerk will so note on the memorandum. Thereafter, the memorandum will be filed in the case file as a permanent record of the serials destroyed.

(5) Technical and microphone surveillance channelizing memoranda may be destroyed without the necessity of identifying in the cover pages of the report the exact location in the office files of the original information. The use of an asterisk identifies the source and the original information can be readily located.

The channelizing memorandum should not be destroyed in the following instances:

(1) When the original information is not contained elsewhere in your office.

(2) Do not destroy serial one of a file regardless of its nature.

(3) Do not destroy any serial containing indexing. It would appear that if indexing was necessary to channelizing memoranda, such indexing would only be done in the main case file as set forth in the title of the communication.

(4) Do not destroy serial showing "action" information. For example, opening, closing, posting, or instructions given by a Supervisor to an Agent concerning the case.

The destruction of these channelizing memoranda should be subject to close supervisory control by you to insure that all pertinent information contained in these memoranda is reported in the investigative report.

Very truly yours,

John Edgar Hoover

Director

As you know, over the years we have had the problem of devising suitable examinations for testing the abilities of Agents claiming a knowledge of the Spanish language. In this regard, it is noted that by SAC letter 54-7 dated 2/2/54, the field was advised that the Bureau had prepared an oral Spanish examination for the purpose of testing Agents claiming ability in the Spanish language.

Subsequent to that, during the period March 9 through 11, 1954, a copy of the Spanish examination described in SAC letter 54-7 was furnished to each field office.

This test has now been in the field for seven years. During this interval we have obtained and devised other Spanish examinations which make the above-described test obsolete.

RECOMMENDATION:

(1) That the test which was distributed to the field in March of 1954 be destroyed because of its obsolescence.

(2) If the first recommendation is approved, the Cryptanalysis-Translation Section of the Laboratory will issue the necessary instructions for the destruction of the examinations.

FROM : SAC, CHICAGO (100-34283)

SUBJECT: STREAMLINING PROCEDURES
CHANNELIZING MEMORANDA

Destruction of Bureau Property - Gen.

ReBulets 6/22/60 and 11/15/60.

In accordance with Bureau instructions, Chicago has on a trial basis conducted an experimental project together with San Francisco in connection with destruction of channelizing memoranda and accordingly there is set forth the following results, observations and suggestions:

Statistics were maintained for a period slightly in excess of four months, between August 18, 1960 and December 31, 1960. During this period a total of 583 inches or 21 file drawers and 16 inches of space was saved. On an annual basis, Chicago alone would save in excess of 60 drawers of space per year. Figured on a cubic feet basis this would amount to 168.8 cubic feet of space. It might also be observed that Chicago is one of the major offices along with San Francisco, Los Angeles and New York which has a problem handling channelizing memoranda.

Methods Utilized in Experiment by Chicago Office

Agents in the initial stages of this program were furnished with memoranda instructing them that in preparing reports, they were also to prepare a destruction memorandum request which in substance identified the case by name and file number, the date of the report and the identity of the reporting agent, with the request that the CCO was to pull and destroy certain serials, the pertinent information of which had been incorporated into the report. Thereafter, the agent in the same memorandum, identified the serial number in the one column and the location of the original information in the informant's file in the second column. The CCO utilized this memorandum to pull the serials to be destroyed.

(2) - Bureau
1 - San Francisco
1 - Chicago

(4)

NOT RECORDED
167 MAR 15 1961

XEROX
MAR 14 1961

JAN. 9 1961

57 MAR 17 1961

The destruction memorandum request thereafter followed the report and all volumes of the file (if there were multiple volumes) to the supervisor's desk. At the desk and following the reading of the report the memorandum was blockstamped by the supervisor who inserted the name of the agent making the request in the blockstamp. The supervisor noted on the destruction memorandum that the CCO should pull the requested serials.

After the report was signed and sent to the mail room it was routed to posting and from posting to a clerk who pulled the serials from the file. The serials and file were then routed to the agent making the request to review the serials and advise the supervisor that all the work requested had been done. The supervisor checked the serials and noted on the original destruction memorandum authority for the CCO to destroy the serials. At this point the file and serials were again routed to the clerk responsible for the destruction and the serials were accordingly destroyed.

The procedure calling for the returning of the serials to the agent for checking and for final authority of the supervisor to destroy was adopted as a check on the CCO and also as an educational device for the agent until both the agent and the CCO became thoroughly familiar with the procedure. After this trial period and if the destruction process is continued by the Bureau it is expected that this step can be eliminated and the supervisor will, at the time the report is signed out, note on the memorandum the authority for the CCO to pull and destroy the serials. Under this procedure it would then be anticipated that the CCO will then return the file to the supervisor for a final notation on the destruction serial by the supervisor.

Additional Instructions to Agent

In setting up the instructions for the experiment and for the agent to follow in reference to the serials that could be destroyed the following instructions were issued:

1) Destruction only permitted on channelizing memoranda where the original information is retained in another file.

2) Serial one of a file, regardless of its nature, is never destroyed.

3) No serial containing indexing can be destroyed.

4) No serial reflecting "action" information, for example, the opening, closing, posting, or instructions given by a supervisor to an agent concerning the case, may be destroyed.

5) Tesur and misur channelizing memoranda are permitted to be destroyed since the use of an asterisk identifies the source and its original information, which can be readily located, is filed elsewhere by date.

Time Spent by CCO

During the trial period of slightly in excess of four months, the CCO utilized approximately 124 hours and 54 minutes or 15 days, 4 hours and 54 minutes. It is emphasized that this was during a trial period and it is believed that this time could be cut down by the adoption of some additional suggestions which will be hereinafter mentioned.

Benefits

1) Extensive present and future savings in file space were accomplished. As indicated previously in excess of 21 drawers and 16 inches (27 inches equal one drawer) were saved in slightly over four months which would mean an excess of 60 file drawers annually could be saved.

2) Multiple volumes in security cases in the 100 classification were condensed enabling quicker file reviews in the future. In one case in excess of four volumes of material was destroyed on one individual security matter case.

3) The CCO during the trial period was able to utilize the file space saved in connection with all expansion requirements in the Chicago office in the 100 classification category.

This saving of space resulted in a corresponding savings of time in the CCO which would have been utilized in connection with expansion requirements in the 100 category had this program not have been in effect.

No weaknesses in the system were noted during the experimental period by this office.

Observations and Recommendations Made in Connection with Chicago Inspection of Inspector R. K. MOORE, 11/30/60

Inspector R. K. MOORE in connection with his inspection in November, 1960 noted that a considerable amount of agent time was needed in preparing the destruction memorandum in longhand in its present form especially where multiple volume files were involved. In some cases as many as 15 pages of longhand material in two columns was prepared by the agents in a single case.

He noted that under the present system the agent (Chicago utilized the suggested form of the Bureau listing serials in column 1 and the location of original information in column 2) was required to advise in two columns in detail the serials to be destroyed as well as the original location of each serial destroyed. The inspection report comments that the same purpose would be served insofar as the information required in column one of the memorandum read in effect "Destroy all serials in volume _____ except serials _____."

Continuing, Inspector MOORE noted that the information required in Column 2, that is, the location of the original report or document, is a duplication of information appearing in column two of the cover pages of the security report which the agent had just prepared and he therefore recommended that column two of this memorandum should be eliminated. He noted that this step alone will reduce the paper work required of the agent preparing this memorandum by at least 50 per cent.

Continuing, Inspector MOORE noted that in preparing the destruction memorandum in cases where there are multiple volumes, these memoranda in the future should be prepared by the agent in sufficient numbers so that one copy will appear in each volume of the multiple volume file which has been stripped, thus accounting for any serials in the particular volume which are missing. This, it was noted, would eliminate the present practice of the Chicago office in these cases of having the CCO prepare charge out slips for each volume where memoranda have been destroyed noting thereon that the missing serials of the volume have been destroyed and referring back to the original destruction memorandum appearing in

another volume. The Inspector felt that this practice alone would eliminate an estimated five to ten per cent of the clerical work required.

The Inspector also suggested the desirability of preparing these destruction memoranda on distinctive colored paper so as to allow ready access to the memorandum by the agents in the future.

Chicago concurs in the observation of Inspector MOORE as noted above. The further observation is made that the suggested duplicate memorandum for multiple volume files could be prepared by the use of pencil and carbon paper and that it would be advisable particularly in multiple volume cases that one copy of the original destruction memorandum be placed as a floater serial on the top of each multiple volume where destruction has taken place. This will allow easy accountability for destroyed serials both for the office and during inspection.

In summary, insofar as Chicago is concerned, the experiment has proven its worth and a continuation appears to be most desirable. Much file space has been saved, expansion problems have been eliminated in the 100 classification and to date no defects have been noted.

It is respectfully suggested that serious consideration be given however to the suggestions of Inspector MOORE in reference to his observations concerning the duplication of work requirements by using a column two and specifically itemize serials for column 1 when a general statement such as he suggested would appear to suffice.

PROPOSED MANUAL CHANGES

Section 87D of the Manual of Instructions should be amended by adding the following as Item 7 (g), page 79:

"(g) Channelizing memoranda, destruction of following submission of reports in security cases

"Channelizing memoranda in organizational and individual security case files may be destroyed following submission of reports in these cases. In destroying these memoranda be guided by the following instructions:

"(1) The Agent, at the time he dictates the report, will prepare a memorandum listing the channelizing memoranda to be destroyed by serial or serial scope and requesting the Chief Clerk's office to destroy. This memorandum should indicate that pertinent information contained in the serials to be destroyed was incorporated in the report.

"(2) The cover pages to the report will list the file and serial number of the original informant reports or master channelizing memoranda.

"(3) In the case of multiple volumes the destruction memorandum should be prepared by the Agent in sufficient numbers so that one copy will appear in each volume of the multiple volume file being stripped.

"(4) Prior to destruction, the Agent's recommendations are to be reviewed and approved by the Supervisor at the time he reviews and approves the report.

NOTE: See memo Bland to Belmont dated 2/27/61 captioned "Streamlining Procedures - Channelizing Memoranda"; TDR/fbm. No Handbook changes necessary.

UNITED STATES GOVERNMENT

Memorandum

TO : DIRECTOR, FBI (100-00) DATE: 1/11/61

FROM : SAC, SAN FRANCISCO (66-1696)

SUBJECT: STREAMLINING PROCEDURES
CHANNELIZING MEMORANDA

ReBulet 6/22/60 and San Francisco let 7/7/60.

ReBulet authorized San Francisco to initiate a program of destruction of channelizing memoranda following the submission of reports, for a period of six months.

Statistics maintained for the six-month period 7/11/60 to 1/6/61 show that 328" of such memoranda have been destroyed, a rate that would save San Francisco more than 54' of file space each year. San Francisco uses open shelf filing in closed files.

The CCO in San Francisco estimates that the enclosure clerk who destroys the memoranda spends approximately two hours per day on this project.

It is believed that in addition to the space saved this program facilitates file reviews and has to date shown no disadvantages.

It is recommended that it be continued in San Francisco and that consideration be given to utilizing it throughout the Field.

Re: STREAMLINING PROCEDURES -
CHANNELIZING MEMORANDA

I have checked with our security supervisors here in New York who feel that the attached proposed SAC Letter is excellent, well conceived, and they can foresee no reason why the instructions could not be handled in the field. With reference to the possible concern about the last item on page two pertaining to serials containing indexing, this should not create a problem since we index only on the principal serial in the main case file as set forth in the title of the communication. Therefore, there will be only one copy of the channelizing memorandum which will be retained, thus not presenting any problem from a destruction or space standpoint.

It is our feelings that the instructions should be issued as prepared in the attached proposed SAC Letter.

SUGGESTION #451-61

Destruction of Bureau Property

b6
b7C

Mrs. [redacted] has suggested that the letters forwarded to the Bureau by the various field offices captioned "Dissemination of Criminal Information to Other Agencies" be destroyed after the pertinent statistics are recorded in the Voucher-Statistical Section. It is presently the practice to file this material after the statistics are recorded.

The Voucher-Statistical Section has no objection to the destruction of these letters after the statistical data has been recorded.

RECOMMENDATIONS OF THE SPECIAL INVESTIGATIVE DIVISION TLG:bm

RE: SUGGESTION #451-61 Submitted By [redacted] FILES & COMMUNICATIONS DIVISION 3/3/61

The suggestion that the letters forwarded to the Bureau by the various Field Divisions captioned "Dissemination of Criminal Information to Other Agencies" be destroyed after the pertinent statistics are recorded at the Bureau Voucher-Statistical Section hasmerit since these letters serve no purpose after the figures contained therein are abstracted and recorded on our records. The Special Investigative Division recommends the adoption of this suggestion.

Submitted By SA [redacted]
Charlotte Field Division

b6
b7C

ALL INFORMATION CONTAINED
HEREIN IS UNCLASSIFIED
DATE 8-10-82 BY SP4ELW/cal

RE: MICROFILMING AND DESTRUCTION OF FILES - General

The Training and Inspection Division has requested the views of our Division regarding the attached suggestion submitted by SA [redacted], Charlotte, who proposes that (1) the office of origin microfilm closed files and prepare a synopsised index card containing a synopsis of the information on microfilm to reduce the necessity of referring to the microfilm, (2) the auxiliary office destroy closed files after making a synopsised index card and forward all items of evidential value to the office of origin, and (3) the Bureau microfilm closing reports in criminal and applicant cases and such information that is deemed essential in security cases. SA [redacted] points out that adoption of this suggestion would result in an immediate reduction in space required to maintain closed files with a resulting savings in the appropriations for the space. He points out as a disadvantage, the initial cost of reviewing the files and establishing the program.

b6
b7C

For purposes of clarification, comments concerning these proposals are being set out separately as they relate to each proposal.

In regard to proposal #1, the microfilming of files in the field has been considered on a number of occasions by the Bureau. On 11-29-54, (66-16304-156), the Executives Conference unanimously felt that no further action should be taken at that time to microfilm field files based on the results of a survey conducted

ORIGINAL COPY FILED IN 66-16304-246

of several offices which disclosed a number of disadvantages to microfilming field files such as (1) difficulty in sending serials to Resident Agencies if material on film, (2) the necessity for Resident Agents to come to headquarters city more often to review references on microfilm unless copies were made, (3) space required to house viewing equipment which in many offices probably equal or exceed the file storage space, and (4) a slow down in the viewing of material on microfilm.

This suggestion was considered in 1959, (66-18966-355), when as a result of a records management program conducted by this Division, two field offices proposed microfilming of closed field files. These suggestions were not adopted inasmuch as the field has existing authority to destroy all files after they become twenty years old, and it was not felt that the Bureau could justify the expense of microfilming files which were going to eventually be destroyed. On the basis of the above facts and inasmuch as the field has authority to destroy files after twenty years, this Division does not feel that we could possibly justify the microfilming of these files, and it is recommended that this proposal not be adopted.

In regard to proposal #2, several suggestions to destroy auxiliary office files prior to the twenty year retention period were made during the aforementioned records management program in 1959. These suggestions and other suggestions proposing a reduction in the twenty year retention period resulted in an extensive study by the Bureau including a survey of ten representative offices. Based on the results of this survey and the recommendations of the Domestic Intelligence and Investigative Divisions who strongly recommended no change in the twenty year retention period for field files, no further consideration was given to these proposals (66-18966-543, 545). In view of the recent study of this proposal and the resultant conclusion, this Division recommends that this proposal not be adopted.

(Continued on Page 3)

Memorandum Short to Tavel 3-8-61
Re: Suggestion #462-61
Submitted By SA [redacted]
Charlotte Field Division

In regard to proposal #3, the Records Branch has been microfilming files for a number of years. We have confined this operation to those categories of files that receive relatively limited use, because of the activity of our files, largely due to the name check program. At the present time we are microfilming all criminal files over ten years old. We have not extended this program to applicant or security files nor is it contemplated that we will do so in the future because of the activity of these files. It is necessary that the contents of the entire file be microfilmed. This Division recommends no further action in regard to this proposal.

RECOMMENDATION:

That this memorandum expressing the views of the Files and Communications Division in regard to the attached suggestion be referred to the Training and Inspection Division in accordance with their request.

SUBJECT: STREAMLINING PROCEDURES - CHANNELIZING MEMORANDA

SAC Letter Number 61-8 dated February 21, 1961, authorized the field to destroy channelizing memoranda in security cases following submission of reports.

My memorandum of February 10, 1961, recommending that the field be allowed to destroy these channelizing memoranda also contained a recommendation that the handling of this matter be the subject of thorough checks by the Training and Inspection Division in connection with all field ~~communications~~ INSPECTIONS to insure proper procedural handling and reporting prior to destruction of channelizing memoranda. It is believed desirable to include this in the Field Inspectors' Manual.

ACTION:

If you agree, the attached proposed Manual change should be forwarded to the Training and Inspection Division for appropriate attention.

SUBJECT: SUGGESTION #451-61
SUBMITTED BY MRS. [redacted]
FILES AND COMMUNICATIONS DIVISION

Destruction of Bureau Property

b6
b7C

SUGGESTION: That letter forwarded to the Bureau by various field offices captioned "Dissemination of Criminal Information to Other Agencies" be destroyed after pertinent statistics are recorded in the Voucher-Statistical Section.

PRESENT PRACTICE: This material is filed after recording. At present time two files are used to handle this, one for Federal agencies, one for state or local agencies.

ADVANTAGES: Saving in filing space and time now used to handle these for filing.

OBSERVATIONS: Files and Communications Division recommended favorable consideration if the Administrative and appropriate Investigative Division agreed.

Mr. Johnson of the Voucher-Statistical Section of the Administrative Division advised, with the concurrence of Mr. Callahan, that they had no objection to the destruction of these letters once the statistical data was recorded.

Mr. McAndrews of the Special Investigative Division, with the approval of Mr. Evans, recommended adoption of the suggestion since the letters serve no purpose after the pertinent statistics are recorded.

The Training and Inspection Division agrees that since these communications serve no purpose after the pertinent data is extracted and recorded, they should be destroyed. This will save sorely needed filing space and unnecessary handling.

RECOMMENDATIONS: 1. That the suggestion be adopted.

Destruction of Bureau Property

At the present time, the Cryptanalysis-Translation Section is using work assignment logs to set out the work currently assigned to crypt aides in the Section, with an individual sheet for the current outstanding work for each aide. As the assignments are completed, the date of their completion is noted in an appropriate column. The purpose of these logs is to follow work currently assigned and their retention would serve no useful purpose; therefore, it is recommended that upon completion of all work on a particular sheet, this sheet be destroyed.

RECOMMENDATION:

That approval be granted to destroy the work assignment log sheets upon completion of all work noted on that sheet.

FROM : W. D. Griffith

SUBJECT: LABORATORY FILES UNIT
MAINTENANCE OF "CITY CARDS"

During the course of the inspection in the Laboratory Division last January, 1961, the Inspector instructed a survey be made to determine whether we can dispense with the "city cards" presently being utilized in the Laboratory Files Unit. These cards are prepared each time a case is received and contain identifying information concerning the case, including title and file number. However, the card is filed according to the city from which the submission is received. As additional submissions are received in the same case postings are made to the appropriate cards so that, and in effect, the city card becomes a journal record with respect to each card and reflects the number of submissions received in this case and the dates received. These cards have been particularly useful in locating submissions or cases referred to by outside contributors when they do not furnish us with a title, file number, or sufficiently identifying information for us to readily locate the case.

We have surveyed the need for these "city cards" over the past sixty days and determined that while they cannot be dispensed with in their entirety, the making of the cards for every case can be modified. It will still be necessary to prepare "city cards" for agencies on our restricted list. It will be necessary to prepare "city cards" for any unknown subject case. When the need arises to locate a case and no file number, title, or subject is set forth, we will henceforth contact the Service Unit in the Files and Communications Division and request that a search be made of abstracts filed by locality. It is believed that in most instances this service offered by the Files and Communications Division should enable us to locate the case and make it possible for us to substantially dispense with the making of "city cards."

66-3286

Our procedure now in the Laboratory Files Unit will be to make the submission postings on the alphabetical card that lists the name of the subject.

We contemplate purging the present "city cards" in connection with our regular three year program. However, since they contain the submission postings, it will not be possible to arbitrarily dispense with these cards at this time but rather, through a process of attrition

SUBJECT: ADMINISTRATIVE DIVISION MATERIAL
STORED ON SEVENTH FLOOR
IDENTIFICATION BUILDING

Destruction of Bureau Property - Gen.

Items listed below are recommended for removal from the storage files and for destruction at this time:

1. Copies of Congressional Record: - Copies are on hand beginning in January, 1958. We have been keeping those for the past two years on hand. Accordingly, it is recommended that those dated in 1958 be disposed of at this time.

2. Copies of Federal Register: - As with the Congressional Record, we have been keeping these for two years. Accordingly, it is recommended that those dated in 1958 be disposed of now.

3. Monthly Administrative Reports: - We have been retaining these for three years. Those now on hand date from July, 1956. It is recommended that those from July, 1956, through June, 1957, be removed and destroyed. It is further recommended that on July 1, 1961, the Records Branch remove and destroy those dated from July, 1957, through June, 1958. This will leave on hand those pertaining to the fiscal years 1959, 1960, and 1961.

4. House Bills; Senate Bills; Books on Appropriation Hearings: - Each of these three categories is on hand for the 85th and the 86th Congresses. Since we are now in the 87th Congress, we should need only the 86th Congress material on hand. Accordingly, the items pertaining to the 85th Congress for each of the three categories should be removed and destroyed.

ACTION:

If you agree, arrangements will be made with the Files and Communications Division to remove the items from storage.

SUBJECT:

NORFOLK COUNTY TRUST COMPANY
710 WASHINGTON STREET
CANTON, MASSACHUSETTS
JULY 18, 1957
BANK ROBBERY - INTERSTATE TRANSPORTATION
OF STOLEN PROPERTY

Destruction of Bureau Property - General

SAC Laughlin, Boston, on 3/14/61 received a subpoena to produce the Bureau's rules and regulations relating to interviews of eyewitnesses to a crime. On being advised by Laughlin, immediate contact was made with the Criminal Division in order to have the U. S. Attorney at Boston intercede.

On 1/23/61, the Supreme Court directed that the case be remanded to the District Court for a rehearing on the defense motion for the production of an FBI record.

The investigating Agent testified on 3/14/61 and, pursuant to questions asked, stated that he had made notes at the time of an interview which were subsequently reduced to writing in a report and thereafter the notes destroyed. The Agent also stated that an Agent is authorized to use his discretion in the destruction of investigative notes once the information has been reduced to writing. The subpoena was issued for SAC Laughlin for the purpose of determining the exact rule.

I thought the "discretion" on the part of the agent had been changed!

The Department was furnished the above information and issued instructions to the U. S. Attorney that SAC Laughlin should appear and take the stand in response to the subpoena but should not bring any Bureau rules and regulations with him. He could testify that an Agent need not retain investigative notes on interviews with persons after the contents of the notes have been properly incorporated in the usual records, such as signed statements, interview forms, or memoranda which are prepared. Any further attempt to obtain Bureau rules and regulations should be declined in accordance with Departmental Order 3229.

SAC Laughlin did take the stand on 3/15/61, was questioned concerning the rules as to destruction of notes, and in accordance with Department instructions

51 APR 20 1961

AR:mpl - 2

XEROX

APR 19 1961

declined to produce the rules and regulations under Departmental Order 3229, which declination was sustained by the Judge.

The question of retaining or destroying investigative notes taken by Special Agents during an interview is not a new one. Malcolm R. Wilkey, former Assistant Attorney General in charge of the Criminal Division, in November of 1960 reaffirmed the Department's position relative to the handling of notes made during an interview. He said that the Bureau's position should be in accordance with the Department's instructions that the Agents destroy such notes after the results of the interview have been reduced to writing in report form and such report has been transcribed and approved. Mr. Wilkey reiterated that the exceptions remain in effect; namely, where the notes were of precise character, such as accountants' work papers, crime scene searches, laboratory examinations and fingerprint examinations, to permit the Agent to testify as to his findings, they should be retained. In those instances where special circumstances suggest the retention of the notes, such as when a subject confesses orally but refuses to put the confession in writing, they may be retained with the specific approval of the Special Agent in Charge.

Mr. Wilkey stated that the notes made during an interview were for the sole purpose of assisting the Agent in reducing the results of the interview to writing in report form; that this report constitutes the record of the interview and the investigative notes serve no purpose once they have been used to assist in preparing the report.

ACTION TO BE TAKEN

We will await any written opinion handed down by the District Court in connection with the rehearing ordered by the Supreme Court.

ADDENDUM BY MR. TOLSON 3/16/61

Despite all of the legal opinions to the contrary, I think the Courts are going to hold against us when we authorize Special Agents to destroy notes made during interviews. Certainly such notes are the best evidence of the results of the interview. I suggest this be taken up by Mr. Parsons and Mr. Rosen with the present Legal Counsel of the Department and the present Assistant Attorney General in charge of the Criminal Division to see whether they concur in the position taken by former Assistant Attorney General Wilkey in November of 1960, on this point.

(Supreme Court, 1960, No. 53)

66-3286-

This is with reference to the above-entitled case in which the Supreme Court, on January 23, 1961, handed down its opinion, and the conference which was held in the office of Mr. Miller on March 20, 1961, at which time Mr. Katzenbach of the Department and Messrs. Parsons and Rosen of the Bureau were present.

The matter of retention of investigative notes of Special Agents of the Federal Bureau of Investigation has been discussed on previous occasions with representatives of the Department. For your ready reference, it is pointed out that former Assistant Attorney General Malcolm Wilkey of the Criminal Division, on November 16, 1960, reaffirmed the Department's position relative to the handling of notes made during an interview. It was indicated that the position to be pursued by the Bureau should be in accordance with the Department's instructions that Agents destroy such notes after the results of the interview have been reduced to writing in report form and when such report has been transcribed and approved.

Mr. Wilkey further reiterated that our present exceptions remain in effect; namely, where notes were of a precise character, such as accountants' work papers, crime-scene searches, laboratory examinations and fingerprint examinations, that such notes should be retained in order to permit the Agent to testify as to his findings. In those instances where special circumstances suggest the retention of notes, such as for example when a subject confesses orally but refuses to put the confession in writing, they may be retained with the specific approval of the Special Agent in Charge.

Inasmuch as notes made during an interview were for the sole purpose of assisting the Agent in reducing the results of the interview to writing in report form, Mr. Wilkey was of the opinion that this report therefore constitutes the record of the interview and the investigative notes serve no purpose once they have been used to assist in preparing the report.

Pursuant to the Department's opinion concerning this matter, we have issued appropriate instructions to our Special Agents.

It would appear desirable, in view of the Campbell case, that we reiterate to our field service the Department's opinion concerning the retention of notes.

Inasmuch as this question may come up with increased frequency in the future and in order to maintain uniformity of action by our personnel, it appears desirable to obtain your current views in this matter.

With reference to the above-entitled case, which the Supreme Court on January 23, 1961, handed down its opinion, Messrs. Parsons and Rosen conferred with Assistant Attorneys General Herbert Miller and Nicholas deB. Katzenbach of the Department concerning the retention of investigative notes of Special Agents.

We went over previous discussions with the Department in which former Assistant Attorney General Malcolm Wilkey, on November 16, 1960, reaffirmed the Department's position relative to the handling of notes made during an interview. It is recalled he reaffirmed the previous position of the Department and reiterated that the procedure which the Bureau was pursuing in this matter was in complete accord with the views of the Department.

Both Messrs. Katzenbach and Miller expressed the view that they would agree with the present procedure. Mr. Katzenbach observed that it was his view the Bureau was doing much more than was required.

ACTION TAKEN:

A memorandum has been prepared to Mr. Katzenbach, with a copy for Mr. Miller, in which we point up the problem, indicate what the practise has been in the past based upon advice we received from the Department, and further indicate that it would be desirable, in view of the Campbell case, that we reiterate to our field service the Department's opinion concerning the retention of notes. Messrs. Katzenbach and Miller anticipate that they will receive the attached memorandum in which we state that inasmuch as this question may come up with increased frequency in the future and in order to maintain uniformity of action by our personnel, it appears desirable to obtain the Department's current views in this matter.

There is attached hereto a memorandum to Assistant Attorney General Katzenbach, with a copy designated for Mr. Miller.

Bulky Exhibit File Number: 87-12942-172

We are in the process of reviewing all bulky exhibits in order that we may dispose of those which serve no further purpose. Inasmuch as many of the bulky exhibits pertain to inactive cases and are occupying badly needed space, it is requested that the appropriate substantive supervisor review the above-listed bulky exhibit and render a decision as to its retention or disposition. A notation as to the decision reached may be placed on this memorandum. The memorandum should be returned to the Filing Unit of the Records Branch, Room 1113, Identification Building, for filing in the case file.

RECOMMENDATION:

That captioned bulky exhibit be reviewed and a decision rendered as to the retention or disposition of the material.

SUBJECT: SUGGESTION #462-61
SUBMITTED BY SA [redacted] b6 b7C
CHARLOTTE OFFICE

ALL INFORMATION CONTAINED HEREIN IS UNCLASSIFIED DATE 8-10-82 BY SP4 EW/ca

Destruction of Files Authorized

SUGGESTION: 1. That the office of origin (OO) in the field microfilm closed files, whenever advisable depending on the various classifications and that reference index cards be established in auxiliary offices. Any material of evidentiary value should be forwarded to and maintained by the particular field office.

2. That the Bureau microfilm only closing reports in criminal and applicant cases and only such information as is deemed essential in security cases.

CURRENT PROCEDURE: Closed case files are maintained in each office and eventually consolidated.

ADVANTAGES: An immediate reduction in space required to maintain closed files with resultant savings in required appropriations for such space.

DISADVANTAGES: The initial cost of reviewing the files and establishing policies for the program.

OBSERVATIONS: SA Roney of the Charlotte Office did not feel the suggestion was practical.

The Files and Communications Division submitted its views and stated that the microfilming of files in the field has been considered by the Bureau on a number of occasions. On 11/29/54, the Executives Conference unanimously opposed any further action at that time since a survey conducted in several field offices disclosed disadvantages such as: 1. the difficultyof sending material to Resident Agencies if it were on film; 2. the necessity for Resident Agents to come to headquarters city more often to review film unless copies were made; 3. space needed for viewing equipment which would probably use up the space saved by microfilming files; 4. a slow down in reviewing filmed material.

In 1959, as a result of a records management survey which the Division conducted, two field offices made the same proposal but it was again not adopted as the field has authority to destroy all files after 20 years and the Bureau did not feel the expense of filming files which would eventually be destroyed was justified. The Division feels these conditions are unchanged at this time.

MEMORANDUM MALONE TO MR. MOHR
RE: SUGGESTION #462-61

As regards the part of the suggestion relating the destruction of auxiliary office files and maintaining reference index cards, several such proposals were previously considered and, as a result of a survey in ten representative offices, the Domestic Intelligence and Investigative Divisions recommended strongly that there be no change in the rule for retention of field files for 20 years.

As for the portion of the suggestion relating to the microfilming of only closing reports in criminal and applicant cases and such information as thought necessary in security cases at the Bureau, Records Branch has been microfilming files for a number of years. However, they have confined this to files receiving limited use because of the activity in files due mainly to name checking. At present they are filming criminal files over ten years old but do not contemplate extending this practice to applicant or security files in the future because these files are referred to frequently. It is necessary that the contents of the entire file be microfilmed. For all the reasons set forth above, Files and Communications Division opposed adoption of the suggestion.

The Training and Inspection Division agrees with the views of the Files and Communications Division.

RECOMMENDATION:

That the suggestion not be adopted. On approval, no futher action is necessary as the suggester was thanked previously by letter.

SUBJECT: SECURITY RISK PROGRAM
ATOMIC ENERGY ACT

DESTRUCTION OF BUREAU RECORDS - Gen'l

Since March, 1948, we have maintained an index of employees of the Atomic Energy Commission (AEC), AEC subcontractors, military contractors and employees of other Government agencies concerning whom investigation has indicated either they, their relatives or associates at one time were reportedly associated in some degree with communist, communist-dominated or pro-Soviet groups. Purpose of this index is to have readily available in the event of an emergency information for dissemination to interested Government agencies so that any necessary action may be taken by those agencies with regard to re-evaluating the clearance status of the individuals involved.

Prior to April, 1956, this index was maintained on 5 by 8 cards. At that time the index was converted to a 5 by 8 loose-leaf notebook. The conversion was made because the index is microfilmed each month in connection with the Bureau's Defense Plans and the heavy cards did not photograph properly. Additionally, the notebook is much more easily transported in the event relocation occurs from the Seat of Government.

The old cards were retained for record purposes and are still being kept, although not in a current status. For a short time after the conversion to the notebook the old cards were used infrequently as a ready reference to check information concerning a particular individual. This information was, of course, available in the file and the cards were referred to only to expedite matters. Within at least the past year there has been no occasion to refer to the cards.

RECOMMENDATION:

Since the information on the cards has not been kept up to date and even the most recent information on them is now at least five years old, even rare use of the cards as a ready reference would be impractical. Accordingly, it is recommended that the old cards be destroyed, since their retention serves no useful purpose.

SUGGESTION RE Streamling Procedures -
CHANNELIZING MEMORANDA (SAC LET. #61-8 (E) 2/21/61)

It is my suggestion that a "Standard Form" be used by all Agents who are contemplating authorizing the destruction of channelizing memoranda following submission of reports incoporating the information contained therein.

Destruction of Bureau Property -

Current practice or rule (Include manual citation as well as facts)

NONE

Advantages of suggestion

1. This form will insure uniformity in submission of information.
2. A Standard Form would reduce time of Agents in either writing or dictating a memo each time the need arose.
3. Listing serials under the volume would expedite the clerical handling.
4. A "Standard Form" would be more easily recognized and would eliminate the possibility of serializing or placing other mail on top of it.

Disadvantages of suggestion

DOMESTIC INTELLIGENCE DIVISION
March 27, 1961

ADDENDUM:

It is the opinion of the Subversive Control Section, Domestic Intelligence Division, that the use of a standardized form to record the destruction of channelizing memoranda will insure uniformity and effect economy in Agent and stenographic time. This is particularly true in view of the fact that such a form will be used throughout the Bureau and it is anticipated there will be a great volume of such forms used in the future by the field.

The sample form submitted by the New York Office appears to be satisfactory except for the fact that the provision therein for identifying serials to be destroyed is not quite complete or clear. There is attached a sample form, identified as Sample Number 2, which it is felt more clearly specifies the material to be destroyed.

RECOMMENDATION:

In view of the fact that the adoption of a standardized form in this matter will be the concern of all field offices, it is suggested that consideration be given to soliciting the views of a representative number of field offices as to the advisability of employing such a standardized form. In this regard, consideration may be given to the attached Sample Number 2.

Division of Assignment: Los Angeles

SUGGESTION

That the attached form be adopted throughout the entire Field as SAC Letr. 61-8, dated 2/21/61, captioned "STREAMLINING PROCEDURES - CHANNELIZING MEMORANDA", authorized destruction of channelizing memoranda following submission of reports in both individual and organizational security cases.

MAR 29 1961

Current practice or rule (Include manual citation as well as facts)

See attachment

Advantages of suggestion and annual savings (include basis for estimate)

If form were adopted it would save Special Agent's time in preparing memorandum, would save typing time, would set forth Bureau authorization as to destruction, would set forth Agent's name and date of report which incorporated channelizing memoranda. of Bureau Property - General

Los Angeles Office prepares approximately four hundred security type reports monthly. This form would be used approximately 4800 times annually in Los Angeles Office alone and where multiple volumes, a substantial number of additional forms would be necessary. Would be a tremendous aid in larger offices.

Disadvantages of suggestion

None

Current practice or rule (include manual citation as well as facts)

From SAC Letr. 61-8, dated 2/21/61 captioned "STREAMLINING PROCEDURES - CHANNELIZING MEMORANDA":

"The current procedure with regard to filing the original informant report, the filing of the master channelizing memoranda in the informant file and the serializing of channelizing memoranda in the substantive case files will be continued as at present.

The Agent, at the time he dictates the report, will prepare a memorandum listing the channelizing memoranda to be destroyed by serial or serial scope and requesting the Chief Clerk's Office to destroy. The memorandum should indicate that pertinent information contained in the serials to be destroyed was incorporated in the report. It will not be necessary to set forth in this destruction memorandum the file and serial number of original informant reports or master channelizing memoranda as this information will be listed in the cover pages to the report. In the case of multiple volumes, the destruction memorandum should be prepared by the Agent in sufficient numbers so that one copy will appear in each volume of the multiple volume file being stripped.

*** Prior to destruction, the Agent's recommendations with respect thereto are to be reviewed and approved by the Supervisor at the time he reviews and approves the report.

Following destruction of the channelizing memoranda the Chief Clerk will so note on the memorandum. Thereafter, the memorandum will be filed in the case file as a permanent record of the serials destroyed."

*** (When Supervisor initials in block stamp of proposed form, this would indicate his approval.)

Memorandum

TO : DIRECTOR, FBI

DATE: 4/6/61

FROM : SAC, NEW YORK (66-7111)

SUBJECT: STREAMLINING PROCEDURES
CHANNELIZING MEMORANDA
SUGGESTION
Destruction of Bureau Records

CONFIDENTIAL

Re SAC Letter 61-8 dated 2/21/61, page 4, section entitled as above. As a result of operating under the system suggested in ref SAC letter, the following observation and suggestions are being made.

The Bureau notes on page 5 (5) of the SAC Letter that "Technical and microphone surveillance channelizing memoranda may be destroyed without the necessity of identifying in the cover pages of the report the exact location in the office files of the original information. The use of an asterisk identifies the source and the original information can be readily located."

As the Bureau is aware, the use of the asterisk is not limited to technical and microphone surveillances. They are also used for top level informants. In addition, by using the asterisk for live informants in addition to the technical and microphone surveillances, the agents then are not in a position to know the source of the information. All they have to know is that it is not necessary to document the information which is in accordance with the Bureau's desires. Since, therefore, the asterisk will not tell the agent that it is a technical or microphone surveillance, it is felt that the rule as set in the SAC letter is too narrow. It is recommended that the instructions be changed so that it will include all asterisk informants and not be limited to technical and microphone surveillances. This recommendation is based on the fact that the original information can be readily located as would be true for technical and microphone surveillances. It would also be more in keeping with the Bureau's desires of not letting the agent know the nature and identity of the source in furnishing the information.

DECLASSIFIED BY SP4 E.W. LUCAS ON
Declassified 8-10-88 Per J. Edgar Hoover Release To Per. 2 - 1.1979

The question arises as to whether or not the instructions contained in the SAC Letter pertaining to the destruction of channelizing memoranda includes the destruction of translations of foreign language newspapers and periodicals, such as "THE MORNING FREIHEIT," which is translated daily and channelizing memoranda made for files other than the subject's file. In including the information in report form, the report merely shows that the article came from "THE MORNING FREIHEIT", plus setting out the page, column, etc., but does not specifically state that the original translation may be located in the case file of the subject newspaper, such as "THE MORNING FREIHEIT". It is the recommendation of the New York Office that these should be destroyed the same as any other channelizing memoranda as it would appear quite evident to any agent that the original would be located in the case file on the newspaper. Further, if this could not be found the newspaper is always available.

The Bureau's comments with reference to the above suggestion are respectfully requested.

FEDERAL COMMUNICATIONS COMMISSION
Destruction of Name Check Records

Description of List: 62-40185-933. Lists of alien and foreign connected employees of certain Western Union offices setting out a summary of citizenship data.

The attached listings of names have been called to our attention by personnel engaged in Name Check work. They advise that there is frequent reference to these listings which do not include derogatory information, although additional information may be obtained in many cases by reference to the Federal Communications Commission citizenship files. In an effort to streamline procedures and eliminate unnecessary reference to this data it is proposed that the material be de-indexed through removal of the cards from the Bureau's indices.

It is requested that the appropriate substantive supervisor review the above listed file reference to determine if any reason exists for retention of the indexing on these listings of names. A notation advising of the decision reached may be placed on this memorandum. The memorandum should be returned to the Correlation Unit of the Records Branch, Room 6309 IB.

RECOMMENDATION:

For referral to appropriate substantive division.

DESTRUCTION OF BUREAU PROPERTY - GENERAL

During the current inspection of the Administrative Division, the inspector has suggested that a system be set up whereby movie films could be purged at regular intervals which are currently stored in the Photographic Unit of the Mechanical Section.

In order to comply with the inspector's suggestion we would appreciate receiving at least each 90 days advice from your division as to what films in which you have a particular interest may be disposed of.

PROPOSED CHANGE IN
SECTION 87D OF THE
MANUAL OF INSTRUCTIONS

Item g (1), page 78a, under the heading "Channelizing Memoranda - Destruction of following submission of reports in security cases," should have added as a last sentence the following:

"Use Form FD-338 for this purpose."

NOTE ON YELLOW:

Memorandum Mr. Malone to Mr. Mohr dated 4/21/61 captioned "Destruction of Bureau Property, Suggestion Number 495-61, Submitted by [redacted] New York Office, Suggestion Number 527-61, Submitted by [redacted] Los Angeles Office," recommended adoption of a form for field use in connection with destruction of channelizing memoranda following submission of reports. Suggestion adopted and Form FD-338 prepared for this purpose. Adoption of this suggestion necessitates above Manual change.

TO : DIRECTOR, FBI

DATE: 4/12/61

Destruction of Bureau Properly

FROM : SAC, LOS ANGELES (66-8)

SUBJECT: STREAMLINING PROCEDURES
CHANNELIZING MEMORANDA

ATTN: Training and
Inspection Division

ReBulet to Chicago 4/4/61.

The Los Angeles Office is in agreement that a form would be desirable in connection with the destruction of channelizing memoranda. In this connection, it is pointed out that the Los Angeles Office submitted a similar suggestion concerning a form on 3/27/61.

A review of the sample form enclosed with reBulet indicates the following considerations which might be considered as disadvantages to this specific form:

1. The Los Angeles Office feels that the form should be filed adjacent to the report to which it relates rather than being maintained unserialized on top of the file. By having it filed adjacent to the report, it is always readily available, and obviates the necessity of checking back through several volumes as would be the case if it was maintained on top of the file unserialized. Serializing the form adjacent to the report to which it relates affords greater control over this communication.

2. The experience of this office to date in the destruction of channelizing memoranda would indicate that the proposed form has an insufficient number of spaces for listing the serials to be destroyed. While it is realized that a second page could be used, it would appear more appropriate to have more spaces available as was done in the form submitted by this office on 3/27/61.

3. It has been the experience of this office that when destroying numerous channelizing memoranda, several individual volumes of a file will be compressed into a single volume and

1-Los Angeles
PLM:mmb
(3)

ALL INFORMATION CONTAINED HEREIN IS UNCLASSIFIED DATE 8-10-82 BY SP4EL W/ cal

66 MAY 29 1961

it would therefore appear unnecessary to have a one serial volume which would contain only a copy of the destruction form.

The Los Angeles Office is in full accord with the suggestion that a form would be desirable in connection with destruction of channelizing memoranda, however, it is felt that in view of the foregoing, the suggestion of the Los Angeles Office of 3/27/61, offers greater advantages.

OPTIONAL FORM NO. 10
5010-104
UNITED STATES GOVERNMENT

Memorandum

TO : DIRECTOR, FBI

DATE: 4/10/61

FROM : SAC, SAN FRANCISCO (66-1696)

SUBJECT: STREAMLINING PROCEDURES - CHANNELIZING MEMORANDA

ATTN: TRAINING AND INSPECTION DIVISION

ReBulet to Chicago 4/4/61 which attached a proposed form for the destruction of channelizing memos.

San Francisco has reviewed the proposed form and sees no objection to its use.

It is noted that the form contains columns for five different volumes. It appears that this number of volumes is excessive and that it is rare that five volumes are used in the preparation of one report. It is suggested that if this form is adopted, the number of volumes on the form be limited to three, which would be much more in line. This would also give more space and would probably be more practical.

UNITED STATES GOVERNMENT

Memorandum

TO : DIRECTOR, FBI ~~(66-2485)~~ DATE: April 10, 1961

FROM : SAC, CHICAGO (100-34283)

SUBJECT: STREAMLINING PROCEDURES -
CHANNELIZING MEMORANDA

Rebulet April 4, 1961 and the enclosed sample copy of a proposed form to be utilized in connection with the destruction of channelizing memoranda program.

The proposed form has been examined and discussed by the supervisory staff of the Chicago Office as well as by the CCO. In general, it is felt that the proposed form should be adopted.

The following observations were made for consideration of the Bureau in connection with any revisions that might be considered as a result of circularization of the sample form:

1. The CCO of the Chicago Office feels that a distinctive color for the form would be most desirable.

2. Above the item "Destroyed By" it is recommended that a line be added to note supervisory approval so that the CCO will know that destruction has been approved by the desk.

3. As paragraph 3 in the form it would be helpful if the form would also cover the scope of the agent's file review in language similar to the following:

(2)- Bureau (REGISTERED)
1- Chicago
CNF/njb
(3)

66-3286-904

REC-60

15 APR 13 1961

66 MAY 29 1961

"File review for this report was made from serial _____ through serial _____."

At the present time, when an agent finishes his file review and at the same time he dictates his report, a memo for the file is dictated noting the scope of the file review. A line in the proposed form would obviate the necessity for this separate memo, thus saving agent, steno, and clerical time.

4. With regard to the space provided for the listing of serials, it is noted that in most cases this space is insufficient for a listing of serials. It is felt that if a second sheet for the form was prepared by the Bureau listing only the information beginning with "Volume #____", then sufficient space would be available for the listing of the total number of serials. Should this suggestion not be approved, it will be necessary in many cases for additional sheets to be attached to the form.

This office has continued to note a substantial saving in file space as a result of the streamling program with regard to security files.

SAC, Chicago 4-4-61

Director, FBI

STREAMLINING PROCEDURES -
CHANNELIZING MEMORANDA

SAC Letter 61-8(E) dated 2-21-61, captioned as above, set forth instructions for destroying channelizing memoranda following the submission of reports in both individual and organizational security cases.

Furnish the Bureau by April 10, 1961, your recommendations concerning the desirability of using the prepared form (copy attached) for recording such destruction of channelizing memoranda. Submit your replies, attention Training and Inspection Division.

MEMORANDUM MALONE TO MOHR
RE: SUGGESTIONS #495-61 and #527-61

1. The use of a distinctive color for the form should be considered;
2. The form should be filed adjacent to the report;
3. More space be made for serials and less devoted to heading for volumes;
4. Addition of a line to note supervisor's initials indicating approval;
5. Addition of a statement to show the number of serials reviewed in preparing the report. It was also noted that the possibility existed that, after destruction, a volume might be left with one serial, the destruction memorandum, which would be undesirable.

The Training and Inspection Division considered these comments in concert with the Domestic Intelligence Division to arrive at a form embodying those suggestions which were practical. Two of the additional proposals were considered impractical, the use of a distinctive color and the fact that consolidation might result in a one-serial volume. There are only so many colors available and these are already used for forms of a similar size to the proposed form so that the possibility of further confusion existed. It was felt that the appearance of the proposed form is distinctive enough to be noticeable. The possibility of a one-serial volume resulting from destruction of channelizing memoranda was felt to be quite remote and even if it did occur, simple administrative procedures could be devised to handle the situation.

The remaining features were incorporated into a form (copy attached) which is submitted for approval.

RECOMMENDATION:

1. That the attached form #4 be approved.

b6
b7C

2. That the attached letters of appreciation be directed to the Misses [redacted] for their suggestions.

3. On approval that the proposed form be directed to the Forms Desk for the necessary handling.

4. That this memo be directed to the Domestic Intelligence Division for the necessary manual revisions.

SUBJECT: DESTRUCTION OF BUREAU PROPERTY
SUGGESTION #495-61 SUBMITTED BY [redacted] NEW YORK OFFICE
SUGGESTION #527-61 SUBMITTED BY [redacted] LOS ANGELES OFFICE

b6
b7C

SUGGESTION: Both suggesters submitted proposed forms (copies attached) designed for use in connection with the destruction of channelizing memoranda following submission of reports incorporating the information contained in the memoranda.

PRESENT PROCEDURE: Agent prepares a memorandum at the time he dictates report listing channelizing memoranda by serial or serial scope and requesting Chief Clerk's office to destroy them. This is reviewed and approved by the supervisor when reviewing and approving the report. The employee destroying the channelizing memoranda initials the destruction memorandum also noting the date and files it in the case file as a permanent record. This procedure of course relates only to such channelizing memoranda as are susceptible of destruction.

ADVANTAGES: The use of the form would standardize the procedure, eliminate much of the time consumed by Agents and typists in preparing memoranda, and facilitate clerical handling.

b6
b7C

OBSERVATIONS: Miss [redacted] submitted her proposed form first which was considered by the Domestic Intelligence Division. That Division agreed with the need for the use of a standardized form to record destruction of channelizing memoranda. They noted several shortcomings in the proposed form which they altered to their satisfaction and recommended that the modified form (copy attached) be sent to a representative group of field offices for their views. Miss [redacted] in the meantime had submitted her proposed form with the same idea in mind. The matter was discussed with the Domestic Intelligence Division which agreed that, inasmuch as their form was in effect a modification of her proposal, their form would serve as a modified version of both suggestions.

Accordingly, the views of the Chicago, Philadelphia, San Francisco, Los Angeles and Washington Field Offices were solicited. They were unanimous in their comment that such a form was desirable and should be adopted. However some additional suggestions were made by these offices concerning the proposed form as follows:

Dear Miss [redacted]

In further reference to your suggestion that the form you devised be used in connection with the disposition of channelizing memoranda, I am pleased to advise you that a modification of your idea has been adopted. The necessary steps are being taken to place it into effect.

I want to thank you for having given me the benefit of your observations on the matter.

Sincerely yours,

J. Edgar Hoover

At the present time, Personnel Records Unit of the Files and Communications Division has approximately 123,000 applicant files stored on 95 sections of shelf filing equipment.

Destruction of Bureau property

During the past years with Bureau approval, we have managed to dispose of many thousands obsolete applicant files. By memorandum dated June 16, 1955, the Executives Conference with the approval of the Director approved the destruction of applicant-type personnel files over ten years old where no information of value was contained therein. (67-80000-1823) By memorandum dated June 3, 1959, it was approved that index cards pertaining to these files could also be destroyed. (66-3286-831) By memorandum dated June 23, 1960, the Executives Conference approved the continuation of this destruction program which included all files through June 30, 1952. (67-80000-2387)

At the present time, it is believed this destruction period should be extended to include all files through December 31, 1955. The files which would be considered for destruction would be where no investigation had been conducted on the applicant and the only items in the file would be the application blank, interview sheet, and possibly other correspondence of no further value.

Regulations of the General Services Administration concerning Federal Records indicate that applications for employment and related papers may be disposed of upon receipt of a Civil Service Commission report of inspection or when two years old, whichever is earlier. Archival authority is not required for the destruction of applicant personnel files.

If destruction of the files as set forth in this memorandum is approved, approximately 23,400 files could be destroyed.

SUGGESTION

Destroy double zero files of classifications no longer used, such as classifications 19, 41, 57, 68, 81, 96, 99, 104, 106, 107, 118, 124, 126, 128, 130, 132.

DESTRUCTION OF BUREAU PROPERTY GENERAL

Current practice or rule (Include manual citation as well as facts)

No provision made for destruction of double zero files.

Advantages of suggestion and annual savings (include basis for estimate)

These files do not appear to have any further use and their destruction would provide added space as well as streamline operations.

SUBJECT: SUGGESTION 664-61
"Destruction of Bureau Property - Gen

Employee [redacted] Honolulu Division, has suggested that "double zero" files of classifications no longer used be destroyed. IN Field division

Existing instructions contained in Part II, Section 3, page 13, Manual of Rules and Regulations state that, "Files and records in field divisions may be destroyed after they become 20 years old." It is believed by the Files and Communications Division that this provision should be followed in destroying double zero files and that no special consideration be given to the destruction of such material. Suggestion that Supervision Files of Classifications No longer used be destroyed IN Field divisions

RECOMMENDATION:

For referral to the Training and Inspection Division.

LES:bpr
(3)

6/21

ADDENDUM OF TRAINING AND INSPECTION DIVISION, JER:het, 6/22/61.

EX-102 REC-23 66-3286-912

The Training and Inspection Division agrees with the views of the Files and Communications Division set forth above. Further, the Inspection Staff has advised that in their experience, retention of the double zero files in question should present no space problem as they are not of sufficient bulk to require much space. For these reasons it is felt that the suggestion should not be adopted.

RECOMMENDATION:

5 JUN 27 1961

That the suggestion not be adopted. On approval, no further action is necessary as the suggester was thanked by prior letter.

SUBJECT: TRAINING FILMS
Destruction of Bureau Reproduction

It has been recommended and approved that the films "Inside the FBI," "Men of the FBI" and "On Guard" be used no longer for training purposes as they are old and outdated. These films have also been used in the past in connection with speeches, and the Crime Records Division has indicated they should be discontinued for speech use as they are out of date.

Several of our field divisions have permanent retention copies of some of these films. It is advisable that one copy of each film be retained here at Seat of Government for historical interest; however, it appears that all other copies should be destroyed.

RECOMMENDATIONS:

1. That all copies of "Inside the FBI," "Men of the FBI" and "On Guard" be destroyed, with exception of one copy of each film which will be retained in the Photographic Laboratory for historical purposes.

1- COPY OF EACH RETAINED IN PHOTO LAB.
ALL OTHERS DESTROYED.
6-28-61 W.J.H.

2. That enclosed SAC Letter be forwarded, advising the field that these 3 films are no longer being used, and instructing that all copies in the field be destroyed when present commitments for their use are handled.

COSTA RICA - GERMAN RESIDENTS

Descriptions of Lists:

64-2108-A-11	German residents in Costa Rica submitting alien registration certificates.
64-2108-A-41	Germans who became naturalized citizens of Costa Rica, and persons born in Costa Rica of German origin who elected to become Costa Rican citizens.
64-2108-A-53	Germans registered by the Costa Rican government, including names of persons deported to the United States; Germans at liberty; Germans under house arrest; Germans (and others) confined to concentration camp.

Destruction of Bureau Property - Use

The attached listings of names have been called to our attention by personnel engaged in Name Check work. They advise that the frequency of reference to these listings causes unnecessary work because insufficient information is available to effect an identification. In an effort to streamline procedures and eliminate unnecessary reference to this data it is proposed that the material be de-indexed through removal of the cards from the Bureau's indices.

It is requested that the appropriate substantive supervisor review the above listed file references to determine if any reason exists for retention of the indexing on these listings of names. A notation advising of the decision reached may be placed on this memorandum. The memorandum should be returned to the Correlation Unit of the Records Branch, Room 6309 IB.

RECOMMENDATION:

For referral to appropriate substantive division.

Destruction of Bureau Records - Gen

SUBJECT: DESTRUCTION OF CHANNELIZING MEMORANDA

SAC Letter 61-8, dated 2/21/61, captioned "Streamlining Procedures - Channelizing Memoranda" authorized destruction of channelizing memoranda following submission of reports in both individual and organizational security cases.

Analysis of suggestions made in the past that might have some relation to this procedure disclosed the following two: #891-60 submitted by SA [redacted] of the New Haven Office, on June 15, 1960, and #787-60 submitted by [redacted] of the Newark Office, on April 14, 1960, which proposed the same or similar procedure but which were not adopted at the time. Since the Bureau rules permit due recognition of suggestions if adopted within a two-year period following submission, it is felt that letters of appreciation should be directed to SA [redacted] and Miss [redacted] for their contributions. b6 b7C

Memorandum to Mr. Tavel
Re: Political - Peru

ADDENDUM TWL:ms 6-23-61

RECOMMENDATIONS OF DOMESTIC INTELLIGENCE DIVISION

The material referred to in 64-1601-833, namely a list of important personalities of the Peruvian Chamber of Deputies, was furnished by Military Intelligence Division, WDGS, on 4-17-46 and is contained in a Military Attache's report for Peru dated 11-29-45.

The list, while it identifies individuals by committee functions and political party, is devoid of identifying data which would be of material assistance in making identifications. It is recommended that the material referred to above not only be de-indexed as proposed, but that the serial be destroyed, as the material contained therein would serve no useful purpose.

after three years. SAC Rightmyer of the Albuquerque Office did not recommend adoption of the suggestion since he favored the current procedure of retention of serials in double zero files. A similar suggestion (#664-61 submitted by [redacted] of the Honolulu Office on 6/14/61) that double zero files in classifications no longer used be destroyed was previously considered and not adopted. Files and Communications Division commented that under existing procedures, files and records in field divisions may be destroyed after they become 20 years old and they felt this provision should be followed in destroying double zero files. The Inspection Staff, Training and Inspection Division agreed and further commented that, in their experience, retention of double zero files should present no space problem as their bulk is not such as to require much filing space. Training and Inspection Division also notes that double zero files are used in the indoctrination of agents newly assigned to the field. For these reasons the suggestion should not be adopted.

SUGGESTION

It is suggested that serials in double zero files be destroyed when material is three years old. The Manual of Rules and Regulations states that material in double zero files need not be indexed. (R&R, Part II, Section 3, page 5). Instructions for double zero files is received from SAC Letters. SAC Letters are indexed and Manual of Rules and Regulations allows SAC Letters to be destroyed after three years. (R&R, Part II, Section 3, page 14). Instructions which come out in SAC Letters are put in Manual changes and have no value after three years.

DESTRUCTION OF BUREAU PROPERTY 6mL

Current practice or rule (Include manual citation as well as facts)

To retain serials permanently.

Advantages of suggestion and annual savings (include basis for estimate)

It would be a savings of filing space.

SUBJECT: DESTRUCTION OF RECORDS
(66-3286)

FIREARMS IDENTIFICATION (BOOKLET)
94-3-6, Sub 6

The captioned booklet was prepared by the Bureau in 1941 and was designed to be widely distributed to law enforcement agencies. It dealt with the correct procedure of recovery, marking, and shipping of firearms evidence. This file consists of eight sections and contains letters and replies to law enforcement officers who requested copies of the booklet. Approximately 95 per cent of this mail was dated in 1941 and 1942. The names of all the recipients of the booklet have been indexed.

This booklet is out of print and no longer distributed by the Bureau and accordingly this file serves no useful purpose today. Correspondence concerning the distribution of this booklet should be de-indexed and destroyed in order to save file space and to prevent unnecessary file reviews. Authority to destroy this type of mail has already been granted by the Archives under the general records schedule. Any mail of a policy nature or of historical value could, of course, be retained.

RECOMMENDATION:

That authority be granted to de-index and destroy the mail in the captioned file.

Employee Suggestion 8-8-61
Submitted by [redacted]

Recommendations and comments of Division Head: 8-21-61

Adoption of this suggestion would result in the saving of Filing Unit space and Numbering Unit abstract space. This material appears to have no present value and the authority to destroy such material has already been granted under the General Records Schedule. The general file 1-48 should be retained as it is composed largely of policy material.

RECOMMENDATION:

For referral to the Training and Inspection Division.

SUBJECT: CHECK OF FBI IDENTIFICATION RECORDS ON TEAMSTERS UNION OFFICIALS LMRDA - IM

DESTRUCTION OF BUREAU PROPERTY - GENERAL

By memorandum 6/13/60, the Criminal Division of the Department was advised of our procedure with respect to checking identification records on the basis of forms submitted by the Department of Labor which contain identifying data on Teamsters Union officials.

This procedure has been completed whereby the Criminal Division was advised of any indications that Teamsters Union officials had a criminal record which showed they were possibly in violation of Section 504 of the captioned act (individuals convicted of certain crimes prohibited from holding union positions). Ticklers of all Labor forms and any related identification records have been maintained for a temporary period of approximately six months. The Identification Division records will show a notation of inquiry made by Labor regarding those individuals on whom a jacket was maintained.

RECOMMENDED ACTION:

Inasmuch as all necessary action has been completed with respect to these ticklers and they have not proved of any value as reference material, they will be destroyed if you approve.

SUBJECT: PUBLICATION FILES
FILES & COMMUNICATIONS DIVISION
Destruction of Bureau Property

During the course of the inspection of the Files and Communications Division, it was determined that the captioned files, which are physically located in the Identification Building, consist of about 196 file cabinets of material. It is believed that much of this material could be purged without material loss of its research value and without the loss of items which would appear essential for future reference and possible use as evidence in security trials. The bulk of the material was filed for the Central Research Section of the Domestic Intelligence Division.

In discussing this matter with Assistant Director William C. Sullivan, he agreed to accept full responsibility for the material in these files and agreed to assign a supervisor to review the material and earmark those items which can be purged. He was in agreement that future controls of this material should be established.

Assistant Director William S. Tavel whose Files and Communications Division services these publication files was advised of the contact with Assistant Director Sullivan in this regard. Assistant Director Tavel agreed to conduct a survey to determine the frequency and extent to which the publications are used by Bureau personnel.

RECOMMENDATIONS: 1. That the Domestic Intelligence Division conduct the necessary review and purge of the publication files.

behind file containing these pledges. These pledges have been de-indexed and the "not recorded" copies were not indexed; therefore, they would never be referred to. This would save valuable space in the Filing Unit. Files and Communications Division advised these pledges would appear to serve no permanent purpose in our files. Archival authority for destruction of this type material has been granted under the General Records Schedule, which permits destruction after a retention period of three months. They also advised material of a policy nature or of historical value pertaining to the creation and purpose of the Law Enforcement Officers Pledge would be retained. The Training and Inspection Division recommends that the suggestion be adopted. On approval, this letter will serve as authority for the Records Branch to destroy this material.

Director, FBI [redacted] 9/27/61

b7D

SAC, New Orleans [redacted]

FORMER [redacted]

Destruction of Bureau Property - Gen

ReBulet 9/21/61.

Enclosed are original and one copy each of memoranda of explanation from SA J. WOODROW GILMORE and WILLIAM E. DENT, JR.

b7D

Incorrect information as first reported to this office by informant as mentioned in mylet to the Bureau of 9/14/61 was contained in PSI's written report dated 8/11/61 at which time he claimed he had attended NOI meetings held at [redacted]. He identified [redacted] who had been regularly attending these meetings.

In verifying this information reported by the informant, Police Chief J. C. KELLY (NA) was interviewed on 9/13/61 at which time he advised that he had personally conducted physical surveillances of the above location on three Sundays between 1:30 p.m. and 2:30 p.m. during this period and that no such meetings were held. He advised further that he had specifically surveilled this address on 7/30/61 between 1:30 p.m. and 2:30 p.m. and that no meeting was being held and that no one entered this meeting hall during that time. This is the only incorrect information furnished by the informant, previous information having been verified as true.

Subsequent to the contact with PSI on 8/11/61 arrangements had been made to recontact him on 8/21/61 but he failed to keep the appointment. He was contacted telephonically on 8/21/61 and stated he had been detained but would recontact the agent and arrange a subsequent meeting. As of 9/13/61 he had failed to make such contact.

The information in the report furnished by PSI on 8/11/61 was channelized to 14 files in the New Orleans Office but no dissemination to the Bureau or any other office has been made.

A review of the information furnished by the PSI reflects that the only information received from him which was disseminated outside the office or into report form is contained in the following described eight reports, copies of which were received by the Bureau:

1) As T-1 on page 3 in the report of SA J. WOODROW GILMORE dated 6/19/61 at New Orleans, captioned [redacted] aka., SM - NOI, Bufile 100-433531."

2) As T-1 on pages 2 and 3 in the report of SA J. WOODROW GILMORE dated 6/17/61 at New Orleans, captioned [redacted] aka., SM - NOI, Bufile 100-434931." b6 b7C

3) As T-1 on page 3 in the report of SA J. WOODROW GILMORE dated 6/9/61 at New Orleans, captioned "ROBERT MENNYWEATHER, aka., SM - NOI, Bufile 100-434930."

4) As T-1 on page 2 in the report of SA J. WOODROW GILMORE dated 6/9/61 at New Orleans, captioned [redacted] aka., SM - NOI, Bufile 100-434933."

5) As T-1 on pages 2, 3 and 4 in the report of SA J. WOODROW GILMORE dated 6/9/61 at New Orleans captioned "REACY GAINES, aka., SM - NOI, Bufile 100-434928."

6) As T-1 on pages 3 and 4 in the report of SA J. WOODROW GILMORE dated 6/9/61 at New Orleans, captioned [redacted] SM - NOI, Bufile 100-434927." b6 b7C

7) As T-1 on pages 2 and 3 in the report of SA J. WOODROW GILMORE dated 6/14/61 at New Orleans, captioned [redacted] SM - NOI, Bufile 100-434932."

8) As T-1 on page 4 in the report of SA J. WOODROW GILMORE dated 6/16/61 at New Orleans, captioned [redacted] aka., SM - NOI, Bufile 100-434929."

b7D

[redacted]

It is noted that dissemination was made to only the Bureau in all of the above described reports except that two copies of referenced report on [redacted] were furnished with leads to the St. Louis Office. b6 b7C

The pertinent information attributed to the PSI in the above mentioned reports was verified and/or corroborated by other witnesses or sources as reflected in the individual reports.

Since all pertinent information that has been included in reports has been verified or corroborated by other witnesses as being true, it is recommended that no change be made in any of this information which was furnished by the PSI and that no change be made in the evaluation of the informant used at that time in the evaluation memorandum accompanying the reports which was to the effect that contacts with the informant had been insufficient to judge his reliability.

With respect to the informant report of the PSI under date of 8/11/61, which is his only report known to contain incorrect information, it is recommended that all copies of this report be removed from the 14 various files of the New Orleans Office to which channelized and be destroyed. If the Bureau approves this recommendation, the original of the written report in PSI's file will be retained but labeled as containing known incorrect information which should not be disseminated.

In reviewing the handling of this matter, it appears the necessary steps were taken to check and verify information supplied by this former PSI and that on the first occasion of his furnishing incorrect information, it was detected. In view of this, no administrative action is recommended.

No further action will be taken at this time in regard to information supplied by this former PSI pending advice from the Bureau concerning the recommendation contained in the body of this communication.

Reurlet dated 9-27-61 captioned "Former [redacted]"

The Bureau concurs with your recommendations set out in relet. In line with those recommendations, clearly label former [redacted] report of 8-11-61 as false. The fourteen copies of channelizing memoranda prepared from the false report should be destroyed. No changes are necessary concerning the eight reports which have been disseminated outside of the Bureau containing information submitted by former [redacted] prior to 8-11-61. Those reports at the Bureau are having a notation placed therein that former [redacted] furnished false information on 8-11-61. Your copies should likewise have a similar notation. Since one copy was furnished by your office to the St. Louis Office, advise that office to likewise make a notation.

b7D

You are instructed to have two Agents promptly contact former [redacted] He should be clearly informed that his services as a potential security informant for the FBI have been discontinued and that the Bureau does not desire that he solicit information for the FBI. During the interview ascertain basis for his making a false report on 8-11-61. In the event he indicates a pro-NOI attitude and continues to attend Nation of Islam meetings, consideration should be given to opening a security matter investigation of him.

b7D

Voucher records at the Bureau indicate that $15 was paid to former [redacted] on 8-11-61 when he furnished the false report. He should be requested to return the money.

Promptly advise the Bureau when all action concerning labeling of the false report, destroying of the fourteen channelizing memoranda and notation in the eight reports has been handled. Also advise of the results of contact with former [redacted] MJR:peb

DESTRUCTION OF BUREAU RECORDS
BUFILE 66-3286

RE: FILE 62-66170 ENTITLED "SALE OF SUGAR AND FOODSTUFF"

We are maintaining a file entitled "Sale of Sugar and Foodstuff" (62-66170). This file consists of three sections, 340 serials and for the most part consists of letters from outside sources concerning possible irregularities in the sale of sugar and other foodstuffs during World War II when rationing was in effect. This correspondence was referred for the most part to the Office of Price Administration which had the responsibility for the enforcement of rationing throughout the country and the investigation of any alleged irregularities.

This material appears to be of no value to the Bureau today and in line with our Records Management Program designed to eliminate obsolete and valueless material from the Bureau's records, it is recommended that the Records Branch be authorized to deindex and destroy the material referred to above. General Records Schedule 14-4 issued by the National Archives authorizes destruction of, without further approval, acknowledgments and transmittals of inquiries and requests that have been referred elsewhere for reply.

If destruction of this material is authorized, of course we would not destroy any material contained in the file wherein the Bureau conducted an investigation or inquiry.

RECOMMENDATION:

That the Records Branch be authorized to deindex and destroy the material maintained in the above-captioned file with the exception of any material relating to a Bureau investigation or inquiry.

SUBJECT: DESTRUCTION OF FILES AND INDEX CARDS
LONDON OFFICE

Destruction of Bureau Property

By letter dated July 14, 1961, the Legat, London, requested permission to destroy index cards where files on same had been destroyed.

Inspector Haverty, in his recent inspections of the Legat Offices, reviewed this question with the various Legats and makes the following recommendations:

1. That the index card reflecting a main file should not be destroyed. It is noted that in many Legat Offices, the File Destruction Program is based on a one-and-three-year interval as compared with a twenty-year destruction program in the domestic field. The index card being retained is an immediate alert to the Legat showing that the person was previously a subject of an investigation.

2. With respect to index cards which only list a reference, it is suggested that if there is no identifying information on such that same may be destroyed. This would be particularly helpful to old established offices, such as London. In this connection, however, it is not suggested that any program of index card destruction be instituted but that same might be handled incidental to regular searches of the indices.

Dear Mrs. [redacted]

I have received your suggestion that Form FD-338, which is used in connection with the disposition of channelizing memoranda, be printed on paper of a distinctive color. I am sure you will be interested to know that consideration was given to the matter at the time the form was adopted. However, it was decided that, since there are only so many colors available and these are already used for forms of a similar size to the form in question, the possibility of confusion would ensue. It was felt that the appearance of Form FD-338 was distinctive enough to be easily recognized.

Although your idea was not adopted in this instance, I hope that you will continue to give me the benefit of your observations in the future.

Sincerely yours,

J. Edgar Hoover

Only one office, Chicago, suggested a distinctive color for the form. The matter was duly considered in concert with the Domestic Intelligence Division and it was decided that the use of a colored form was impractical since there are only so many colors available and these were already in use for forms of a similar size; therefore, the possibility of confusion might ensue. It was felt that the appearance of FD-338 was distinctive enough to be noticeable. For these reasons it is felt the suggestion should not be adopted.

Employee Suggestion
FD-222 (Rev. 9-11-58)

#310-62

b6
b7C

Date 11-16-61

To:	From: (Suggester's name)	Division of Assignment
Director, FBI		NORFOLK

SUGGESTION

This employee suggests that once index cards for motor numbers, serial numbers, license numbers and vehicle identification numbers of motor vehicles and serial numbers for radios, televisions, typewriters, and firearms are withdrawn, the files pertaining thereto also be destroyed if no longer of value. In UNSUB cases, re the above, it is felt since the index cards pertaining to these files are destroyed after five years, the files are of no reference value; therefore, these files too, should be destroyed.. Of course this would not apply when a SUBJECT has been identified or other names indexed. A survey was conducted with 26 matters and it was determined that from 3700 files reviewed approximately 1000 of these files could be destroyed and 10 feet of drawer space could be gained.

o Destruction of Bureau Records

Current practice or rule (Include manual citation as well as facts)

MRR 11-3-5 Index cards on MN, SN, LIC. NO., VEH. IDENT. of motor VEH. and for radios, televisions, typewriters and firearms are withdrawn after five years. MRR does not state that the files should be destroyed.

Advantages of suggestion and annual savings (include basis for estimate)

The value of the above would result in the accrual of additional office space throughout the Bureau Field Offices. The estimated value to be based upon the number of files that could be destroyed by each Field Office.

ALL INFORMATION CONTAINED
HEREIN IS UNCLASSIFIED
DATE 8-10-82 BY SP4EW/cal

Disadvantages of suggestion

This would require extra time to destroy pertinent files.

b6
b7C

(The use by the United States of my suggestion shall not form the basis of a further claim of any nature by me, my heirs, or assigns upon the United States. I understand that I will be considered for any justified award only if my suggestion is adopted within two years after submission.)

SUBJECT: SUGGESTION NUMBER 268-62
SUBMITTED BY SPECIAL AGENT [redacted] OF THE
ALBUQUERQUE OFFICE

b6
b7C

Destruction - Gen of Bureau Property

SUGGESTION:

SA [redacted] has suggested that unknown 26 cases (ITSMV) be destroyed after they become five years old. The present practice in the field is to keep files twenty years before destroying. The manual allows index cards on motor numbers and serial numbers to be destroyed when they become five years old. (Rules and Regulations, Part II, Section 3, page 5) Since index cards are destroyed on the motor numbers and serial numbers, unknown subject 26 cases have no value after the index cards are destroyed, therefore, it is felt that these cases would no longer be needed and could be destroyed after the index cards have been destroyed.

b6
b7C

The advantage of this suggestion would eliminate unnecessary files and saving of space. SA [redacted] indicates there would be no disadvantages to this suggestion.

ALL INFORMATION CONTAINED HEREIN IS UNCLASSIFIED DATE 8-10-82 BY SP-4 EWJ/cal

RECOMMENDATIONS OF GENERAL INVESTIGATIVE DIVISION:

The destruction of the aforementioned files as set out by SA [redacted] would necessitate the utilization of employee's time to review each file to be destroyed in order to determine that these files contain no information which should be maintained. Such time expended by the employees would be excessive and such a procedure would not be economically sound when compared to actual space saved in each respective field office through the destruction and elimination of these files. It is estimated that the average unknown subject 26 file contains between two and four serials.

DEC 12 1961

In addition to the above, the Bureau cannot arbitrarily destroy files but must first obtain appropriate clearance for destruction of investigative files from the Archives.

In view of the above, it is recommended that the above suggestion not be enacted.

Director, FBI

Bureau Property General

DESTRUCTION OF FILES
AND INDEX CARDS
ADMINISTRATIVE

CONFIDENTIAL

ReBulet to Paris 10-8-56 which set forth instructions for destruction of certain files within the discretion of the Legal Attache subsequent to the lapse of three years for criminal-type and five years for security-type cases.

During the recent inspection of the foreign offices, the Inspector evaluated a request, made by the London Office, that permission be granted to destroy index cards where the files to which these cards referred had been destroyed. The rule as set forth in the Foreign Operations Policy Manual, Section 6, Page 12 (2), states "Index cards for files destroyed should be retained, thereby affording a future file reference for any necessary Bureau indices check."

Based on the Inspector's evaluation, it was decided that this rule should remain in effect with the following qualifications:

DECLASSIFIED BY SP4CLW/ca
ON 8-10-82

In those instances where the index card for files destroyed lists only one reference and there is no identifying information on the card, then it may be destroyed. The Bureau, however, does not desire that any program of index-card destruction be instituted but rather that it be handled incidental to regular searches of the indices. If the card lists several references relating to one individual, these cards are also to be retained.

Re: DESTRUCTION OF FILES
AND INDEX CARDS
ADMINISTRATIVE

NOTE ON YELLOW:

CONFIDENTIAL

The rule in foreign offices that index cards are not to be destroyed when the file is destroyed is contrary to the rule in the domestic field. The reason for this is that foreign offices have an accelerated file destruction program depending on the danger faced by the particular office due to the proximity to the Iron Curtain countries. Instructions set forth above based on approval of Mr. Malone's memorandum to Mr. Mohr 10-27-61 "Destruction of Files and Index Cards, London Office."

Appropriate changes in the Foreign Operations Policy Manual will be made.

Destruction of Bureau Property - Gen.

SUPERVISION - ITSMV
SUGGESTION #268-62 SUBMITTED BY
MR. [redacted] ALBUQUERQUE OFFICE

SYNOPSIS

Suggester proposed that unknown subject files in the 26 Classification (Interstate Transportation of Stolen Motor Vehicle (ITSMV) be destroyed after five years. At present they are destroyed when 20 years old but index cards on motor, serial, license, and vehicle identification numbers are withdrawn as they are encountered after five years old. Savings in filing space is to be realized. SAC Albuquerque recommended adoption. Newark, Baltimore and Washington Field Offices were solicited and also favor adoption of suggestion. Training and Inspection Division, with concurrence of General Investigative and Files and Communications Division, recommend extension of suggested procedure to include such cases in the 15 (Theft From Interstate Shipment) and 87 (Interstate Transportation of Stolen Property) Classifications. Legal Research Desk, Training and Inspection Division, also agrees that signed statements, if there be any, can be destroyed since no prosecution was involved in contradistinction to usual Bureau cases where the statements involve admissions and pertinent statements which might become subject of appeal after conviction, at a future date. Same suggestion previously submitted by Mr. [redacted] of Savannah Office (#882-62, 6/8/60).

b6 b7C

RECOMMENDATIONS:

1. That the suggestion, extended to include the 87 (ITSP) and 15 (TFIS) Classifications, be adopted; the attached letters be sent to Messrs. [redacted]

ORIGINAL COPY FILED IN

MEMORANDUM MALONE TO MOHR
RE: SUGGESTION #268-62

DETAILS

SUGGESTION: That files in Unknown Subject Interstate Transportation of Stolen Motor Vehicles be destroyed after they become five years old.

PRESENT PROCEDURE: These files are destroyed after they are 20 years old. However, Manual of Rules and Regulations, Part II, Section 3, Page 5 instructs that index cards on motor numbers, serial numbers, license numbers, or vehicle identification numbers are to be withdrawn as they are encountered after they are five years old.

ADVANTAGES: Once index cards are removed, as indicated above, after five years, the Unsub 26 cases lose their value too and could be destroyed after the cards are destroyed. This would eliminate unnecessary files and save filing space.

OBSERVATIONS: SAC Rightmyer of the Albuquerque Office recommended adoption because, aside from the fact that pertinent index cards are destroyed after five years, Unsub 26 cases, particularly where no logical suspects were found during investigation, have only data showing theft of a car and, after five years, are of little value.

The General Investigative Division commented that destruction of these files would necessitate expending of employee's time to review each file to be destroyed to determine that these files contain no information which should be maintained. Such time expended would appear excessive and not economically sound when comparing to actual space saved. They estimated the average unknown subject 26 case file contains between two and four serials. They also pointed out that the Bureau cannot arbitrarily destroy files but must obtain clearances from Archives. For these reasons they opposed adoption of the suggestion.

Files and Communications Division stated that, as the present regulations provide for destruction of index cards on motor and serial numbers after they are five years old, the suggestion had merit and should be adopted. No archival authority is necessary in these cases.

Training and Inspection Division contacted the Newark, Baltimore and Washington Field Offices concerning the merits of the suggestion; and they favored adoption. Washington Field felt that both index cards and files are of value in car theft ring cases but admitted that, in the absence of index cards, the case files are useless.

MEMORANDUM MALONE TO MOHR
RE: SUGGESTION #268-62

The matter was rediscussed with General Investigative Division and Mr. Ferrara advised that in view of the comments of Files and Communications Division they had no objection to adoption of the idea. They stated they had no "ring" cases over five years old and the possibility of the use of these Unsub 26 files in these cases is remote. Concerning the possibility of signed statements in these files, General Investigative Division and Training and Inspection Division both feel that their presence would be a rarity since, if positive information were developed, the case would probably become a known subject case and the destruction procedure would not apply to it.

Training and Inspection Division also feels that the suggested procedure should be extended to unknown subject cases in the 87 (Interstate Transportation of Stolen Property) (ITSP) and 15 (Theft from Interstate Shipment) (TFIS) cases. The matter was discussed with Mr. Gamble and Mr. Grampp, of the General Investigative Division, who handle the cases in the 15 and 87 classifications, respectively, and they could could see no objection to extension of the procedure to these types of cases. Mr. Short of the Files and Communications Division advised that archival authority is not needed for destruction of the unknown subject file in these cases either.

The matter of destruction of any signed statements that might be encountered in connection with these cases in the 26, 18 and 87 classifications, was discussed with Mr. Dalbey of the Legal Research Desk of the Training and Inspection Division. He advised that whereas the signed statements in the usual Bureau case involve admissions and pertinent statements which might become subject of appeal after conviction, or additional litigation at a future date, it would not appear that the same conditions would apply to signed statements, if there be any, in these unknown subject type of cases since no prosecution was involved and they could also be destroyed. Therefore, it is being recommended that permission be given for the destruction of unknown subject cases in the 26, 15 and 87 classifications after they become five years old. Based on the results obtained in these classifications, consideration will be given to extending this procedure to other classifications at a future date. Further, in order to avoid tying up manpower in the field on a project-type operation, it is felt that the field should be permitted to accomplish this destruction as expeditiously as possible based on available manpower. The Inspection Staff was contacted and concurs with the foregoing opinions. b6 b7C

It is noted the same suggestion (#882-62 dated 6/8/60) was submitted by Mr. [redacted] of the Savannah Office but not adopted because it was felt the space saved would not be commensurate with the time expended. It is felt that Mr. [redacted] should also receive recognition for the adoption of the suggestion.

FROM : J. F. Malone

SUBJECT: DESTRUCTION OF BUREAU RECORDS - General
SUGGESTION #310-62 SUBMITTED BY
MR. [redacted] NORFOLK OFFICE

Index Cards & Files of Certain Cases be destroyed

Mr. [redacted] suggested that once index cards for motor, serial, license, and vehicle identification numbers, and serial numbers for radios, televisions, typewriters, and firearms are withdrawn, that the files pertaining to them also be destroyed if of no further value. He was referring specifically to unknown subject files on which these index cards were made.

Mr. [redacted] suggestion was made at the time when a similar suggestion, pertaining to the destruction of unknown subject cases in the 26 (Interstate Transportation of Stolen Motor Vehicle) classification (#268-62 submitted by [redacted] Albuquerque Office) was under consideration. He was advised by letter dated November 22, 1961, that his suggestion would be considered along with the other and he would be advised if it were adopted.

By memorandum from Mr. Malone to Mr. Mohr dated 12/5/61, it was recommended that Mr. [redacted] suggestion, extended to include the 87 (Interstate Transportation of Stolen Property) and 15 (Theft from Interstate Shipment) classifications, be adopted and appropriate manual changes made. This recommendation was approved by Mr. Tolson.

It is therefore felt that Mr. [redacted] should be advised that a modification of his suggestion was adopted.

RECOMMENDATION: That the attached letter of appreciation be directed to Mr. [redacted] His suggestion was acknowledged by prior letter.

SUGGESTION

It is suggested that Unsub 26 cases be destroyed after they become five years old. The present practice is to keep files 20 years before destroying. It is noted that the Manual allows index cards on motor numbers and serial numbers to be destroyed when they become five years old. Since index cards are destroyed on the motor numbers and serial numbers, Unsub 26 cases have no value after the index cards are destroyed, therefore it is felt that these cases would no longer be needed and could be destroyed after the index cards have been destroyed.

Destruction of Property - Gen'l

Current practice or rule (Include manual citation as well as facts)

To keep 26 cases until they are 20 years old before destroying

SUBJECT: (U)
DEINDEXING OF TECHNICAL
SURVEILLANCE LOGS
FILE 65-56402 Sub 1
ENTITLED NATHAN GREGORY SILVERMASTER
ETAL
ESPIONAGE-R

Description of Bureau Records - Gen'l

~~SECRET~~

b7E

Memorandum from Branigan to Belmont dated 11-3-59 (65-30092-6556) sets forth a suggestion that technical surveillance logs on [redacted] (S)(U) received from the Washington Field Office be deindexed inasmuch as information if identifiable appears in other Bureau files and information unidentifiable is of little value to current file reviews. This suggestion was adopted with an additional recommendation that the Files and Communications Division consider possible deindexing of other technical surveillance logs if similar comments apply. (S) U

File 65-56402 Sub 1 (Nathan Gregory Silvermaster, Etal, Espionage-R) consists of 41 sections, 3,060 serials, containing nothing but technical surveillance logs prepared in connection with the investigation. The last piece of mail placed in this Sub file was dated 5-26-48. Through this file, there are a number of names indexed wherein only the last or first name was secured and no identifying information was available to permit an identification of these individuals. Consequently "One" cards were made using the only name available such as "One Jean" or "One Irene" (section of file attached with examples marked). There are hundreds of these cards which were made as a result of the technical surveillance in connection with this investigation. Inasmuch as there are no identifying data concerning the subjects of these index cards, they are of no value to the Bureau today, accordingly we request that we be authorized to deindex all "One" cards prepared in connection with the technical surveillance logs maintained in this case. U

RECOMMENDATION:

DECLASSIFIED BY AUC 60290 BCE/DCG/ymm
ON 8/13/03
#03-R0762

That the Files and Communications Division be authorized to deindex all "One" cards prepared in connection with the technical surveillance logs maintained in this case. (S) U

INTERDEPARTMENTAL COMMITTEE CONSIDERING
SEAMEN'S PASSPORT APPLICATIONS

Destruction of Bureau Property - Gen.

Description of Lists: 66-15917-16,17,66. Names of applicants for seamen's passports with the committee's action indicated.

The attached listings of names have been called to our attention by personnel engaged in Name Check work. They advise that the frequency of reference to these listings causes unnecessary work because insufficient information is available to effect an identification. In an effort to streamline procedures and eliminate unnecessary reference to this data it is proposed that the names of those individuals applying for seamen's passports which were considered and approved on the initial review be de-indexed through removal of the cards from the Bureau's indices. The names of those individuals refused or approved after being reconsidered, will remain indexed.

It is requested that the appropriate substantive supervisor review the above listed file references to determine if any reason exists for retention of the indexing on these listings of names, subject to the limitations set out above. A notation advising of the decision reached may be placed on this memorandum. The memorandum should be returned to the Correlation Unit of the Records Branch, Room 6309 IB.

SUBJECT: SUPERVISION - ITSMV
SUGGESTION #750-60 SUBMITTED BY
MR. [redacted] LOUISVILLE OFFICE

b6
b7C

Mr. [redacted] submitted a suggestion dated 3/29/60, proposing that Unknown Subject cases in the 26 (Interstate Transportation of Stolen Motor Vehicle) classification be destroyed five years after the date of closing or referring these cases on completion. Destruction of Bureau Property

At the time, the suggestion was not adopted because files in the prescribed group consisted for the most part of two to four serials and the excessive time necessary to cull them to insure that information of value was not destroyed would not be commensurate with potential saving in space. However, the Bureau recently adopted a procedure as a result of a suggestion by Mr. [redacted] of the Albuquerque Office (#268-62 dated 11/6/61) to permit destruction of such files in the 26, 87 (ITSP), and 15 (TFIS) classifications after they are five years old.

Since the adopted procedure encompasses the suggestion of Mr. [redacted] it is felt he should be accorded appropriate recognition since his suggestion was made within the requisite two-year limitation period.

b6

Dear Mr. [redacted]

Reference is made to your suggestion of March 29, 1960, concerning the disposition of files in one of the Bureau's classifications after five years. It is a pleasure to let you know that a procedure has been adopted which will place your proposal into effect.

I want to take this opportunity to thank you for the initiative you displayed in submitting your idea, and to assure you that your interest has not been overlooked.

Sincerely yours,

J. Edgar Hoover

SUBJECT: DESTRUCTION OF RECORDS
ADMINISTRATIVE FILES
(64 CLASSIFICATION)

While purging the files in the 64 (Foreign Miscellaneous) classification of extra copies of documents inaccordance with our Copy Destruction Program, we have located a number of files containing unrecorded administrative mail relating to the SIS Program in World War II. These files (samples attached) contain administrative memoranda relating to supplies, personnel matters, etc., in connection with the operation of the various Bureau offices in South America when the SIS Program was in effect. This material appears to be of no value and we request that we be authorized to destroy it.

It is pointed out that we have authority (66-3286-608) to destroy similar administrative type of materials (66 classification, Administrative Matters) maintained relating to our field offices. Archival authority is not necessary for the destruction of the administrative type of materials of this nature.

RECOMMENDATION:

That this memorandum be referred to the Administrative Division and to the Domestic Intelligence Division for authority to destroy this material.

Employee Suggestion
FD-252 (Rev. 9-1-59)

#481-62

b6
b7C

Date: 1/10/62

To:	From: (Suggester's name)	Division of Assignment
Director, FBI		FBI, San Juan

SUGGESTION

Destruction of Bureau Records - General

That instructions in the Manual of Rules and Regulations, Part II, Section 3-6(2), entitled, "Destruction of copies of serials," which read, "...office of origin may destroy all copies of each serial after file has been closed for ten years..." be extended as follows: "Also, office of origin and auxiliary offices may destroy all copies of each serial in pending files which is over ten years old."

Current practice or rule (Include manual citation as well as facts)

Current practice in pending files is to retain all copies of all serials.

Advantages of suggestion and annual savings (include basis for estimate)

Advantages - Saving of file space.
Annual savings - Variable and difficult to estimate. However, in a spot check on a 3-copy, 50-page mimeographed report, it was found that an approximate saving of one inch of file space could be effected on each report if two of the three ten-year-old serials are destroyed.

To: Director, FBI

From: (Suggester's name)

Division of Assignment: Files & Communications

SUGGESTION

1. That Bureau file 66-3657 be reviewed for de-indexing and destruction. This is the original FBI Law Enforcement Bulletin file consisting of 26 file sections and enclosures behind file. This file is closed and the last serial is dated January, 1938.

2. That Bureau file 94-3-1 also be reviewed for de-indexing and destruction of mail more than ten years old (or some other reasonable date to be set). This is the current FBI Law Enforcement Bulletin file and consists of 289 sections and enclosures behind file.

3. That the rough draft writeups for FBI Law Enforcement Bulletins maintained in folders behind file 94-3-1 be destroyed. These rough drafts utilize 32 file drawers of files space.

Current practice or rule (Include manual citation as well as facts)

All mail maintained in file. DESTRUCTION OF BUREAU RECORDS - GEN'L

Advantages of suggestion and annual savings (include basis for estimate)

1. Savings of file room space
2. Savings of index space through de-indexing
3. Elimination of unnecessary searches and reviews

12-27-61

b6
b7C

ADDENDUM: 1-3-62

The Records Branch favors the adoption of this suggestion because it would in fact effect the savings indicated in the suggestion by Mrs. [redacted] Any mail of historical value regarding the creation of the Law Enforcement Bulletin or any mail of a policy nature would, of course, be retained and could be consolidated into the current file 94-3-1. The other mail, consisting largely of requests from individuals and responses thereto and requests from various field offices regarding distribution of the Law Enforcement Bulletin, could be destroyed. Such destruction is authorized under the general records schedule by the National Archives and no further authority is required.

The Records Branch particularly favors item three of the suggestion regarding destruction of rough draft writeups for Law Enforcement Bulletins in view of the fact that bound copies of all Law Enforcement Bulletins are maintained by the Bureau library. Comments of the Crime Records Division should be secured.

RECOMMENDATION:

For referral to the Training and Inspection Division.

FROM : F. W. WAIKART

SUBJECT: DESTRUCTION OF ROUTINE IDENTIFICATION DIVISION MAIL

Attached are samples of mail originating from the Identification Division and appropriately marked "Return to Ident. Division for Destruction." After the appropriate outgoing communication has been sent, this material is therefore returned to the Identification Division where the mail is destroyed.

In order to avoid unnecessary handling and transmission of this type of material through the Messenger and Courier facilities, it is proposed that after the necessary action to dispatch the outgoing correspondence in the Mail Room or the Teletype Unit, the supervisory personnel of these units be authorized to destroy this type of material. This has been discussed with Mr. Bowles of the Identification Division and he is in agreement with the suggested change in procedure.

RECOMMENDATION:

That after appropriate action, supervisory personnel in the Mail Room and Teletype Unit be authorized to destroy specifically designated Identification Division material without returning it to that Division.

O'REILLY, J.E.

TO : Mr. Mohr

DATE: 1/5/62

FROM : J. F. Malone

SUBJECT: DESTRUCTION OF ROUTINE IDENTIFICATION DIVISION MAIL

We have made inquiry into the suggestion of the Files and Communications Division concerning the destruction of routine Identification Division mail. This suggestion appears to have merit. No change in policy is proposed in the suggestion. The ultimate disposition of the mail would be the same as it is now, namely, destruction. The only change would be who actually does the destroying.

It is proposed that the outgoing mail be destroyed by the supervisor in the Mail Room; outgoing telegrams would be destroyed by the supervisor in the Teletype Unit. This limits the number of individuals who would have permission to destroy, namely, the two supervisors. This procedure would avoid the processing of the mail through the Messenger and Courier facilities back to the Identification Division where the mail is now destroyed.

It is suggested, however, that the stamp which is placed on mail and telegrams to be destroyed be changed to reflect that the destruction is to be accomplished in the Mail Room or Teletype Unit. The stamped notation that the mail is to be destroyed, initialed by the Identification Division, would be authority for the Mail Room and Teletype Unit to dispose of the communications. This procedure would present no unusual problem in the Mail Room as the supervisor would handle these items under present instructions which requires him to make certain that a yellow is attached to each outgoing piece of mail before it actually leaves the Bureau.

66-3286-
SDT RECORDED
27 JAN 24 1962

RECOMMENDATION:

That the suggestion to destroy routine Identification Division mail by the supervisors of the Mail Room and Teletype Unit as ~~proposed by~~ Files and Communications Division be approved.

~~CONFIDENTIAL~~

SUBJECT: PRODIP
(PROPOSED DESTRUCTION OF EXTRA COPIES OF SOVIET AND SATELLITE PERSONNEL LISTS)

INFORMATION IN THIS LETTER IS DECLASSIFIED IN PART PER (CIA) LETR DTD 3-3-81 SP8BTS/CAL 8-21-86

Destruction of Bureau Records 211847

Each month a list of Soviet and satellite personnel and dependents stationed in the U.S. as of the first of the month is forwarded by letter to the Office of Security, Department of State, CIA, ACSI, ONI, OSI and NSA. A copy of the yellow of the letter of transmittal and a copy of the personnel list is designated for Prodip. ~~Classified per appropriate agency letter dated 1-2-62~~

It is proposed that all such lists in the Prodip file, with the exception of the current list, be destroyed because (1) these lists are not indexed in Prodip; (2) the master lists of Soviet and satellite personnel are maintained in the SPIA and SATPIA files; (3) for ready reference purposes, the current list is the only one necessary in the Prodip file; and (4) this will effect a saving of space in the Special Mail Room.

ACTION:

If you approve, this memorandum should be routed to the Records Section so that the Soviet and satellite personnel lists which are enclosures to the Prodip yellows of the monthly letters to the Office of Security, Department of State, captioned "Soviet and Satellite Personnel in the U.S." may be destroyed, with the exception of the list for the current month. When a new list is routed to the Prodip file, the list for the preceding month should be destroyed.

Accountable Officer, NIH — Date

PROPERTY OFFICER'S CERTIFICATION

I hereby certify that the necessary adjustments and entries have been made on the inventory records of the Property Unit, Supply Management Branch, NIH.

_____ — _____
Head, Property Unit — Date

INSTRUCTIONS

Prepare this form in quadruplicate. Forward all copies through the administrative officer to the accountable officer, NIH. The second and third copies will be returned to the lender, the fourth copy to the borrower. On return of the property, the lender shall indicate its return on the third copy and return to the accountable officer. Loans between NIH areas do not require approval of the accountable officer, however, for record purposes, the original copy must be forwarded immediately to the accountable officer, and the third copy when property has been returned.

FROM : J. F. Malone

SUBJECT: DESTRUCTION OF MATERIAL IN BUREAU FILE 66-3657
SUGGESTION #441-62 SUBMITTED BY
MRS. [redacted]
FILES AND COMMUNICATIONS DIVISION

b6
b7C

Destruction of Bureau Property

SUGGESTION: That Bureau file 66-3657 (original FBI Law Enforcement Bulletin [LEB] file) be reviewed for de-indexing and destruction; that Bureau file 94-3-1 (current LEB file) be reviewed for de-indexing and destruction of mail more than 10 years old; that rough draft write-ups of LEB maintained in folders behind file 94-3-1 be destroyed

PRESENT PROCEDURE: All mail is retained in these files.

ADVANTAGES: Suggester hopes to save filing and index space and eliminate unnecessary searches and reviews.

OBSERVATIONS: Crime Records Division considered these proposals and agreed that file 66-3657 should be reviewed for de-indexing and destruction of unnecessary material. They recommended that any pertinent information disclosed on review should be consolidated with file 94-3-1.

66-3286-

NOT RECORDED
141 FEB 8 1962

Concerning destruction of mail more than 10 years old in 94-3-1, Crime Records felt this was too drastic and felt the time lapse should be raised to 15 years.

1 ENCLOSURE With regard to the last proposal, they stated that the term "rough draft write-ups" as applied to material maintained in folders behind file 94-3-1, is not quite appropriate since the material is actually documentary in nature. It consists of the original manuscript received from the contributor and contains notations, additions, deletions, corrections, and similar background data relating to the treatment of the article in preparing it for publication. It also contains administrative notations of the results of Bureau file checks, verification of data and names, etc. Destruction of this material would leave only the finished product as a record; therefore, they opposed destruction of this material earlier than 15 or 20 years.

~~ENCLOSURE~~ Training and Inspection Division feels that as much filing space and review time as possible should be saved consistent with the needs of the Division which has reference to this material. Therefore, it is recommended that the suggestion, as modified by Crime Records Division, should be adopted.

MEMORANDUM MALONE TO MOHR
RE: SUGGESTION #441-62

RECOMMENDATIONS:

1. That the suggestion modified as proposed by Crime Records Division, be adopted and the attached letter of appreciation be directed to the suggester. Receipt of the suggestion was acknowledged by prior letter.

2. That Crime Records Division undertake to review the material in Bufile 66-3657 and earmark the unnecessary material for destruction and de-indexing; pertinent material to be transferred to Bufile 94-3-1.

3. That Crime Records Division undertake the review of material in Bufile 94-3-1 which is at least 15 years old, to determine what material should be destroyed and de-indexed.

4. That Crime Records Division review those manuscripts maintained behind Bufile 94-3-1 which are at least 15 years old to determine what material should be destroyed and de-indexed.

January 10, 1962

RECOMMENDATION NUMBER 441-62 TO DE-INDEX AND DESTROY CERTAIN FILES ON FBI LAW ENFORCEMENT BULLETIN

Crime Records Division Comments:

We concur with the desire to eliminate unnecessary data and material to save file space and index space.

Point Number 1. We concur with the recommendation that Bufile 66-3657 be reviewed for de-indexing and destruction of unnecessary data. Pertinent information in serials to be consolidated with Bufile 94-3-1, current FBI Law Enforcement Bulletin file.

2. We feel destruction of mail more than 10 years old in file number 94-3-1 is somewhat too severe. A 15-year limit would be better and would provide a considerable portion of file space.

3. The description of material maintained in folders behind file 94-3-1 as "rough draft write-ups" is not quite appropriate. While these folders do contain the manuscripts of each article and introduction used in the Bulletins, one folder for each month, this material actually is documentary in nature. It consists of the original manuscript as received from the contributing police official. It contains notations, additions, deletions, corrections and similar background data relating to the treatment of the article in preparing it for publication. It also contains notations of the results of Bureau file checks, verification of data, names, etc., relating to each article. To destroy this background information would leave us without any record concerning the material published other than the final and finished product. Therefore, we cannot concur that this information should be destroyed. It might be that the older sections, some 15 or 20 years old, could be destroyed.

FROM : J. S. JOHNSON

SUBJECT: TREASURY BOND SCHEDULES, 1947 - 1953

Destruction of Bureau Property - GSA Row.

Copies of Treasury bond schedules for Bureau employees for the years 1947 - 1953 are contained in two cabinets in the Records Section. These schedules represent the only record in the Bureau of the bonds issued to Bureau employees and the serial numbers of such bonds. These schedules are used infrequently to determine the serial number of lost bonds upon request from Bureau employees; however, such serial numbers can be obtained through the Bureau of Public Debt in Chicago although this is a time-consuming procedure. Requests by our employees for the serial number of bonds issued for the years 1947 - 1953 have virtually ceased, there being only one such request during the past year. It is therefore believed that we should no longer maintain these bond schedules and they should be destroyed. There is no Government regulation requiring our maintenance of these schedules.

Subsequent to 1953, the Treasury Department has operated on a different system and serial numbers of bonds can be obtained with little difficulty from them. We, therefore, have not maintained a list of such numbers.

RECOMMENDATION:

It is recommended that the bond schedules for the years 1947 - 1953 be destroyed by incineration.

FROM : Division Streamlining Committee

SUBJECT: SUGGESTION NO. 482-62

Destruction of Bureau Records

b6
b7C

Domestic Intelligence Division comments have been requested concerning a suggestion submitted by [redacted] San Juan Office, that copies of serials as well as channelizing memoranda and/or similar material may be destroyed upon verification of death of subject.

SUGGESTION:

That instructions in the Manual of Rules and Regulations, Part II, Section 3-6A, which states "Copies of serials and all classification may be destroyed upon verification of death of subject" be enlarged to read "copies of serials as well as channelizing memoranda and/or similar material may be destroyed upon verification of death of subject."

ALL INFORMATION CONTAINED HEREIN IS UNCLASSIFIED DATE 8-10-82 BY SP4 EWW

CURRENT PRACTICE:

Duplicate serials are destroyed. All other serials are retained for 20 years.

COMMITTEE FINDINGS:

Suggestion appears to have some merit, however, the information contained in the channelizing memoranda to be destroyed according to this suggestion has potential value and since no time limit is imposed by this suggestion, indexing to the original of the memoranda will be required. The suggestion is also vague in using the term "similar material." The authorization for destruction must be spelled out in more specific terms than utilized in the suggestion as submitted. It is questionable whether the alleged savings and space would be sufficient to justify the time spent in removing the memoranda, preparing their filing index cards which would be retained until the file is destroyed at the expiration of 20 years. At the end of the 20 years, it would be difficult from a review of the files to be destroyed to determine what index cards should then be pulled from the general index. The result would be useless index cards remaining in cabinets.

REC-72 66-3286-923

FEB 14 1962

EX-101

RECOMMENDATION:

That this memorandum recording the views of the Domestic Intelligence Division be forwarded to the Suggestion Desk of the Training and Inspection Division for assistance.

TO : Mr. Mohr

DATE: 2/12/62

FROM : J. F. Malone

SUBJECT: DESTRUCTION OF BUREAU RECORDS - GENERAL
SUGGESTION #482-62 SUBMITTED BY
MISS [redacted] SAN JUAN OFFICE

b6
b7C

SUGGESTION: That provisions of the Manual of Rules and Regulations (MRR), which permit destruction of copies of serials in all classifications upon verification of death of the subject, be extended to cover channelizing memoranda and/or similar material.

CURRENT PRACTICE: MRR, Part II, Section 3, 6, a, on page 11c permits the destruction of copies of serials in all classifications on verification of death of subject. Channelizing memoranda are destroyed after being incorporated in a report. Files and records in the field may be destroyed after 20 years.

OBSERVATIONS: SAC Speakes of the San Juan Office favored adoption of the idea.

Files and Communications Division had no objection to the destruction of such material if the substantive Division thought it feasible.

The Domestic Intelligence Division commented that, while the idea has merit, the information contained in the channelizing memoranda to be destroyed has potential value. They felt no time limit is posed by the suggestion and indexing to the original of the memoranda would have to be done. They stated the suggestion was also vague regarding the term "similar material." They questioned whether any savings in time or space would be sufficient to justify the time spent in removing memoranda and performing the necessary indexing to the original until the file is destroyed after 20 years.

The Training and Inspection Division feels that while there is merit to the suggestion, it is difficult to envision whether savings in space would be substantial enough to warrant adoption of the idea. At the present time, channelizing memoranda are destroyed in security classifications after the information is incorporated in a report. This was permitted because they are quite voluminous and after being placed in a report would only furnish duplicate information. Channelizing memoranda are rare in almost

SUGGESTION: Destroy all but one copy of a serial when the case is RUC'd, in criminal type matters as is now done in security matters.

X Destruction of

O Destruction of Bureau Records
General

EXPEDITE 30 1

Current practice or rule (Include manual citation as well as facts)

To destroy extra copies of serials when the file is consolidated each six months.

Advantages of suggestion and annual savings (include basis for estimate)

Will give needed file space. Applies particularly to 91 matters when sometimes the office(s) receive two copies of a voluminous report to cover a minor lead such as MVB check. In the manner above outlined the destruction could be done on a day-to-day basis, i.e. after posting operations, and reduce the project work that comes up each half year.

Unable to estimate savings.

SUBJECT: DE-INDEXING OF BUREAU FILE 44-25 ENTITLED "KU KLUX KLAN"

Bureau file 44-25 entitled "Ku Klux Klan" consists of two sections containing 71 serials and one not-recorded section. This file relates to Ku Klux Klan activities during the 1920's and the last piece of mail placed in this file was recorded on March 5, 1924. This file contains considerably indexing and many of the names indexed have little or no identifying information. A number of the serials (example serial 44) relate to list of Federal employees whose names were being checked against Ku Klux Klan membership list. In view of the lack of identifying information relating to many of the names indexed and in view of the age of the material involved, this information appears to be of questionable value to the Bureau today and it is recommended that consideration be given to de-indexing this file.

RECOMMENDATION:

That this memorandum be referred to the Special Investigative Division and that consideration be given to de-indexing file 44-25 entitled Ku Klux Klan.

Destruction of Bureau Records - General 103299

CENSORSHIP - WATCH LIST

Description of Lists: 62-62736-5-47 (watch list)
48 (deletion list)
268 (deletion list and watch list)

The attached listings of names have been called to our attention by personnel engaged in Name Check work who advise that there is frequent reference to this material. In an effort to streamline procedures and eliminate unnecessary reference to this data it is proposed that these and similar lists be de-indexed through removal of the cards from the Bureau's indices.

It is requested that the appropriate substantive supervisor review the above listed file references to determine if any reason exists for retention of the indexing on these and similar lists. A notation advising of the decision reached may be placed on this memorandum. The memorandum should be returned to the Correlation Unit of the Records Branch, Room 6309 IB.

RECOMMENDATION:

For referral to appropriate substantive division.

DESTRUCTION OF BUREAU RECORDS - GENERAL
EMPLOYEE SUGGESTION #573-62

It has been suggested that auxiliary offices be permitted to destroy all extra copies of serials in criminal cases at the time the case is referred upon completion (RUC'd).

Your comments and recommendations are solicited concerning the advisability of adopting this procedure. Submit replies to reach the Bureau, attention, Training and Inspection Division, by March 9, 1962.

Dear Miss [redacted]

Reference is made to your suggestion concerning the disposition of material maintained in certain Bureau files. I am indeed pleased to advise you that your proposal has been adopted and the necessary steps are being taken to place it into effect.

I want to thank you for giving me the benefit of your observations on this matter.

Sincerely yours,

J. Edgar Hoover

SUBJECT: DESTRUCTION OF BUREAU PROPERTY
GENERAL SUGGESTION #546-62 SUBMITTED
BY MISS [redacted]
FILES AND COMMUNICATIONS DIVISION

ALL INFORMATION CONTAINED HEREIN IS UNCLASSIFIED DATE 8-10-82 BY SP4 EWT Cal

Suggestion: That files 94-1-1805 and 62-160 be reviewed for destruction of the "Protective Bulletins" which are filed therein. File 62-160 is on the Illinois Bankers Association, the last bulletin is dated November 1948 and they go back to 1921. File 94-1-1805 is on the Pennsylvania Bankers Association, the last bulletin is dated December 1943 and they go back to 1925.

Current Practice: These bulletins are not filed.

Advantages: If destruction of these bulletins is approved, the index cards could also be destroyed. A saving of searching time and space would be realized.

Observations: The Files and Communications Division advised these bulletins would appear to have no present value and their destruction would result in the removal of numerous unnecessary cards from the General Index. Authority for destruction of this type of material has been granted under the General Records Schedule and no further archival approval is required.

The General Investigative Division felt the suggestion should be adopted. They advised, if adopted, the work of their division would not be affected. The information in these bulletins is quite old and, if a Bureau subject is mentioned therein the Bureau case file would provide equal or better information. No instance can be recalled wherein search of Bureau indices developed references to these bulletins which was of value to any investigation.

The Training and Inspection Division feels this suggestion should be adopted to provide for clearing this material, which is of no further value, from our files.

Captain Pilger in

Memo to Mr. Mohr
Re: Destruction of Bureau Property
General Suggestion #546-62 Submitted
By Miss [redacted] b6 b7C
Files and Communications Division

RECOMMENDATIONS:

(1) That the suggestion be adopted and the attached letter of appreciation forwarded to the suggester. She was thanked by prior letter.

(2) On approval, the memorandum will serve as authority for the Files and Communications Division to take appropriate action.

VIEWS OF THE GENERAL INVESTIGATIVE DIVISION RE: SUGGESTION #546-62

COMMENTS OF GENERAL INVESTIGATIVE DIVISION 2/13/62 JPJM:imc

The suggestion, if carried out, would not affect the work of General Investigative Division. As pointed out, the last bulletin is dated in 1948 (Illinois) and the information is, therefore, quite old. If a Bureau subject is mentioned therein the Bureau case file would provide equal or better information.

No instance is recalled wherein search of Bureau indices developed references to those bulletins of value to any investigation.

The above has been cleared with Bank Robbery, Federal Reserve Act and Interstate Transportation of Stolen Property Desks.

TO : Mr. Mohr

DATE: 2/12/62

FROM : J. F. Malone

SUBJECT: DESTRUCTION OF BUREAU RECORDS - GENERAL
SUGGESTION #481-62 SUBMITTED BY
MISS [redacted] SAN JUAN OFFICE

b6
b7C

SUGGESTION: That the provisions of the Manual of Rules and Regulations (MRR) which permit an office of origin (OO) to destroy all copies of serials after a file has been closed ten years, be extended to permit an OO and auxiliary offices to destroy all copies of each serial in pending files which is over ten years old.

PRESENT PRACTICE: MRR, Part II, Section 3, D, 6b (2), page 11c provides that all copies of each serial in the 65, 100 and 105 Security classifications may be destroyed after the file has been closed ten years or upon verification of the death of the subject, provided the files have not already been consolidated at the discretion of the SAC.

ADVANTAGES: Savings to be realized in file space.

OBSERVATIONS: SAC Speaks of the San Juan Office recommended adoption of the suggestion for advantages stated. General and Special Investigative Divisions were not involved since the manual provisions deal with Security cases.

The Domestic Intelligence Division opposed adoption of the suggestion. They commented that the choice of words may not convey the intention of the suggestion. This change would allow even copies of recent serials to be destroyed. In order to avoid this, it is preferable to retain this requirement as at present. Further, pending files are of potential worth in their entirety no matter how old the serials may be.

The Files and Communications Division had no objection to adoption of the suggestion since it would undeniably save filing space. They felt the comments of Domestic Intelligence Division should be obtained.

REC- 53 66-3286-928

The Training and Inspection Division feels the idea has merit and should be adopted. It is difficult to reconcile with sound records management the keeping of additional serials in a file on the off-chance that they might be needed for dissemination purposes. Ample reproduction facilities in the form of Xerox machines, photostating and autostating equipment are available if needed. The Records Branch at the Seat of

INDEXED

MEMORANDUM MALONE TO MOHR
RE: SUGGESTION #481-62

Government now destroys all duplicates of serials in its files. It is noted that Archival authority is not needed for the destruction of serials. The possibility that copies of serials in the security classifications 65, 100 and 105, would be needed after ten years appears remote and limited primarily to changes of office of origin. In the latter instance of course, the new office of origin must be given a copy of all correspondence in the case which it has not already received. Instances of this nature would not appear so frequent as to justify clinging to copies of old serials in the pending cases in these classifications. It is noted that the suggestion refers only to serials which are 10 years old or more in these files and does not seek destruction of more recent ones.

The San Juan Office cited the instance of three copies of a ten year old, 50-page mimeographed report, where an inch of file space could be saved from the destruction of two of the three copies of the report alone.

Contact was made with the Washington Field Office (WFO) and the New York Office (NYO), both of which handle substantial volumes of cases in the three categories. Both offices were of the opinion that the suggestion was sound and would effect a desirable saving in filing space. A spot check of the files in WFO showed 10 volumes in one case, 2 1/2 volumes in another and 47 volumes in another which were pending and contained material 10 years old or more. The bulk of this old material was extra copies of reports so, at a conservative estimate space occupied by 30 volumes could be saved in these three cases alone. The New York Office advised that adoption of this procedure would save them ten filing cabinets of space.

It is realized that instances would arise when there would exist a good and sufficient reason to retain this material; therefore, it is felt that the destruction of these copies should be permissive rather than mandatory.

RECOMMENDATIONS:

1. That the suggestion be adopted.

2. On approval, that the suggester be commended.

See Addendum

ADDENDUM DOMESTIC INTELLIGENCE DIVISION TDR/mea 2-16-62

Numerous suggestions along similar lines have been considered unfavorable in the past.

It has been this Division's position that three copies of reports in security cases on individuals should be retained by the office of origin as a minimum of three copies of reports on individuals included in the Security Index will be necessary in the event of a national emergency in which such individuals will be apprehended. One copy of the report must be submitted to the local United States Attorney who will be requested to conduct hearings in these cases, one copy should be available for use of Agents who may attend hearings under the Emergency Detention Program and one copy should remain in the field office file in order that the file may be complete. In opposing the reduction in the number of such copies, an additional factor exists in that it may be necessary to reconstruct security files in the field should files at the Seat of Government be destroyed by enemy attack.

The question of reduction in the number of copies of reports in these security cases was considered by the Executives Conference in September, 1954. The Executives Conference by memorandum of September 17, 1954, agreed with this Division's position in this matter.

With respect to those individual security cases, the subjects of which are not included in the Security Index, I would like to point out that:

1. There is no way of knowing whether or not such a subject may be added to or redesignated for the Security Index.

2. Many of these individuals are included in the Reserve Index and will be subjects of investigation, interrogation and/or considered for apprehension under the Emergency Detention Program following apprehension of Security Index subjects. Therefore, this Division feels compelled to oppose destruction of extra copies of reports in these cases.

The above factors do not take into consideration the need for extra copies on changes of office of origin and need for

Memo Malone to Moore, 2/28/62, JKR:lpnb

Ltr to Commendation 2/1/62, mea/lpnb

ADDENDUM (continued)

extra copies for dissemination purposes, it being noted that numerous security reports are continually being disseminated to interested agencies in the Executive Branch and this dissemination is by no means limited to serials less than 10 years old.

In taking the above position, this Division has taken into consideration the increase in ability to reproduce reports and other documents in the field, however, under emergency conditions under which we must deliver to the United States Attorneys reports promptly in order that he may prepare for hearings which, under the Regulations of the Attorney General, must be held in each case within 45 days following apprehension, a great deal of confusion, difficulty and delay in reproducing reports would undoubtedly result. For the above reasons it is the opinion of this Division that reports in individual security cases should not be destroyed in accordance with the above suggestion, however, if the need for space is so compelling as to override the above reasons for retention of these reports, this Division will not further oppose the adoption of the suggestion.

W.C.S.

1/20
I think we have to come to this sooner or later. I recommend we adopt the suggestion

FROM : C. L. ROGERS

SUBJECT: ADMINISTRATIVE DIVISION MATERIAL STORED ON SEVENTH FLOOR IDENTIFICATION BUILDING

On February 7, 1962, I checked through our stored material and recommend the following for removal from the storage files and destruction at this time.

Division Three

OF Bureau Property

1. Public and Private Laws, 85th Congress: - We are now in the 87th Congress and we have the 86th Congress material also on hand. We do not need the 85th Congress material and it can be destroyed now.

2. Printed copies of Hearings for Fiscal Year 1960: - We have those on hand for 1961 and those for 1962 will soon be coming in. Accordingly, it is felt we should be able to dispose of those for 1960 now.

3. Civil Service Commission Bulletins and Department Circulars: - There is a group of these on hand dated in 1957 and 1958. We do not need them this far back and this group should be removed and destroyed now.

4. Civil Service Commission Transmittal Sheets: - These are on hand for 1958, 1959 and 1960. We should be able to dispose of those for 1958 and 1959 now.

5. Copies of Congressional Record: - Copies are on hand beginning in January, 1959. We have been keeping those for the past two years on hand. Accordingly, those dated in 1959 can be disposed of at this time.

6. Copies of Federal Register: - As with the Congressional Record, we have been keeping these for two years. Accordingly, those dated in 1959 can be destroyed now.

66-3286
NOT RECORDED
133 MAR 7 1962

7. Group of bulletins, circulars, and the like, as follows:

(a) - Department of Justice Orders and Memos for 1955 and 1956.

MAR 7 1962

ORIGINAL FILED IN 62-109060-1555-79

Memorandum to Mr. Callahan from C. L. Rogers
Re: Administrative Division Material

1 drawer (b) - Department of State Standardized Regulations for 1958 through 1960.

1 drawer (c) - Treasury Department Circulars for 1959 and 1960.

1 drawer (d) - United States Attorneys Bulletin, 1958 through 1960.

The above items consist of copies of the usual routine bulletins, circulars, and the like, distributed by the agency involved. At the time of receipt, copies were forwarded to the interested Divisions and officials. If we wanted anything along this line at this time we would go to the agency for it anyway so having the copies in our storage file is of no particular benefit. Accordingly, this group of items should be disposed of now.

RECOMMENDATION:

That items 1 through 7 described above be removed from storage and be destroyed now. Should you agree, arrangements will be made with the Files and Communications Division to have this done.

Destruction completed 2/14/62. 65

SUBJECT: SUGGESTION NO. 481-62
"Destruction of Bureau Records - General"

b6
b7C

Domestic Intelligence Division comments have been requested concerning a suggestion submitted by [redacted] San Juan Office, that office of origin and auxiliary offices may destroy all copies of each serial in pending files which is ten years old. Domestic Intelligence Division is not in favor of adopting this suggestion.

SUGGESTION:

That instructions in the Manual of Rules and Regulations, Part II, Section 3-6 (2), entitled "Destruction of Copies of Serials" which reads "...office of origin may destroy all copies of each serial after file has been closed for ten years..." be extended as follows "also, office of origin and auxiliary office may destroy all copies of each serial in pending files which is over ten years old."

CURRENT PRACTICE:

Current practice in pending files is to retain all copies of all serials.

COMMITTEE FINDINGS:

First, the choice of words in the suggestion may not convey the intention of the suggestion. This change would allow even copies of recent serials to be destroyed. In order to avoid such it is preferable to retain this requirement as it is presently set forth in Rules and Regulations. In addition, pending files are of potential worth in their entirety no matter how old the serials may be.

REC- 53 66-3286-929

RECOMMENDATION:

That this memorandum recording Domestic Intelligence Division not in favor of adopting the above suggestion be forwarded to Training and Inspection Division, Suggestion Desk.

SUBJECT: SUGGESTION 481-62

Destruction of Bureau Records - General

[redacted] has suggested that field offices be permitted to destroy extra copies of serials, which are over 10 years old, in pending files. Regulations now permit the destruction of extra copies of serials in closed files which are 10 years old.

b6
b7C

Files and Communications Division has no objection to the adoption of this suggestion. As pointed out by Miss [redacted] destruction of extra copies would provide additional filing space in the pending files.

In view of the nature of the suggestion, it is believed that the comments of the substantive divisions at the Seat of Government should be obtained. In addition, consideration should be given to securing the comments of Special Agents in Charge of some of the larger continental field divisions.

RECOMMENDATION:

For referral to the Training and Inspection Division.

SUBJECT: DESTRUCTION OF BUREAU RECORDS - GENERAL
SUGGESTION #481-62 SUBMITTED BY
MISS [redacted] SAN JUAN OFFICE

The purpose of this memorandum is to bring up to date the consideration and conclusions reached regarding the captioned suggestion.

ALL INFORMATION CONTAINED HEREIN IS UNCLASSIFIED DATE 5-13-81 BY 6383 VRT/ca

b6
b7C

SYNOPSIS

Miss [redacted] suggested that provisions of the Manual of Rules and Regulations (MRR) which permit an office of origin (OO) to destroy all copies of serials in the 65, 100 and 105 Security classification cases after the case has been closed ten years or upon verification of the death of the subject, be extended to permit an OO and auxiliary offices to destroy all extra copies of each serial which is over ten years old in pending files.

SAC Speakes of the San Juan Office and Files and Communications Division recommended adoption in the interests of saving filing space. Contact with the New York, and Washington Field Offices which also handle substantial volumes of cases in these classifications resulted in their recommendation that the idea be adopted. New York advised that such a procedure would save ten filing cabinets of space.

Domestic Intelligence Division opposed adoption of the suggestion on the basis that a minimum of three copies of reports in security cases on individuals are necessary in the event of a national emergency, one copy for the file, one for the local U. S. Attorney and one for the use of Agents in connection with the Emergency Detention Program. They pointed out that destruction of 10-year old material would necessitate reproduction of this material for the above purposes and also for additional dissemination.

You approved the recommendations of the Training and Inspection Division that the suggestion be adopted and the suggester commended. The Domestic Intelligence Division added an addendum reiterating their objections but advising that if the need for space was compelling enough to override their objections they would not oppose adoption. Mr. Belmont added his recommendation that the suggestion be adopted.

Accordingly, the Training and Inspection Division recommends that the procedure be placed into effect and that in implementing it, any destruction of the material involved should only be done on the responsibility of the case Agent or his supervisor.

Destruction of Bureau Property

In response to requests from the Mechanical Section, the General Investigative Division has reviewed the Dillinger case to determine if the three bullet-proof vests, which were obtained from members of the Dillinger gang should be retained at the Bureau as evidence in the Dillinger case. This property is no longer of any evidentuary value.

The retention of these vests has been discussed with the Laboratory and Crime Records Division, and they do not feel this property is of significant value for Laboratory examination or exhibit material in the future.

The three bullet-proof vests are old and deteriorating and have no value.

From a review of the Dillinger file, these vests are of no evidentuary value.

SUBJECT: INVESTIGATIVE REPORTS
SUGGESTION #497-62 SUBMITTED BY
SA EUGENE C. PETERSON, TAMPA OFFICE
Destruction of Bureau Records

Captioned employee proposed that the provisions of the Manual of Instructions, Volume III, Section 87D, g(7), page 78a, pertaining to the destruction of channelizing memoranda following submission of reports in security investigations, also apply in criminal cases. He made specific mention of cases in the 92 (Anti-Racketeering) and 162 (Interstate Gambling Activities) classifications.

The Special Investigative Division felt that comments and recommendations should be solicited from the New York, Newark, Philadelphia and Chicago Offices in view of the coverage existing in those offices under the Criminal Intelligence Program. Following receipt of their views, final decision will be made regarding the suggestion.

RECOMMENDATION:

That the attached letter be sent to the New York, Chicago, Newark and Philadelphia Offices.

INVESTIGATIVE REPORTS

It has been suggested that the provisions of the Manual of Instructions, Volume III, Section 87D, g(7), page 78a, regarding the destruction of channelizing memoranda following the submission of reports in security investigations, also apply in criminal cases. Specific mention was made of cases in the 92 (Anti-Racketeering) and 162 (Interstate Gambling Activities) classifications.

Your comments and recommendations are requested regarding the proposed procedure. Submit replies to reach the Bureau, attention, Training and Inspection Division, by February 16, 1962.

FROM : L. E. SHORT

SUBJECT: MILWAUKEE, WISCONSIN, POLICE DEPARTMENT
NATIONAL STOLEN PROPERTY INDEX CHECKS
Bureau File 87-290-51-2

O Destruction of Bureau Property - Gen

Reference is made to letter to Milwaukee Field Office dated 12-16-61 wherein it was requested that the Milwaukee Office contact the Milwaukee Police Department and suggest that a change be made in the form submitted by that department for checks of the National Stolen Property Index (NSPI) of guns coming to the attention of the department. Currently, as a result of this action, the form that is being received from the Milwaukee Police Department does not contain the phrase "please add to your records." Therefore, since by prior agreement the Milwaukee Police Department assumes the check of the NSPI to be negative after receiving no answer for three weeks, no reason exists for the filing of these form letters after a search of the NSPI with negative results. The Records Branch has revised its procedure for handling such requests from this department to provide for the destruction of "negative" form letters on recovered guns. However, those form letters reporting stolen guns will be indexed and filed as has been the procedure in the past. Also, when a search of the NSPI develops some possible identifications requiring correspondence with the Milwaukee Police Department, these forms are also indexed and filed.

The Bureau file relating to searches of the NSPI for the Milwaukee Police Department currently consists of 69 sections requiring in excess of three drawers of filing space. The vast bulk of this file is made up of form letters which generated negative results in a search through the NSPI. In view of the revised procedure for handling current correspondence with the Milwaukee Police Department, no reason exists for retention of this material in file and it should be destroyed in order to conserve space and facilitate subsequent reviews of the file.

RECOMMENDATION:

166-3286-
NOT RECORDED
199 MAR 12 1962

It is recommended that Bureau File 87-290-51-2 be purged of form letters from the Milwaukee Police Department on which searches of recovered guns developed no information.

CONTACTS WITH LAW ENFORCEMENT OFFICIALS
66-3579

File 66-3579 has been called to our attention by Records Branch personnel who advise that there is frequent reference to this material. In an effort to streamline procedures and eliminate unnecessary reference to this data, it is suggested that the names of law enforcement officials where no derogatory information or lack of cooperation is indicated be de-indexed through removal of the cards from the Bureau's indices.

It is requested that the appropriate substantive supervisor review 66-3579 to determine if it may be de-indexed as suggested above. A notation advising of the decision reached may be placed on this memorandum. The memorandum should be returned to the Correlation Unit of the Records Branch, Room 6309 IB.

RECOMMENDATION:

For referral to appropriate substantive division.

RE: BRAZIL - JAPANESE RESIDENTS

Instant memorandum refers to various serials in 64-3008-B which disclose the names of Japanese residents in Brazil during WW II. The lists of names, several of which were obtained through confidential sources, are devoid completely of identifying data or at most have insufficient to effect identification.

Records Division proposes that the material be deindexed through removal of the cards from Bureau indices.

ACTION:

That Records Division proposal be carried out as lists in view of lack of identifying data are of no material help.

ADDENDUM HWL:slj slj 3/21/62

Re: MEXICO - FOREIGN RESIDENTS

List is comprised for the most part of Italians who resided in Ciudad Mante, Tamaulipas, Mexico, as of July, 1942. The list was obtained by SIS Number Nine, Mexico City, from "a confidential, reliable source" who was not further identified and contains no allegations of subversive activities against any of the persons listed.

The Records Section desires to de-index the names. Since the list is 20 years old and contains no derogatory information, there appears no need to retain the cards in the index.

ACTION:

It is recommended that the names contained in the serial be de-indexed.

Memorandum

TO : Director, FBI
Att.: Training and Inspection Div. DATE: 3/8/62

FROM : SAC, Norfolk (66-788)

SUBJECT: DESTRUCTION OF BUREAU RECORDS - GENERAL EMPLOYEE SUGGESTION #573-62

ReBulet 3/2/62, which outlined the suggestion that auxiliary offices be permitted to destroy all extra copies of serials in criminal cases at the time the case is RUC'd, and which requested my comments and recommendations.

A study of this suggestion revealed that destruction of extra copies of serials at the time the case is RUC'd would not materially benefit Norfolk Office operations. In accordance with instructions set forth in Manual of Rules and Regulations, Part II, Section 3, page 11b, criminal files are currently consolidated each six months, at which time extra copies of serials are destroyed. Therefore, any space that might be saved by destroying serials at the time the case is RUC'd would conserve that space for only a six-month period. It is not felt that the adoption of this suggestion, balanced off against the fact that it would require the handling of these files on two separate occasions, is warranted, since under the present procedure, both the consolidation and the destruction of serials are accomplished in one handling.

This office has found that quite often it is necessary to reopen files that have been RUC'd. This is particularly true with deserter matters, which the Norfolk Office handles in large volume. A majority of such reopenings occur within a period of six months after the case is RUC'd. Adoption of the suggestion would require that extra copies of serials be destroyed when the case is RUC'd and therefore file would be stripped in order to route serials to the investigating Agent when the case is reopened.

After a thorough discussion of this suggestion with the Chief Clerk, I feel that the present procedure for consolidating and stripping files after a six-month period better fulfills Norfolk needs than the suggestion.

I therefore recommend that the current procedures remain in effect.

5 MAR 12 1962

OPTIONAL FORM NO. 10
5010-104

UNITED STATES GOVERNMENT

Memorandum

TO : Director, FBI DATE: 3/6/62
Attention: Training & Inspection Division

FROM : SAC, Charlotte

SUBJECT: DESTRUCTION OF BUREAU RECORDS - GENERAL
EMPLOYEE SUGGESTION #573-62

EXP. PROC. MAR 9 1962

ReBulet 3/2/62.

It is not believed that this suggestion would be of any advantage to the operation of the Chief Clerk's Office in view of the present rule of stripping files when closed or RUC'd for six months and is usually done at the same time the files are consolidated.

There are disadvantages to the suggestion offered in that at the time these serials are destroyed the clerks would have to take time from moving mail and files, which in effect would decrease efficiency on a day to day basis. It would still be necessary to destroy duplicate or extra copies of cases in which the office is office of origin at the time the cases are consolidated at the six month period. This would necessitate the checking of auxiliary office files to determine if they are origin files and would require extra handling of these files. Finally, RUC cases are frequently reopened and when the copies are not retained for a period of 6 months this would increase the amount of autostating necessary and describing serials on charge out slips.

It is the opinion of this office that this suggestion should not be approved.

SUBJECT: DESTRUCTION OF RECORDS
FBI REPORTS
BUREAU OF EMPLOYMENT SECURITY
U. S. DEPARTMENT OF LABOR

Mr. [redacted] Office of Investigations and Security, Department of Labor, advised Liaison on March 9, 1962, that the Bureau of Employment Security had several cabinets full of FBI reports which had served their purpose and they wanted to know how they could dispose of them or if the Bureau wanted them returned. It was ascertained that all of these investigations carry the character "Fraud Against the Government" and were referred to the Labor Department inasmuch as they involved possible misuse of unemployment insurance benefits.

b6
b7C

After checking with the Records and Communications Division, Mr. [redacted] was advised that the Bureau had no objection to the destruction of these reports under existing Federal regulations. It was pointed out that if any of the reports should be classified it will be necessary to refer to appropriate Executive Orders for instructions as to the records that must be kept covering destruction of classified material.

Mr. [redacted] stated that he was familiar with these orders and would see that the destruction was appropriately administered.

ACTION:

For information.

FROM : SAC, PITTSBURGH (66-1360) ATTENTION: TRAINING & INSPECTION DIVISION

SUBJECT: DESTRUCTION OF BUREAU RECORDS - GENERAL
EMPLOYEE SUGGESTION #573-62

ReBulet to New York, 3-2-62.

Consensus of supervisory and clerical personnel, Pittsburgh, is that adoption of captioned suggestion would result in the saving immediately of a small amount of space but would cause a double review project in order to purge the files both immediately, upon RUCing a report, and six months thereafter. This would be necessary because in some cases, particularly fugitive matters, it would be necessary to retain at least two copies of the RUC report unless the fugitive had been apprehended. Experience has been that fugitive cases are reopened repeatedly in auxiliary offices, at which time extra copies are necessary and must be duplicated in the event there are leads in two or more resident agencies. This would be more costly than the small saving of space by immediate destruction. The saving in time, if any, would be negligible.

RECOMMENDATION: Suggestion not be adopted.

SUBJECT: DESTRUCTION OF RECORDS
RE: FILE ENTITLED
"INTERDEPARTMENTAL CHARGES
INCURRED IN CONNECTION WITH
INVESTIGATIONS"
BUFILE 62-156

Bureau file 62-156 entitled "Interdepartmental Charges Incurred in Connection With Investigations" consists of 13 sections, 1,260 serials, and the first piece of mail placed in this file is dated in 1927. The contents of this file consist of administrative data relating to expenses of Bureau personnel in connection with investigations performed in behalf of other Departments in the Government.

This data appears to be of no value to the Bureau today and there would appear to be no necessity to retain it. It is requested that the Administrative Division review this file to determine if any reason exists why the material cannot be destroyed. A notation advising of the decision reached may be placed on this memorandum, which should be returned to the Correlation Unit, Records Branch, Room 6309 IB.

In the event destruction is authorized, archival authority is not necessary for the destruction of administrative data of this type.

RECOMMENDATION:

That this memorandum be referred to the Administrative Division to determine if the material referred to above may be destroyed. The first and last sections of the file are attached.

FROM : J. F. Malone

SUBJECT: DESTRUCTION OF BUREAU RECORDS - GENERAL
SUGGESTION #573-62 SUBMITTED BY
MR. [redacted] ALBANY OFFICE

b6
b7C

SUGGESTION: That all copies except one of a serial be destroyed, when a case is referred upon completion (RUC'd), in criminal-type matters as is now done in security matters.

PRESENT PROCEDURE: Extra copies of these serials are destroyed when the file is consolidated each six months.

ADVANTAGES: Adoption of this procedure would give additional needed filing space.

OBSERVATIONS: The Special Investigative Division and New York Office both recommended the suggestion be adopted. New York recommended, however, that this procedure not be mandatory in that each office be permitted to make a selective determination based on the judgment of the supervisor in the case involved.

The General Investigative Division, Charlotte, Norfolk, and Pittsburgh Offices, all recommended the suggestion not be adopted. The consensus of opinion was that this procedure would not materially benefit their operations. While a small amount of space would be saved immediately by the adoption of this procedure, it would cause a double review project in order to purge the files upon RUCing a case and again six months thereafter. Quite often it is necessary to reopen fugitive cases that have been RUC'd and a majority of such reopenings occur within a period of six months after the case is RUC'd; and therefore, either the file would be stripped or additional time would be used in duplicating copies in order to route serials to the investigating Agent.

The Training and Inspection Division agrees the suggestion should not be adopted. The small amount of filing space which would be saved would be more than offset by the handling of these files on two separate occasions since at the present time both the consolidation and the destruction of serials are accomplished in one handling, and by the preparation of additional copies of serials in the event a case is reopened.

Memo to Mr. Mohr
Re: DESTRUCTION OF BUREAU RECORDS

RECOMMENDATION:

That the suggestion not be adopted. On approval, no further action is necessary since the suggester was thanked by previous letter.

SUGGESTION NUMBER 573-62

SUGGESTION

[redacted] Clerk, Albany Office, recommends that in criminal cases, auxiliary offices destroy all but one copy of serials at the time that the case is RUC'd. This is now being done in security cases. In criminal cases at the present time, extra copies of serials are being destroyed when the file is consolidated each six months. Purpose of suggestion is to provide additional file space. Mr. [redacted] indicates suggestion applies particularly to bank robbery cases when an auxiliary office receives two copies of a voluminous report containing a minor lead for that office.

b6
b7C

COMMENTS AND RECOMMENDATION OF THE GENERAL INVESTIGATIVE DIVISION

Purpose of furnishing auxiliary offices with two copies of reports and other serials containing leads is to provide a copy for file and a copy for the Agent who will cover the leads. Where more than one location (Resident Agencies) is involved, additional copies are furnished in order to provide copies for the Agents covering leads in the different locations. If extra copies are destroyed by an auxiliary office at the time leads covered and case RUC'd, and thereafter additional leads were received by that office in the same case, difficulty would be encountered because sufficient copies of the serials containing the original leads and background data would not be available for distribution to the Agents handling these additional leads. In criminal cases additional leads in multiple locations are received frequently by auxiliary offices. Accordingly, it is believed that, in anticipation of receiving such additional leads in multiple locations, auxiliary offices should retain extra copies of serials in criminal cases for a reasonable length of time (six months under current procedures).

With respect to the statement of Mr. [redacted] in his suggestion to the effect that an auxiliary office sometimes receives copies of voluminous bank robbery reports containing a minor lead for that office, SAC letter 61-32 dated 6-13-61 instructs all offices to exercise good judgment in dissemination of voluminous bank robbery reports to other offices and to send reports to auxiliary offices only in those cases where absolutely necessary to enable the auxiliary office to conduct the requested investigation. Compliance with these instructions would avoid the situation mentioned by Mr. [redacted]

b6
b7C

General Investigation Division recommends against the adoption of captioned suggestion.

SUGGESTION #497-62 SUBMITTED BY
SA EUGENE C. PETERSON, TAMPA OFFICE

SUGGESTION: That destruction of Bureau Property - Gen'l channelizing memoranda be permitted in criminal cases under the same provisions it is now permitted in security cases. This would apply particularly to cases in the 92 (anti-Racketeering) and 162 (Interstate Gambling Activities) classifications.

PRESENT PROCEDURE: Manual of Instructions, Volume III, Section 87D, item g, on page 78a, in substance permits the destruction of channelizing memoranda in individual and organizational security cases following submission of a report including the information.

ADVANTAGES: Would streamline case files and save filing space.

OBSERVATIONS: SAC Santoiana, Tampa Office, felt that the procedure would be most practical and workable if applied to the criminal field and recommended adoption.

The views of the New York, Chicago, Newark and Philadelphia Offices were solicited concerning the merits of the suggestion. The Chicago Office advised that a review of their anti-racketeering and interstate gambling activities files did not disclose the volume of channelizing memoranda normally found in a security-type investigation and they did not feel the suggestion would have sufficient benefit to warrant adoption. The Philadelphia, New York and Newark Offices had no objection to adoption of the suggestion since destruction of these memoranda would not be mandatory.

The General Investigative Division advised that as far as the administrative handling of information furnished by informants is concerned, racial informants, which are the only type the Division handles, are administered in the same manner as security-type investigations. The suggested manner of handling channelizing memoranda also applies to this type of work. They could see no objection to its application in other criminal cases, too.

MEMORANDUM MALONE TO MOHR
RE: SUGGESTION #497-62

The Training and Inspection Division feels that the idea should be adopted. The provisions of the Manual of Instructions, as they apply to security cases, were inserted to permit field offices, especially where space was at a premium, to dispose of unnecessary copies of memoranda after the pertinent data is included in reports. The provisions are permissive and do not require, nor would it be prudent to do so, arbitrary destruction of such memoranda. The ever-expanding field of criminal investigations especially in the field of anti-racketeering and interstate gambling activities makes it evident that the paper work will soon become quite voluminous. In the interests of avoiding this situation and also to establish uniformity in the policy concerning the destruction of channelizing memoranda, it is felt that it is most logical and desirable to adopt the suggestion. This decision was reached after discussion with the Special Investigative Division which is in agreement with these views.

RECOMMENDATIONS:

1. That the suggestion be adopted and the attached letter of appreciation directed to Mr. Peterson. Receipt of his suggestion was acknowledged by prior letter.

2. On approval, that this memorandum serve as the authority for the Manuals Desk, Training and Inspection Division, to make the necessary Manual changes.

SUBJECT: SUGGESTION REGARDING DESTRUCTION OF FILE MATERIAL
#166-62
BUREAU PROPERTY

94-1-137-1-46

b6
b7C

Mrs. [redacted] Supervisor of the Consolidation Unit, has suggested that Bureau file 94-1-137 be reviewed for de-indexing and destruction. This file, consisting of thirteen volumes, concerns the Director's remarks before the New York Herald Tribune Forum in 1936 and in 1939. It consists largely of requests for copies of these remarks, titled "The Influence of Crime on the American Home," delivered in 1936, and "Law Enforcement in a Crisis," delivered in 1939. Both of these speeches have been out of print for many years and the most recent mail in file is dated April, 1943. Requests for similar material are now destroyed after a reply has been prepared and they do not come to file.

Destruction of the mail in this file would result in a savings of file room space and would also eliminate unnecessary cards from the general index. Authority for destruction is contained in the general records schedule and no further archival approval is required.

The Records Branch feels that this suggestion has considerable merit, that the mail contained in this file has no present value, and that its destruction would result in a savings. The comments of the Crime Records Division should be secured.

RECOMMENDATIONS:

(1) For referral to the Training and Inspection Division.

ADDENDUM OF TRAINING AND INSPECTION DIVISION, ML:mvd, 4/5/62

The Training and Inspection Division agrees with the Files and Communications Division that this is a worthwhile proposal. Due to the suggester receiving an oral acknowledgment, the suggestion is being listed for statistical purposes and forwarded to the Crime Records Division for appropriate action.

RECOMMENDATION:

That the Crime Records Division review file 94-1-137 to ascertain if this material can be destroyed and de-indexed.

ADDENDUM: (ELC:tmf 4-9-62)

Crime Records Division has reviewed the memorandum and the file in question and can see no need to retain this material. It is felt that this material can be destroyed and de-indexed.

SUBJECT: CORRESPONDENCE

For your information the forms presently in use in connection with investigations conducted under Executive Order 10450 (Federal Employee Security Program) and Executive Order 10422 (United Nations Loyalty Program) have been reviewed and necessary revisions made.

Form 9-29, the subject of a memorandum dated 3-28-62, was recommended for destruction as it is no longer used. Changes in forms 9-28 and 9-37 (subjects of memoranda dated 3-28-62) were recommended and approved.

Form letters 9-2, 9-7, 9-19, 9-21, 9-36, 9-37, 9-39 and 9-46 are used to route reports and other information to the Civil Service Commission and to the Internal Security Division of the Department of Justice. Form 9-45 is a follow-up letter to agencies conducting foreign investigations in these cases.

Form letters 9-2, 9-7, 9-19, 9-21, 9-36, 9-37, 9-39, 9-45 and 9-46 are approved and sent directly to the mail room. This procedure has been discussed with representatives of the Files and Communications Division, who are in agreement with this procedure. In this regard Section 16 (21) (b) of the Manual for Bureau Supervisors reveals that form letters to organizations outside the Bureau may be approved for routing to the mail room in the office of the Section Chief.

Of course, if the information involved is of unusal interest the form letters are sent to the office of the Assistant Director.

SUBJECT: BUDGET UNIT MATERIAL STORED ON SEVENTH FLOOR IDENTIFICATION BUILDING

Destruction of Bureaus Property - General Bitby

During the period from about February 12, 1962, through April 10, 1962, Miss [redacted] of this unit has reviewed our budget material in captioned space for the fiscal years 1936 through 1945. This material was checked against the corresponding fiscal year appropriation files, duplicates destroyed, unnecessary material removed, folders listed and numbered with consecutive numbers for each fiscal year, and the remaining material returned to the Records Branch. Prior to this action this material occupied 47 file drawers. This has been reduced to 17, a reduction of 30 drawers or 63.8 per cent. This action leaves only the material for fiscal years 1932 through 1935 consisting of three file drawers to be treated in this manner when time permits.

POSTAL CENSORSHIP Destruction of Bureau Property - General

Description of Lists: 62-62736-sub 2. Lists of individuals to whom the programs of short wave broadcasts from Tokyo were sent. (Serials 2003, 2004, 2711, 7334) Lists of intermediaries for correspondence with enemy territory. (Serials 7339, 7342) List of members of the Red Cross Society of Japan. (Serial 3186)

The attached listings of names have been called to our attention by personnel engaged in Name Check work who advise that there is frequent reference to this material. In an effort to streamline procedures and eliminate unnecessary reference to this data it is proposed that the material be de-indexed through removal of the cards from the Bureau's indices.

It is requested that the appropriate substantive supervisor review the above listed file references to determine if any reason exists for retention of the indexing on these listings of names. A notation advising of the decision reached may be placed on this memorandum. The memorandum should be returned to the Correlation Unit of the Records Branch, Room 6309 IB.

RECOMMENDATION:

For referral to appropriate substantive division.

Date: 4/17/62

To: Director, FBI

From: (Suggester's name)

Division of Assignment: SAVANNAH

SUGGESTION

In connection with records management systems, it is suggested that the Bureau consider authorizing the destruction of 00 files after they are 10 years old. All instructions and policies that old would be in the Manuals by that time and this would save space. It is also suggested that all zero files be destroyed when 10 years old since only non-specific material is filed therein. 88-0 is a good example of needed destruction as this file grows and after 10 years material therein would rarely be used.

°Destruction of Bureau Property.

Current practice or rule (Include manual citation as well as facts)

00 files are not destroyed at all. Zero files are either destroyed by the 20 year rule, or certain classifications such as 25 by the 10 year rule. MRR, Part II, Section 3, page 13.

Advantages of suggestion and annual savings (include basis for estimate)

There would be a minimum of 8 cubic feet of file space in each field division made available as a result of the destruction of 00 files alone. The zero files would save considerably more. I have no way of estimating the annual savings.

SUBJECT: SUGGESTION OF
CHIEF CLERK [redacted]
SAVANNAH DIVISION

ALL INFORMATION CONTAINED HEREIN IS UNCLASSIFIED DATE 8-10-82 BY SP4 ELW/ Cal

This is to furnish the views of the General Investigative Division concerning the suggestion of Chief Clerk [redacted] b6 b7C

[redacted] suggested that the Bureau consider authorizing the destruction of 00 files and 0 files after they are ten years old. The advantage of the destruction of these files is the considerable saving of filing space.

This division feels that this suggestion has merit; however, it is believed that the files should be purged rather than destroyed in total. The material that is obviously of no further assistance to the field division could be destroyed after it is ten years old. The material that may be of some further assistance to the field division should be retained. This would result in a considerable saving of filing space in the various field offices.

With regard to these files at the seat of Government, it is believed that they should definitely be retained and not destroyed. The material in the 00 files provides the background on Bureau policy and procedures which is frequently needed even though periods in excess of ten years have elapsed. Likewise, the material in 0 files which is ten years old is necessary in connection with name checks and other purposes.

b6
b7C

SUBJECT: DESTRUCTION OF BUREAU PROPERTY
SUGGESTION #824-62 SUBMITTED BY
MR. [redacted] SAVANNAH OFFICE

SUGGESTION: That zero and double zero files be destroyed after 10 years.

ADVANTAGES: Suggester feels there would be a savings of file space.

OBSERVATIONS: SAC Jamieson, Savannah, considered this an excellent suggestion. He noted it would result in considerable savings of space. Also, since all pertinent information contained in the files should be in appropriate manuals there would be no loss of necessary information.

The Domestic Intelligence Division and the Special Investigative Division do not recommend destruction of these files. Regarding double zero files, both pointed out that necessary and pertinent background data on which manual changes and certain policy are based would be lost with the destruction of these files. They felt the limited space saved does not warrant the lost motion and waste involved in destroying information of possible value at a later date.

Regarding zero files, both divisions advised that even though non-specific information is retained in this file it has continued value for an indefinite period and should not be destroyed prior to time currently allowed. They pointed out that background data filed therein could become important at a later date if individual becomes a fugitive or involved in a security-matter investigation.

The General Investigative Division has recommended that zero and double zero files in the field offices be purged rather than destroyed. That these files at SOG be retained and not destroyed.

The Files and Communications Division and the Training and Inspection Division both recommend against adopting this suggestion. Memorandum J. J. McGuire to Mr. Mohr, 1/19/60 reflects observations of appropriate divisions at SOG and certain field offices were obtained relative to destruction of zero and double zero files. It was recommended and approved at this time that no change be made in the retention of these files. This survey disclosed a decided difference of opinion among the field offices, as to particular classifications that should be destroyed or retained.

b6
b7C

Suggestion #824-62
Submitted by [redacted]
Savannah Division

ADDENDUM HET:swb 4/26/62

Suggestion would authorize destruction of 00 files and 0 files when ten years old.

Special Investigative Division does not favor suggestion. 00 files which are authorized to contain instructions and policy will in reality contain information in addition to that incorporated in Manuals. For example, in implementing certain instructions received from Bureau in form of SAC Letter, field might well compile local data which would be recorded in 00 files. An example would be research within a field division territory as to list of reservations falling within CGR category. Another example might be the research of local statutes having a bearing upon a Federal statute, such as certain state crimes with certain UFAP matters or certain statutes with reference to Interstate Transportation of Stolen Fireworks. 00 files are compact and are maintained in the field in consolidated form. It is questionable whether the space saved in cutting the destruction time from 20 years to 10 years would be significant in view of lost motion and waste involved in destroying information of possible value obtainable only through reinvestigation.

With respect to 0 files, although such contain nonspecific data as far as a Federal violation is concerned, in many instances information received in the field is pertinent background data which will be of value in the event we should be seeking the person on a later occasion as a Bureau fugitive. The information being of a nonspecific nature is not available in the central Burau files under the Records Management System and could not be reconstructed from central microfilm records. In view of the possible value of such data in connection with fugitive inquiries, it appears that the destruction rule should be retained at 20 years except for the special rules now in effect on certain classifications (ten years for 25 classification and five years for Unsub matters in certain volume categories).

Memo Malone/Rakes, 5/10/62, DAB/jmd

ADDENDUM: DOMESTIC INTELLIGENCE DIVISION, JVB; bmt:cad 5/2/62

SUGGESTION NUMBER 824-62

The destruction of double zero files after 10 years old is not recommended. The suggestion claims that all instructions and policies that old would be in the manuals after 10 years. Only the current instructions would be in the manuals if this suggestion is adopted and the history behind the manual changes would be lost. Since the SAC letters filed in the double zero files contain this material, the history or old instructions even after 10 years old are of considerable value. The limited amount of space that would be saved does not warrant adoption of this suggestion in view of the above.

Suggestion is made that all zero files be destroyed when 10 years old since only nonspecific material is filed therein. Adoption of this suggestion is not recommended for security zero files since the nonspecific information contained therein has value at all times. True, the zero files contain nonspecific information since this is the primary purpose of the zero file, however, this nonspecific material does not lose its value in security work. Such material is often of considerable value and importance after many years have passed. When allegations are received and indices searched any information contained in the zero files is carefully evaluated. Particles of information may come from several sources over a period of years and while each particle of information may have no particular significance by itself several of these tied together can often give rise to a security investigation. If zero files are destroyed as suggested much worthwhile and important data will be lost.

ZERO FILES

[redacted] has suggested destruction of the zero and double zero files after ten years old. This matter has been considered previously by the Bureau. On 11-19-59, in memorandum H. L. Edwards to Mr. Tamm, it was indicated that the observations of the appropriate divisions at the Seat of Government were obtained relative to destruction of zero and double zero files. As a result of that survey, it was recommended and approved that no change be made in the retention of these files. It appears that the previous objections to destruction of this material are still valid and accordingly no change appears necessary.

RECOMMENDATION:

For referral to the Training and Inspection Division.

NOTE: Suggestion #824-62 referred to the Files and Communications, Domestic Intelligence, General Investigative, and Special Investigative Divisions for views and recommendations.

SEE PAGE 2

ORIGINAL FILED IN 166-2-1-610

Suggestion #825-62 referred to the Domestic Intelligence, General Investigative and Special Investigative Divisions for views and recommendations.

Suggestion #826-62 referred to the Domestic Intelligence, General Investigative, Special Investigative and Training and Inspection Divisions for views and recommendations.

Suggestion #827-62 suggests that Form FD-302, Form for Reporting Information That May Become Testimony, be prepared with preinserted carbon paper.

This idea has been considered approximately thirteen times during the past two years and not adopted. The principal reason for this being the additional cost involved in having preinserted carbon paper in forms. The use of regular carbon produces better results when a number of copies are prepared and has added advantage in that it can be used on an average of ten times whereas the preinserted carbon is used only once. The same disadvantages still apply; therefore, this suggestion is not being adopted.

Dear Miss [redacted]

I have received your suggestion that in certain instances the requirement be rescinded that a list be maintained at the beginning of each classification to show the disposition of files. Your idea has been carefully considered and it was decided it should not be adopted. In the interest of conserving space, it is preferable to maintain a list of files.

The interest and alertness which prompted you to submit your proposal are indeed appreciated.

Sincerely yours,

J. Edgar Hoover

SEE PAGE 2

The Training and Inspection Division recommends this suggestion not be adopted. At the present time, regulations provide for the destruction of files in field divisions after they become twenty years old; however, a list is kept at the beginning of each classification of files destroyed and date destroyed. In some instances such as in the 25 classification, certain files may be destroyed when 10 years old and the reason for destruction is placed on the file front of the consolidated volume beneath the file numbers, e. g.,

25-11210 - 25-11250
All files destroyed with the
exception of the enclosed per
MRR.

This is the procedure the suggester proposes be used when files are destroyed after 20 years of age. It should be noted that usually an entire file is not destroyed due to the 20-year rule. There are ~~usually~~ certain portions of an important nature or cases having many ramifications which must be retained. In cases such as these, information could be placed on the file fronts as suggested. However, when the complete file has been destroyed it would be necessary to file the file front with the files listed thereon, if this suggestion were adopted. Maintaining a list at the beginning of the classification is preferred to filing these file fronts which take up unnecessary space.

GRAF SPEE
65-16112
O Destruction of Bureau Property - General

Description of Lists:

Serial 25.	Names, photographs, and information on 21 members of Graf Spee personnel who had escaped, as of Oct. 1940.
Serial 26.	Names and photographs of 29 officers and 39 petty officers and men of the Graf Spee who were reported to have escaped from internment in Argentina as of Oct. 1940.
Serial 73.	Graf Spee personnel transferred from Martin Garcia Island to Sierra de la Ventana, and those still interned on Martin Garcia Island as of Jan. 1944.
Serial 87.	Graf Spee personnel in Argentina, showing situation as of April, '44.
Serial 109.	Graf Spee personnel, showing location as of August 1945.
Serial 117.	Graf Spee personnel married in Argentina, and personnel who had escaped from Argentina, as of December, 1945.

The attached listings of names have been called to our attention by personnel engaged in Name Check work who advise that there is frequent reference to this material. In an effort to streamline procedures and eliminate unnecessary reference to this data it is suggested that the material be deindexed through removal of the cards from the Bureau's indices. It should be noted that many of the Graf Spee personnel were repatriated to Germany.

It is requested that the appropriate substantive supervisor review the above listed file references to determine if any reason exists for retention of the indexing on these references. A notation advising of the decision reached may be placed on this memorandum. The memorandum should be returned to the Correlation Unit of the Records Branch, Room 6309 IB.

Destruction of Bureau Property Item

FOREIGN BORN MEMBERS OF ARMED FORCES
100-63960

Description of Material:

Serial 5. Personnel information sheets with data on 17 employees of Naval Torpedo Station, Alexandria, Va. whose personnel statements disclosed a connection by birth or ancestry with countries indicated.

Serial 17. List of names submitted by Immigration and Naturalization Service of 150 noncitizens serving in the armed forces who desired to become naturalized.

The above described material has been called to our attention by Records Branch personnel who advise that there is frequent reference to this data. In an effort to streamline procedures and eliminate unnecessary reference to this material it is suggested that it be deindexed through removal of the cards from the Bureau's indices.

In connection with serial 17, it should be noted that these names were checked and copies of Immigration forms were retained where derogatory information was revealed in Bureau files. These copies were indexed and are filed with serial 16.

It is requested that the appropriate substantive supervisor review the above described file references to determine if any reason exists for retention of the indexing on this material. A notation advising of the decision reached may be placed on this memorandum. The memorandum should be returned to the Correlation Unit of the Records Branch, Room 6309 IB.

RECOMMENDATION:

For referral to appropriate substantive division.

SUBJECT: ~~CONFIDENTIAL~~
TOKYO, JAPAN
SUGGESTION #789-62 SUBMITTED BY
LEGAL ATTACHE [redacted] TOKYO OFFICE

b6
b7C

SUGGESTION: That reports received by Legat from other agencies on general subject matters be destroyed after material has been reviewed and the pertinent material summarized and submitted to the Bureau.

b1

(S) PRESENT PROCEDURE: Legat Tokyo receives voluminous reports on about 40 general subject matters such as, Japanese Communist Party, Political Matters - Japan, Political Matters - Korea, etc., from other local U. S. Government agencies, mainly OSI, [redacted] G-2. Where pertinent to the Bureau's interests, he summarizes the material and submits it to the Bureau or else he will forward a copy of the complete report with a cover letter in which he sets forth his analysis of the contents.

ADVANTAGE: Destruction of the material will save filing space and clerical time necessary to file and serialize the material.

OBSERVATIONS: The suggested procedure was analyzed by Inspector Haverty of the Inspection Staff, Training and Inspection Division, during the recent inspection of the Tokyo Office. He recommended that the Tokyo Office be permitted to destroy this material after the pertinent material was transmitted to the Bureau by the Legat and pertinent items indexed to the communication to the Bureau by which the material was dispatched or summarized.

The matter was telephonically discussed with Mr. Branigan of the Espionage Section, Mr. Wannall of the Nationalities Intelligence Section and Mr. Grimes of the Foreign Liaison Unit, all of the Domestic Intelligence Division and with Mr. Short of the Files and Communications Division. They advised that the suggestion appeared most practical and they had no objections to its adoption.

66-3286

The Training and Inspection Division agrees that the suggestion should be adopted. It will save much time and filing space through the elimination

REPATRIATION OF CITIZENS
DURING WORLD WAR II - 65-36220
PURGING OF LISTS

Destruction of Bureau Property

During World War II, the Bureau received numerous lists of residents of various countries being considered for repatriation to their respective countries. These lists related to citizens of Germany, Japan, Italy, various Latin American countries, the United States, etc. Lists were also received relating to personnel of various companies, diplomatic nationals en route to other assignments, passenger lists, etc. The lists related to citizens of both Axis and neutral countries and in many cases the United States was not involved directly in that the individuals never touched on our shores nor were they American citizens. The majority of these lists contained little or no identifying data concerning the individuals listed thereon.

File 65-36220 (several sections attached) entitled "Repatriation of Citizens" contains a variety of these lists. Many other similar lists appear in files maintained in the 64 classification (Foreign Miscellaneous) and other files. Inasmuch as this information appears to be of little or no value to the Bureau today, in line with our Records Management Program designed to eliminate valueless and obsolete material from the Bureau's records and to make the indices as compact, informative, and efficient to use as possible, it is proposed that the Records Branch be given authority to deindex all lists of names relating to repatriation matters which occurred during World War II. Of course, we would not deindex any derogatory information concerning any individuals whose name appears on one of these lists.

RECOMMENDATION:

That the Records Branch be authorized to deindex all lists of names relating to repatriation matters which occurred during World War II with the exception of those names on whom derogatory information is set forth.

From: [redacted]

Employee assigned to (Division): NYO

SUGGESTION

Destruction of Bureau Property

It is suggested that where a case has been opened under an unknown subject, and the only possible indexing was the article stolen and the company or person from whom stolen, that these cards be destroyed when the title is changed to include the name of the subject. This could be accomplished by having the indexer prepare a destroy slip at the time the changed title is indexed. The destroy slip would be held in Indices for 30 days to prevent the card being pulled prematurely in case mail might come in from another office under the former title.

Current practice or rule (Include manual citation as well as facts)

Manual of Rules and Regulations, Part II, Section 3, C, 3d. "Index Systems. Index cards must be prepared for names in the title of a report."

Advantages of suggestion

With very little extra work this will permit the elimination from the indices of cards that are really "dead." It will also facilitate the searching of mail on current thefts where no other identification is available for searching.

☐ Mr. ☐ Mrs. ☒ Miss [redacted]

SUPERVISORY CLERK, GS-10

Signature and Title of Employee Suggester

Recommendations and comments of Division Head

Not recommended. (See next page)

Signature and Title

The Training and Inspection Division is opposed to the suggestion. The two items mentioned are not identical or mutually inclusive. The list on pages 8, 9 and 10 is for a guide and is not intended to be completely specific. The administrative files contained therein will have different periods of destruction under certain circumstances. This list is more for ease of reference than a complete instruction from inception to destruction. The instructions on pages 13 through 15b however are specific and all-inclusive regarding the destruction of Bureau records. Since they are necessary here and would only partially suffice if added to the guide list, it is felt the suggestion would result in unnecessary duplication.

Suggestion # 951-62 suggests that where a case has been opened under an unknown subject, and the only possible indexing was the article stolen and the company or person from whom stolen, these index cards be destroyed when the title is changed to include the name of the subject. SAC Foster of the New York Office opposed adoption of the idea because these unknown subject index cards are helpful in identifying criminal cases on occasions where the only information on hand is the identity of the article stolen or the company or person from whom it was stolen. They are also valuable when surveys are conducted to determine the number of cases received from a particular trucking firm. Further, stops placed on stolen merchandise require the retention of these index cards as long as the stops are outstanding. The matter was also discussed with Mr. Gamble of the Interstate Crimes Unit of the General Investigative Division who agreed with the objections of SAC Foster. He pointed out in addition that, in bank robberies, where different branches of the same banking establishment have been victimized, these index cards are the means of differentiating among cases.

Recommendations and Comments of Division Head (Cont'd)

The unsub cards are helpful in identifying criminal cases on occasions where the only information at hand is the identity of the article stolen or the company or person from whom stolen. They're also valuable when surveys are conducted as to how many cases are received from a particular trucking company. When stop cards are placed with pawn shops or police departments, the unsub cards could not be destroyed if the stop remained outstanding.

MR. TAVEL 6-15-62

L. E. SHORT

Destruction of Bureau Property -

POSTAL CENSORSHIP
62-62736-sub 2

Description of Lists: Japanese, or Americans of Japanese ancestry, residing in Hawaii, who applied for Japanese draft deferment; Japanese in Hawaii, who previously had applied for and been granted Japanese draft deferment by the Japanese government, sending notification of foreign residence. See serials 12771, 12772, 12773, 12774, and 12775.

The attached listings of names have been called to our attention by Records Branch personnel who advise that there is frequent reference to this material. In an effort to streamline procedures and eliminate unnecessary reference to this data it is proposed that these and similar references appearing in this file be deindexed through removal of the cards from the Bureau's indices.

It is requested that the appropriate substantive supervisor review the above listed file references to determine if any reason exists for retention of the indexing on this type of material. A notation advising of the decision reached may be placed on this memorandum. The memorandum should be returned to the Correlation Unit of the Records Branch, Room 6309 IB.

RECOMMENDATION:

For referral to appropriate substantive division.

SUBJECT: DESTRUCTION OF FILE MATERIAL
BUREAU PROPERTY - GEN.

b6
b7C

Mrs. [redacted] supervisor of the Consolidation Unit, Files and Communications Division, has recommended that the following file material be considered for destruction:

File 94-1-603 - that mail concerning requests for copies of the Director's address before the Chicago Boys' Club Dinner at Chicago, Illinois, November 9, 1936, entitled "Youth and Crime."

File 94-1-372 - that mail concerning requests for copies of the Director's address before the Boys' Club of America Convention at Philadelphia, Pennsylvania, May 20, 1936, entitled "Youth Problems in Crime."

This mail is all over twenty years old and it appears to have no further value. Its destruction would result in saving space in the file room and in eliminating unnecessary cards from the general index. Destruction of this category of mail is authorized under the general records schedule and no further archival authority is required. Current mail, mail of historical value and mail concerning setting of policy would be retained.

RECOMMENDATION:

That authority be granted to destory this mail in file as set forth above.

SUBJECT: DESTRUCTION OF BUREAU RECORDS - GENERAL
BUFILE 66-3286

RE: FILE 62-65897 ENTITLED
"INQUIRIES REGARDING INDIVIDUALS IN WAR ZONES"

We are maintaining the file entitled "Inquiries Regarding Individuals in War Zones" (62-65897). This file consists of ten sections, 750 serials, and for the most part consists of inquiries from outside sources requesting information or assistance in locating relatives, friends, or acquaintances serving in the Armed Forces. The great majority of these inquiries were received during World War II. This correspondence for the most part was referred to the War Department or a letter was sent back to the correspondent informing them to communicate with the War Department.

This material appears to be of no value to the Bureau today; and in line with our Records Management Program designed to eliminate obsolete and valueless material from the Bureau's records, it is recommended that the Records Branch be authorized to deindex and destroy the material contained in this file. General Records Schedule 14-4 issued by the National Archives authorizes destruction of, without further approval, acknowledgments and transmittals of inquiries and requests that have been referred elsewhere for reply.

If destruction of this material is authorized, of course, we will not destroy any material in the file wherein the Bureau conducted an inquiry or which would appear to be pertinent to the Bureau's operations today.

RECOMMENDATION: Completed By Purge. 1508 refs. de-indexed. 11 Inquiries Destroyed.

That the Records Branch be authorized to deindex and destroy the material maintained in the above-captioned file with the exception of any material relating to a Bureau inquiry or which would be pertinent to the Bureau's operation today.

POSTAL CENSORSHIP
62-62736-sub 2

Lists of trivial condemned items for various periods during World War II have been called to our attention by personnel engaged in Name Check work who advise that there is frequent reference to this material. In an effort to streamline procedures and eliminate unnecessary reference to this data it is suggested that it be deindexed through removal of the cards from the Bureau's indices.

It is requested that the appropriate substantive supervisor review the attached serials 9252, 9433, 10709, and 10710, which are examples of these lists, to determine if any reason exists for retention of the indexing on this type of material. A notation advising of the decision reached may be placed on this memorandum. The memorandum should be returned to the Correlation Unit of the Records Branch, Room 6309-IB.

RECOMMENDATION:

For referral to appropriate substantive division.

AMERICAN BLACK LIST
100-36078

Description of Lists: Confidential Lists of Unsatisfactory Consignees, and Proclaimed Lists of Certain Blocked Nationals. Serials 1x, 1x1, 21x, 24, 25, 34, 35, 65, 93, 99, 102, 105, 111, and 177

The attached listings of names have been called to our attention by personnel engaged in Name Check work who advise that there is frequent reference to this material. In an effort to streamline procedures and eliminate unnecessary reference to this data, it is suggested that these serials, and similar material throughout this file, be deindexed through removal of the cards from the Bureau's indices. It should be noted that serial 194, which is a memorandum of a press and radio news conference held 7-8-46, indicated the withdrawal of the Proclaimed List of Certain Blocked Nationals. It should also be noted that mail indicating violations of this proclaimed list was indexed, and will remain so. (See serials 150 and 151).

It is requested that the appropriate substantive supervisor review the above listed file references to determine if any reason exists for retention of the indexing on these listings of names. A notation advising of the decision reached may be placed on this memorandum. The memorandum should be returned to the Correlation Unit of the Records Branch, Room 6309-IB.

RECOMMENDATION:

For referral to appropriate substantive division.

SECURITY PROCEDURES
BERN OFFICE
Destruction of Bureau

Rebulet 6/4/62. Property

The following is being submitted in response to the questions raised by rebulet.

The Embassy security guards are members of the U.S. Marine Security Guard Force and are American citizens. No local personnel are employed in the Embassy security force.

With respect to the procedures utilized in the disposal of Embassy classified trash, the trash is collected by members of the Marine security force, personallyddelivered to the disposal plant, inserted into the collection funnel by the security force and maintained under direct visual observation until the trash is afire and has begun to proceed down the collection chute. At this point it is completely inaccessible to anyone.

AMERICAN BLACK LIST
(Deindexing)

DESTRUCTION OF BUREAU RECORDS - GEN'L

Memorandum 6/21/62 Short to Tavel solicited views of substantive division as to advisability of deindexing specific serials containing listing of individuals included on captioned list. Deindexing should be accomplished.

The Proclaimed List of Certain Blocked Nationals, commonly known as American Black List (ABL), was created by Presidential Proclamation 7/17/41. It includes individuals and business houses in South and Central America (6471) and in Europe and Africa (3269). The basis for inclusion on the list consisted of demonstrated political sympathy, cloaking activities, or connection with other firms having similar commercial or political ties with Germany or Italy in early years of World War II.

The ABL was kept in a current status through amendments thereto supplied by Department of State, Treasury Department, the Attorney General, Department of Commerce, and the Office of Inter-American Affairs.

The ABL was withdrawn from use by the United States Government 7/8/46 as the result of action taken and statement issued by Department of State under Acting Secretary, Dean Acheson.

The basis for inclusion of individuals and firms on the ABL related to firms and individuals politically aligned with the Fascist Government of Italy and the Nazi Government of Germany. Such alignment is no longer applicable to intelligence investigations being conducted by the Bureau and indexing of individuals on the ABL is believed of little value.

RECOMMENDATION:

If you approve, Correlation Unit of the Records Branch should accomplish deindexing of list maintained in captioned case as noted in memorandum Short to Tavel 6/21/62.

TO : Mr. DeLoach

DATE: 6-12-62

FROM : D. C. Morrell

SUBJECT: MRS. [redacted] Destruction of Bureau Records

b6
b7C

PURPOSE:

Mr. Clayton has requested a memorandum pertaining to the possibilities involved in the handling of a letter which Mrs. [redacted] indicates she had written to the Bureau on or about 5-21-62.

ALL INFORMATION CONTAINED HEREIN IS UNCLASSIFIED DATE 8-24-82 BY SP-4 EW/dcg

BACKGROUND:

Mrs. [redacted] telephoned on 6-8-62 from Jacksonville, Florida, and stated she had addressed a letter to the Director "3 weeks ago" and that she had not received an answer; that the matter about which she had written is very urgent; that she must have help and that she desired a reply immediately. She was assured that receipt of her letter would be checked. Her manner was quite demanding and her conversation more or less irrational.

b6
b7C

It has been determined that Mrs. [redacted] letter was received and placed on Expedite Processing by the Director's Office on 5-23-62. The letter, according to Expedite Processing was dated 5-21-62 in which she stated she was being slandered and she asked for help. She indicated that a copy of her letter had been forwarded to the Attorney General. Files and Communications Division advised that an abstract of the mail was prepared and subsequently a cancellation was received, probably by phone, and the letter was taken off Expedite Processing.

Correspondence and Tours Section maintains an "appears mental" card regarding Mrs. [redacted]. This card was made per a 1-6-56 memorandum from Jones to Nichols, and it was indicated that correspondent had written and called on numerous occasions with complaints including persecutions by Catholics, numbers racket, personal job difficulties, missing friend, alleged delayed report by FBI on name check resulting in her being denied a job, and alleged slander. (62-100227)

66-3286-
5 JUL 23 1962

Bufiles indicate that on 3-16-54, she contacted Mr. Holloman in the Director's Office and stated that according to the Civil Service Commission (CSC) the FBI had had a name check on her since January and because of our delay she was being denied a position. A check with CSC disclosed that they considered her a "screwball" and she was not being considered for employment by the Government. She applied for a job with the Bureau in August of 1947. In a letter to the Bureau in January, 1956, Mrs. [redacted] claimed that members of her family had filed motions in local court declaring her mentally ill and incompetent. Postal authorities at Jacksonville, Florida,

Morrell to DeLoach memo
RE: Mrs. [redacted] b6 b7C

have described her as definitely unbalanced. Assistant United States Attorney [redacted] of Jacksonville on 9-23-60, when given a postal card addressed to Mrs. [redacted] stated that he believed her to be insane and declined prosecution. She was the victim in a possible extortion case. Mrs [redacted] has made numerous far-fetched complaints to the Bureau and has contended she is a personal friend of the Director and Miss Gandy.

OBSERVATIONS:

A thorough check of the personnel in Correspondence and Tours Section has been made with regard to the [redacted] letter dated 5-21-62 and none of the personnel recall handling or seeing the letter. b6 b7C

It is noted that if the letter to which Mrs. [redacted] refers was actually received in Correspondence and Tours Section it may have been destroyed in accordance with existing regulations concerning mental mail, which regulations have been in effect over the years and which were reiterated by Executives Conference memorandum of 9-30-54 and approved by the Director.

Our procedures consist of thoroughly reading and analyzing each piece of correspondence coming into the Section. Mail which appears to be of the mental type is read for threats, self-destruction, criticism or any interest to other agencies, prior to any action being taken. If no reason exists to the contrary, the correspondence is destroyed in accordance with existing regulations. Registered and certified letters are held for a 90-day period prior to destruction. Enclosures of value are returned to the correspondent. Address changes are noted on the pertinent card. If some action is required, such as bringing facts to the attention of a local police department, such action is taken and the letter is sent to file.

The accumulation of mental mail, in the volume presently received in the Bureau, would present a tremendous filing task and be a records management problem, since some individuals are chronic to the extent of writing several times per day and writing letters of great length. We now receive about 100 letters of this type daily, many of which are long, rambling, handwritten, physically filthy and dirty and some of which are obscene.

In many instances these individuals designate copies of their letters to a variety of Government officials since those who write this type letter feel they definitely have a problem which should be brought to the attention of all concerned. The indication of copies to additional agencies is not the governing criterion regarding the destruction of the letter if the correspondence is definitely of no interest to the FBI or any other agency.

b6
b7C

Morrell to DeLoach memo
RE: Mrs. [redacted]

On 6-12-62 a 30-day trial period was instituted in the Correspondence and Tours Section wherein, in the cases of mental mail, a notation of the date mail is received will be made on the chronic card of the correspondent, prior to destruction of the correspondence.

RECOMMENDATION:

None. For information.

We should do this.

TO : Mr. Tolson

DATE: July 5, 1962

FROM : The Executives Conference

SUBJECT: HANDLING OF MENTAL MAIL

Destruction of Bureau Records

The Executives Conference on July 5, 1962, consisting of Messrs. Evans, DeLoach, Callahan, Conrad, Bowles, Stanley, Rosen, Edwards, Clayton, Wick and you considered the problem of destruction of correspondence from persons known to have mental aberrations.

Briefly, most of the mental mail received by the Bureau is handled in Correspondence and Tours Section. Set forth below is a tabulation of mail of this type received in this Section in June and destroyed. This does not encompass all of the mental mail received in this Section as some of it is sent to files; some retained for 90 days; and some sent to various field offices:

Friday	6-15-62	38	Letters
Monday	6-18-62	103	"
Tuesday	6-19-62	54	"
Wednesday	6-20-62	38	
Thursday	6-21-62	45	
Friday	6-22-62	34	

66-3286-
NOT RECORDED
199 JUL 24 1962

The decision as to whether this mail should be destroyed is made by the Agent dictators. They have considerable experience in the Bureau and in correspondence matters. Before any mail is destroyed, it must be checked against our mental cards and the personnel carefully read it for possible threats, indication of threatened self-destruction, criticism of the Bureau or Bureau personnel or to determine if there is anything of interest to other Government agencies. If there is no reason existing to the contrary, the correspondence is then destroyed and a notation made on the back of the card relating to the individual correspondent. Enclosures of value are returned to the correspondent when the letter is first received and mail of this type is held for 90 days.

Executives Conference Memorandum
Re: Handling of Mental Mail

Also, registered and certified letters are retained for 90 days before they are destroyed. When correspondence reflects a change in address, such change is noted on the correspondent's card and the mail is sent to file. If action is required, such as bringing information to the attention of a police department, such action is taken and the letter sent to file.

The Agents who read this mail know their job and give careful attention to what they are doing. If there is a question as to whether the mail should be retained or destroyed, the doubt is resolved in favor of retention. To have one person read all the mail would require practically all of his time on this operation. Having it handled by the Agent dictators as it comes to their desks in connection with their other assignments spreads the burden and it can be assimilated in the regular course of their work. Further, to have one person read it and make the decision would mean the mail has to be handled twice, once by the first dictator and second by the one person so designated. It should be noted that much of this type mail is very difficult to read and frequently is of considerable length, often running into twenty pages or more. This double handling would be inefficient and would not benefit the Bureau to any appreciable extent.

No problems can be recalled during the past eight years in connection with any mental mail and during this time the procedures outlined above have been followed.

It was the unanimous opinion of the Conference that mental mail continue to be handled as it has been in the past.

I accept this with
serious reservations.

SPEAKING ENGAGEMENTS. Misc

b6
b7C

Captioned employee has proposed that certain file material relating to speeches by Bureau representatives be destroyed. According to Mrs. [redacted] this is an extension of the existing practice in which speech material filed in 94-1 has been destroyed. Files and Communications Division believes that employee's suggestion is feasible and should be adopted.

By memorandum W. G. Eames to Mr. Nease 12-30-58 (94-1-1666), it was indicated that Mrs. [redacted] had suggested the destruction of speech material in file 94-1. Her proposal related to Bureau source material and the suggestion was adopted. Subsequently my memorandum 11-22-61 (94-1-1810) indicated that Mrs. [redacted] had asked consideration be given to destroying that material from outside sources which related to speeches and was filed in file 94-1. This was approved and destruction of the material has been accomplished.

b6
b7C

Mrs. [redacted] current suggestion relates to material similar to that filed in the 94-1 file and there appears to be no sound reason for retaining this material in Bureau file. Destruction of this material will result in a savings of file space. Samples of the material referred to by Mrs. [redacted] are attached.

b6
b7C

If employee's suggestion is adopted, archival approval for destruction will not be required inasmuch as authority is contained in the General Records Schedule.

SUBJECT: DESTRUCTION OF PM NEWSPAPER CLIPPINGS, 1940--1944

Destruction of Bureaus Records Gen.

As space is always at a premium in the Bureau's Library and we must be constantly aware of this fact, it is recommended that all the clippings from PM Newspaper be destroyed. They take up one complete shelf in the Bureau's Library. The publication has been out of existence for many, many years and any reference we might have to any article which appeared in PM could be checked out through the Library of Congress. There is no need to clutter dead storage with this material.

RECOMMENDATION:

That all the clippings from PM Newspaper from 1940 through 1944 be destroyed.

TO : Mr. W. C. Sullivan DATE: July 27, 1962

FROM : R. W. Smith

SUBJECT: CENTRAL RESEARCH MONOGRAPHS
IN FIELD OFFICE LIBRARIES
CENTRAL RESEARCH MATTER

Destruction of Bureau Report

A review of the monograph inventory of the Central Research Section reveals that nine monographs have little current value or usefulness because of their age since virtually all were prepared ten or more years ago. For this reason, it is felt that field offices should destroy these particular monographs, although those offices with considerable security work wishing to retain copies of some of these monographs should be permitted to do so.

Five copies of each of these monographs would be retained by the Central Research Section for research purposes and would be available to any office having future need thereof. The titles of the monographs would continue to be listed in the "Bibliography of Central Research Section Monographs."

Approval is requested authorizing field offices and legal attaches to destroy or retain specified monographs.

RECOMMENDATION:

It is recommended that attached file copy of a letter, the original on Plastiplate, to all offices and legal attaches be approved and transmitted. When approved, this memo should be returned to Central Research Section so that the letter may be dated.

Division of Assignment
Files and Communications

SUGGESTION

That file 1-30 on Technical Training be reviewed for destruction of all material which is obsolete or of no value. The file consists of 3 sections for general material and a sub file for each Field Office. Very little material has been filed in any of the Field Office Sub files since 1947. All historical or policy material should be retained and material that comes in from the Field Offices in the future could be filed in the general file as there should be very little. The Field Office files would be destroyed.

Destruction of Bureau Records

Current practice or rule (Include manual citation as well as facts)

Type of material in the Field Office files is no longer sent to the Bureau.

Advantages of suggestion and annual savings (include basis for estimate)

Approximately 5000 serials in the Field Office sub files could be destroyed which would mean a saving of space in the Filing Unit. Also would mean a saving of space in the Numbering Unit as the abstracts would be destroyed.

Employee Suggestion
Submitted by: [redacted]

COMMENTS:

These files consist largely of mail sent in by the field divisions concerning technical training afforded Agents. Very little mail has been received subsequent to 1947 and the files are not now utilized since the field divisions no longer submit this type of mail.

Destruction of mail in this file would result in a savings of file room space and would also eliminate unnecessary cards from the General Index. Authority for destruction is contained in the general records schedule and no further archival approval is required.

The Records Branch feels that this suggestion has considerable merit, that the mail contained in this file has no present value and that its destruction would result in a savings. The comments of the Training and Inspection Division should be secured.

SUBJECT: DESTRUCTION OF INTERVIEW NOTES AND RECORDS
JENCKS ACT

Bureau Records
General

On my memorandum of 10/16/62 to you, same caption, the Director approved the suggestion that Mr. Rosen and Special Agent Dwight J. Dalbey and I take up with the Department the question whether we should or should not make a change in our present policy of destroying fragmentary and incomplete notes of interview after the full record of interview has been prepared in the form of a memorandum or signed statement. We met today at 3:00 p. m. in the office of William E. Foley, First Assistant, Criminal Division, in the absence of Assistant Attorney General Herbert J. Miller, Jr. With Mr. Foley were the following additional personnel of the Criminal Division: Howard P. Willens, Executive Assistant, Robert S. Erdahl, Chief of the Appeals and Research Section, Harold E. Koffsky, Deputy Chief for Legislation, and Nathaniel E. Kossack, Chief of the Fraud Section.

We outlined our present policy on notes and emphasized the difficulties which we have had in the bank robbery case of Campbell v. U.S. in Boston, and the security case of Ogden v. U.S. on the West Coast, and then asked Mr. Foley whether the whole matter of destruction or retention of notes should not be reviewed again at this time. Mr. Foley said he thought such action would be premature at this time because the Department has just filed its brief in the Campbell case before the Supreme Court and the question of keeping and producing the notes is at issue in that case. He said we have called for an answer by the Supreme Court to this question and he believes that we should wait for it. This opinion was seconded by Mr. Erdahl, who said that at least by December we should know whether the Supreme Court will grant certiorari or deny certiorari in this case. If the Court grants certiorari there is good reason to believe that it will answer the specific question whether investigative notes are producible. If the Court denies certiorari, it will mean that there are not even four members of the Court who think the question of retaining and producing notes is sufficiently important for the Supreme Court's review.

Mr. Erdahl added that if certiorari is granted we may not get a decision until early next summer, but even in that event he does not think that the Supreme Court will hold that investigative notes taken in incomplete form are producible under the Jencks Act because for the Court to do so would mean that they must overrule the definition of a producible statement laid down in the Palermo case, and he does not think they will overrule Palermo. That case was one in which the Supreme Court unanimously upheld the lower court determination that an Internal Revenue agent's 600 word summary memorandum on a 3 1/2 hour interview with a person who became a government witness was not sufficiently detailed, or sufficiently in the words of the witness himself, to be a producible statement of the witness under the Jencks Act. Palermo v. U. S., 360 U. S. 343 (1959). The assumption for our purposes is that an Agent's notes of the interview, being much less detailed than the memorandum, would similarly not amount to a producible statement of the witness.

The Department representatives were then asked whether it might not be a good idea to obtain at this time some Departmental reaffirmation of present policy for use by the Bureau as proof of our good faith policy in the event this question comes up again in a trial court as it did in the Campbell and Ogden cases. Mr. Foley said he saw no need for an official reaffirmation now because the time that we will have to wait until we learn whether the Court grants or denies certiorari is no longer than some time in December. Should it develop, however, that the Court grants certiorari in the Campbell case, and thus takes up to another six months for its decision, we can then meet again and consider the advisability of the Department giving the Bureau some statement on policy to be followed, including reaffirmation of present policy, should it be decided that that policy is the one which the Bureau should continue to follow.

The Department representatives seemed particularly hopeful of some definite clue to the Court's view in the action that it will take in the Campbell case and very hesitant to jump either way on this question until they get that clue. They do not seem disposed to make any new move at this time.

RECOMMENDATIONS:

1. That the Legal Research Desk of the Training Division follow Supreme Court action to determine, at the earliest possible date, the action of the Supreme Court in either granting or denying certiorari in the Campbell case.

2. That after the Supreme Court has granted or denied certiorari in the Campbell case, we bring this matter again to the Director's attention for such action as is advisable in the light of the latest developments.

DATE: 10/16/62

FROM : J. J. Casper

SUBJECT: DESTRUCTION OF INTERVIEW NOTES AND RECORDS (JENCKS ACT)

This memorandum responds to the Director's instructions that, "I want Casper to make a completely new and objective study of our procedures re destruction of records. I personally am against any destruction until all facets of a case are completely disposed of. H." This notation appeared on a memorandum of 10/8/62, from Mr. Sullivan to Mr. Belmont re "Billy Maurice Ogden; Security Matter-C; Fraud Against The Government."

There was a destruction of records in the Ogden case prior to complete disposition of the case. The records destroyed were the Agent's notes of interview with a person who became a government witness at trial. The notes were destroyed after their substance had been incorporated into the witness' signed statement, which was given to the defense at trial for cross-examination purposes as required by the Jencks Act. Ogden was convicted but the Circuit Court of Appeals vacated the conviction and remanded the cause to the trial court to determine whether the destroyed notes were a producible statement of the witness under the Jencks Act and, if so, whether the substantial rights of the defendant were affected by failure to produce. The Circuit Court made clear that if the notes were destroyed in accordance with normal practice, in good faith, and with no intent to suppress evidence, and the defendant was given the same information through the signed statement of the witness, the District Court could enter a new conviction. On remand the District Court held a hearing but is reserving judgment until an official copy of Bureau instructions on destruction of notes is entered into the record.

What the Agents did in the Ogden case accurately reflects, in part, the Bureau's present policy on destruction of the records contained in the investigative notes of a criminal case. The usual notes taken by an Agent during interview with a potential witness may be destroyed after their substance has been incorporated into a signed statement or a memorandum. Other types of notes must be retained, however. These are: (1) Written statements, signed by the witness; (2) written statements unsigned by the witness but approved or adopted by him in any manner; (3) notes so complete (as by shorthand) that they amount to a substantially verbatim account of what

Destruction of Bureau Property - General

the witness said; (4) any notes read back to the witness and approved by him; (5) any notes of the Agent's own investigation, such as a crime scene search or a laboratory examination. Manual of Instructions, Part II, Section 4, page 2c.

We understand the Director's instructions to mean that he definitely desires a continuation of the present policy of keeping those several types of notes which we have been permanently retaining, and that he further desires a re-examination of our policy which calls for destruction of the usual notes of interview after their substance has been incorporated into a signed statement or memorandum which is producible to the defense.

Destruction of interview notes made into a signed statement or memorandum is based on advice from the Department. The Jencks decision was handed down on June 3, 1957. On the following June 20, Assistant Attorney General W. Wilson White, Office of Legal Counsel, advised the Bureau that the Agent's memorandum of an interview was a more complete record than the notes and this made keeping of the notes unnecessary except where the notes were a record of the Agent's own findings, as in a crime scene search. As noted above, we keep these. Bufile 62-104029, Section 12. This advice was repeated by Assistant Attorney General Malcolm R. Wilkey, Criminal Division, in a memorandum to the Director on March 2, 1960, when he said of witness interview notes made into a memorandum that, "We do not believe that such original notes need be retained. This is especially true where the notes are the usual 'key-word' personalized jottings rapidly prepared to aid the agent in later dictating his memorandum." Bufile 62-104029-Section 14. It was repeated again by Mr. Wilkey in his October 4, 1960, memorandum to the Director in which Mr. Wilkey pointed out that in a brief before the Supreme Court in Needleman v. U. S., certiorari dismissed 362 U. S. 600 (1960), the Department had taken the position that "It is, however, not deemed feasible to preserve all personal notes taken by the agents." Bufile 62-104029, Section 14.

The Department reaffirmed this policy on March 22, 1961, in an interview which Mr. Rosen and Mr. Parsons had with then Assistant Attorney General Katzenbach, Office of Legal Counsel, and Assistant Attorney General Miller, Criminal Division. Both these officials said they would agree with the Bureau's present procedure. Mr. Katzenbach said it was his view that the Bureau is doing much more than is required. Bufile 91-10242, Section 4.

In most of our criminal cases this policy of destroying the interview notes after the memorandum is prepared has worked well. In fact, this statement is true of virtually all of our cases, which have run into the thousands since we began complying with the Jencks Act. Percentage wise, we have had extremely

few cases in which the question of note retention has become an issue in the case. On trial, the requirements of the Jencks Act have been met by producing the memorandum and the case has not been lost by failure to produce the notes. The Legal Research Desk has a number of citations on this precise point, available if desired.

It must be admitted, however, that so long as we follow the practice of destroying the interview notes we lay ourselves open to a defense claim that (1) these notes are the original recording of the interview and the Jencks Act requires that they be produced; (2) failure to produce these notes is a violation of the Jencks Act and requires that the testimony of the government witness be stricken from the record, and (3) that we destroyed the notes in bad faith in an attempt to evade compliance with the Jencks Act. Such questions often are raised by the defense (citations available) and as yet we have no decision by the Supreme Court. For example, the Court gave no answer in Needleman v. U. S., 261 F2d 802 (1958), cert. den. 362 U. S. 600, a narcotics case. The question of preserving notes came up in Campbell v. U. S., 365 U. S. 85 (1961), a Bureau bank robbery case in Boston, but was not answered except for the view expressed by four justices, concurring in part and dissenting in part, that the Jencks Act does not require the government to preserve all records and notes taken during the countless interviews that are connected with criminal investigation. When the Court remanded the Campbell case to the District Court for further hearings we were obliged to send SAC Laughlin into court to show that interview notes are destroyed as a matter of policy after preparation of the memorandum, and not to evade compliance with the Jencks Act. The issue came up in the Ogden case (Ogden v. U. S., 303 F2d 724 (1962), concerning which the Director issued his above-referenced instructions, and on remand of that case from the Circuit Court of Appeals to the District Court for further hearing we had to show the court written proof from our manuals that we destroy the interview notes as a matter of policy, and not to evade compliance. It seems obvious, also, that so long as we continue to destroy the interview notes we will be required to show in court, again and again, that we did so as a matter of procedure, in good faith, and without any intent to evade compliance with the Jencks Act. This will go on until the Supreme Court definitely decides, if it does, that interview notes need not be kept after the memorandum of interview has been prepared.

Keeping all interview notes will present some problems, also. Increased file space and clerical work will be necessary. These problems are not insurmountable and the field offices can handle them, although it must be admitted that since our cases can become the subject of appeals or court action such as habeas corpus for a long time after the original conviction, it would be necessary to hold these notes for many years if we were to keep them until the

the case is disposed of completely. In addition, however, there may be special problems of prosecution. If the defense is able to obtain both the Agent's notes and his memorandum for cross-examination purposes, testimony of government witnesses may be open to more harassment by the defense as they compare the notes with the memorandum, and both with the testimony of the witness. In the great majority of the cases the notes taken by the Agent are fragmentary, consisting of a few key-words and phrases stated during the course of the interview. This is sufficient to recall to the Agent's mind the conversation with the witness so that he can prepare a signed statement or memorandum. If the Agent is confronted with these same notes, however, at a time months or possibly years after the occurrence, and also with the complete memorandum of the interview, the defense might have a "Roman holiday." They could badger the Agent considerably on how he could write so complete a memorandum from a few fragmentary notes, obscuring from the court and jury the fact that the Agent remembered the conversation quite well with these notes at the time he dictated the interview. This course of action would obviously tend to discredit the Agent and the Bureau. The task of the prosecutor would, by the same token, be made more difficult and this is a matter of direct interest to the Department. The potential embarrassment to the Bureau in keeping these fragmentary notes and having to produce them might prove to be a greater evil than the present practice of destroying the notes and having rarely to prove that the destruction was made in good faith.

It seems likely, also, that if the Bureau once changed its policy to one of keeping all notes, and found this alternative undesirable, it could not then revert to a policy of destroying such notes without having to answer repeated charges in court that the notes were being destroyed to evade compliance - so that we could not be made to produce them.

We suggest that since this problem has a number of serious ramifications for both the investigator and the prosecutor, a final decision should be deferred until we have again explored this matter with the Department on all the points mentioned above. This seems particularly true in view of the fact, which we have just learned, that in the Campbell case cited above which is now again before the Supreme Court on a writ of certiorari, the Department's brief has taken the position that the usual investigative notes taken by the Agent simply as an aid in preparing his memorandum are not producible under the Jencks Act.

It is suggested also that at this conference with the Department the Bureau be represented by myself, Assistant Director Rosen and Special Agent Dwight J. Dalbey of the Legal Research Desk. In discussing this matter with the Department, we suggest that we ask the Department whether it would be possible to obtain a reaffirmation of the present policy of destroying the notes in such a manner so that this reaffirmation from the Department can be produced in court by the Bureau should the issue of note destruction again arise in any of our cases.

Memo to Mr. Mohr
Re: Destruction of Interview Notes and Records, Jencks Act

RECOMMENDATIONS:

1. That final decision be deferred until we obtain the views of the Department.

2. That Assistant Director Rosen and Special Agent Dwight J. Dalbey and I take this matter up with the Department as soon as we can arrange a conference with them.

we seem to have decided to try to talk the Dept into approving our present practice. I think the notes should be retained 10/21

DATE: 6-29-62

FROM D. C. Morrell

SUBJECT: MRS. [redacted]

Destruction of Bureau Records
Gen.

b6
b7C

Reference is made to my memorandum of 6-12-62, captioned as above, which is attached. This letter relates to the handling of a letter from Mrs. [redacted] dated 5-21-62 and sets forth policies and procedures regarding the handling of mental mail in the Correspondence and Tours Section. You have asked me to set forth an indication of how much mental mail is destroyed by personnel of this Section and also who makes the decision that the mail be destroyed.

Set forth below is a tabulation of the mental mail destroyed in Correspondence and Tours Section commencing 6-15-62. It should be noted that this does not encompass all of the mental mail received in this Section as a part of it is sent to files, some is retained for 90 days; some is sent to the various field offices.

Friday	6-15-62	38	Letters
Monday	6-18-62	103	"
Tuesday	6-19-62	54	"
Wednesday	6-20-62	38	"
Thursday	6-21-62	45	"
Friday	6-22-62	34	"

The decision as to whether mental mail should be destroyed is made by the individual dictators. These employees are dictators with considerable experience in the Bureau and in correspondence matters. Before any mail is destroyed it must be checked against our mental cards and is also read for threats, indication of possible self-destruction, criticism of the Bureau or Bureau personnel or whether it is of any interest to other Government agencies. If no reason existed to the contrary, the correspondence is then destroyed in accordance with existing regulations reiterated in Executive Conference memorandum of 9-30-54 which was approved by the Director. Registered and certified letters are held for a 90-day period prior to destruction. Enclosures of value are returned to the correspondent when the letter is first received and mail of this type is held 90 days. Address changes are noted on the pertinent card and correspondence is sent to file. If some action is required, such as bringing facts to the attention of a local police department, such action is taken and the letter is sent to file.

Morrell to DeLoach memo
Re: Mrs. [redacted]

As examples of the type of mental mail in question, last week we received an envelope from a correspondent in which contained a large number of hand-written notes on torn pieces of paper. These notes were physically dirty and most distasteful to handle. This is not unusual. We also received a letter that was almost an inch thick due to the number of pages. Several of our mental correspondents must do nothing all day but write letters and we frequently receive from them as many as 6 to 12 letters a day. By 1 p.m. today we had received 10 letters from one of our mental correspondents. Letters from this person are completely nonsensical and frequently obscene. Another correspondent writes once a day and believes the President is going to send someone to take her away from her surroundings. Another believes his brain and various other parts of his body are being hit by electricity. A well-to-do woman from Virginia who has also visited the FBI thinks everyone is harassing her, not harmfully. She recently travelled all over Europe and wrote us from each place. Other letters, frequently of the same basis, are impossible to read. Another woman, a New York artist, writes letters largely rambling about her life as an artist. The New York Office has contacted her several times but her letters continue and are frequently 10 to 20 pages long. I could cite many other examples but they fall into a general pattern and usually indicate the correspondents have a persecution complex and they suffer from imagined slander, harassment or other "wrong doings." In some instances the incoming letter appears to be rather normal but upon closer analysis proves to be without basis and results from some persecution complex. Usually this person's letters all deal with the same problem time after time.

RECOMMENDATION:

For information.

EMPLOYEE SUGGESTION

ALL INFORMATION CONTAINED HEREIN IS UNCLASSIFIED DATE 8-24-82 BY SP4 EW/dcg

Reference is made to the suggestion submitted by Miss [redacted] of your office on October 24, 1962, that index cards be destroyed when title is changed to include the name of the subject in those cases opened under an unknown subject and the only possible means of indexing was the article stolen and the company or person from whom stolen.

This same suggestion was submitted by Miss [redacted] on May 25, 1962, and she was advised in the letter of acknowledgment dated May 31, 1962, that her idea had not been adopted because of disadvantages involved. This decision was the result of views of the General Investigative Division and your own objections to the effect these index cards are helpful in identifying criminal cases when the only information on hand is the identity of the article stolen or the company or person from whom it was stolen. They are also valuable when surveys are conducted to determine the number of cases received from a particular trucking firm, as an example. Stop cards placed as a result of stolen property would dictate retention of these index cards as would the necessity to differentiate among cases with respect to bank robberies where different branches of the same firm were victimized.

b6
b7C

It has been decided these objections are still valid and no further consideration should be given to the proposal.

Since the present suggestion is substantially a reiteration of the former submitted but five months previously, it is felt that a letter of acknowledgment should not be sent in this instance. You should advise Miss [redacted] of this fact and the reasons why her proposal is not being considered.

SUGGESTION

66-3286-545

It is suggested that where a case has been opened under an unknown subject, and the only possible indexing was the article stolen and the company or person from whom stolen, that these cards be destroyed when the title is changed to include the name of the subject. This could be accomplished by having the indexer prepare a destroy slip at the time the changed title is indexed. The destroy slip would be held in Indices for 30 days toprevent the card being pulled prematurely in case mail might come in from another office under the former title.

It is also suggested that index cards prepared under other identifying data for unknown subject cases also be destroyed when the subject is identified.

Current practice or rule (Include manual citation as well as facts)

Manual of Rules and Regulations, Part II, Section 3, C, 3d. "Index System. Index cards must be prepared for names in the title of a report." ~~X~~ Destruction of index cards in unknown subject cases

Advantages of suggestion

With very little extra work this will permit the elimination from the indices of cards that are really "dead." It will also facilitate the searching of mail on current thefts where no other identification is available for searching.

SUBJECT: SPEAKING ENGAGEMENTS - GENERAL
SUGGESTION #340-63 SUBMITTED BY MRS. [redacted]
FILES AND COMMUNICATIONS DIVISION

ALL INFORMATION CONTAINED HEREIN IS UNCLASSIFIED DATE 8-24-82 BY SP 8BJ dcg

Destruction of Bureau Property - General

Mrs. [redacted] has suggested that certain file material relating to speeches by Bureau representatives be destroyed. The Files and Communications Division recommended that the suggestion be adopted. They noted that it had previously been approved that speech material in Bufile 94-1, which relates to Bureau source material, be destroyed (Memorandum W. G. Eames to Mr. Nease, 12/30/58, in Bufile 94-1-1666). Subsequently, it was approved that speech material from outside sources also be destroyed (Memorandum L. E. Short to Mr. Tavel, dated 11/22/61, in Bufile 94-1-1810). Files and Communications stated that the present suggestion was an extension of this practice and related to material similar to that filed in Bufile 94-1. They felt there was no sound reason for its retention and destruction of it would save filing space. Archival authority would not be necessary as authority was already contained in the General Records Schedule.

b6
b7C

The Crime Records Division considered the proposal and advised that they had no objection to the destruction of the material provided none more recent than 10 years old be destroyed. Material of more recent receipt still had reference value.

The Training Division, in view of the comments of Crime Records Division feels that the suggestion, modified to apply to material 10 years old or prior to that time, should be adopted.

#386-63 b6 b7C

Date 10/29/62

To:	From: (Suggester's name)	Division of Assignment
Director, FBI		Philadelphia

SUGGESTION

Destroy "00" files on file classifications that have been discontinued, such as 19, 41, 68, 86, 96, 99, 101, 104, 106, 107, 118, 121, 124, 126, 128, 132.

Destruction of Bureau Property - Fea-

Current practice or rule (Include manual citation as well as facts)

Not specifically covered in manual. Present general rule that could apply would be authority to destroy all files 20 years of age.

Advantages of suggestion and annual savings (include basis for estimate)

Saving of space, and eliminate cluttering up of file system with administrative type files containing obsolete information and/or instructions.

ALL INFORMATION CONTAINED HEREIN IS UNCLASSIFIED DATE 8-10-82 BY SP-4 Crowley

Disadvantages of suggestion

None.

b6 b7C

(The use by the United States of my suggestion shall not form the basis of a further claim of any nature by me, my heirs, or assigns upon the United States. I understand that I will be considered for ... if adopted within two years after submission.)

FBI NOV 6 3 28 PM '62 RECD-READING ROOM

Dear Mr. [redacted]

I have received your suggestions concerning the disposition of certain double zero files and the inclusion of the dictator's initials on outgoing communications. I am sure you will be interested to know that the Manual of Rules and Regulations makes provision for double zero files on classifications which have been discontinued. It is felt that files for current classifications should be retained since pertinent material is contained therein. The use of initials on correspondence has been considered previously and not adopted since it was felt additional efforts necessary to insure this information was included on correspondence would outweigh any advantage to be gained.

The interest which prompted you to submit your ideas to me is indeed appreciated.

MAILED 8
NOV 6 - 1962
COMM-FBI

Sincerely yours,

J. Edgar Hoover

2 - SAC, Philadelphia - 1 - Suggestion File
1 - Field Personnel File

Your attention is called to the Manual of Rules and Regulations, Section 3, page 13. Regulations provide that double zero files in discontinued

classifications may be destroyed after they become twenty years old. It is felt that double zero files in current classifications should be retained since pertinent background data on which manual changes and certain policy are based are retained in these files.

NOTE: Suggestion #384-63 proposes that offices replying by letter or airtel to another office's letter or airtel include the initials of the dictator of the original correspondence to provide the receiving office with the identity of employees interested in the reply. A saving of supervisory and clerical time would be realized by using this method.

Similar ideas have been considered several times in the recent past. It was determined that, while this procedure might be of some small help to larger offices, the addition of this information is unnecessary. In fact, Suggestion #410-62 submitted by Miss [redacted] Crime Records Division, proposed use of dictator's initials following the name of the division in certain correspondence to field offices. This procedure was placed into effect for a short period of time but was discontinued due to objections. It is felt that additional efforts necessary to insure that communications contain the proposed information would outweigh any advantage to be gained when the procedure would be of no benefit to the majority of our field offices or divisions at the Seat of Government. The Training Division, therefore, recommends this suggestion not be adopted. b6 b7C

Suggestion #385-63 proposed that sections of double zero files in which the contents are twenty years of age or more be destroyed.

The Training Division recommends this suggestion not be adopted since it is felt that pertinent background data on which manual changes and certain policy are based would be lost with the destruction of these files, and that retention of double zero files should present no special problem as the bulk is not such as to require much filing space (see file 66-1934-7860).

Suggestion #386-63 proposes the destruction of double zero files on classifications that have been discontinued; such as 19, 41, 68, 86, 96, etc. Suggester states this is not specifically covered in the manual. Current procedure provides that these files may be destroyed after they become twenty years old. Suggestion #664-61 submitted by Miss [redacted] Honolulu Office, proposed this same idea and was not adopted. It is felt the twenty-year rule with regard to destruction of files should be retained with discontinued classifications and no special consideration should be given to the destruction of such material. It was felt that such files are not of sufficient bulk to require much space. For these reasons, the Training Division recommends this suggestion not be adopted. b6 b7C

SUGGESTION

Destroy sections of "00" files the entire contents of which are 20 years of age or more.

Destruction of Bureau Property - Gen.

Current practice or rule (Include manual citation as well as facts)

There is no present rule or practice which could apply. Unless one is made these files will accummulate for indefinite period of time unless the classification is discontinued after which they could be destroyed 20 years later.

Advantages of suggestion and annual savings (include basis for estimate)

Save file space and eliminate cluttering up file system with administrative type sections of files containing obsolete information and/or instructions. If not obsolete the instructions would still be included in M.R.&R. As most instructions set forth in SAC Letters are subsequently included in the M.R.& R consideration could be given to destroying "00" files much less than in 20 years.

ALL INFORMATION CONTAINED
HEREIN IS UNCLASSIFIED

DESTROYIT OFFICE PAPER SHREDDER
PITTSBURGH OFFICE

Reurlet 10/30/62.

No tests have been conducted by the Laboratory with respect to the "Destroyit Office Paper Shredder." However, other types of shredders have been examined.

The shredding operation is not considered sufficiently secure for the disposal of confidential waste in Bureau offices. Shredding operations have been utilized, however, for one step in the disposal process where difficulty has been experienced in incineration or other local factors are involved which dictate an intermediate step in the disposal process.

In view of previous tests which have been made in the Laboratory on similar shredders, it does not appear necessary for your office to conduct any tests on the Destroyit Shredder.

THE OFFICE PAPER SHREDDER

destroyit DESTROYS DAILY

all this information which might get to the wrong people:

Important supplier's names ▪ Customer's lists ▪ Designs for new products ▪ Old contracts ▪ Old ledger sheets ▪ Confidential Correspondence ▪ Payrolls ▪ Credit Cards ▪ Pencilled profit and loss figures ▪ Memos ▪ Government Orders and Instructions ▪ Estimates ▪ Special Formulas ▪ Cost Figures ▪ Unpublicized Prices ▪ Confidential interviews (Medical, Government, Business) ▪ Bids.

IMPORTANT INFORMATION CANNOT LEAVE YOUR ORGANIZATION IF YOU HAVE A destroyit

Losses can be enormous when private information gets into the wrong hands. The handy, handsome DESTROYIT Paper Shredder is essential office equipment, not only for the officers and executives of a company, but wherever records of importance become obsolete and must be thrown away: bookkeeping departments with names of customers and essential suppliers, advertising departments' mailing lists, designs and drafts for new products or improvements, contracts for special material such as government orders or unusual material from special vendors. What the DESTROYIT Office Shredder does is to make available, within reach, the continued and immediate destruction of essential papers meant for waste, which otherwise "hang around", possibly long enough to "backfire". Daily disposals destroying your waste-paper in the DESTROYIT is efficient, careful office practice avoiding losses and possible trouble when you least expect it.

There are four DESTROYIT models, different only in the width of the shreds and the quantity of paper that the machine will take at one time. A table model DESTROYIT (identical machines without cabinet) is available for $50.00 less. Model 6MM destroys up to 16 sheets of 16 lb. bond paper at once, while model 1MM will make the thinnest shreds of any shredder available, especially important to some organizations with highly secretive or confidential material.

The DESTROYIT is the only two-way office paper shredder with a second outside door for quantity shredding. In one hour, Model 6MM will destroy over 125 lbs. of paper or card stock, otherwise the main door has its own removable waste-bin enclosed in a unit attractively designed for the modern office.

For EXTRA strength the cutting mechanism and motor operate on ball bearings which are enclosed in an ALL METAL housing. There are no plastics used. Paper clips and staples do not damage the mechanism. When needed, the shreds can be used as excellent shipping and packing material. There are push-button controls for "on", "off", and "reverse".

The DESTROYIT is utterly simple — any one can operate it. Riding on casters, it is easily moved to favorable working spots in the office or plant.

GUARANTEED FOR 1 YEAR

SPECIFICATIONS ON 4 MODELS

Model	Size of Shreds	*Quantities of Paper Shredded	Price fob N.Y.
No. 1 mm	3/64"	4 sheets	
No. 2 mm	3/32"	8 sheets	
No. 4 mm	3/16"	12 sheets	
No. 6 mm	1/4"	16 sheets	

PRICES INCLUDE CABINET ON WHEELS & RECEIVING BIN.
Table DESTROYIT (same models without cabinet) $50.00 less.

Dimensions: Height: 34 4/5". Width: 17 3/5". Depth: 15 3/5".

Weight:
Net Weight: 71 lbs. (Uncrated).
Gross Weight: 110 lbs. (Crated).

Throat Opening: 8 4/5" (Takes sheets many times its width in one feeding).

Motor: ¼ H.P. 60 Cycle, 110 volt, 1 phase, A.C. Reversing type plus circuit breaker. Cable for connection to electrical outlet.

Push-button controls for "On", "Off", "Reverse". Cutting mechanism and motor operate on ball bearings.....

All models visually alike, only the internal shredding units are different.

super-speed series 50, NEWEST ADDITION TO THE destroyit LINE OF PAPER SHREDDERS

SUPER-SPEED SHREDDING FEATURES

1. Staples and clips do not affect self-sharpening cutters of hardened steel — ball race bearings throughout.
2. Push button operation.
3. All metal construction throughout — No plastics.
4. Shreds are disposed of with great convenience: two steel pull out rods support the shred bag, into which the shreds fall (a supply of plastic shred bags come with each machine).
5. 500 lbs. of shreds per hour, rated capacity; the machine shreds as fast as it is fed — so simple, with its gravity feed table, that it is easy to be fast.
6. Powered by heavy duty ⅝ H.P. electric motor with overload cut out device and powerful reverse mechanism.
7. Gravity feed table 14" wide at its start.
8. Dimensions: 18½" wide x 17" deep x 10½" high. Weight: 84 lbs. (140 lbs. crated).
9. Color and Finish: Two-tone enamel gray with chrome trim and polished aluminum feed tray. Blends tastefully with every modern office decor. (Desk/Table model only).

THREE SHRED WIDTHS AVAILABLE WITH SUPER-SPEED SERIES 50

MODEL 50	MODEL 51	MODEL 52
¼" shred	1/16" shred	1/32" shred

GUARANTEED FOR ONE YEAR

The DESTROYIT SUPER-SPEED is important equipment wherever there is a great volume of confidential material which must be destroyed regularly and quickly. Its powerful operating speed makes it possible to handle such an impressive volume that this shredder will be able to work for many departments. In fact, it shreds as fast as it is fed. And its ease of handling makes it almost fun to use. Simply drop any confidential matter onto the gravity feed table; it will then slide quickly into the shredding mechanism, which jets the unreadable shreds into the conveniently attached shred bag. CONFIDENTIAL CORRESPONDENCE, DESIGNS FOR NEW PRODUCTS, OLD CONTRACTS, ESTIMATES, IBM CARDS AND CHECKS ARE THOROUGHLY DESTROYED. Even paper many times the size of the throat is easily handled — quickly pulled into the shredding mechanism over the gravity feed table which is 14" wide at its start. The DESTROYIT SUPER-SPEED is in the vanguard of its field; there's no finer equipment available at its price, size, speed and powerful production.

Re: DESTROYIT

Dear Sir:

Thank you for your recent request for further information on our DESTROYIT Office Paper Shredder.

Enclosed is literature which gives complete descriptive data and specifications -- and we are asking our dealer in your area to get in touch with you. This dealer has a representative equipped to give you excellent service in your locality.

The name of our dealer is:

Whitaker Bros. & Co.
134 - 3rd St. Aspinwall
Pittsburgh 15, Pennsylvania

Att: Mr. [redacted]

We appreciate your interest -- and we are sure our dealer will be able to answer any questions you might have regarding this equipment, and to show you how this machine will prove its value to your organization in many ways.

Very truly yours,

MICHAEL LITH SALES CORP [redacted]

STENOGRAPHERS' MANUAL (SEAT OF GOVERNMENT)(66-2256)
Destruction of Bureau Property

ORIGINAL FILED IN 66-1934-1

As of November 1, and May 1, of each year, all Divisions at the Seat of Government are to review those parts of the above-captioned manuals affecting the work of their Division and advise the Training Division by November 1, as to whether or not any manual changes are necessary. If changes are necessary, they are to be submitted at that time. Communications have now been received from all the Divisions at the Seat of Government and the results are set out below.

The Identification Division, the Files and Communications Division, the General Investigative Division, the FBI Laboratory, the Crime Records Division, the Special Investigative Division, and the Inspection Division reported that the manuals had been reviewed and that no changes were necessary.

The Training Division submitted two changes--one for the Manual of Instructions and one for the FBI Handbook.

The Administrative Division reported the review had been completed and the following units were preparing manual revisions:

12-4-62 Revision prepared and sent

The Property Management Unit is preparing a revision concerning instructions for soliciting bids. No actual changes in procedure are involved. The revisions are to clarify existing instructions.

DEC 13 1962

Memo J. J. Casper to Mr. Mohr
RE: FBI Handbook

The Personnel Services Unit will prepare changes regarding within-grade raises. These revisions are presently being delayed awaiting the receipt of necessary regulations from the Civil Service Commission.

The Veterans' Counseling and Clerical Promotion Unit will prepare revisions concerning retirement and leave matters. Instructions have gone out to the field in an SAC letter; however, manual revisions will be deferred to await the passage by Congress of appropriations to implement the changes.

The Domestic Intelligence Division submitted two changes--one for the Manual of Instructions and one for the Manual of Rules and Regulations.

Destroyed 12-7-62 jmb

In accordance with the provisions of Section 46 (15), page 25b, of the Supervisors Manual, authority is requested to destroy the memoranda received from the Divisions reporting that the manuals had been reviewed and that the manuals were current, changes were being submitted, or that no changes were necessary.

RECOMMENDATIONS:

1. That the Administrative Division expedite the submission of proposed changes for solicitation of bids and closely follow to insure appropriate changes are made when action has been taken by the Civil Service Commission and by Congress. (Training Division will follow.)

Destroyed 12-7-62 jmb

2. That this communication serve as the necessary summary memorandum for this semiannual review of standard Bureau manuals and the memoranda described above from the various Divisions be destroyed.

INTERCEPTED RADIO MESSAGES
DESTRUCTION OF MAIL
Property

A review of file 65-6854 has disclosed a "not recorded" section containing only copies of intercepts during the year 1942. Throughout the twenty-eight sections of this file there are other "not recorded" copies of intercepts dated around the same period of time. In addition there are Monthly Technical Summaries relating to analyses of messages which are filed as enclosures throughout this file for the year 1945 and earlier. (see serials 1911 and 1912)

Permission is requested to destroy these Monthly Technical Summaries and copies of intercepts in that they are bulky and appear to have no current or future value. According to SA C. F. Downing, it is not necessary to retain this material for the Laboratory.

It is requested that other appropriate substantive supervisors review this material to determine if any reason exists for its retention. A notation advising of the decision reached may be placed on this memorandum. The memorandum should be returned to the Correlation Unit of the Records Branch, Room 6309 IB.

RECOMMENDATION:

For referral to appropriate substantive divisions.

SUBJECT: DESTRUCTION OF FILES

Since the spring of 1962 the London Office has acquired approximately 20 volumes of 100-0 material which consists almost entirely of serials relating to possible participants in the 8th World Youth Festival in July-August, 1962. (u)

In addition, the London Office maintains a 100 main file on the Festival itself and in that file are contained complete lists of the individuals known to have participated. (u)

The Bureau is requested to approve Legat, London's destruction of this 100-0 material, relating to the 8th World Youth Festival at this time rather than after the normal five year period has elapsed which applies to general security type files. If this approval is granted it will greatly help the file space problem that now exists in the London Office. (u)

SUBJECT: ADMINISTRATIVE - FILING SYSTEM

SYNOPSIS

By letter dated 3/4/63 SAC, Cincinnati, recommended certain Administrative files be destroyed when three years old. Views were solicited from appropriate Seat of Government Divisions and Washington Field Office. All contacted favored adding general statement to Manual of Rules and Regulations (MRR) providing that in the absence of specific instructions to the contrary, material in any Administrative file not listed in the MRR for destruction may be destroyed when three years old on an annual basis if of no value; however, the Training Division felt that the files on arraignment, arrests, interviews including confessions and signed statements, and searches and seizures should be retained indefinitely. Files and Communications Division advised General Services Administration and Archives provide for the destruction of Administrative material within the agency, by the agency, when it has served its purpose. The Administrative Division requested Cincinnati be advised specifically concerning the maintenance of certain files, which is covered in the enclosed letter to Cincinnati. Divisions contacted had no objection to destruction of files listed by Cincinnati after three years if of no value except for those named above which Training Division felt should be retained.

RECOMMENDATIONS:

1. That the enclosed revision be approved for the MRR providing for destruction of material in Administrative files not listed in MRR for destruction after three years on an annual basis if of no value except for the Administrative files on arraignment, arrests, interviews including instructions on confessions and signed statements, and searches and seizures.

2. That the enclosed letter to Cincinnati containing the views of the Administrative Division concerning certain Administrative files be forwarded.

DETAILS

By letter dated 3/4/63 SAC, Cincinnati, submitted a list of Administrative files maintained in his office and requested advice as to when these files could be destroyed. He recommended destruction after three years. He was advised by letter dated 3/8/63 that a study would be made of the matter and that he would be advised of the disposition of the files.

Specific views were solicited from Washington Field Office, Administrative Division, Files and Communication Division, and Inspection Division as to adding the following general statement to the Manual of Rules and Regulations:

In the absence of specific instructions, any Administrative file not listed for destruction in this manual may be destroyed when three years old on an annual basis if of no value.

The Washington Field Office thought that the general statement should specify that "material" in these files could be destroyed.

The Inspection Division felt the words "and if authorized by the SAC" should be added to the above statement.

The Administrative Division favored adoption of the proposed addition to the Manual of Rules and Regulations but commented specifically concerning certain files listed by the Cincinnati Office. These comments are set forth in the enclosed letter to Cincinnati and for purpose of brevity will not be set forth in this memorandum.

The Files and Communication Division advised that the General Services Administration and Archives provide for the destruction of Administrative material within the agency, by the agency, when it has served its purpose. The Records Branch considers it good records management to destroy such material on a regularly scheduled basis.

In addition to the above-named Seat of Government Divisions, the remaining Divisions, except for Identification Division and the Domestic Intelligence Division, were contacted to see if there was any objection to the destruction of any of the files listed in Cincinnati letter. The Identification Division and

Training Division

Memo J. J. Casper to Mr. Mohr
Re: Administrative - Filing System

Domestic Intelligence Division were not contacted because there were no files listed of interest to those Divisions. The General Investigative Division, FBI Laboratory, Crime Records Division and the Special Investigative Division had no objection to destruction of these files when three years old.

Due to the legal questions which may arise from time to time, the Training Division recommended that the following Administrative files be retained indefinitely:

1. Arraignment
2. Arrests
3. Interviews including confessions and signed statements
4. Searches and seizures.

It is noted that a memorandum from Mr. H. C. Boswell to Mr. Clegg dated 11/28/49 (66-1934-6704), set forth a list of Administrative files that should be destroyed after three years or one year; however, no provision was made for the destruction of the files listed above because it was felt that the subject matter was such that the files should be retained permanently.

The Training Division also felt that it was not necessary for the proposed manual revision to include the words "and if authorized by the SAC" as proposed by the Inspection Division because the general rule "if of no value" is sufficient; further we are placing the final determination on the SAC due to the fact that the destruction is on a permissive basis. If the SAC wants to retain certain files he may.

Note attached concerning which Mrs. Buchanan would like my views. I think this should go elsewhere for the ~~information~~ REASONS stated below.

First, it is the PROPER Files Division which maintains liaison with the Archives on the ~~public~~ interpretation of Government laws and regulations concerning destruction of files. In other words, Assistant Director Tavel, or so it is my impression, is responsible for determining whether is is possible to destroy these files in three years.

Second, if it is possible to destroy them in three years, I think the decision on destroying those circled in red is not a question for the Legal Research Desk but one for ~~the~~ administrative determination by the head of this division. The question is administrative, not legal. My own bias is against destruction. The instructions which we issue on the circled matters are, in our view, important ones and they are not automatically outmoded in three years' time. The legal rules covered do not change that fast. I am greatly in favor of the Training Division giving rather complete instructions to Bureau Agents and offices and then making them retain those instructions and be charged with the responsibility for reading them and following them. We can't very well do that if they toss out our instructions at the end of every three years.

RECOMMENDATION OF GENERAL INVESTIGATIVE DIVISION: 3/12/63 RJG

The Training Division has inquired as to whether the General Investigative Division would have any objection to the destruction by Cincinnati of administrative files after three years on subjects pertinent to this Division.

The Civil Rights Section, the Accounting and Fraud Section, and the Criminal Section have reviewed the list of files and we would have no objection to the destruction of these files. It is noted, however, that included on the list were manuals and working guides. This Division would have no objection to the destruction of administrative files pertaining to manuals and working guides provided the manuals and working guides themselves are retained.

3/12/63

Re attached routing slip requesting the views of the Inspection Division on the disposition of certain Administrative files maintained by the Cincinnati Division and referred to in Cincinnati letter to the Bureau, 3/4/63.

While the actual content of these files cannot be determined at SOG from the topical data furnished by SAC, Cincinnati, it appears in general that such files might be purged or destroyed on a selective basis when 3 years old, and that a general statement, as suggested, be placed in the Manual of Rules and Regulations. It is suggested, however, that such action be taken only upon the authority of the SAC.

In view of the above, it is suggested that the following be added at the end of the proposed general statement: if of no value and if authorized by the SAC.

Dear Mr. [redacted]

Thank you for your suggestions concerning the placement of the date of issue on the credentials of employees and the disposition of case files in certain classifications after they are five years old. You may be interested to know that the dates are now placed on Special Agents' credentials as they are replaced. The feasibility of extending this practice to cover the badges and credentials of other employees and the proposal contained in your second suggestion are under consideration and I will let you know if they are adopted.

Your interest in submitting these ideas to me is indeed appreciated.

Sincerely yours,

J. Edgar Hoover

SUGGESTION

It is suggested that the classifications 52(Theft,embezzlement, robbery, illegal possession of, or destruction of government property), and 70 (Crime on Government Reservation) be added to the list of files to be destroyed when five years old on unknown subject cases.

DESTRUCTION OF BUREAU PROPERTY - Heat

Current practice or rule (Include manual citation as well as facts)

Manual of Rules & regulations, part II, section 3, page 13a Permits and office to destroy files in unsubject caes in classifications 15, 26, and 87 when five years old

Advantages of suggestion and annual savings (include basis for estimate)

It appears that files in classifications 52 and 70 would be of no value after five years old in unknown subject cases. If these files were destroyed it would save filing space which is a big problem in all field offices.

SUBJECT: ALIEN PASSENGERS
Bufile 65-9873
DESTRUCTION OF BUREAU RECORDS - GEN'L

Bureau file 65-9873 has been called to our attention by Records Branch personnel who advise that there is frequent reference to listings appearing in this file. In an effort to streamline procedures and eliminate unnecessary reference to this data, it is proposed that the material be deindexed through removal of the cards from the Bureau's indices on all individuals mentioned on whom there is no derogatory information. For an example see serials 57 and 115.

It is requested that the appropriate substantive supervisor review these file references to determine if any reason exists for retention of the indexing on these and similar listings of names. A notation advising of the decision reached may be placed on this memorandum. The memorandum should be returned to the Correlation Unit of the Records Branch, Room 6309 IB.

RECOMMENDATION:

For referral to the appropriate substantive division.

SUBJECT: ADMINISTRATIVE DIVISION MATERIAL STORED ON SEVENTH FLOOR IDENTIFICATION BUILDING

ALL INFORMATION CONTAINED HEREIN IS UNCLASSIFIED DATE 8-10-82 BY SP-4 ALW/dcg

DESTRUCTION OF BUREAU RECORDS - GEN'L

On March 12, 1963, I looked over the material we have stored at the Identification Building and recommend the following be removed from the storage file and destroyed at this time.

destroy & 1½ drawers

1. Administrative Reports: - These are on hand beginning with the fiscal year 1959. We have been following a policy of keeping the reports on hand for only the past three fiscal years and in line with this those for July 1958 through June 1959 are recommended for disposal.

3/4 drawer

2. Miscellaneous Circulars (Cabinet 47): - These consist of such items as Federal Personnel Manual System circulars; Civil Service Commission circulars and miscellaneous CSC booklets and bulletins. Some of these are dated in 1959; others in 1960 and 1961. All were made available to the appropriate desks at time of receipt. It is suggested those items dated in 1959 and 1960 be destroyed.

½ drawer

3. Sundry Department of Justice Memos and Orders dated in 1957 (Cabinet 80): - These were all made available to the appropriate desks at time of receipt. Those from 1958 on are still on hand in the Administrative Review Unit. This should be adequate retention and accordingly it is suggested that the batch dated in 1957 be destroyed now.

8 drawers

4. Congressional Record: - We have been keeping these on hand for the past two calendar years. In keeping with this, it is recommended that those for the calendar year 1960 be destroyed.

66-3286-

NOT RECORDED
102 APR 3

5 drawers

5. Federal Register: - As with the Congressional Record, we have been retaining only those pertaining to the last two calendar years. Accordingly, it is recommended that those for the calendar year 1960 be destroyed.

¼ drawer

6. Outgoing Requisitions (Cabinet 3): - Bound folders covering outgoing requisitions for scattered months in 1950 and 1951 are on hand. These have no value after this long period of time and it is recommended they be destroyed. (Files and Communications Division should note that copies of

AMERICAN CITIZENS RESIDING IN RUMANIA
INDEX PURGE

DESTRUCTION OF BUREAU PROPERTY - Yes

In the Fall of 1957, State Department, at our request, furnished us 20,600 citizen identification forms pertaining to individuals then believed to be residing in Russia and the satellite countries. We have carefully reviewed these forms and, where appropriate, checked selected individuals named therein against the records of BA Source 4. We have found that frequently subjects of these forms have subsequent to 1957 returned to the United States.

Eight hundred and one of these forms pertain to American citizens in Rumania and have been filed as bulky enclosures to Serial 4 in this case. All of the names appearing on these forms have been indexed including the names of parents, for the most part deceased, husbands and wives, relatives and references in the United States. There are approximately 3,000 names indexed on the 801 forms. The forms are presently retained in Room 636, Riddell Building, and it has been observed that frequently file-review employees find it necessary to refer to the forms.

In most instances it is not possible to identify the person whose name we are checking to the name indexed in the forms. More important, the information in these forms is not derogatory and is of no specific significance. None of the names in the other 19,800 forms have been indexed. It appears that the indexing of the forms re citizens in Rumania serves no useful purpose.

RECOMMENDATION:

That names indexed in these forms be purged from our indices.

FROM : J. J. Casper

SUBJECT: DESTRUCTION OF INTERVIEW NOTES AND RECORDS
JENCKS ACT

Bureau Property

On Monday, 12/3/62, the Supreme Court granted certiorari in the Boston bank robbery case of Campbell v. U. S. We do not know how soon they will hear and decide the case but the interval could easily run until next June.

Granting of certiorari in this case brings up again the recurring question of whether the Bureau's policy should be that all investigative notes are to be kept for possible production in court under the Jencks Act or whether it is permissible to destroy the notes after their substance has been dictated into a memorandum, as is currently the case with notes covering witness interviews. The Department hopes that in the Campbell case the Supreme Court will give a final answer to the question of whether we are required to keep all investigative notes, including those on interviews with potential witnesses.

Pursuant to the Director's instructions, Mr. Rosen, SA Dwight J. Dalbey of the Legal Research Desk, and I discussed this problem with staff members of the Criminal Division of the Department on 10/23/62. They recommended at that time that we take no action on a possible change in policy until it was learned whether the Supreme Court would grant certiorari in the Campbell case. We asked the Department at that time whether it might not be a good idea to give us some Departmental reaffirmation of our present policy of destroying the notes on witness interviews after the memorandum has been prepared, so that if the policy comes into question in any future cases we would have evidence that the notes were destroyed in good faith and not as an attempt to evade production to the defense under the Jencks Act. Mr. Foley again said to wait until we know whether the Supreme Court grants certiorari in the Campbell case. He added, however, that should the court grant certiorari (which it now has done) there might be an interval of six months before we get a decision in the case and,

in view of that fact we could meet again after the grant of certiorari and consider the advisability of the Department giving the Bureau some statement on policy to be followed in keeping or destroying notes.

My memorandum of 10/23/62, to you pointed out the results of this conference and recommended that we again bring this matter to the Director's attention after the Supreme Court has granted or denied certiorari in the Campbell case. That recommendation was approved. Now that the Supreme Court has granted certiorari, the Director may wish us to confer again with the Department to see if they will issue some instructions to us concerning the retention or destruction of notes, which we may follow until we hear further from the Supreme Court in the Campbell case.

RECOMMENDATION:

FROM : A. Rosen

SUBJECT: DESTRUCTION OF INTERVIEW NOTES AND RECORDS; JENCKS ACT (Bureau Property)

ALL INFORMATION CONTAINED HEREIN IS UNCLASSIFIED DATE 8-10-82 BY SP-4 RW/dg

I called Mr. William E. Foley of the Criminal Division concerning our previous discussion in which mention was made of the Campbell v. U. S. case and indicated to him that on Monday, 12/3/62, the Supreme Court granted certiorari in the Boston bank robbery case and that we didn't know how soon they would hear the case and decide but in the interim there could easily be a lapse of six months, at least.

Reference is made to Mr. Casper's memorandum of 12/5/62 to Mr. Mohr reviewing the previous meeting with representatives of the Criminal Division in Mr. Foley's office.

In view of the granting of certiorari by the Supreme Court in this case and inasmuch as the Department indicated that no action or possible change in policy should be considered until it was learned whether the Supreme Court would grant certiorari in the Campbell case, the question was again raised with Mr. Foley and the need for rediscussion of the matter was pointed out.

It was indicated to him that in any rediscussion of the matter, the question would necessarily be directed to whether it might not be a good idea for the Department to give us some reaffirmation of our present policy of destroying the notes on witness interviews after the memorandum has been prepared. It was indicated that this might be necessary or desirable if the policy comes into question in any future cases before the Supreme Court hearing is had so that if the question comes up in any future cases, we would have evidence that the notes were destroyed in good faith and not as an attempt to evade production to the defense under the Jencks Act.

FROM : A. Rosen

SUBJECT: DESTRUCTION OF INTERVIEW NOTES AND RECORDS; JENCKS ACT

I checked with Mr. William E. Foley in the Criminal Division on January 7, 1963, concerning our previous discussion, as reflected in my memorandum of December 17, 1962, concerning the Supreme Court granting of certiorari in the Campbell v. U. S. case. It is recalled this case relates to the question of destruction of interview notes and records.

Mr. Foley stated he had discussed this matter with representatives of the Criminal Division and it was their view that the Department's position was entirely proper at this time and that no further action should be taken pending the outcome of the Supreme Court decision. The discussion was directed toward the question of whether it would be a good idea for the Department to give us some reaffirmation of our present policy in destroying notes on witness interviews after the memorandum has been prepared. Mr. Foley stated he had discussed this matter with Assistant Attorney General Jack Miller and Miller and representatives of the Criminal Division definitely felt there was no need for any further action on the part of the Department.

The position of the Department, therefore, is that the Campbell v. U. S. case is presently before the Supreme Court and until a decision is reached by the Supreme Court, there is no need for any reaffirmation of our present policy of destroying notes on witness interviews after a memorandum has been prepared. This is not necessary nor does the Department feel any purpose would be served in reaffirming its position at this time.

ALL INFORMATION CONTAINED HEREIN IS UNCLASSIFIED DATE 8-10-82 BY SP4 ELW/dcg

ACTION TO BE TAKEN:

That the docket of the Supreme Court be followed in order that any action taken be immediately reviewed. If the Supreme Court action on certiorari in the Campbell v. U. S. case requires further interpretation by the Department of Justice, this will be immediately sought and appropriate instructions issued to the field. If the Supreme Court does not change the present view of the Department of Justice, appropriate instructions should, nevertheless, be issued to

DATE: January 21, 1963

FROM : Mr. F. J. Baumgardner

SUBJECT: FORMER KOREAN PRISONERS OF WAR
VOLUNTARY NONREPATRIATES
TREASON
Destruction of Bureau Property

Memorandum from Baumgardner to Belmont dated 4-9-56 related that Army had furnished to us copies of its results of investigations relating to twenty-one former prisoners of war who refused repatriation and elected to remain with the Chinese communists following the Korean conflict. This material is currently stored in sixteen boxes as a bulky enclosure to serial 38 of Bureau file 100-408965.

The retention of this material by the Bureau was necessary in view of our then pending treason investigations of these twenty-one individuals. Since that time, one of the subjects died in China and ten have returned to the United States. The Department has declined prosecution on these subjects. The remaining ten subjects are still outside of the United States, and the Department is withholding its prosecutive opinion concerning them until they return to this country. Since the material we are retaining is a duplicate of original material held by Army and a copy of the material has in each instance been furnished to the Department, the retention of this material by the Bureau relating to eleven subjects on whom prosecution has been declined is no longer necessary or desirable.

ORIGINAL FILED IN 100-408965-127

January 21, 1963 WASHINGTON 25, D. C.

MEMORANDUM TO ALL BUREAU OFFICIALS AND SUPERVISORS

0 Destruction of Bureau Property - General

(A) PURGE OF OBSOLETE INDEXING AND EXTRA COPIES FROM THE BUREAU'S INVESTIGATIVE FILES -- You are reminded, as set forth in the Supervisors' Manual, page 12C, items 24 and 26, to be alert in reviewing files for obsolete indexing and/or excessive copies, referring such matters to the Correlation Unit of the Records Branch, Room 6309 IB, Extension 2115, for handling.

The Records Branch in its day-to-day operations is making every effort to identify and to eliminate obsolete indexing from the general indices, which now contain over 48,000,000 cards. Similarly, unnecessary copy material is being systematically removed, where possible, from our 5,000,000 investigative files in order to reduce their bulkiness and facilitate handling and reviewing.

The cooperation of all officials, agent supervisors, and clerical file review employees will materially assist this program.

Very truly yours,

John Edgar Hoover

Director

ANONYMOUS COMMUNICATIONS
FILE 62-108

Destruction of Bureau property

File 62-108 entitled "Anonymous Communications" consists of 107 sections, 6,203 serials. This file was opened January 15, 1920, and is still an open file. The file consists of anonymous communications received by the Bureau over the years, the majority of which relate to matters over which the Bureau does not have jurisdiction. No investigations have resulted from these communications and it does not appear that they are of any value to the Bureau.

In line with our Records Management Program designed to eliminate valueless and obsolete material from the Bureau's records, it is proposed that all mail in this file over three years old be deindexed and destroyed, unless, of course, the mail contains data which would be pertinent to the Bureau's operations or of value to the Bureau and should be retained. General Records Schedule No. 14, item 7, issued by the National Archives, permits destruction of anonymous letters, excluding those on which investigations were made or were the basis for administrative action, after three months.

RECOMMENDATION:

That all mail in file 62-108 (Anonymous Communications) be deindexed and destroyed after becoming three years old, unless the mail contains data which would be of value to the Bureau and should be retained. Sample files attached.

SUBJECT: DE-INDEXING OF BUREAU FILES 44-1 THROUGH 44-56 CAPTIONED KU KLUX KLAN

Destruction of Bureau Property

Bureau files 44-1 through 44-56 relate primarily to Ku Klux Klan activities prior to 1925. These files occupy five cabinet drawers of space and have a considerable amount of indexing. The names indexed usually consist of the double initial with a surname and have little or no information to identify the individual indexed. Of this series of files, Bureau files 44-25 and 44-16 have been de-indexed because of the lack of identifying information and the age of material involved. Inasmuch as the remainder of this series of 44 files contain information of questionable value currently, it is proposed that names indexed in files other than 44-25 and 44-16 be de-indexed.

There is some correspondence that has been placed in these files within recent years. Therefore as a standard for limiting the names to be de-indexed, it is recommended that only those names indexed prior to 1930 be de-indexed.

65-3286
NOT RECORDED

Destruction of Bureau Property

SUGGESTION: To destroy mail from field advising that an article or weapon previously listed in the National Stolen Property File (NSPF) has been recovered and recommending deletion from the index. Indicate destruction of the card by black pencil "purge" check over listed article or weapon and place notation "Destroyed per letter from (Field Office) on (date), " on serial already in file which requested listing.

PRESENT PROCEDURE: At present, the communication requesting an item be placed in NSPF, and the one advising of its recovery and requesting deletion from the index, are both filed.

ADVANTAGE: Saving of filing space.

OBSERVATIONS: Files and Communications Division favored adoption of the idea because it would permit a systematic purge from files of mail with no listing value. They requested views of General Investigative Division be obtained.

General Investigative Division had no objection to the procedure provided the communications dealt solely with cancellation of the "stop" in the NSPF and no other matter such as the fact that a Theft of Government Property case was being closed and the reasons therefor.

Training Division agrees that in the absence of any pertinent data other than request for removal of item from NSPF, retention of such communications is unnecessary and they should be destroyed in the manner described. Further, in these instances it should not be necessary for the field to prepare abstracts with these letters. The Files and Communications Division agrees.

Enclosure

RECOMMENDATIONS:

1. That the suggestion be adopted with the proviso that it apply only to letters dealing solely with removal of items from NSPF, and this memorandum serve as authority for Files and Communications Division to place the procedure into effect.

2. That the Manuals Desk, Training Division make the necessary changes concerning the preparation of abstracts in these cases.

3. On approval, that the enclosed letter be directed to Mrs. [redacted] Receipt of the suggestion was acknowledged by prior letter.

VIEWS OF GENERAL INVESTIGATIVE DIVISION ON SUGGESTION #621-63.

ADDENDUM BY GENERAL INVESTIGATIVE DIVISION JPJM:imc 1/29/63

Suggestion is that Records Branch be authorized to destroy rather than file an incoming communication which advises of recovery of an item, previously listed in the National Stolen Property File (NSPF), and which cancels the "stop" on that item in the NSPF.

Once the NSPF "stop" has been canceled and the "stop" card destroyed this Division would have no further interest. There would be no objection to the suggested handling by the Records Branch, IF THE COMMUNICATION DEALT SOLELY WITH THIS.

The above would not apply, of course, where the communication canceling the "stop" also contained information which would otherwise go into file, for example the fact that a Theft of Government Property case was being closed and the reasons therefor.

SUBJECT: PRESS INTELLIGENCE
Bufile 66-4910
Destruction of Bureau Property

This file consists mainly of copies of Press Intelligence Bulletins to which the Bureau subscribed in 1935 and requires a full cabinet drawer of filing space. There is little or no indexing of the bulletins and the last one filed is dated in 1942. In an effort to reclaim cabinet space it is suggested that these bulletins be deindexed and destroyed except where the Director or other Bureau officials have indicated a particular interest in the contents. As examples, see serials 230X, 230X1, and 230X2.

It is requested that the appropriate substantive supervisor review this file to determine if any reason exists for retention of the described public source material. A notation advising of the decision reached may be placed on this memorandum. The memorandum should be returned to the Correlation Unit of the Records Branch, Room 6309 IB.

RECOMMENDATION:

For referral to the appropriate substantive division.

SUBJECT: SUGGESTED HANDLING OF PHOTOGRAPHS TAKEN IN CONNECTION WITH INVESTIGATIONS

Destruction of Bureau Property

In connection with a recent project wherein we were assisting "U. S. News and World Report" in the preparation of an article relating to bank robberies, we were asked for copies of photographs taken during a bank robbery by a concealed camera. We called the file on this particular case only to discover that the desired film had been destroyed since all prosecutive action had been completed. Fortunately, the file revealed portions of the film had been released to both Associated Press and United Press International and we were able to refer "U. S. News and World Report" to these news services to obtain the desired pictures. The film in question had been a bulky exhibit and was destroyed in accordance with the procedure wherein such exhibits are periodically reviewed to determine if their retention is still warranted. It is suggested this procedure be revised so that exhibits involving photographs taken in connection with investigations be referred to this Division prior to destruction. In this way we can insure retention of investigative photographs which would be of value to illustrate articles and other material we furnish to various news media. destruction of Crime Research

It is also suggested that other Divisions be instructed to route to this Division on a continuing basis any photographs taken in connection with investigations which might be of value from a public relations standpoint. Through this procedure we will be able to compile a current listing of various photographs regarding different types of cases so they can be readily located when needed to illustrate material we furnish to news media. Such a compilation of photographs would also be of benefit in connection with various training programs conducted by the Bureau. Routine photographs such as mug shots, of course, should not be sent to this Division for review.

SUBJECT: REHABILITATION PROGRAM
RECORDS BRANCH

Destruction of Bureau Records GEN

DESCRIPTION OF FILE: 62-58394
OFFICE OF EMERGENCY MANAGEMENT
916 SERIALS, LAST MAIL DATED 1947.

The attached file has been called to our attention by personnel of the Consolidation Unit. The following type of material is outdated and there appears to be no reason for its continued retention:

1. Memos re investigations of employees of Office of Production Management, copies of which went in case files on the individuals listed. (see serials 346 thru 375 for examples).

2. Lists of names of applications for positions in National Defense Agencies. (see serials 432 thru 435 for examples).

3. Copies of forms re name checks made on employees of Office for Emergency Management, information taken from Bureau files. (see serials 814, 816 for examples).

It is requested that the appropriate substantive supervisor review the above listed file to determine if any reason exists which would preclude destruction. A notation advising of the decision reached may be placed on this memorandum and returned to the Consolidation Unit of the Records Branch, Room 7231.

RECOMMENDATION:

For referral to the appropriate substantive division.

SUBJECT: DESTRUCTION OF ADMINISTRATIVE-TYPE FILES
66 CLASSIFICATION

The 66 classification contains a number of files which were opened each year to contain data furnished in an annual report to the Attorney General. The general file contains that data placed in the annual report. Each general file has separate subfiles for each Seat of Government division which furnished interesting case data for inclusion in the annual report.

Since the data appearing in the subfiles duplicates information appearing in case files and is also included to some degree in the general file, it appears that there is no longer any reason to maintain the subfiles.

The Records Branch proposes to destroy and delete subfiles for the general files listed below. No archival authority is necessary for destruction of these records since they duplicate data appearing in other files maintained by the Bureau. A typical subfile is attached. Following is a list of the files on which it is proposed that all subfiles be destroyed together with the year for which the file was maintained:

66-1629	(1925)	66-3800	(1934)
66-1858	(1926)	66-4300	(1935)
66-2005	(1927)	66-5000	(1936)
66-2100	(1927)	66-5500	(1937)
66-2200	(1928)	66-6000	(1938)
66-2500	(1929)	66-6400	(1939)
66-2700	(1930)	66-6800	(1940)
66-2900	(1931)	66-7600	(1941)
66-3300	(1932)	66-10915	(1942)
66-3700	(1933)	66-16250	(1943)

RECOMMENDATION:

It is recommended that this memorandum be reviewed by the appropriate division for approval. This memorandum should be returned to the Correlation Unit of the Records Branch, 6309 IB, together with a notation indicating approval or disapproval of the proposed destruction.

SUBJECT: GOVERNMENT PROPERTY - FBIRA CARD
(COLLECTION AT TIME OF SEPARATION)

Form FD-193

Presently, the Manual of Rules and Regulations requires that property issued to employees is to be collected upon separation or suspension. In cases of the clerical identification card or badge, SAC is to destroy in the field and so advise the Bureau. Manual revision has been submitted instructing the same procedure with respect to FBIRA cards issued to employees. Should employee not be a member of the FBIRA, SAC or division head is to so note in the communication forwarded to the Bureau reporting return of Bureau property. Normally, FD 281 or FD 281A (enclosed) are used in reporting return of property, and at the Seat of Government employees may return property directly to the Property Management Unit. In all instances, the communication reporting return (or destruction, where applicable) of property is placed in the employee's personnel file.

Report of Exit and Separation form (FD 193), Item D, presently states "Has employee returned all documents made or received while in the Bureau's service (exceptions: commendation, censure or promotion letters or copies of expense vouchers, etc.)?" Since the Exit Interview form is executed at time employee submits resignation and property is actually not collected until employee ceases active duty, it is being proposed that Item D be revised to state "All Government property, documents made or received while in the Bureau's service, including FBIRA card, will be collected on date employee ceases active duty (exceptions: commendation, censure or promotion letters or copies of expense vouchers, etc.)." Such instruction is deemed advisable since it is important that property acquired during Bureau service should be obtained from the employee and the instruction will serve as a reminder to the interviewing official that this must be done. The instruction will further serve the purpose of enabling the interviewing official to remind the separating employee to turn in all property on the date active duty ceases.

EX-111 REC- 51 66-3286-21

Enclosed is form FD 193 (Report of Exit and Separation), showing the proposed revision of Item D.

(Read before interviewing)

The exit interview, to be beneficial, must be conducted as promptly as possible after receipt of resignation. Where it involves a clerical employee, it shall be conducted by the Agent supervisor under whose jurisdiction the employee works. Where it involves a Special Agent, each SAC shall personally conduct the exit interview. In the absence of the SAC, the exit interview should then be conducted by the official in the field office who is acting for him. In every instance the exit interview form shall reflect the name of the official who actually conducted the interview and the form must be signed by him on the reverse side in the space provided. There are to be no exceptions. The interview should be conducted in adequate privacy with adequate time. It should be designed to supplement resignation, to obtain real, motivating reason for resignation, to serve as basis for (1) accurate analysis of turnover, (2) determining necessary or desirable organizational improvements, and (3) permitting a recorded recommendation regarding future reinstatement. Many times, an exit interview, properly and promptly conducted, results in saving a valuable employee. On involuntary separations, the exit interview is designed to record the reason and any pertinent comments, it being assumed the recommendation would be unfavorable for reinstatement.

Reasons given for separation *(Check block applicable)*

☐ 1. Military

2. Working conditions
- ☐ a. Excessive work (overtime, 6-day week)
- ☐ b. Unsatisfactory relations with Supervisor or employees
- ☐ c. Interest of work (monotony)

SUBJECT: SUPERVISION - INTERNAL SECURITY
SUGGESTION #874-63 SUBMITTED BY
SA [redacted]
OKLAHOMA CITY OFFICE

ALL INFORMATION CONTAINED HEREIN IS UNCLASSIFIED DATE 8-10-82 BY SP-4 [illegible]

Form FD-338a

SUGGESTION: A form be adopted in lieu of a memorandum to be placed in file listing each channelizing memorandum destroyed from the 100 classification case files and location of the original information. As the review and destruction are conducted on a yearly basis numerous memoranda will be involved in most offices. Further, suggest form may be executed in legible longhand.

PRESENT PROCEDURE: Copies of informant's reports designated for the 100 classification case files of informants may be purged on a yearly basis after the reports are a year old. A memorandum must be prepared and placed in the file listing each item destroyed and the location of the original information.

Destruction of Bureau Property - Gen.

ADVANTAGES: Suggested procedure would eliminate typing time and provide for uniformity in handling. Savings would result from elimination of typing time which is required under the present system.

OBSERVATIONS: SAC Teague, Oklahoma City Office, recommended adoption.

The Domestic Intelligence Division recommended adoption. It made no changes in the format as submitted by the suggester. 66-3286-

NOT RECORDED
167 MAY 10 1963

The Training Division also recommends adoption. Form FD-338 which is used in criminal and security cases when channelizing memoranda are destroyed following submission of reports, is similar in format to the proposed form and the Domestic Intelligence Division was requested to carefully consider possibility of combining the proposed form with FD-338. It was decided one form would not be practical for both purposes since the material which is purged in connection with Form FD-338 has been incorporated into a report; and the cover pages accompanying the report list the file and serial number of the original informant reports or master channelizing memoranda; whereas, in the current situation, the location of the original material is noted in the memorandum or will be placed on form, if adopted. Therefore, it is the opinion of the Domestic Intelligence Division and the Training Division that both forms are necessary

Dear Miss [redacted]

Thank you very much for the suggestion regarding the disposition of certain unknown subject files and index cards after five years. You may be interested to know that, due to a prior suggestion, this matter is already under consideration of 52 & 70 Classification Files

Although action had already been taken in this regard, the interest and alertness which prompted you to bring this matter to my attention are indeed appreciated.

Sincerely yours,

J. Edgar Hoover

NOTE: Suggests destruction after five years of unknown subject files and index cards relating thereto, in classification 52 and 70 if the crime is not punishable by death.

Memorandum J. J. Casper to Mr. Mohr, 4-16-63, captioned Destruction of Bureau Property - General, Suggestion #882-63 Submitted by [redacted] Albuquerque Office, is presently being considered by the interested divisions regarding disposition of files five years old in several classifications, 52 and 70 are included.

#945-63

Date: April 17, 1963

To: Director, FBI

From: (Suggester's name)

Division of Assignment: HONOLULU

SUGGESTION

Destroy after five years unknown subject files and index cards relating thereto, in classification 52 and in 70 if the crime is not punishable by death. A notation should be placed on the file front of a consolidated volume, showing reason for destruction.

NO DESTRUCTION OF BUREAU PROPERTY - Chief Clerk

Current practice or rule (Include manual citation as well as facts)

At present, files are destroyed after twenty years. Manual of Rules and Regulations II-3-13.

Advantages of suggestion and annual savings (Include basis for estimate)

The Statute of Limitations expires after five years, except in crimes punishable by death which may occur in Crime on Government Reservation cases, and have no more value than the 15, 26, or 87 classifications which the Bureau has given permission to destroy (Manual of R & R II-3-13a). It is believed at least three fourths or more of the Unsub cases in the CGR classification could be destroyed and should therefore be considered.

Destruction would provide added space and an appreciable savings in space costs throughout the Bureau offices.

Disadvantages of suggestion

No disadvantages are known.

SUBJECT: RETENTION OF INVESTIGATIVE NOTES
THE JENCKS ACT

The Director said, "I would like a memo giving the pros and cons as to retention of notes of our Agents in investigations. H"

An Agent's investigative notes fall into distinct categories, both functionally and legally. This analysis will discuss each category separately.

1. Notes made to record the Agent's own findings. These are notes of oral confessions, crime scene searches, Laboratory examinations, fingerprint examinations, interview logs, surveillance logs, and accounting work papers. All such notes are kept by the Bureau at this time and they must be kept; they are an aid to the Agent in refreshing his recollection before testifying in court. In testifying to complex data, such as a long list of motor serial numbers, the Agent sometimes refers to such notes while on the witness stand. The Department has instructed the Bureau that all notes of this category are to be retained. Bufile 66-2120-6449; 66-3286-949.

2. Notes made to record interviews with witnesses. These notes fall into distinct subgroups as follows:

a. Written statements which have been signed by the witness; written statements which the witness did not sign but which he approved or adopted in any manner; notes made by shorthand, speedwriting or in longhand so complete that they are a substantially verbatim and complete "word for word" recording of what the witness said on interview; notes which have been read back to the witness or which the witness has been allowed to read or which the witness has approved or adopted in any manner as his true account during the interview. Notes falling into this subgroup constitute "statements of the witness" under the Jencks Act and must be retained for production to the defense, on demand, after the Government witness has testified. We retain notes of this type and the Department has instructed us to do so. Bufile 62-104029-628; 66-2435-2548.

b. All other witness interview notes. The notes in this subgroup are the sketchy key word or key phrase notes taken hurriedly by the Agent during the interview, or jotted down by him shortly after the interview in the case of a witness likely to "clam up" if he sees notes being made, and used by the Agent to prepare his memorandum (interview report form). Although we know of no Bureau statistics in point, notes of this type probably constitute the great bulk of notes taken during criminal investigations. It is these notes which represent the problem in note retention, both because of their volume and the fact that the Supreme Court has not yet held them to be "statements of the witness" which must be produced to the defense for cross-examination. The pros and cons of retaining these notes appear to us as follows:

PRO:

(1) The notes would always be available for production in court, and the Bureau could not be accused of destroying them to avoid production in court. This does not guarantee, of course, that the Government, as represented by the United States Attorney, would willingly produce such notes.

(2) The file record of interview would be more complete for any purpose desired, administrative or otherwise.

CON:

(1) The Department repeatedly has advised us that we are not required to keep such notes. As former Assistant Attorney General Malcolm R. Wilkey, Criminal Division, said on March 2, 1960, "We do not believe that such original notes need be retained. This is especially true where the notes are the usual key word personalized jottings rapidly prepared to aid the Agent in later dictating his memorandum." Bufile 66-3286-949; 66-2435-2548; 62-104029-627, 635.

(2) Production of sketchy key word and key phrase investigative notes could prove to be a greater evil than destroying them and occasionally having to prove that the destruction was in good faith. When the defense attorney on cross-examination is able to compare the testimony of the witness with the Agent's memorandum of the interview, and with the Agent's fragmentary notes he has an unusual opportunity to destroy the witness in whole or in part by showing the little inconsistencies between these three items and expanding on them until he makes the witness out as either confused or a liar. He can ridicule the sketchy notes and ask

how anyone could make so few notes into a complete memorandum. The notes actually serve to spark the Agent's memory perfectly when dictating the memorandum shortly after taking the notes but as time goes by the terms become progressively meaningless and a defense attorney could capitalize on this appearance. This becomes more true with the passage of time, and if we retain these notes they would have to be kept for years until all of the various methods of appeal and review had been exhausted or the time for them had passed. We have mentioned this objection before. Bufile 66-3286-949. Solicitor General Cox mentioned it on April 24, 1963 saying there inevitably would be inconsistencies between the three versions and a skilled defense attorney could capitalize on these inconsistencies.

(3) If Agents know that all notes must be kept and they are faced with the prospect of producing both their notes and their memoranda after the witness has testified, they will become apprehensive of inconsistencies and will tend to concentrate on the form of the note-taking rather than the substance of the inquiry. This observation was made by Solicitor General Cox on April 24, 1963.

(4) Retention of all notes will increase the filing problems - problems of space to house these notes and of clerical employees to handle the increased volume of paper work. The space problem will continue for years because with the practice of the courts to hear appeals directly and by habeas corpus for years after the conviction, it would be necessary for us to retain all notes for many years in most cases.

(5) If the Bureau wants to change its policy to one of keeping all notes, without being required to do so by the courts, and found this alternative undesirable, reversion to the original practice of destroying fragmentary notes would seem likely to lead to defense charges that whereas we once kept all fragmentary notes we are now destroying them and obviously are doing so to evade production.

In general, the problem of retaining or destroying those fragmentary notes which we are now allowed to destroy is difficult and one that cannot be solved either way without running some risk and incurring some hardship. During the past several years we have repeatedly taken this problem up with the Department and, since the Campbell case first came up on appeal, the Department has repeatedly told us not to change until the Campbell case was decided. That case will be decided shortly and the decision may possibly give an answer so clear that all speculation on the proper policy can be ended. We suggest that a decision be deferred until the Supreme Court hands down its opinion in the Campbell case.

Have we this in writing? ✓

Memo to Mr. Mohr
Re: Retention of Investigative Notes
The Jencks Act

RECOMMENDATION:

That this subject be reviewed for final decision immediately upon learning the Supreme Court's decision in Campbell v. United States, argued 4/25/63.

FROM : J. J. Casper

SUBJECT: RETENTION OF INVESTIGATIVE NOTES
THE JENCKS ACT

Our memorandum of April 25, 1963, same caption, responded to the Director's request for the pros and cons as to retention of notes made by Agents during the investigation. In the last paragraph on page 3 of that memorandum we refer to the fact that with Department approval we destroy fragmentary notes after the memorandum based on those notes has been dictated, transcribed and approved. We said that the Department has repeatedly told us not to change this rule until the Campbell case was decided. The Director asked, "Have we this in writing? H."

We have these instructions from the Department both in writing and in oral instructions given during conferences. We will set them out in sequence.

A memorandum to the Director from Malcolm R. Wilkey, Assistant Attorney General, Criminal Division, dated October 4, 1960, responded to the Director's memorandum of September 14, 1960. In discussing this problem, Mr. Wilkey's memorandum said:

"The Supreme Court has not as yet been called upon to decide whether the testimony of a government witness must be stricken because of the inability of the government to produce notes of interviews for the inspection of the court under 18 USC 3500. That point is, however, involved in Campbell v. United States, No. 53, October Term 1960, in the Supreme Court (a copy of the government brief is hereto attached). Your attention is specifically invited to the footnote on page 17 of the brief in which the Department is on record with the Supreme Court that 'It is, however, not deemed feasible to preserve all personal notes taken by the agents'.

XEROX 66-3286-

NOT RECORDED
145 MAY 9 1963

79 MAY 9 - 1963

> It may be that the Supreme Court will lay down some guidelines in that case which will be of assistance in solving what appears to be a difficult problem of paper work management for the Bureau. Until such time I do not feel compelled to advise you to change your present procedures which will cause you to assume the added burden and expense involved in the storage and safe keeping of notes which are, as you state, in the aggregate a great deal of useless paper." Bufile 62-104029-623.

The Department's reluctance to make any change in the rule until the Campbell case is finally decided appears to trace back, at least in part, to the above-stated fact that they are on record with the Supreme Court as believing that it is not feasible to preserve all notes.

The same question was again raised to the Department by the Director's memorandum of February 6, 1961, and the Department replied as follows through a memorandum of February 28, from Mr. William E. Foley, Acting Assistant Attorney General, Criminal Division:

> "Reference is made to your memorandum dated February 6, 1961, requesting my advice as to continuing the practice of destroying the original notes of an interview made by an agent at the time of the interview. The question arises in view of the recent Supreme Court decision in Campbell v. United States (No. 53, October Term, 1960).
>
> As you point out in your memorandum, the question of note retention was involved in both Needelman and Campbell but was decided in neither, although the court's opinion in Campbell and the dissenting opinion refer to the problem. As I read that opinion, I do not consider that the court has handed down a mandate requiring you, at this time, to retain the original notes which you describe as having no practical value. Further

clarification of this point may arise during the course of the further proceedings on remand to the District Court in Campbell. " Bufile 62-104029-627.

Since the above two communications were received, the same question has been raised to the Department during oral conferences. Deputy Attorney General Katzenbach (then Assistant Attorney General, Office of Legal Counsel) and Assistant Attorney General Herbert J. Miller, Jr., Criminal Division, told Mr. Rosen and Mr. Parsons on 3/22/61, that the policy still held. Bufile 66-3286-949. On October 23, 1962, Mr. Foley, who is First Assistant to Assistant Attorney General Miller, and staff members of the Criminal Division recommended to Mr. Rosen, SA Dwight J. Dalbey and me no action be taken to change the policy on note retention until after we know more about what the Supreme Court will do in the Campbell case. On January 7, 1963, after we had learned that the Supreme Court would hear the Campbell case for the second time, Mr. Rosen again checked with Mr. Foley and was again told that no action should be taken pending the outcome of the Supreme Court decision, and that there was at that time no need for any reaffirmation of the established policy of destroying notes after the memorandum of interview has been prepared. Bufile 62-104029-633, 634, 635.

RECOMMENDATION:

None....for information.

SUBJECT: Destruction of Bureau Property -
MINIFON WIRE RECORDERS
(1 EACH #4, MODEL 5300 SN11320;
1 EACH #5, MODEL 5500 SN513554)

The above units, which are approximately eight years old, were tested for possible use and found to be defective. A representative of Fidelity Sound Company, Washington, D.C., has advised that the units are not economically repairable.

In 1958, the Bureau purchased several Minifon Wire Recorders Model P-55S and all of the older units, with the exception of the above listed units, have been destroyed. The Bureau currently has the capability of handling playback of recordings made on the old model Minifon Wire Recorder.

In view of the above, it is not recommended that these units be repaired.

ACTION:

Unless advised to the contrary, the above listed units will be destroyed and removed from inventory.

SUBJECT: DESTRUCTION OF BUREAU PROPERTY - GENERAL SUGGESTION #882-63 SUBMITTED BY MR. [redacted] ALBUQUERQUE OFFICE

b6
b7C

SUGGESTION: That unknown subject (unsub) files in the 52(Theft, Embezzlement, etc., of Government Property)(TGP) and 70(Crime on a Government Reservation) (CGR) classifications be added to the list of unsub cases which may be destroyed after they are five years old.

PRESENT PROCEDURE: Unsub cases in the 15(Theft from Interstate Shipment), 26 (Interstate Transportation of Stolen Motor Vehicle), and 87 (Interstate Transportation of Stolen Property) classifications may be destroyed after five years if there are no stops outstanding on them.

ADVANTAGES: Would achieve a substantial amount of filing space.

OBSERVATIONS: SAC Hawkins of the Albuquerque Office saw no reason why the unsub cases in these two classifications could not be handled as suggested and recommended adoption.

The General Investigative Division which has supervisory responsibility for the two classifications involved, commented that the current regulations concerning the destruction of unsub cases in the 15, 26, and 87 classifications have been in effect for about a year and one-half and have proved beneficial. Based on this experience they saw no reason why the suggested expansion should not be approved with the provisions that no case file in the suggested classifications should be destroyed if a capital offense were involved, or the case contained information of an intelligence-type, useful on a continuing basis, or if the case contained signed statements obtained from witnesses. With these exceptions, they recommended adoption of the idea. In arriving at this decision, they considered extending the practice to additional classifications but concluded that it would be

SUBJECT: SELECTIVE SERVICE
SUGGESTION #1001-63 SUBMITTED BY
MR. [redacted]
CINCINNATI OFFICE

Destruction of Bureau Property - Gen

SUGGESTION: That consideration be given to the destruction of classification 25 (Selective Service) files under the 10-year rule when the U. S. Attorney has ruled the registration as being fictitious.

CURRENT PRACTICE: Offices are authorized to destroy files in the 25 classification when 10 years old in those cases where the delinquency is not willful and also in those cases where office is not office of origin or the office of prosecution.

ADVANTAGES: The principal advantages would be saving of needed filing space and a reduction in the time required to review this classification for destruction.

OBSERVATIONS: SAC Mason, Cincinnati Office, recommended approval and a cash award if adopted. He advised the savings would be difficult to compute but there would be a saving of filing space and cost of filing cabinets.

The Special Investigative Division advised it had no objection to extending the present rules and regulations to include the destruction of files pertaining to fictitious registrants.

Training Division discussed this matter with the Files and Communications Division and no objection was posed to the adoption of this idea. Training Division feels this is worthwhile since these cases have been opened under a fictitious name and actually are unknown subject cases. When the 10-year period has elapsed no reason would exist for the retention of this material. As far as can be ascertained, the number of these cases is not such that any substantial amount of space or file cabinets would be saved; therefore, it is felt no cash award is warranted for this idea.

ADDENDUM RHA:jw 5-6-63

SPECIAL INVESTIGATIVE DIVISION b6 b7C

Mr. [redacted] suggests that consideration be given to destruction of files 10 years old in the Selective Service category wherein the United States Attorney has ruled that the registration is fictitious.

Current rules and regulations pertaining to destruction of Selective Service case files are set forth in Manual of Rules and Regulations, Part II, Section 3, page 13a. Offices are authorized to destroy files in the 25 classification when 10 years old in those cases where the delinquency is not willful and also in those cases where office is not office of origin or the office of prosecution.

The Special Investigative Division has no objection to extending current rules and regulations to include the destruction of files pertaining to fictitious registrants.

Destruction of Property

This file consists of 19 sections, was opened in 1943, and the last piece of mail is dated in 1948. There are numerous lists throughout the file of alien enemies deported from various countries in Latin America to be interned in the United States. The majority of these lists contains little or no identifying data. Examples of such lists are serial 620, which has approximately 1,000 references, and serial 241, which has approximately 1,450 references.

The Records Branch was recently authorized to deindex lists of names relating to repatriation matters where no derogatory information was set forth. See memo Mr. Short to Mr. Tavel on "Repatriation of Citizens During World War II," Bureau file #65-36220-2783. Inasmuch as these lists appear to have little or no value to the Bureau today and are similar to lists in the repatriation file, it is suggested that Records Branch be given authority to deindex lists of alien enemies interned in the United States when no derogatory information is given.

It is requested that the appropriate substantive supervisor review this file to determine if any reason exists for retention of the indexing on these listings of names. A notation advising of the decision reached may be placed on this memorandum. The memorandum should be returned to the Correlation Unit of the Records Branch, Room 6309 IB.

66-3286-

17 JUN 13 1963

RECOMMENDATION:

For referral to appropriate substantive division.

NFS:jam
(3)

ADDENDUM BY DOMESTIC INTELLIGENCE DIVISION: 6-12-63

RECORDS

Consultation between substantive supervisors handling German and Japanese cases and supervisors of Foreign Liaison Unit shows that no reason exists for continuing to maintain index cards on the above-mentioned World War II axis aliens who were deported from Latin America for internment in the US when no derogatory information is set forth concerning them. It is believed, therefore, that these names should be deindexed.

DESTRUCTION OF FILES
25 CLASSIFICATION

ALL INFORMATION CONTAINED
HEREIN IS UNCLASSIFIED
DATE 8-10-82 BY SP-4 2w jdg

Reference is made to your letter of June 24, 1963, under the same caption concerning instructions for the destruction of files in the 25 classification (Selective Service Acts of 1940, 1948 etc.), which were given during an inspection of your office. In relet you implied that these instructions are more restrictive than those set forth in the Manual of Rules and Regulations and stated that, unless advised to the contrary the less restrictive interpretation would be followed.

Current instructions pertaining to the destruction of Selective Service case files as set out in the Manual of Rules and Regulations provide for retention of conscientious objector files and allow for the destruction of zero files, files in which investigation disclosed delinquency was not willful, and files in which an office is not office of origin or office of prosecution.

These instructions are current and adequate but of course do not apply to cases involving other violations in addition to Selective Service, even though they happen to bear a 25 classification. It should also be noted that it is not necessary for a subject to be sentenced for a determination to be made that the case involves a willful delinquency. In this regard, all Public Law 431 and Public Law 414 cases involve willful delinquencies.

MAILED 27
JUL 8 1963
COMM-FBI

Consistent with the above observations, you may destroy 25 classification files in accordance with current instructions set forth in the Manual of Rules and Regulations.

NOTE: By letter dated 6/24/63, SAC Dallas advised that, UACB, he would follow instructions for the destruction of files in the 25 classification as contained in Manual of Rules and Regulations, Part II, Section 3 rather than follow more detailed instructions in this regard issued during an inspection of his office. The Special Investigative and Files and Communications Divisions considered the proposal of SAC Dallas and the consensus of their comments is set forth in the foregoing letter.

Re MRR II, 3, 13a.

The recent manual revision again calls to my attention the more detailed instructions issued during an inspection of this office limiting the destruction of 25 files. Those instructions were:

"If Dallas is Office of Origin retain file ONLY IF:

1. Wilful violator - actually sentenced
2. Conscientious Objector
3. Dual character cases
4. Public Law 431 cases
5. Re-employment cases
6. Prominent individuals, local or national
7. Muslim Cult of Islam cases
8. Cases involving other than Registrant
9. File is subject of Interesting Case write-up

If Dallas is NOT origin any file may be destroyed."

Since MRR would appear to make additional files eligible for destruction, the less restrictive interpretation will be followed UACB.

Letter SAC, Dallas to Director, FBI 6-24-63
RE: Destruction of Files
25 Classification

ADDENDUM:

Files and Communications Division believes that Dallas Division should destroy Selective Service Files in accordance with provisions of Manual of Rules and Regulations. Specific items set forth by inspectors for Dallas are the rules which are provided for clerical employees at the Seat of Government engaging in reviewing Selective Service Files for destruction. They are designed to give employees guidance in interpreting instructions that files not involving willful violation could be destroyed.

ADDENDUM RHA:jw 7-2-63

DESTRUCTION OF FILES
25 CLASSIFICATION

SPECIAL INVESTIGATIVE DIVISION

Dallas letter sets forth instructions given to Dallas during an inspection limiting the destruction of 25 files. Dallas letter implies these instructions are more restrictive than instructions set forth in the Manual of Rules and Regulations. SAC Dallas states, UACB, the less restrictive interpretation will be followed.

Current instructions pertaining to destruction of Selective Service case files as set out in the Manual of Rules and Regulations provides for retention of conscientious objector files and allow for destruction of zero files, files in which investigation disclosed delinquency was not willful and files in which office is not office of origin or the office of prosecution.

These instructions are current and adequate but of course do not apply to cases involving other violations in addition to Selective Service, even though they happen to bear a 25 classification. It should also be noted that it is not necessary for a subject to be sentenced for a determination to be made that the case involves a willful delinquency. In this regard all Public Law 431 and Public Law 414 cases involve willful delinquencies.

RECOMMENDATION:

It is recommended that SAC Dallas be advised he should destroy 25 classification files in accordance with current instructions set forth in the Manual of Rules and Regulations consistent with the above observations.

Dear Miss [redacted]

Your suggestion has been forwarded to me concerning the disposition of certain material in file. After careful consideration, it has been decided this proposal should not be adopted since this material is the only record at the Seat of Government regarding these investigations and is valuable for reference purposes.

Although this idea was not adopted, the interest you displayed in submitting it is indeed appreciated.

Sincerely yours,

J. Edgar Hoover

Director, FBI		Files & Communications

SUGGESTION

The Executive Conference in January of 1948 approved the destruction of Property synopsized reports in Closed A. E. A. and E. cases. (66-6200-116-799) It is suggested that remaining P. S. Q and letter to the field which are the only material remaining in file be destroyed.

ALL INFORMATION CONTAINED HEREIN IS UNCLASSIFIED DATE 9-16-82 BY SP4 EWM/acg

Current practice or rule (Include manual citation as well as facts)

Advantages of suggestion and annual savings (include basis for estimate)

1. Saving of space in the indices, abstract units and filing cabinets. (It is noted that the file jackets and clips take up more room than the contents of the file since file only contains the P. S. Q form.)

2. Since the index cards would be purged there would be a saving of time in Name Searching as there would be no reference to list.

3. Saving of time in File Review as there would be no reference to review.

4. Saving of time in Filing Unit as there would be no file to pull and deliver.

Disadvantages of suggestion

Not known.

SUBJECT: CUSTODIAL DETENTION
File 100-2
DESTRUCTION OF BUREAU RECORDS - MAJOR CASE

This file has been called to our attention by Records Branch personnel who advise that there is frequent reference to lists of names appearing in this file. In an effort to streamline procedures and eliminate unnecessary reference to this data, it is suggested that the material be deindexed through removal of the cards from the Bureau's indices.

Permission is requested to deindex the following references, a sample of which is attached for each type of list found. The sample reference is underlined.

OK 1. Outgoing letters to Navy or War Departments requesting information on individuals listed who were to be considered for custodial detention in event of a national emergency:

Serials	619	692	752	839	904X

#6-64 b6 b7C

Date: 6/28/63

To: Director, FBI

From: (Suggester's name)

Division of Assignment: CINCINNATI

SUGGESTION

It is suggested that consideration be given to the destruction of files in the 26 classification under a 10-year rule in those instances where the office is not the office of origin or office of prosecution. This might possible be carried a step further and include the destruction of all files in this classification under a 10-year rule with the exception of those of an important nature or having many ramifications. This suggestion would not affect the 5-year Unsub rule.

N/D
DESTRUCTION OF BUREAU PROPERTY

Current practice or rule (Include manual citation as well as facts)
The MRR II,3, page 13 states "Files and records in field divisions may be destroyed after they become twenty years old." It also states in this same section on page 13a that Unsub files may be destroyed when 5-years old if stops are not outstanding.

Advantages of suggestion and annual savings (include basis for estimate)

The adoption of this suggestion would release a substantial amount of filing space in the closed files section which is currently by these files of very little or no activity

ALL INFORMATION CONTAINED HEREIN IS UNCLASSIFIED DATE 8-10-82 BY SP4AW/acg SUPERVISION — I.T.S.M.V.

SUBJECT: SUGGESTION #6-64

Comments of the Files and Communications Division have been requested concerning the captioned suggestion by [redacted] of the Cincinnati Division which recommends that field files in the 26 classification be destroyed under a 10-year rule where the office is not the office of origin or the office of prosecution. b6 b7C

DESTRUCTION OF BUREAU PROPERTY

In past years there have been many suggestions similar to this concerning the destruction of field office files ranging from 5 years to the present 20-year retention period which were not adopted. In 1959 with the approval of the Executive Conference the retention period was decreased from 25 years to 20 years (SAC Letter 59-31), it being noted at that time that by reducing the retention period to 20 years by 1963 only replacement equipment would be needed in the field.

The present 20-year rule is arbitrary in nature and envisions that pertinent file material will be available for ready reference with rare exceptions. Archival approval would not be necessary inasmuch as the originals are on file at the Seat of Government.

Over the years some of the objections to the decreasing of the retention period to less than 20 years have been: (1) Considerable correspondence would be necessary between offices to check indices, not only in applicant and security of government employees' cases but in other cases as well. (2) Delays could result in some instances in meeting deadlines due to necessity of setting out leads to offices of origin to secure the necessary checks. (3) In some instances the auxiliary office file contains information not furnished through the office of origin or the Bureau, for example, an auxiliary office might conduct investigations and on authorization from the office of origin close the case administratively by memorandum for the file.

66-3286-
NOT RECORDED
136 JUL 23 1963

The Files and Communications Division would not oppose the adoption of this suggestion, but it is felt the opinion of the Training Division and the appropriate desks handling the classification should be obtained.

RECOMMENDATION:

For referral to the Training Division.

#2564

Date: July 11, 1963

To: Director, FBI

From: (Suggester's name)

Division of Assignment: Files and Communications

SUGGESTION

That the files in the 40 classification (Passport and Visa Matters) containing only Department of State check sheet and application form GH and BC (examples contained in files 40-64941 and 40-67451) be destroyed. Also that form GH or BC and Interdepartmental Visa Review Committee minutes reflecting nothing of a derogatory nature (examples in files 40-11573 and 40-38648) be destroyed. These 40 files run 19 years and more since their receipt in the Bureau and contain only the State Department check sheet and the application.

DESTRUCTION OF BUREAU PROPERTY

Current practice or rule (Include manual citation as well as facts)

These files are retained in Filing Unit. Main card on applicant or applicants is filed in General Index and abstracts are filed in Numbering and Service Units.

Advantages of suggestion and annual savings (include basis for estimate)

Approximately 50,000 files and 50,000 index cards relating to these files could be destroyed at substantial savings in space both in the file cabinets and in the index.

Eliminate listing of unnecessary 40 references on searching slips and subsequent file reviews.

RE: SUGGESTION

COMMENTS:

The Files and Communications Division favors the adoption of this suggestion. The destruction of the files indicated by the suggestion would result in considerable savings in the Filing Unit and the General Index Unit. More important, however, the elimination of these files would result in a savings of clerical time in the Name Searching and File Review Units because it would not be necessary to list or review such files.

This suggestion was previously considered on March 16, 1956, as Suggestion #611-56 (File #40-00-93). At that time the suggestion was not adopted because of the objections of both the Domestic Intelligence Division and the Investigative Division. These divisions then stated that information in the 40 classification files had occasionally been found useful in establishing identity in other Bureau files and for background data. Subsequently, on April 22, 1960, it was suggested and approved (Suggestion #738-60, File #40-00-147) that the sponsors of visa applicants in 40 classification files be de-indexed when no derogatory information was contained in Bureau files on these individuals. The Domestic Intelligence Division concurred in the adoption of this suggestion. This de-indexing has been completed and, therefore, the cards presently in the indices on this type of 40 classification files are only those on the subject of the file. The files in effect are already partially destroyed.

It is felt that the Domestic Intelligence Division and the Special Investigative Division may wish to re-examine their previous objections to the destruction of this material. If it is agreed that this suggestion should be adopted necessary congressional approval would have to be secured through the Archives prior to destroying this material.

RECOMMENDATIONS:

(1) For referral to the Training Division for appropriate consideration.

(2) That the comments of the Domestic Intelligence Division and Special Investigative Division be secured prior to considering this suggestion for adoption.

DESTRUCTION OF BUREAU RECORDS

SUGGESTION: That files in the 40 classification (Passport and Visa Matters) containing only Department of State check sheet and application form GH and BC (sample attached) be destroyed. Also, suggests that form GH or BC and Interdepartmental Visa Review Committee minutes (sample attached) reflecting nothing of a derogatory nature be destroyed. Some of the mail in these files was received 19 or more years ago.

PRESENT PROCEDURE: The files are retained in the Filing Unit and main cards on applicant or applicants are filed in the General Index Unit with the abstracts being retained in the Numbering and Service Units.

ADVANTAGES: Suggester advises there are approximately 50,000 files and 50,000 index cards relating to these files which could be destroyed at a substantial saving in space in the file cabinets and the index if this material could be destroyed. A saving of employee time would be realized since listing of unnecessary references on searching slips and subsequent file reviews would be eliminated.

OBSERVATIONS: Files and Communications Division favored adoption of this idea due to the advantages cited by the suggester.

The Domestic Intelligence Division was strongly opposed to adoption. This division pointed out these files still contain considerable identifying and background information concerning aliens who in the past have applied for permission to enter the United States. In our investigations involving the detection of Soviet illegals in the United States, the information in these files has been useful in enabling this division to obtain background and identifying data concerning various individuals and to distinguish between legitimate persons and those who are suspected as having entered the United States as illegals under fictitious identities. In view of the increased emphasis on the investigations of illegals, Espionage Section was definitely opposed to the destruction of this material.

Memo to Mr. Mohr
Re: Mail, Suggestion #25-64

The Special Investigative Division concurred with the views of the Domestic Intelligence Division that the files should be retained. These files are becoming more and more important in intelligence activities and on occasion they are used in Security of Government Employee applicant work in developing additional background and/or identifying data in cases.

The Training Division, due to the views expressed by the Domestic Intelligence and Special Investigative Divisions that these files do contain useful identifying and background material, agrees this material should be retained for use.

RECOMMENDATION:

That the suggestion not be adopted. On approval, no further action is necessary with regard to the suggester as she was thanked by prior letter.

VIEWS OF THE DOMESTIC INTELLIGENCE DIVISION RE: SUGGESTION #25-64

ADDENDUM — STREAMLINING COMMITTEE
DOMESTIC INTELLIGENCE DIVISION 7/15/63 GHL:nck

The Domestic Intelligence Division is still opposed to the destruction of these files which contain considerable identifying and background information concerning aliens who in the past have applied for permission to enter the United States. In our investigations involving the detection of Soviet illegals in the U.S., the information in these files has been useful in enabling us to obtain background and identifying data concerning various individuals and to distinguish between legitimate persons and those who are suspected as having entered the U.S. as illegals under fictitious identities. In view of the increased emphasis on the investigations of illegals, Espionage Section is definitely opposed to the proposed destruction of these files.

Domestic Intelligence Division recommends strongly that this suggestion not be adopted.

VIEWS OF THE SPECIAL INVESTIGATIVE DIVISION RE: SUGGESTION #25-64

SPECIAL INVESTIGATIVE DIVISION

Re: Suggestion 25-64

This suggests that files in the "40" classification (Passport and Visa Matters) be destroyed in those instances where the file contains no information of a derogatory nature. The views of Domestic Intelligence (DI) and this Division were solicited.

The suggestion has been discussed with representatives of DI and this Division concurs with DI's recommendation that the files be retained.

Note: DI advises these files are becoming more and more important in developing information relative to "illegal" espionage agents and in other intelligence activities. We on occasions make use of them in SGE/ applicant work in developing additional background and/or identifying data in our cases.

SUBJECT: SUPERVISION - ITSMV
SUGGESTION #6-64 SUBMITTED BY
MR. [redacted] CINCINNATI OFFICE

b6
b7C

DESTRUCTION OF BUREAU PROPERTY

SUGGESTION: In those instances where an office is not office of origin or office of prosecution, files in the "26" classification (Interstate Transportation of Stolen Motor Vehicle)(ITSMV) should be destroyed when 10 years old. This could be carried a step further and permit destruction of all files in this classification after 10 years unless they were important in nature or had many ramifications.

PRESENT PROCEDURE: Files and records in field offices may be destroyed after they become 20 years old although unknown subject (unsub) files in this classification and four others may be destroyed after five years provided: stops are not outstanding; a capital offense is not involved; the file contains no information of an intelligence type, useful on a continuing basis, or signed statements obtained from witnesses.

ADVANTAGES: Suggester feels elimination of these files would free a substantial amount of filing space.

OBSERVATIONS: SAC Mason of the Cincinnati Office recommended adoption.

The Files and Communications Division noted that many previous suggestions concerning the destruction of field office files had been considered and not adopted for reasons such as considerable correspondence between offices to check indices would be necessary in some cases; delays in meeting deadlines might result due to the necessity of setting out leads to offices of origin for necessary checks; in some instances, such as discontinuance, where office of origin has closed case administratively, Bureau would not have information in its files.

66-3286-
NOT RECORDED
125 JUL 25 1963

They commented that the present 20-year rule is arbitrary in nature and envisions that pertinent file material will be available for reference with rare exceptions. However, archival approval would not be necessary since originals are on file at the Seat of Government. They stated they were not opposed to the suggestion provided the ITSMV desk approved.

Manual of Rules & Regulations
Revised

JUL 23 1963

SEE PAGE TWO

cc-66-1934

ORIGINAL FILED IN 26-0

Memo to Mr. Mohr
Re: Suggestion #6-64

The General Investigative Division favored adoption of that portion of the suggestion which proposed destruction of "26" cases when office was not origin or office of prosecution. They stated that the great majority of these cases contain results of investigation by auxiliary offices relating to interview of the owner of the stolen car and neighborhood investigations to determine circumstances of the theft. This information is available in complete form in the office of origin's file.

However, they opposed the extension of this practice to all files in this classification except those "of an important nature or having many ramifications" as being too general in nature and offering no set criteria for choosing the files to be retained or destroyed.

The Training Division notes that the Manual of Rules and Regulations (Part II, Section 3, item D, 8, b (1)(c) on page 13a, now provides for the same type of destruction as proposed in the "25" (Selective Service Act, etc.) classification with the exception of conscientious objector cases. Therefore, Training Division agrees with views of General Investigative Division and adds the provision that no file containing signed statements obtained from witnesses should be destroyed. General Investigative Division agrees to this.

RECOMMENDATIONS:

(1) That the suggestion, only as it applies to "26" files where office is not origin or office of prosecution, be adopted and enclosed letter be sent to suggester. Receipt of the idea was acknowledged by prior letter.

(2) On approval, this memorandum will be authority for the Manuals Desk, Training Division, to make necessary manual revisions.

SUBJECT: REHABILITATION PROGRAM
RECORDS BRANCH

Destruction of Bureau Property

DESCRIPTION OF FILE: 66-2542-sub 2 (subs for Field)
INFORMATION RE CONFIDENTIAL INFORMANTS IN PLANTS

Reference is made to memorandum from Mr. Short to Mr. Tavel, dated July 19, 1963, pointing out the material in the confidential plant informant file accumulated during World War II is outdated and recommending that the file be reviewed and the obsolete material be destroyed. In the alternative, it was suggested that if it is not feasible to destroy the mail and all the index cards that the card on the plant where the informant was located and the card on the informant's symbol be destroyed.

Under the Plant Informant Program, which was in effect during World War II, an individual communication was submitted to the Bureau by the Field Office setting forth the name of the plant informant, symbol number, name of the plant and background information. These communications were indexed and recorded at the Bureau and also maintained in the Plant Informant Index on the Security Informant Desk. Subfiles were opened for each field office. At the end of World War II and at the discontinuance of this particular Program, the index cards in the Security Informant Index were destroyed. The mail and index cards in the general index were retained.

Since these communications contain background information on individuals who at one time were helpful, this information should be retained in our files in the event of name checks and for reference purposes. It is suggested, therefore, that the mail not be destroyed and the general index cards on the individual plant informants be retained. The Domestic Intelligence Division agrees, however, that the index cards on the symbol numbers and the index cards on the plants are of no current and future value and may be de-indexed and destroyed.

L. E. SHORT

REHABILITATION PROGRAM
RECORDS BRANCH

DESCRIPTION OF FILE: 66-2542-sub 2 (subs for Field)
INFORMATION RE CONFIDENTIAL INFORMANTS IN PLANTS

The attached file has been called to our attention by personnel of the Consolidation Unit. The material in this file concerning informants used in plants during the war (period from 1942 to 1944) is outdated and there appears to be no reason for its continued retention. In an effort to provide file space for current cases, it is proposed that the file be reviewed and obsolete material destroyed.

If it is not feasible to destroy the mail and all of the index cards, it is suggested that the cards on the plant where the informant was located, and the cards on the informant symbol be de-indexed and destroyed.

It is requested that the appropriate substantive supervisor review the above listed file to determine if any reason exists which would preclude destruction. A notation advising of the decision reached may be placed on this memorandum and returned to the Consolidation Unit of the Records Branch, Room 7231.

RECOMMENDATION

For referral to the appropriate substantive Division.

NOTE CONTINUED

May, 1962, not adopted. Present regulations provide for destruction of files in field after they become twenty years old; however, a list is kept at the beginning of each classification of files destroyed and date destroyed. In some instances such as in the 25 classification, certain files may be destroyed when ten years old and reason for destruction placed on file front of consolidated volume beneath file numbers. This procedure is being proposed for use when files are destroyed after twenty years of age. Usually, an entire file is not destroyed due to the 20-year rule. Certain portions of an important nature or cases having many ramifications must be retained. In such cases, information could be placed on file fronts as proposed; however, when complete file has been destroyed it would be necessary to file the file front with files listed thereon. Maintaining a list at beginning of classification preferred to filing these file fronts which take up unnecessary space. Training Division recommends suggestion not be adopted.

SUGGESTION When files are destroyed after twenty years old, write on the consolidated volume, under file numbers, "All files destroyed with the exception of the enclosed per MRR, and the current date."

EP

0 Destruction of Bureau Records - General

JUL 22 1963

Current practice or rule (Include manual citation as well as facts)

MRR II-3-13-8A. "Keep at beginning each classification list of files destroyed and date destroyed."

Advantages of suggestion and annual savings (include basis for estimate) This would eliminate the extra handling of a list at the beginning of each classification and establish a simple uncomplicated method of filing. Over a period of years the first volume in any classification may have the notation: "26-1 thru 26-700

ALL FILES DESTROYED WITH THE
EXCEPTION OF THE ENCLOSED PER MRR 7/18/63"

If any reason should come up that the date of destruction need be known the last date of destruction in the file should suffice.
In larger offices where the volume of destruction is much greater the numbers may read 26-1 thru 2000. This may become overbearing and perhaps one file front could be placed in front of the classification showing files destroyed up to the next file being maintained. The next file would show 26-2001 thru 26-2050. (continued on attached)

ALL INFORMATION CONTAINED HEREIN IS UNCLASSIFIED DATE 8/20/82 BY SP4AW/dcg

ST 1CR

Destruction of Bureau Records - Gen.

*As far back as 1924 the Department of Justice began furnishing to the Bureau periodically lists by names of United States Attorneys, Marshals, Judges, and Commissioners as well as the clerks of court for the various judicial districts in the United States. This material was processed into files appropriately captioned according to the subject matter (United States Attorneys, etc.) with some indexing and in certain cases copies prepared for the administrative file covering the particular judicial district. The files have since become obsolete and no longer serve any useful purpose as information contained therein is always available on short notice through inquiry in the Department of Justice. Many of the officials involved are no longer in office and may even have passed away. **The files have been inactive since 1954.***

In addition to the above we have current files on the individual judicial districts which reflect the attorneys, judges, etc. holding office in those particular districts. The latter mentioned files provide adequate information for correspondence purposes, but it would require verification through the Department of Justice in order to determine the current official's name.

A review of the files containing the list of officials could very safely be deindexed through purging and the majority of the material destroyed, thus, the recommendation that the Consolidation Unit completely review the files in question for purposes of purging obsolete material contained therein.

RECOMMENDATION:

*In view of the above it is recommended the captioned files be reviewed by the Consolidation Unit and their views submitted as to purge and destruction of material contained therein. **A sample file is attached.***

SUBJECT: NATIONAL STOLEN PROPERTY INDEX
SUB FILES OF 87-290
Destruction of Mail

ALL INFORMATION CONTAINED HEREIN IS UNCLASSIFIED DATE 8-10-82 BY SP-4 FLW/dcg

Bureau Records - General

It is suggested that Police Bulletins filed in sub files of 87-290 be destroyed when the cards are destroyed. The present rule for the National Stolen Property Index (NSPI) permits the destruction of cards after three years with the exception of cards on firearms and securities issued by foreign corporations. (This includes stocks, bonds, travelers' checks, etc.) Mail over three years old on which the index cards have been destroyed should also be destroyed since no reference will be made to this mail.

The following examples are attached:

(1) 87-290-38-1, Section 1, which has 150 serials. Only 22 serials have indexing which has been retained in the NSPI.

(2) 87-290-38-1, Section 2, which has 150 serials. Only 14 serials have indexing which has been retained in the NSPI.

Since sub files of 87-290 occupy fourteen cabinet drawers, destruction of this mail would result in the saving of considerable file space.

Authority has previously been granted to destroy obsolete forms submitted by the Milwaukee, Wisconsin, Police Department relating to searches of recovered guns in the NSPI which developed no information. See memorandum from L. E. Short to Mr. Tavel dated 3-5-62, filed as 87-290-51-2-3316, which is also attached.

SEE ADDENDUM OF THE TRAINING DIVISION ON PAGE TWO

ORIGINAL FILED IN 87-290-

ADDENDUM JPJM:raw 7/29/63

The Records Branch referred to the General Investigative Division a suggestion that Police Bulletins be destroyed when index cards relating to matters carried in those bulletins are destroyed. Specifically this relates to index cards in the National Stolen Property File and Police Bulletins which advise of losses.

COMMENTS

When the National Stolen Property Index Card is destroyed, in accordance with Bureau policies, there is no way to trace property to a bulletin or to correspondence and therefore maintenance of the bulletins serves no purpose relating to the National Stolen Property Index.

RECOMMENDATION

It is recommended that the General Investigative Division raise no objection to the destruction of unindexed Police Bulletins which serve no practical purpose for this Division. It is recommended that this addendum and the memorandum from Mr. Short to Mr. Tavel be forwarded to the Files and Communications Division for their action in disposing of the Police Bulletins. It is suggested that this memo be routed through Training Division for its views.

ADDENDUM OF THE TRAINING DIVISION, JER:pab (8-2-63)

The Training Division has no objection to destruction of the material as proposed.

RECOMMENDATION:

That this be forwarded to Files and Communications Division.

TO : Director, FBI DATE: 7/19/63

FROM: SAC, Kansas City (66-1608)

SUBJECT: DESTRUCTION OF Bureau FILES AND RECORDS

Mr. Tavel

The Kansas City Office is maintaining two voluminous files which are utilizing eight file drawers of space. One is the MATNAP case, Bufile 7-1820, of which Kansas City has 65 volumes with correspondence over 20 years old. There is additional correspondence in this case which consists of 630 serials covering the period from July 1943 to the present. Kansas City has had no investigative activity in this matter since July 1958.

The other case consisting of 29 volumes of material over 20 years is the BREKID case, Bufile 7-576. There are 57 serials in this matter covering the period of July 1943 to July 1963. The Kansas City Office has had no investigative activity in this matter since July 1959.

It is requested this office be granted authority to dispose of the volumes of records in these two matters which are over 20 years old.

UACB 7/30/63 this will be done.

Director, FBI	[redacted]	DOD

SUGGESTION

It is suggested that the Legal Attaches advise the FBI Laboratory of the destruction of key lists on the first of each month, and receipt of key lists every three months by Routing Slip rather than by cable.

Destruction of Bureau Records

Current practice or rule (Include manual citation as well as facts)

Current practice is to advise of destruction of key lists and receipt of key lists by cable.

Advantages of suggestion and annual savings (include basis for estimate)

This would save sending 16 cables per year by each Legal Attache. In the case of the receipt of key lists every 3 months, the address label of the envelope containing them is returned to the Laboratory, and if the "Invoice of Contents" were returned at the same time showing the serial numbers, this would serve the same purpose as sending an encoded cable.

Destruction of Bureau Property

As an outgrowth of the Bureau's investigative activities in South America during World War II, we accumulated 44 1/2 file cabinets (178 file drawers) of file material referred to as Special Intelligence Service (SIS) files that are for the most part inactive yet occupy valuable space in our file room.

As originally set up, the SIS files were maintained separately from the regular files, and under a unique system of classification activities in the various countries were broken down into sub files covering such matters as political, economic, social conditions, plant surveys, etc. There were also breakdowns with nationality designations covering German, Japanese, Italian, Spanish, communist, etc., activities. In addition to the investigative files, there are also voluminous records on administrative matters such as training, living conditions, radio stations, embassy files and the like. Many of these files, particularly those involving personnel matters and ordinary administrative matters, were consolidated into the Bureau's regular files system in 1944 when the Records Branch assumed custody of the files.

Because of the consistent lack of reference to most of these files in recent years, a survey extending over a period of one month was made to determine the actual usage of SIS files and the value of the information if any contained therein. During the survey, a number of files were charged out; however, only 14 proved to be of any value to the requesting supervisor and these were contained in either (1) confidential informant files (2) files on countries in which we presently have Legal Attaches (3) or the communist sub files. It is accordingly, believed that most of these files can now be destroyed with the probable exception of the categories listed;

68 MAR 25 1964

CRIMINAL FILES 64-4104-1070

namely, those SIS files on confidential informants, communists activity sub files and administrative files on the countries in which we presently have Legal Attaches.

If approved, it is suggested that someone from the Domestic Intelligence Division preferably with a background in SIS work be designated to review a sampling of these files in order to confirm the views of this division as to their ultimate destruction. The Records Branch will make available sample files in any manner desired and provide whatever other assistance is required in order to help resolve questions and minimize the work involved. Archival authority will also be necessary before the records may be finally destroyed and this will be handled by this Division at the appropriate time.

RECOMMENDATION:

That a representative from the Domestic Intelligence Division review whatever files are believed necessary in the SIS collection with a view towards their ultimate de-indexing and destruction.

To: Director, FBI

From: Legat, Rome (66-79)

Subject: INTERESTING CASE WRITE-UPS

ALL INFORMATION CONTAINED HEREIN IS UNCLASSIFIED DATE 8-27-82 BY SP4 AWB

ReBulet 10/15/59.

In order to keep at a desirable minimum the volume of the files maintained by Legat, Rome, this office desires to institute a destruction program concerning Interesting Case Write-Ups.

As noted in referenced Bureau letter, this office now receives two copies of each Interesting Case Write-Up prepared at the Bureau.

Experience in this office has shown that for all practical purposes, one copy of each Interesting Case Write-Up is sufficient.

UACB, therefore, this office will, on an annual basis, beginning 9/30/63, destroy one of the two copies of each Interesting Case Write-Up received which has been in the possession of this office for at least one year.

SUGGESTION It is suggested that files in classification 26 be destroyed when 3 years old, when the destroying office is not office of origin, office is not office of prosecution and when the file contains no signed statements from witnesses. It is suggested that the index cards for the subjects of these files be stamped:

File Destroyed
Office of Origin_____

The Indices clerk would insert the office of origin on the index card.

Reference is seldom made to these files after the cases are RUC'd. In the event it were necessary to get information from the file, the office of origin could be contacted.

Current practice or rule (Include manual citation as well as facts)
Manual of Rules and Regulations, Part II, Sect. 3, para 9b (2). Classification 26 and index cards relating thereto be destroyed when ten years old, when certain qualifications are met.

Advantages of suggestion and annual savings (Include basis for estimate)

Considerable saving in space.

UNRECORDED COPY FILED IN 26-00-1

It is the opinion of the ITSMV Supervisor, New York Office, that this suggestion is feasible as applied to ITSMV cases which are closed in the UNSUB status (now destroyed in five years). The suggestion could be extended to origin cases too, in the UNSUB category. Once a case is closed, in ITSMV character, without identifying the subject it is practically a certainty that the case will not be reopened unless the same vehicle is stolen again, in which instance it is highly improbable that the thief would be the same person. It would be a very unusual case where a signed statement would exist in an UNSUB, ITSMV case.

The Administrative Division of New York Office recommends that this suggestion receive favorable consideration; ie, that files on closed known-subject ITSMV cases be destroyed by auxillary (non-prosecutive) offices in 3 years and that a closed UNSUB, ITSMV files be destroyed by origin and auxillary offices at the end of a three year period.

It is estimated that there are approximately 100 files per month in these categories in New York Office. By implementing this procedure now, approximately 3,000 files could be destroyed immediately.

ALL INFORMATION CONTAINED HEREIN IS UNCLASSIFIED DATE 8-10-62 BY SP-4 EW/dcc

SUBJECT: GERMAN SABOTEURS
98-1040

DESTRUCTION OF BUREAU PROPERTY

Bureau letter to all Special Agents in Charge, Number 149, Series 1942, dated 11-11-42 (98-1040-114) requested that they review Internal Security, Espionage, Sabotage, and other National Defense files and prepare a list of those Germans who had returned to Germany during the previous five years.

Bureau letter to all Special Agents in Charge, Number 250, Series 1944, dated 9-21-44 (98-1040-252) indicated that the Bureau no longer desired the names of Germans who had returned to Germany and that this project was to be discontinued.

In an effort to streamline procedures and eliminate unnecessary reference to this data it is suggested that the lists of Germans who returned to Germany be deindexed through removal of the cards from the Bureau's indices. For examples see serials 131, 134, 137, 138, 139, 231, 233, 239, 241, 242, 244, 248, and 251. It is noted that some of these lists contain the names of individuals who returned to Germany and subsequently re-entered the United States (see serials 134 and 233). It is being suggested that these names also be deindexed unless some derogatory information is given.

ORIGINAL FILED IN 98-1040-256

It is requested that the appropriate substantive supervisor review this file to determine if any reason exists for retention of the indexing as described. A notation advising of the decision reached may be placed on this memorandum. The memorandum should be returned to the Correlation Unit of the Records Branch, Room 6309 IB.

SUBJECT: SUGGESTION #149-64 Destruction of Bureau Property - GEN

Comments of this division have been requested concerning proposal to destroy files in the 26 classification when the files are three years old, when the destroying office is not office of origin, when offices are not office of prosecution and when the files contain no signed statements. New York Office suggests expansion of the suggestion to include origin cases in the unknown subject category. Further, the New York Office recommended that the suggestion be further expanded to include closed known subject cases in auxillary offices.

Suggestion 6-64 concerning the destruction of files in this classification was recently considered by the Bureau and adopted. This suggestion, which was processed in July of this year, permits the destruction of files by auxillary offices when 10 years old. In view of the recent adoption of Suggestion 6-64 it is not believed that Suggestion #149-64 should be considered favorable at this time until a sufficient period has elapsed to determine if problems or unnecessary work may arise from the adoption of the 10-year destruction program.

RECOMMENDATION:

For referral to the Training Division.

VIEWS OF THE GENERAL INVESTIGATIVE DIVISION RE: SUGGESTION #149-64

ADDENDUM - GENERAL INVESTIGATIVE DIVISION WGC:kak 9/5/63

b6
b7C

Supervisory Clerk [redacted] suggestion proposes destruction of all 26 classification (ITSMV) files after three years by auxiliary offices wherein the auxiliary is not office of prosecution and file contains no signed statements. She also proposes that the index cards for subject of these files be stamped to show that file has been destroyed and identity of office that was origin in the case. As an addendum, the ITSMV supervisor at New York states above suggestion believed feasible and proposes that it be expanded to include unknown subject origin cases also. The Administrative Division, New York Office, endorses the original suggestion and expands it to include auxiliary office files in unknown subject cases. The specific recommendation of SAC, New York is not set forth.

The question of file destruction by field offices in the 26 classification was last considered by the Bureau in July, 1963. At that time, the proposal was adopted that files in known subject cases could be destroyed by auxiliary offices after ten years. The regulation that unknown subject case files could be destroyed after five years in both origin and auxiliary offices, where certain requirements were met, was not changed. The effect of the change made in July, 1963, with regard to reducing filing space required for these files has not had time to be demonstrated.

The known subject files at office of origin in most instances will contain information that is not available in the Bureau file. It is, therefore, believed that the present ten-year rule on this category should not be disturbed.

The advantage of reducing the period of retention of unknown subject auxiliary office 26 files from the present five years to three years would appear negligible, and not worth the substantial clerical task of reviewing each file and stamping each index card in the manner proposed in this suggestion.

Based on the above considerations, it is recommended that suggestion not be favorably considered.

memo copies to Mohr 9-11-63 mlm

VIEWS OF THE INSPECTION DIVISION RE: SUGGESTION #149-64

ADDENDUM:

INSPECTION DIVISION
TDWestfall:cmv
9/4/63

The Inspection Division has evaluated both the suggestion of [redacted] and the suggestion of the Administrative Division of the New York Office and is opposed to the adoption of either suggestion.

b6
b7C

The suggestion of Miss [redacted] that files in classification 26 be destroyed when 3 years old, when destroying office is not office of origin or office of prosecution and when file contains no signed statements from witnesses would have the advantage of the destruction of the number of files but also have certain disadvantages. The major disadvantage is that past experience has shown that car thieves are often repeaters, and the information contained in office files may become vital to the instantaneous investigative action necessary in a future case.

The suggestion of the Administrative Division of the New York Office that unsub cases 3 years old be destroyed is not sound in that the Federal Statute of Limitations does not bear ~~possession~~ prosecution until 5 years have elasped, and certainly the facts gathered during investigation should be maintained until the Statute has run. There have been many instances in the past year where a conscience-stricken subject has come to the FBI and confessed a crime within the Bureau's jurisdiction. Should the field office file pertaining to such a crime be destroyed, it would create a number of problems as so far as FD 302's, etc., are concerned.

Based on the above reasons, the Inspection Division recommends against the adoptions of these suggestions.

Bureau Property - Gen'l

SUBJECT DESTRUCTION OF MAIL DELIVERY RECEIPT CARDS, RELATED LOGS AND RECORDS AFTER 90 DAYS

ALL INFORMATION CONTAINED HEREIN IS UNCLASSIFIED DATE 8-10-82 BY SP4 Tew/dcg

The purpose of this memorandum is to recommend the destruction of a ten-year accumulation of mail delivery receipt cards and related records that are presently occupying valuable space in our file room, and which have never been referred to since the inception of the regulation in 1953 requiring their permanent retention. (Prior to 1953, these records were maintained for 90 days.)

As a result of an incident that occurred in 1953 in the Harry Dexter White Case, when the Bureau sent a letter to General Vaughan at the White House which the general denied receiving, we have been permanently keeping all mail delivery receipt cards and related logs and records. The theory, of course, is that these records will prove actual delivery to an individual of each piece of Bureau mail sent by special messenger, courier or through U. S. postal channels where the material is registered.

We now have accumulated 5.56 cubic feet of these records which completely occupy four of our large bulky enclosure storage bins in the file room. Under present regulations, they will continue to accumulate and occupy more and more valuable space even though during the entire ten-year period we have never referred to or utilized any part of this large mass of record material. It is also pointed out that even with these records an identical situation could still occur as happened in the Harry Dexter White Case because the recipient could still deny that he personally ever received a particular communication from the Bureau. This obviously occurs because both our delivery system and the postal service only delivers mail to the agency mail room or courier service where it is signed for by some minor clerical employee. Therefore, in the light of our experience in the past ten years and the fact that such a procedure as this will continue to unnecessarily eat up valuable space in our file room, it is recommended that we revert to the old procedure of retaining these records only for 90 days in order to insure that normal tracing action can be taken where there is some question concerning the delivery or nondelivery of Bureau mail.

SUBJECT: DESTRUCTION OF BUREAU PROPERTY - GENERAL
SUGGESTION #149-64 SUBMITTED BY
MISS [redacted] NEW YORK OFFICE

b6
b7C

SUGGESTION: That Interstate Transportation of Stolen Motor Vehicle (ITSMV), classification 26, files be destroyed when three years old when the destroying office is not office of origin, office is not office of prosecution and when the file contains no signed statements from witnesses. Suggests index cards for the subjects of these files be stamped:

File Destroyed_____
Office of Origin_____

The indices clerk would insert the office of origin on the index card. Suggester notes reference is seldom made to these files after the cases are referred upon completion to the office of origin and in event it is necessary to get information from the file, the office of origin could be contacted.

CURRENT PRACTICE: Files in this classification may be destroyed when ten years old provided office is not office of origin, office is not office of prosecution, file contains no signed statements from witnesses.

ADVANTAGES: Saving of filing space in all field offices.

OBSERVATIONS: The ITSMV supervisor, New York Office, felt this idea feasible for ITSMV cases which are closed in the unknown subject category (now destroyed in five years) and could be extended to origin cases also in the unknown subject category. The Administrative Division, New York Office, recommended files on closed known subject ITSMV cases be destroyed by auxiliary offices in three years and that closed unknown subject files in this category be destroyed by office of origin and auxiliary offices at the end of the three-year period.

Files and Communications Division recommended suggestion not be adopted since the ten-year rule for destruction in these cases was only placed into effect in July, 1963, at which time this matter was very carefully evaluated. This division felt a sufficient period of time should be allowed to elapse to determine if problems or unnecessary work may arise from this procedure before any further action is taken in this regard.

The General Investigative Division was opposed to adoption. It was pointed out that known subject files at office of origin in most instances will contain information that is not available in the Bureau file. Present ten-year rule should not be disturbed at this time since the effect of this change with regard to reducing filing space required has not had time to be demonstrated. The advantage of reducing the period of retention of unknown subject auxiliary office 26 files from the present five years to three years would appear negligible and not worth the substantial clerical task of reviewing each file and stamping each index card in the proposed manner.

The Inspection Division also opposed adoption. This division noted the major disadvantage is that past experience has shown that car thieves are often repeaters and the information contained in office files may become vital to the instantaneous investigative action necessary in a future case. The proposal of the Administrative Division, New York Office, concerning destruction of unknown subject cases when three years of age is not sound in that the Statute of Limitations does not bar prosecution until five years have elapsed and certainly the facts gathered during investigation should be maintained until the Statute has run out.

The Training Division agrees with the above-expressed views of the interested divisions. Since the ten-year rule was so recently adopted, it is felt a sufficient period of time should elapse under this regulation to provide a basis for further action, if advisable. Field offices have not had this regulation in effect long enough to see how much space will be saved by this rule and what problems may be encountered in this procedure.

RECOMMENDATION: That the suggestion not be adopted. On approval, no further action is necessary with regard to the suggester as she has been thanked by prior letter.

ASAC CHARLES G. CUSICK
SAVANNAH OFFICE

ALL INFORMATION CONTAINED HEREIN IS UNCLASSIFIED DATE 8-10-82 BY SP4 2W/dcg

Destruction of Bureau Property - General

SUGGESTION: That consideration be given at the time of consolidation of files to destroying identification records which have been incorporated into investigative reports and placing a note to that effect on the following serial. As an example, if serial 10 is the identification record and serial 11 is a letter, notation would be placed on serial 11 that serial 10 was an identification record and that it had been destroyed. Consideration might also be given to destroying individual serialized identification records in all cases whether set out in report or not and making notation as mentioned above.

CURRENT PRACTICE: Copies of all serials must be retained in a file.

ADVANTAGES: Suggester feels many identification records are being retained unnecessarily since a permanent up-to-date identification record is always available at the Seat of Government if it should be needed. Proposed procedure would save considerable space throughout the Bureau during consolidation of files.

OBSERVATIONS: SAC Jamieson, Savannah Office, advised this proposed procedure would result in a saving of a substantial amount of space and recommended favorable consideration.

66-3286-
NOT RECORDED
199 SEP 18 1963

The Identification Division had no objection to the suggestion and, in fact, felt it was good. This division did not believe that requests for identification records would substantially increase if the suggestion were placed into effect.

Files and Communications Division advised it appeared this procedure would have field-wide application and would save some filing space. The idea is not, however, applicable to files at the Seat of Government. While this division posed no objection to the field destroying any or all of the identification records in field files, it was noted that the field might find it useful to retain an identification record in a field file if it has not been set out in an investigative report. Accordingly, it was recommended that when consolidating field files the field be allowed to destroy only those individual

Re: FILES
SUGGESTION #144-64 SUBMITTED BY
ASAC CHARLES G. CUSICK
SAVANNAH OFFICE

identification records that have been set out in subsequent investigative reports.

Inspection Division and Training Division agree that this suggestion should not be adopted. There are occasions when dispositions of arrests are not included on the identification record and the field office must make a request of local law enforcement agencies by use of Form FD-10 (copy attached), for this information. A notation is made on the identification record that this action has been taken. Upon return of the FD-10, pertinent information is noted on the identification record. However, a report may have been written in this case with the identification record set out before the requested dispositions have been received from the law enforcement agencies.

The indentification record is the only place in file where this information will appear. In making file reviews regarding subjects or suspects, this information may be needed. It is felt these records should be retained for this reason.

RECOMMENDATION: That the suggestion not be adopted. On approval, no further action is necessary with regard to the suggester as he has been thanked by prior letter.

SUBJECT: DESTRUCTION OF FILES AND RECORDS
MATNAP, BUFILE 7-1820
BREKID, BUFILE 7-576

ALL INFORMATION CONTAINED HEREIN IS UNCLASSIFIED DATE 8-10-82 BY SP-4 ELW/dcg

Reference is made to Kansas City letter 7-19-63.

Referenced letter requested authority to dispose of files in captioned cases in the Kansas City Office. Destruction authority is requested only on that material in these files which are over 20 years old. Kansas City advises there are 65 volumes with correspondence over 20 years old in the MATNAP case and 29 volumes of material over 20 years old in the BREKID case.

The Manual of Rules and Regulations, Part II, Section 3, Page 13 provides authority for field divisions to destroy field files after they become 20 years old. However, Bureau authority is required in cases of an important nature. The Files and Communications Division has no objection to the destruction of files described by the Kansas City Office. However, since these are cases of an important nature policy considerations are in order. Therefore, it is recommended that the views of the Investigative Division by obtained.

It should be noted that the files will be destroyed by Kansas City UACB 7-30-63.

RECOMMENDATIONS:

(1) That this matter be referred to the Investigative Division.

See addendum, General Investigative Division page 1A.

(2) After the Investigative Division has considered the request, this matter should be referred to the Inspection Division.

UNRECORDED COPY FILED IN

ADDENDUM: GENERAL INVESTIGATIVE DIVISION 7/25/63 JAC:hw

The Matnap case in which Seattle is office of origin remains unsolved and is still under investigation. Accordingly, the General Investigative Division recommends that Kansas City continue to retain all volumes of this file.

The Brekid case has been prosecuted; however, one of the primary ringleaders Alvin Karpis is still incarcerated in the McNeil Island Penitentiary on the life sentence he received. The General Investigative Division recommends that Kansas City continue to retain all volumes of this file.

ADDENDUM OF INSPECTION DIVISION July 26, 1963 JHG:wmj

The Inspection Division feels there is no point in having auxiliary offices such as Kansas City retain all volumes over 20 years old in the MATNAP case. Of course, the Office of Origin, Seattle, should retain all volumes and thereby be in a position to furnish any old background data to an auxiliary office if the remote possibility occurs that the auxiliary office needs same. If Kansas City has any material of evidentary value or any statements or memoranda of significance which Seattle does not have, this should, of course, be retained. With respect to BREKID, the case has been prosecuted. If some problems arise, we have copies of all reports at the Seat of Government and the matter could be resolved by reference to these files. Of course, any signed statements, documentary evidence or memoranda not in possession of the Bureau should be retained.

We are having a tremendous problem in many of our field offices with respect to space, which is materially being affected by the accumulation of records. It is imperative that we destroy as many old records as logical and practical. To do otherwise is a waste of space and file cabinets, both of which are expensive. It is my suggestion that an SAC Letter be prepared permitting all offices to destroy their files in these cases except the Office of Origin. However, it is also felt that auxiliary offices should not destroy signed statements, important memoranda or evidentiary material not in possession of the Office of Origin.

Airtel to KC 7/26/63. Hold destruction for further consideration. FWW

Being handled by Insp. Div.

I take up w/ Exec. Conf. 7/26.

Director, FBI	[redacted]	NEWARK

SUGGESTION

It is suggested that when Criminal Cases are closed that all copies of the FD-302's which have never been utilized in a report or sent to another office with the exception of the original and any copy reflecting indexing be destroyed at that time, inasmuch as they will be destroyed in six months time. It is to be noted that all Criminal Cases are consolidated six months after they have been closed, and at that time all copies are destroyed per Bureau instructions.

DESTRUCTION OF BUREAU MAIL - GENERAL

Current practice or rule (Include manual citation as well as facts)

Manual of Rules and Regulations, Part II Section 3 Page 11c sets forth how to handle excess copies of inserts and FD-302's when utilized in a report, but does not show the disposition when not used in a report.

Advantages of suggestion and annual savings (include basis for estimate) (con't)

This would save numerous clerical employees and supervisors time in minimizing the extra work in handling the FD-302's. These files would be more readily available for all personnel in following above procedure.

Current practice or rule (include manual citation as well as facts)

The Newark Office currently practices the following: 1. The closed serializer destroys all copies with the exception of one copy of the FD-302. Original is always maintained. 2. Closed serializer date stamps one copy and then routes the FD-302 with the file to the appropriate supervisor for his initials. 3. The FD-302 is returned to the closed files unit from the supervisor. 4. The closed serializer than matches the carbon copy with the original FD-302 previously filed.

SUBJECT: Destruction of Bureau Property - Gen.
EAST BERLIN TELEPHONE DIRECTORY
PARTS I AND II, MAY, 1958

One set of captioned publication has been retained in the Foreign Liaison Unit since 1958 because the Bureau Library had no secure facility for this classified material. This was authorized in memorandum M. A. Jones to Nease, 8/12/58.

We have consulted the Espionage and Nationalities Intelligence Sections regarding the current need for the set kept in Room 850 RB and find that neither of these Sections has further interest in this material. Supervisor Papich advises that no purpose would be served by returning it to CIA where it was originally prepared. Accordingly, we are destroying the two volumes which have been maintained by the Foreign Liaison Unit.

DESCRIPTION OF FILE: 94-1-704
ACKNOWLEDGEMENTS OF COPIES OF
DIRECTOR'S SPEECH MADE JUNE 21, 1939

The attached file has been called to our attention by personnel of the Consolidation Unit. A good part of the material in this file consists of letters acknowledging a copy of the Director's speech made June 21, 1939. A copy of the address was mailed to everyone on the Bureau mailing list. This material is outdated and there appears to be no reason for its continued retention. In an effort to provide file space for current cases, it is proposed that the file be reviewed and obsolete material destroyed. It would also save space in the General Index and unnecessary listing of references.

It is requested that the appropriate substantive supervisor review the above listed file to determine if any reason exists which would preclude destruction. A notation advising of the decision reached may be placed on this memorandum and returned to the Consolidation Unit of the Records Branch, Room 7231.

RECOMMENDATION:

For referral to the appropriate substantive division.

DESCRIPTION OF FILE: 62-10861
SPANISH SWINDLE

The attached file has been called to our attention by personnel of the Consolidation Unit. This file was opened in 1923 and now has 44 sections. The majority of the mail in this file consists of letters sent to the Bureau enclosing a letter received by the sender which relates to the "Spanish Swindle". The Bureau sends a copy of the letter and the enclosure to the Post Office Department for their interest. In an effort to streamline procedures and eliminate unnecessary reference to this data it is proposed that all of this material over ten years old be deindexed through removal of the cards from the General Index.

It is requested that the appropriate substantive supervisor review the above listed file to determine if any reason exists which would preclude removal of these index cards. A notation advising of the decision reached may be placed on this memorandum and returned to the Consolidation Unit of the Records Branch, Room 7231.

RECOMMENDATION:

For referral to the appropriate substantive division

TO : MR. TOLSON

DATE: September 10, 1963

FROM : J. H. GALE

SUBJECT: DESTRUCTION OF Bureau FILES AND RECORDS
MATNAP (Bufile 7-1820)
BREKID (Bufile 7-576)

Kansas City office has requested authority to dispose of material in the MATNAP (Unsub; Charles Fletcher Mattson - Victim; Kidnapping) and BREKID (Volney Davis, aka, et al; Edward George Bremer - Victim; Kidnapping) cases which is over 20 years old. Kansas City advises there are 65 volumes with correspondence over 20 years old in the MATNAP case and 29 volumes of material over 20 years old in the BREKID case. Kansas City has had no investigative activity in the MATNAP case since July, 1958, and none in the BREKID case since July, 1959. These two cases were both major cases which had extensive investigative activity and voluminous reports were sent to every office in the country. The MATNAP case is still pending. The BREKID case has been prosecuted and one of the primary ringleaders, Alvin Karpis, is still incarcerated in the McNeil Island Penitentiary on the life sentence he received.

New York, Washington Field, San Francisco, Chicago, Kansas City and Seattle Offices were polled to determine their views and they are unanimous in agreeing that the 20-year-old material in both of these cases should be destroyed. Several of the auxiliary offices polled have not had any leads in the MATNAP or BREKID cases in 4 or 5 years and they feel that it is a waste of space and file cabinets to retain these files. In the offices polled the volumes that could be destroyed at this time would amount to approximately 5 file drawers which is one cabinet. If we can save one cabinet in each office, this amounts to approximately $2600, as five-drawer file cabinets are worth approximately $50 apiece and all offices are periodically ordering new cabinets to take care of the continual expansion of records.

The Inspection Division feels there is no point in having auxiliary offices such as Kansas City retain all volumes over 20 years old in the MATNAP or BREKID cases. Of course, the Offices of Origin, offices of prosecution, as well as the Bureau should retain all volumes and thereby be in a position to furnish any old background data to an auxiliary office if the remote possibility occurs that the auxiliary office needs same. If the auxiliary office has any material of evidentiary

UNRECORDED COPY FILED IN

value or any statements, reports or memoranda of significance which Seattle, the Office of Origin, does not have, then, of course, this should be retained. In other words, this proposal amounts to permitting auxiliary offices to destroy reports and letters in these two cases providing the offices of prosecution and Offices of Origin have copies of these reports. The Files and Communications Division agrees with the Inspection Division, as does the General Investigative Division.

RECOMMENDATION:

That the field be advised that all auxiliary offices in these two cases may destroy letters and reports over 20 years old providing the Offices of Origin and offices of prosecution have copies. If approved, the attached SAC Letter will so advise the field.

To	From (Suggester's name)	Division of Assignment
Director, FBI	SA [redacted]	CLEVELAND

SUGGESTION It is suggested that the current practice for the destruction of channelized memoranda, copies of security informants' reports designated for organizational and individual security case files, be expanded to include a program for the destruction of channelized memoranda not affected by the current practice or rule which is set forth in the space provided on this form. Specifically, the program suggested for consideration is as follows:

Over an extended period of time, review all pending and closed organizational and individual security case files and destroy channelizing memoranda from which pertinent information has been incorporated in a report. This could be facilitated by checking the "Location" column in the Administrative Pages of the reports for the location citation and then checking the channelized memoranda for the one having the same citation.

Current practice or rule (Include manual citation as well as facts) Manual of Instructions, Section 87D, p79, states that channelizing memoranda in organizational and individual security case files may be destroyed following submission of reports in these cases.

Advantages of suggestion and annual savings (include basis for estimate) Under the program suggested above, channelized memoranda would be destroyed in numerous cases wherein reports are no longer being prepared. In those cases wherein reports have been prepared subsequent to the inauguration of the present rule as cited above, it would provide for the destruction of channelized memoranda from which information was incorporated into preceding reports. It is felt that this would result in additional space saving, the object of the current procedure. Serials containing administrative data would not be destroyed.

DESTRUCTION OF BUREAU PROPERTY
GEN'L.

Disadvantages of suggestion No known disadvantages.

SUBJECT: REX H. SMELSER; SOUTHWEST LOUISIANA VOCATIONAL - TECHNICAL SCHOOL, LAKE CHARLES, LOUISIANA
RACIAL MATTERS - CONTEMPT OF COURT
DESTRUCTION OF BUREAU RECORDS

Prior to a hearing in Federal Court on 9-19-62, Xerox processing of several rolls of film which contained photographs of records of captioned school was begun at the Department's request. A subsequent agreement between the Department and captioned school established that it would not be necessary to utilize this film. The Xerox process was discontinued and prints which had already been made were retained as a bulky exhibit.

Per memorandum April 3, 1963, this material was to be reviewed after six months to determine whether or not the prints could then be destroyed.

ACTION:

Trial in this matter has been set for 11-18-63, in U. S. District Court, Baton Rouge, Louisiana. It is, therefore, felt unwise to destroy the above film at this time since the Department could make additional requests concerning the film. The above bulky exhibit should be retained and will be reviewed in three months to determine if the prints may be destroyed.

SUBJECT: BUREAU RECORDS - GEN'L
DESTRUCTION OF OUTDATED RECORDS

Among the background material which has been collected over the years by our Foreign Liaison Unit is a set of bound volumes containing photographs of the interior and exterior of a number of our SIS Offices in Latin America. These photographs were all taken during the early 1940s and appear to be of no value whatever to our present operations. As an example, we are temporarily attaching one of these volumes.

ACTION:

If approved, we will destroy these volumes of photographs as itemized in the attached list.

SUBJECT: DESTRUCTION OF OUTDATED RECORDS
Bureau

The Foreign Liaison Unit has collected a good deal of background material over the years during the course of its supervision of foreign liaison activities. It has been determined that some of this is of an historical nature and we believe it should be destroyed as it serves no worthwhile purpose.

In particular, we have a number of volumes containing copies of plant survey reports made in Latin America during World War II. In addition to the actual reports, there are volumes of exhibits which contain maps, photographs, and charts of the facilities in question. As all of this material pertains to the early 1940s, we believe it is no longer of any value.

ACTION:

If approved, we will destroy the old plant survey material itemized in the attached list.

DESTRUCTION OF BUREAU PROPERTY
SUGGESTION

Reference is made to the suggestion submitted by you dated October 10, 1963, wherein you proposed that copies of Form FD-209 and other memoranda reflecting positive results be purged from administrative control files of informants following the inspection of the field office by representatives from the Seat of Government.

This matter has been referred to the appropriate divisions for consideration and you will be advised if a favorable decision is reached.

Employee Suggestion
FD-252 (Rev. 9-11-59)

Date: 10/10/63

To:	From: (Suggester's name)	Division of Assignment
Director, FBI	SAC HERBERT E. HOXIE	EL PASO

SUGGESTION

Following field office inspection by SOG representatives, copies of FD-209 (form reflecting results of contact with informants) and other memoranda designated for field office control file reflecting results of positive information received from informants be destroyed.

Current practice or rule (Include manual citation as well as facts)

There is no provision for destruction of these items. Information from these copies of form and memoranda is correlated into Criminal Informant Monthly Progress Letter.

Advantages of suggestion and annual savings (include basis for estimate)

A periodic purging of the file would provide a means of eliminating considerable material of an administrative nature which no longer need be maintained in this file. The original of the form or memoranda is available in the main informant file. By retaining these copies pending an inspection there would be provision made for review by SOG representatives following which these copies could be destroyed. This should result in a considerable saving in accumulated file space. It is noted that in an analogous situation, the Manual of Rules and Regulations, Part II, Section 3, Page 15, provides for (advantages continued on attached page)

Disadvantages of suggestion

A limited amount of time by clerical employees would be necessary to remove the copies from the file. It is felt that this time actually would be negligible compared to the benefits to be derived.

(The use by the United States of my suggestion shall not form the basis of a further claim of any nature by me, my heirs, or assigns upon the United States. I understand that I will be considered for any justified award only if my suggestion is adopted within two years after submission.)

Advantages continued:

destruction after a field office inspection by SOG representatives of copies of the record of information furnished other agencies - FD-159 - from the main dissemination control file. Such information is correlated into a monthly letter to the Bureau. It is felt that the same reasoning which applies to destruction of Form FD-159 applies to destruction of copies of informant forms and memoranda, when the information has already been correlated into the Monthly Progress Letter and it has been reviewed by inspectors.

SUBJECT: MAIL
SUGGESTION #211-64 SUBMITTED BY
SPECIAL AGENT [redacted] CLEVELAND

b6
b7C

DESTRUCTION OF BUREAU PROPERTY GENL

SUGGESTION: That the current practice for destruction of channelizing memoranda be expanded to permit the field to go back and review all pending and closed organizational and individual security case files and destroy any such memoranda from which the pertinent information has been included in a report. Suggester feels that this could be facilitated by checking the "Location" column in the administrative pages of reports and then checking the previous channelizing memoranda for the one having the same citation.

PRESENT PRACTICE: Under existing instructions, copies of channelizing memoranda in individual and organizational case files in security matters may be destroyed following incorporation of the information in a report.

ADVANTAGES: Suggester hopes to realize additional savings in filing space.

OBSERVATIONS: Domestic Intelligence Division opposed adoption of the idea. They commented that, although unquestionably there would be a saving in filing space, the cost of manpower expended in such a program would far outweigh the value of any space saved. Any destruction would have to be closely supervised since there are a number of exceptions which preclude destruction under present procedures. For example, channelizing memoranda are not destroyed if they contain indexing or administrative data showing action taken. Nor is one destroyed if it is the first serial in a file or if the original information is not contained in any other file in the office.

Training Division agrees with these views. Actually, under current procedure, there is nothing to preclude the type of purging suggested, namely reviewing previous cases and volumes wherein information contained in channelizing memoranda had been incorporated in a report prior to the adoption of the present rule in 1961. However, as noted by Domestic Intelligence Division, it is felt the cost to do this would far exceed the value of the space saving anticipated.

66-3286- 62-36951-3881

OCT 15 1963

RECOMMENDATION: That the suggestion not be adopted. On approval, no further action is necessary. Receipt of the suggestion was acknowledged by prior letter.

ORIGINAL FILE IN

ADDENDUM DOMESTIC INTELLIGENCE DIVISION 10-7-63 TDR/mea:nck

By SAC Letter 61-8, 2-21-61, the field was authorized to destroy channelizing memoranda in individual and organizational security files following the submission of reports, with certain exceptions. The suggestor recommends that we go behind that date and, in effect, purge the files of channelizing memoranda routed thereto prior to the above instructions. There is no question that a saving in space would be accomplished; however, it is firmly believed that the cost in manpower that would be necessitated by such a procedure would far outweigh the value in space conserved. Any destruction would have to be closely supervised inasmuch as there are a number of exceptions in which channelizing memoranda cannot be destroyed under present procedures. We do not destroy channelizing memoranda when (1) the original information is not contained elsewhere in the field office file. (2) Serial 1 of the file is not to be destroyed regardless of its nature. (3) Serials containing indexing are not to be destroyed. (4) Serials containing "action information" are not to be destroyed; for example, opening, closing, posting, or instructions given by a supervisor to an Agent concerning a case.

The suggestor comments that destruction of these channelizing memoranda could be facilitated by checking the "Location" column in the administrative pages of the reports and then checking the channelizing memoranda for the one having the same citation. This does not appear to be accurate as the "Location" citation shows only the location of the original information in the field office files and not the serial number of the channelizing memoranda in a subject's file from which the information is obtained.

It is recommended that the suggestion not be adopted.

SUBJECT: DESTRUCTION OF OUTDATED RECORDS

Among the material maintained by the Foreign Liaison Unit is the temporarily attached bound volume entitled "Ports and Navigation - Brazil 1940." This book contains a number of maps and statistics concerning Brazil and despite the date on the cover, there is the date 1938 on the title page. It is outdated and a very careful analysis indicates that it is of no value to our current operations.

ACTION:

If approved, the attached book will be destroyed.

TO : Mr. W. C. Sullivan DATE: October 21, 1963

FROM : D. J. Brennan

SUBJECT: DESTRUCTION OF OUTDATED RECORDS
DESTRUCTION OF BUREAU PROPERTY

The Foreign Liaison Unit has been maintaining the temporarily attached statistical Atlas of Brazil which bears the date 1941 and contains charts, maps, and graphs concerning the products and population of Brazil. Explanatory material is printed in Portuguese, English, and French. The Atlas is outdated and a careful analysis of it indicates that it is no longer of any value to our operations.

ACTION:

If approved, the attached volume will be destroyed.

SUBJECT: DESTRUCTION OF OUTDATED RECORDS

Destruction of Bureau Records

Among the background material being maintained by the Foreign Liaison Unit is the temporarily attached volume entitled "Southern Argentina and Chile." This consists of a number of maps and photographs of that area prepared in cooperation with the National Geographic Society. Although the volume is undated, internal evidence indicates it was prepared in the mid 1940's. A very careful analysis of the volume suggests that it is no longer of any value to our operations.

ACTION:

If approved, the attached book will be destroyed.

Employee Suggestion
FD-552 (Rev. 9-11-59)

H 28 v 164

b6
b7C

Date
October 21, 1963

To:	From: (Suggester's name)	Division of Assignment
Director, FBI		General Investigative, SOG

SUGGESTION That index cards prepared on known serial numbers of "bait" money or other currency, bonds or securities taken as part of loot in bank robberies, burglaries or larcenies be destroyed when the subjects are identified and that portion of the loot recovered. (If approved, appropriate changes for the FBI Handbook, Manual of Instructions and Manual of Rules and Regulations will be prepared).

Destruction of Bureau Records - Gen'l

Current Practice or Rule (include manual citation as well as facts)

Known serial numbers on bank loot are always indexed in the office of origin and upon request, depending upon the extent of circularization, may be indexed in other offices and at the Bureau. There is no provision for destroying such index cards other than under the rule which permits destruction of certain files and index cards when they are 20 years old.

Advantages of suggestion and annual savings (include basis for estimate) The adoption of this suggestion will provide an effective procedure for purging files at the Bureau and in the field of thousands of index cards on a continuing basis after they have served their purpose. For example, bait money in the amount of $1,000 in five dollar bills requires the use of 200 index cards by each office where indexed. There were 1,371 violations of the Bank Robbery Statute in Fiscal Year 1963, and in a large percentage of these cases the serial numbers on a portion of the loot were known and required indexing in the office of origin and, in many instances, in several other offices and at the Bureau as well. These index cards are of no value after the subject has been identified and the bank loot recovered. Unable to estimate annual savings, but the benefits to be derived from conservation of space and clerical time will be ever increasing.

Disadvantages of suggestion

The suggester has checked with several other employees, including the Records Branch, and no disadvantage to this procedure has been noted.

REHABILITATION PROGRAM
RECORDS BRANCH

DESCRIPTION OF FILE: 62-23951
GENERAL APPEARANCE FILE
78 SECTIONS, 5,630 SERIALS

The attached file has been called to our attention by personnel of the Consolidation Unit. The Classifying Unit discontinued cross-indexing names in this file in 1951. The contents of this file consists in part of outgoing yellows regarding general appearance forms and single fingerprint records. This material is no longer sent to file and there appears to be no reason for its continued retention. It is proposed that the yellow form letters in this file be destroyed and that the entire file be deindexed. The destruction and deindexing of this material would result in saving space in the Filing Unit and in eliminating unnecessary cards from the General Index.

It is requested that the Identification Division review the above listed file to determine if any reason exists which would preclude destruction and deindexing. A notation advising of the decision reached may be placed on this memorandum and returned to the Consolidation Unit of the Records Branch, Room 7231.

RECOMMENDATION:

For referral to the Identification Division.

DATE 8-10-82 BY SP4 EW/dcg

Dear Miss [redacted]

I have received your suggestion that Form FD-338 be printed on pink paper and be maintained as the top serial in a file. It may interest you to know that similar proposals have been considered in the past and not adopted. The principal objection to this procedure is that it would create an exception to our general rules of serializing documents placed in a file.

Although your suggestion was not adopted in this instance, I want to thank you for submitting it to me.

NOTE CONTINUED

Similar proposals have been received in the past and not adopted. Present regulations require that any document placed in a file be serialized in the proper sequence. This is in accord with sound record management and accountability. Unserialized or floating serials could become a problem as there could only be one top serial to any file. The FD-338 is in effect a permanent charge out used to account for channelizing serials that are destroyed after incorporation in a report. The original should be filed next to the report containing the information from the serials to be destroyed. It is an easy matter to find a report in a file and the FD-338, which is filed adjacent to it, even though the FD-338 is printed on white paper. Several Bureau forms are printed on pink paper and it is believed that printing FD-338 on pink paper would not appreciably facilitate the location of this form in the file. Recommend suggestion not be adopted.

Employee Suggestion
FD-252 (Rev. 9-11-59)

b6
b7C

Date
October 25, 1963

To:	From: (Suggester's name)	Division of Assignment
Director, FBI	[redacted]	New Haven

SUGGESTION

That FD-338 be printed on a distinctive color paper (pink) so that it would remain the top serial in the file and thus more readily show the serial numbers missing in the file through destruction of the channelizing memoranda when file is reviewed by agent, clerk, supervisor or inspector. If it were printed on a distinctive color paper (pink) rather than white as it is now, it would follow a clerical function now handled in a similar manner with FD-237, Criminal Informant Review Sheet, and FD-238, Security Informant Review Sheet, which forms are pink, unserialized, and remain as a top serial in the file.

Destruction of Bureau Records - General

Current practice or rule (Include manual citation as well as rule) MR&R states only that channelizing memoranda in criminal and security cases may be destroyed following submission of reports, such memoranda being listed on FD-338 and requesting CCO to destroy. Does not state that memoranda should be kept as a top serial, or that it should or should not be serialized.

Advantages of suggestion and annual savings (Include basis for estimate)

Eliminates confusion of missing serials when reviewing files, since FD-338 at this time may be located anywhere in file and must be located in order to properly review file for form errors. A distinctive color (pink) makes the likelihood of burying it in file with other serials less likely. Since it would follow procedure now carried out in connection with FD-237 and FD-238, clerical employees will understand the method of filing with a minimum of training.

Disadvantages of suggestion

None observed.

DESTRUCTION OF BUREAU PROPERTY
SUGGESTION #247-64 SUBMITTED BY
SAC HERBERT E. HOXIE, EL PASO OFFICE

SUGGESTION: That permission be given to destroying copies of FD-209 (form reflecting results of contact with informants) and other memoranda designated for field office control file reflecting results of positive information received from informants following field office inspection by SOG representatives.

PRESENT PROCEDURE: Suggester advises no provision is made for the destruction of these items. Information from these copies of form and memoranda is incorporated into Criminal Informant Monthly Progress Letter.

ADVANTAGES: Periodic purging of file would provide a means of eliminating considerable material of an administrative nature which no longer need be maintained in this file. The original of the form or memorandum is available in the main informant file. By retaining these copies pending an inspection, there would be provision made for review by SOG representatives following which these copies could be destroyed. This would result in a saving of filing space.

DISADVANTAGES: A limited amount of time by clerical employees would be necessary to remove the copies from the file. This time would be negligible compared to the benefits to be derived from proposed procedure.

OBSERVATIONS: General Investigative Division felt the suggestion had merit and should be adopted since this material would have served its purpose when the information has been furnished the Bureau in the monthly letter and after the inspection has been completed since the original material is retained in the informant file.

Domestic Intelligence Division advised this method would not pertain to the work of their division since it involves work regarding criminal informants.

The Special Investigative Division pointed out it was not possible to determine from the manner in which the suggestion was written exactly what "control file" SAC Hoxie referred to. However, upon the assumption that he meant the El Paso Office

ORIGINAL FILED IN 66-3286-

Memo Casper to Mohr
Re: Destruction of Bureau Property
Suggestion #247-64 Submitted By
SAC Herbert E. Hoxie, El Paso Office

has a "Monthly Progress Letter Control File," the Top Echelon and regular Criminal Informant Desks could see no objection to the proposed idea. Each month a letter is forwarded to Bureau from each field division listing among other things the outstanding accomplishments attributed to their informants during the preceding month. These accomplishments are no doubt written up individually as they occur with copies designated for the control file. When preparing the progress letter the field dictator probably uses these memornada for the purpose of abstracting information. Therefore, these individual copies would no longer be necessary as the information has been consolidated into the one monthly progress letter.

The Inspection Division advised the Manual of Rules and Regulations, Part II, page 15a, v (3), states channelizing memoranda in criminal cases and security cases may be destroyed following submission of reports, with certain listed requirements. If SAC Hoxie is referring to the criminal informant administrative control file and is channelizing copies of FD-209 containing positive informant statistical information to this file, it would appear this manual reference would permit the destruction desired. While there is no rule concerning such a control file, Manual of Instructions states FD-209 may be used to extent SAC deems justified. This division advised the possibility exists that El Paso has an unauthorized administrative file opened for filing copies of FD-209s containing positive information and recommended El Paso be requested to furnish information regarding this file.

By letter dated 11/1/63, SAC, El Paso advised that in order to avoid a physical review of each and every informant file in the office when the monthly progress letter is prepared for the Bureau, it was found to be more convenient in various offices to maintain a control file which includes positive information furnished of value by informants. When the monthly report is submitted for an informant file and it reflects positive information, a copy is designated for the control file.

The Training Division and the Inspection Division feel that it is permissible for an office to maintain such a control file as an aid to them and, if such a control file is maintained, it is practical to destroy material maintained therein following the field inspection. However, it is felt this practice is not prevalent throughout the field and it should be left to the discretion of the SAC regarding the procedure he finds most convenient. There appears to be no need to bring this matter to the attention of all offices.

RECOMMENDATION: That the suggestion be adopted for use in the El Paso Office and the attached letter of appreciation forwarded to SAC Hoxie. The suggestion was acknowledged by prior letter.

SUBJECT: DEINDEXING OF PRESIDENTIAL WARRANTS - CUSTODIAL DETENTION
Bufile 100-2 Sub 60
Destruction of Bureau Property

File 100-2 Sub 60 consists of thirty-three sections opened in 1942 and the last piece of mail is dated in 1945. This file concerns Presidential Warrants which authorized and directed the apprehension of alien enemies.

There is considerable indexing in this file (see serials 841, 856, and others) where the only identifying information is an address in 1942. Other serials (see serial 21) have no identifying information. Notations on much of the mail indicate that the warrants were detached and filed in case files.

It is requested that the appropriate substantive supervisor review this file to determine if any reason exists for retention of the indexing described above. A notation advising of the decision reached may be placed on this memorandum. The memorandum should be returned to the Correlation Unit of the Records Branch, Room 6309 IB.

RECOMMENDATION:

For referral to appropriate substantive division.

FROM : A. Rosen

7-1820
7-576.

SUBJECT: DESTRUCTION OF FILES AND RECORDS
MATNAP (Bureau file 7-1820);
BREKID (Bureau file 7-576)

This is to recommend that attached letter be sent to all field offices authorizing the destruction of photographs of suspects, maintained over twenty years, in captioned cases provided these photographs are of no further use in these investigations and provided that copies of these photographs are in the possession of the offices of origin and prosecution.

BACKGROUND

The Matnap case concerns the kidnaping of Charles Fletcher Mattson, aged ten, who was kidnaped 12-27-36 at Tacoma, Washington. Extensive investigation has been conducted and subject has not been identified. The Brekid case involves the kidnaping of Edward George Bremer on 1-17-34 at St. Paul, Minnesota. Alvin Karpis and others have been convicted for the Bremer kidnaping. Karpis was sentenced to life imprisonment and is still in prison.

SAC Letter 63-50 (B) dated 10-1-63 provides for the destruction of certain reports and letters in captioned cases by auxiliary offices provided copies are in the possession of the offices of origin and prosecution.

Since issuance of the above SAC letter, the Philadelphia Office has advised that it has a considerable accumulation of photographs of former suspects in these files which have been on hand for twenty years or more. Philadelphia suggests that other field divisions probably have the same large accumulation of photographs of suspects. Philadelphia recommends that in view of the age of the photographs and the fact that probably the individuals would not be identifiable at this time from these old photographs, authority be granted to dispose of them.

The General Investigative Division feels that continued retention of such photographs by auxiliary offices would serve no useful purpose; however, it is felt that the office of origin should continue to retain complete files.

Memorandum to Mr. Belmont
RE: DESTRUCTION OF FILES AND RECORDS

ACTION RECOMMENDED

If approved, attached is a letter to all offices granting authority for auxiliary offices to destroy photographs of individuals which have been maintained in captioned files for over twenty years provided that they are of no further use in these investigations and provided that copies of these photographs are in the possession of the offices of origin and prosecution. This letter instructs that photographs of subjects and their associates in the Brekid case should be retained and under no circumstances should any photographs or other material of possible evidentiary value be destroyed. Office of origin is being instructed to continue to retain complete files.

November 21, 1963

SAC, Albany

Director, FBI 66-3286-

MATNAP;
BREKID
FILING SYSTEM - DESTRUCTION OF Bureau Records
FILES BY AUXILIARY OFFICES

Reference is made to SAC Letter ~~63-50~~ (B) dated 10-1-63, which provides for the destruction of certain reports and letters in captioned cases by auxiliary offices, provided copies are in the possession of the offices of origin and prosecution.

It has come to the Bureau's attention that auxiliary offices may have a considerable accumulation of photographs of individuals once considered suspects in these cases. Any such photographs which have been maintained for over twenty years may be destroyed provided they are of no further use in captioned investigations and provided that copies of these photographs are in the possession of the offices of origin and prosecution.

Any photographs of subjects and their associates should any photographs or other material of possible evidentiary value be destroyed. Office of origin should continue in the Brekid case should be retained. Under no circumstances to retain complete files.

TO : DIRECTOR, FBI DATE: 10/17/63

FROM : SAC, PHILADELPHIA (7-124)

SUBJECT: MATNAP

Re SAC letter 63-50 dated 10/1/63 authorizing destruction of certain reports and letters over 20 years of age in captioned file.

It has been noted that there is also a considerable accumulation of photographs of individuals in exhibit envelopes of this file most of which are 20 years or more of age. No doubt other divisions have the same large accumulation of photos of suspects in their file. In view of the age of the photographs and fact that probably the individuals would not be identifiable at this time from these old photos, authority is requested to dispose of them.

DESCRIPTION OF FILE: 62-26144
PAMPHLET ENTITLED "TREASURY DECISIONS"
DATED FROM 1931-1945

The attached file has been called to our attention by personnel of the Consolidation Unit. The material in this file is no longer sent to file and there appears to be no reason for its continued retention. In an effort to provide file space for current cases, it is proposed that the file be destroyed.

It is requested that the appropriate substantive supervisor review the above listed file to determine if any reason exists which would preclude destruction. A notation advising of the decision reached may be placed on this memorandum and returned to the Consolidation Unit of the Records Branch, Room 7231.

RECOMMENDATION:

For referral to the appropriate substantive division.

DEINDEXING OF COMSAB FILE
Bufile 62-0107

Destruction of Bureau Records - General

Captioned file was initiated in March, 1948, as a control file in which were filed ticklor copies relating to potential communist saboteurs. The file remained active until February, 1955, when SAC letter 55-12 instructed that Comsab tabbing of security index subjects be discontinued.

During the period that this file was active approximately 3,000 names were indexed. The majority of these names were security index subjects on whom main files already existed. In fact, information appears in the individual main files that these persons have been tabbed for Comsab.

Since there appears to be no good reason for continuing the indexing of such names in the Comsab file, it is proposed that this file be deindexed. There is some information in this file concerning some individuals which does not relate to the administrative procedure of designating them for the Comsab list. This type of information will not be deindexed.

RECOMMENDATION:

It is recommended that this memorandum be referred to the Domestic Intelligence Division to consider the proposed deindexing of captioned file. Comments concerning this deindexing may be placed on this memorandum which should be returned to the Correlation Unit, Room 6309 IB.

FASCISM IN THE JAPANESE ARMY AND NAVY
Buffile 105-163

Destruction of Property

Description: Photostat copy of document entitled "Fascism in the Japanese Army and Navy" compiled by Chinese Army Headquarters in 1941 and furnished to the Bureau by ONI in 1944.

The attached enclosure has been called to our attention by Records Branch personnel who advise that there is frequent reference to this material. In an effort to streamline procedures and eliminate unnecessary reference to this data which is over twenty years old and in many cases has no identifying information, it is suggested the material be deindexed through removal of the cards from the Bureau's indices.

It is requested that the appropriate substantive supervisors review this enclosure to determine if any reason exists for retention of the indexing. A notation advising of the decision reached may be placed on this memorandum. The memorandum should be returned to the Correlation Unit of the Records Branch, Room 6309 JH.

ALL INFORMATION CONTAINED HEREIN IS UNCLASSIFIED DATE 8-10-82 BY SP4 EZW/dcg

DESCRIPTION OF FILE: 66-4982
GYMNASIUM

The above described file has been called to our attention by personnel of the Consolidation Unit. The file has 9 sections, 1,262 serials. The following types of mail in the file are outdated and there appears to be no reason for its continued retention:

Memos re absentees from gym
Memos re supplies and repairs
Mail re training schedules at Seat of Government and Field Offices.

This type of mail is no longer sent to file and 1,050 of the serials in the file are over 20 years old. In an effort to provide file space for current cases, it is proposed that the file be reviewed and obsolete material destroyed. Mail of a policy or historical nature would not be destroyed.

It is requested that the Training Division review the enclosed serials, removed from the file as examples of the type of mail to be destroyed, to determine if any reason exists which would preclude destruction. A notation advising of the decision reached may be placed on this memorandum and returned to the Consolidation Unit of the Records Branch, Room 7231.

ALL INFORMATION CONTAINED
HEREIN IS UNCLASSIFIED
DATE 8-16-82 BY SP-4 EW/dcg

DESCRIPTION OF FILES:
94-1-1474; 94-1-1465; 94-1-972

The above listed files have been called to our attention by personnel of the Consolidation Unit. These files contain numerous serials that are acknowledgments of a copy of a speech made by the Director in 1937 and 1938. Copies of the speeches were sent to all individuals on the mailing list at that time. The files are described as follows:

94-1-1474. Speech made at the Commencement exercises of the Oklahoma Baptist University, Shawnee, Okla., May 23, 1938

1/29/64 mail destroyed Cons. EHG

94-1-1465. Speech made at the Commencement exercises of Westminster College, Fulton, Missouri, June 1, 1937

1/29/64 mail destroyed Cons. EHG

94-1-972. Speech made at a convention of the General Federation of Women's Clubs, Kansas City, Missouri, May 17, 1938.

1/31/64 Mail destroyed Cons. EHG

All of the mail suggested for destruction is over 20 years old. Destruction of this same type of mail in other 94-1 files has previously been approved. Destruction of this mail would result in a savings of file room space and would also eliminate unnecessary cards from the General Index.

RECOMMENDATION:

For referral to the Crime Records Division for evaluation to determine if any reason exists which would preclude destruction.

SUBJECT: SUGGESTION #282-64
Destruction of Bureau Records

The views and recommendations of this division have been requested in regard to captioned suggestion. The suggestion is that index cards prepared on known serial numbers of "bait" money or other currency, bonds or securities taken as part of loot in bank robberies, burglaries or larcenies be destroyed when the subjects are identified and that portion of the loot has been recovered.

This division is in general agreement with the comments of the suggester and believes that the suggestion should be given favorable consideration.

RECOMMENDATION:

For referral to the Suggestion Desk, Training Division.

ADDENDUM OF INSPECTION DIVISION TDW:wmj 10/25/63

b6
b7C

Inspection Division has evaluated the suggestion of SA [redacted] and concurs with the comments of Assistant Director A. Rosen. However, it is not believed that any attempt should be made, if this suggestion is adopted, to make a special project of going back and destroying indices cards where the substantive matter has already been resolved. It would appear that these index cards could be destroyed as they are encountered rather than making a special project of same. Other than the above comment, it would appear that some benefit would be derived in cutting the over-all bulk of indices cards by the adoption of this suggestion.

SUBJECT: DESTRUCTION OF INDEX CARDS
SUGGESTION #282-64 SUBMITTED BY
SA [redacted] GENERAL INVESTIGATIVE DIVISION

Destruction of Bureau Records

SUGGESTION: Index cards prepared on known serial numbers of "bait" money or other currency, bonds, or securities taken as part of loot in bank robberies, burglaries, or larcenies be destroyed when the subjects are identified and that portion of the loot recovered.

CURRENT PRACTICE: No provision for destroying such index cards other than under the rule which permits destruction of certain files and index cards when they are 20 years old.

ADVANTAGES: This will provide an effective procedure for purging thousands of index cards on a continuing basis after they have served their purpose. For example, bait money in the amount of $1,000 in five dollar bills requires 200 index cards by each office where indexed. These index cards are of no value after the subject has been identified and the bank loot recovered. Unable to estimate annual savings, but the benefits to be derived from conservation of space and clerical time will be ever increasing.

DISADVANTAGES: No disadvantage to this procedure has been noted.

REC-41 66-3286-979

OBSERVATIONS: Files and Communications Division is in general agreement with the suggester and believes the suggestion should be given favorable consideration. They also commented that some system will have to be established for office recovering the bills to let all others who have indexed them know what to destroy.

6 JAN 20 1964

Inspection Division concurs with the comments of Assistant Director Rosen. However, it is not believed that any attempt should be made, if suggestion is adopted, to make a special project of going back and destroying index cards where the substantive matter has already been resolved. It would appear that these index cards could be destroyed as they are encountered rather than making a special project of same. Other than the above comment, it would appear that some benefit would be derived in cutting the over-all bulk of indices cards by the adoption of this suggestion.

Memo to Mr. Mohr
Re: Destruction of Index Cards
Suggestion #282-64 Submitted by
SA [redacted] General Investigative Division

Training Division recommends adoption. Suggestion makes provisions for the destruction of a large number of index cards after they have served their purpose.

RECOMMENDATIONS: 1 - Approval of suggestion. If approved, the attached letter will be sent to suggester. Receipt of suggestion was previously acknowledged by letter.

2 - This memorandum serve as the authority for the General Investigative Division to take the necessary steps for the implementation of the suggestion and for the preparation of appropriate changes for the Handbook, Manual of Instructions and Manual of Rules and Regulations.

DESCRIPTION OF FILE: 66-5450-sub 1
APPROPRIATION, 1938
7 SECTIONS, 909 SERIALS ① DESTRUCTION OF BUREAU PROPERTY

The attached file has been called to our attention by personnel of the Consolidation Unit. The material in this file is outdated and there appears to be no reason for its continued retention.

This file is sub 1 of file 66-5450 and was made up for filing of letters from private citizens giving their comments on the possible curtailment of Bureau personnel because of proposed budget slashes. Many of the serials are carbon copies, originals of which are in various newspaper and organization main files. The last mail in the file is dated in 1939. Destruction of this mail would result in a savings of file room space and would also eliminate unnecessary cards from the General Index.

It is requested that the appropriate substantive supervisor review the above listed file to determine if any reason exists which would preclude destruction. A notation advising of the decision reached may be placed on this memorandum and returned to the Consolidation Unit of the Records Branch, Room 7231.

RECOMMENDATION:

For referral to the appropriate substantive division.

Employee Suggestion
FD-252 (Rev. 9-11-59)

#445-64

Date: January 16, 1964

To:	From: (Suggester's name)	Division of Assignment
Director, FBI	SA Roy D. Simpson	Domestic Intelligence

SUGGESTION

It is suggested that the duplicate copy of DD Form 254 (Security Requirements Check List) presently designated for filing in Bufiles be destroyed by Bureau Supervisor and not retained. Copy of form attached.

Destruction of Bureau Property - general

Current practice or rule (Include manual citation as well as facts)

See attached sheet (page 2).

Advantages of suggestion and annual savings (include basis for estimate)

If adopted this suggestion would amount to an estimated yearly saving to the Government of $1,483.20, not including the savings by the elimination of procedures at the Bureau as well as the Department of Defense of an intangible nature for which no monetary savings can be accurately computed.

These forms were received in 1963 on an average of 1,263 per month varying from 803 in March, 1963, to 1,695 in July, 1963, making a total of 15,156 items received in 1963. The forms average approximately five pages per item, making a total of about 75,780 pages received each year. The elimination of the filing of these forms will result in considerable savings to the Government. (Continued on page three)

Disadvantages of suggestion

None apparent.

ALL INFORMATION CONTAINED HEREIN IS UNCLASSIFIED DATE 9-16-82 BY SP-4 EW/dcg

(The use by the United States of my suggestion shall not form the basis of a further claim of any nature by me, my heirs, or assigns upon the United States. I understand that I will be considered for any justified award only if my suggestion is adopted within two years after submission.)

Current Practice or Rule (Include Manual Citation as well as Facts)

DD Form 254 is a Department of Defense form submitted to the Bureau in duplicate to advise of the awarding of classified contracts by military services. Such advice is required by the Delimitations Agreement and under our Plant Informant Program the field contacts the security representative at the plant involved and explains FBI responsibility for espionage, sabotage and subversive activities. On receipt of the form in duplicate by Bureau Supervisor, one copy is designated for the appropriate field office and sent out by Bureau routing slip, Form 0-7. The second copy is stamped for filing in the appropriate Bufile and subfile and sent to Records Section.

In Records Section this form is reviewed to determine if it is ready for filing and a "checkers' stamp" is placed in the lower left corner. It must thereafter be filed and the filer places his number on the mail.

These Forms DD-254 are not indexed or serialized at the Seat of Government and on the basis of a suggestion submitted 10-31-62 (100-349957-550) are destroyed at the end of one year. Experience has shown that the Bureau supervisor at the Seat of Government has not had an occasion necessitating a review of these forms once they have been placed in file. If this suggestion is approved and the need should ever arise to locate a form, it would be readily available in the field office file covering the particular plant holding the contract.

Advantages of Suggestion and Annual Savings (Include Basis for Estimate)

It is estimated that each item costs approximately $.07½ to place in file which equals $1,136.70 per year. The physical storage of this material for a period of from one year up to two years will require about three 5-drawer file cabinets costing $65.50 each for a total savings to the Records Division of the Bureau of $1,333.20 per year. Additional savings would result in the elimination of procedures of stamping, initialing, processing and handling of each duplicate form by a clerical employee in the unit handling the Plant Informant Program in the Domestic Intelligence Division. An accurate figure cannot be attributed to this procedure in view of its intangible nature.

If this suggestion is adopted, the Department of Defense will be advised that a duplicate copy of the form is not required by the FBI. The forms forwarded to the Bureau are reproduced by Defense Department by various methods including photostats, xerox, thermofax and plastiplate. Utilizing the theory that all such copies are prepared on plastiplate which is the most economical method of reproduction, a very conservative estimate as to the cost of preparing the extra copy would be $2.00 per 1,000 sheets or approximately $150 per year. This figure is believed to be extremely conservative and the actual savings to the Department of Defense cannot be actually determined by the Bureau. This savings is in addition to the $1,333.20 listed above.

REHABILITATION PROGRAM
RECORDS BRANCH

DESCRIPTION OF FILE: 99-0
PLANT PROTECTION - GENERAL

"DESTRUCTION OF BUREAU PROPERTY

Reference is made to memorandum from Mr. Short to Mr. Tavel dated December 23, 1963, recommending that 99-0 File be reviewed by the appropriate substantive supervisor to determine if any reason exists which would preclude destruction of material contained in this file.

This file consists of 63 sections and 10 sections selected at random were reviewed. This material relates to the plant protection and plant survey programs which the Bureau conducted just prior to World War II. This program was discontinued in 1942 and the responsibility for plant surveys was taken over by the military services.

There are numerous pieces of correspondence in this file which relate to matters strictly of an administrative nature concerning a program which has been discontinued for over 20 years. The continued retention of such material does not appear to be worthwhile or warranted. There is, however, a considerable amount of mail in the file which would appear to be of a historical or policy nature and such material should, of course, be retained.

RECOMMENDATION:

It is recommended that qualified personnel of the Records Branch be authorized to review this file in detail and to destroy any mail strictly of an administrative nature. All mail which is of a policy or historical nature should not be destroyed but permanently retained.

TO : Mr. Conrad

DATE: January 8, 1964

FROM : R. L. Millen

SUBJECT: AMPLICORP FLYWEIGHT TAPE RECORDERS #F-3 & #F-6
Destruction of Bureau Property

Recently, the Bureau acquired for special recording purposes two Uher 4000 briefcase-size recorders as replacements for Amplicorp Recorders #F-3 and #F-6. The latter units have outlived their useful service life since the cost of necessary repairs would be exorbitantly high.

ACTION:

Unless advised to the contrary #F-3 and #F-6 will be removed from inventory. Except for a few useable parts, the units will be totally demolished.

Dear Mrs. [redacted]

Thank you for the suggestion that only one main index card should be made for mail that is on the list of standard or foreign country subfiles. It is a pleasure to advise you that your proposal has been adopted and the necessary action is being taken to place it into effect.

Your interest in our operations is indeed appreciated. I hope we will continue to receive the benefit of your ideas in the future.

MAILED 11
FEB 3 1964

NOTE CONTINUED

Files and Communications Division recommended adoption since employees who would be using these numbers have access to the standard and foreign country "sub" lists and the proposal would save typing time and also space in indices. Training Division agrees. On approval, this letter will be authority for Files and Communications Division to place idea into effect.

Division of Assignment
FILES AND COMMUNICATIONS

SUGGESTION

That only one main card be made on mail that is on the standard SUBJECTS and foreign country sub lists. The following notation should be dropped down on the main card: "For subs for Field Offices or foreign countries see standard or foreign country sub list".

DESTRUCTION OF BUREAU PROPERTY

Current practice or rule (Include manual citation as well as facts)

A main card is made as each sub is opened for a Field Office or foreign country.

Advantages of suggestion and annual savings (Include basis for estimate)

Save time of the typist making the main cards, clerk filing the main cards, and would save space in the index. A check of the index on three subjects on the standard sub list showed 74, 87 and 119 main cards filed on the same subject matter with subs.

Disadvantages of suggestion

None as all employees using these file numbers have the standard sub lists available to them.

b6
b7C

(The use by the United States of my suggestion shall not form the basis of a further claim of any nature by me, my heirs, or assigns upon the United States. I understand that I will be considered for any justified award only if my suggestion is adopted within two years after submission.)

SUBJECT: DEINDEXING OF BUREAU FILES RELATING TO RATIONING AND BLACK MARKET ACTIVITIES
Bufile 66-3286

ALL INFORMATION CONTAINED HEREIN IS UNCLASSIFIED DATE 8-10-82 BY SP4EW/dcg

Reference is made to Bureau memorandum filed as 62-66170-341, which is attached, giving authority to deindex and destroy correspondence concerning possible irregularities in the sale of sugar and other foodstuffs during World War II when rationing was in effect. This correspondence was referred for the most part to the Office of Price Administration, which had the responsibility for the enforcement of rationing throughout the country and the investigation of any alleged irregularities.

The files listed below, which are attached, contain material pertaining to alleged irregularities in the rationing of other items during World War II. It is suggested that material in them be deindexed and destroyed in accordance with authority given for file 62-66170. It should be noted that General Records Schedule 14-4 issued by the National Archives authorizes, without further approval, destruction of acknowledgments and transmittals of inquiries and requests that have been referred elsewhere for reply. Of course, no material will be destroyed wherein the Bureau conducted an investigation or inquiry.

62-67612	Rationing of Gasoline and Oils
62-73428	Black Market - General
62-74221	Rationing - Food
62-74395	Rationing of Liquors - Destroyed 5/6/64
62-77836	Black Market in Cigarettes Destroyed
100-189123	Rationing of Clothing

RECOMMENDATION:

That the Records Branch be authorized to deindex and destroy the material maintained in the above-mentioned files in accordance with authority set out in 62-66170-341 and outlined above, with the exception of material relating to a Bureau investigation or inquiry.

SUBJECT: DEINDEXING OF GERMAN EMBASSY FILE
Bufile 65-28688

DESTRUCTION OF BUREAU PROPERTY

File 65-28688 has been called to our attention by Records Branch personnel, who advise that the frequency of reference to this file causes unnecessary work because insufficient information is available in many cases to effect an identification.

This file consists of 33 sections and over 20 of these sections contain logs of a surveillance kept on the German Embassy in the years 1940 - 1941. Many names are surnames or given names only, which make positive identification difficult. In an effort to streamline procedures and eliminate unnecessary reference to this data, it is suggested that limited deindexing be done of this material as was done in the file entitled "Sodac Washington, D. C.," file 65-30092 per authority contained in 65-30092-6556 which is attached. In file 65-30092 names of Soviet personnel, many of which were surnames only, were deindexed; but names of U. S. Government employees or other American citizens were left indexed if they contacted the Embassy or Soviet officials, even though the names were incomplete.

It is also suggested that serial 565 of 65-28688, which contains over 450 names of German nationals who desired to return to Germany, be deindexed.

It is requested that the appropriate substantive supervisor review this file to determine if deindexing may be done as suggested above, both on the logs and on serial 565. A notation advising of the decision reached may be placed on this memorandum. The memorandum should be returned to the Correlation Unit of the Records Branch, Room 6309 IB.

RECOMMENDATION:

DECLASSIFIED BY AUC 60290 BCE/DCG/gmw
ON 11/16/03

For referral to appropriate substantive division.

LFS:mec:klw CONFIDENTIAL ADDENDUM 1/27/64

Domestic Intelligence Division has no objection to recommended deindexing of logs pertaining to 1940-41 coverage at German Embassy. Names of United States Government employees or other American citizens appearing in logs should also be deindexed, since they no longer have any significance in relation to Bureau's current investigative responsibilities. There is also no objection to deindexing names appearing in serial 565 of 65-28688, consisting of list of persons desiring to return to Germany.

Destruction of Bureau Property

SUBJECT: PURGE OF OLD SIS FILES

General

Reference is made to the memorandum from Mr. L. E. Short to Mr. Tavel dated 8/5/63 recommending that certain SIS files be reviewed by the Domestic Intelligence Division with a view towards possible purging of some of these files.

The review suggested is being performed by me as time allows. It should be kept in mind that hundreds and hundreds of files are involved.

Review has been completed of those SIS files concerning living conditions. A list of these files and recommendations as to destruction is attached. Also attached is a sample file concerning living conditions in San Salvador.

As will be noted from the attached sheet it is, in the main, recommended that all living conditions files be destroyed except those giving an up-to-date picture of living conditions in countries covered by our Legal Attaches. The review of additional SIS files will be continued as circumstances permit.

RECOMMENDATION:

That the living conditions files be destroyed in accordance with the attached listing.

SUBJECT: REHABILITATION PROGRAM
RECORDS BRANCH
DESTRUCTION OF BUREAU PROPERTY
DESCRIPTION OF FILE: 62-45731
RE POEM "YOU'RE A POLICEMAN"

The attached file has been called to our attention by personnel of the Consolidation Unit. There appears to be no reason for its continued retention.

This file has two sections and has been partially de-indexed. It consists entirely of requests for, transmittals and acknowledgments of, the poem "YOU'RE A POLICEMAN" by Mr. W. H. Drane Lester, letters dating from August, 1936, to February, 1955. Destruction of this mail would result in the savings of a small amount of file room space and eliminate unnecessary cards from the General Index.

It is requested that the appropriate substantive supervisor review the above listed file to determine if any reason exists which would preclude destruction. A notation advising of the decision reached may be placed on this memorandum and returned to the Consolidation Unit of the Records Branch, Room 7231.

RECOMMENDATION:

For referral to the Crime Records Division.

FROM : J. J. Casper

SUBJECT: PROCLI - GENERAL
SUGGESTION #495-64 SUBMITTED BY
SPECIAL AGENT ROY D. SIMPSON
DOMESTIC INTELLIGENCE DIVISION

O Destruction of Bureau Property - General

Form DD-254 is a Department of Defense Form submitted to the Bureau in duplicate to advise of the awarding of classified contracts by branches of the armed services. This notice is required under the Delimitations Agreement and, pursuant to our Plant Informant Program, the field contacts those responsible for security at the plant involved to explain FBI jurisdiction in espionage, sabotage and subversive activity matters. Therefore, on receipt of the DD-254s at the Bureau, one copy is routed to the appropriate field office and the remaining copy is sent to Records Section at the Seat of Government (SOG) to be placed in the appropriate Bureau file.

These latter forms are not indexed or serialized in Records Section but are reviewed, checked, and filed for one year after which they are purged.

Special Agent Simpson suggests that the duplicates are not necessary and should be dispensed with since, in our experience, the Bureau supervisor at SOG has not had any occasion to review these forms once they have been placed in file. He believes that, should such need arise, the form would be readily available in the file of the field office covering the plant in question.

Suggester points out that an average of 1,263 of these forms were received each month during 1963 varying from a low of 803 in March, 1963, to a high of 1,695 in July, 1963, for an estimated total of 15,156 during the year. They average about five pages per item or a total of 75,780 pages for the year. It is estimated that it costs about 7 1/2 cents to file each one or a total (75,780 x 7 1/2¢) of $1,136.70 per year. Added to this would be a saving in space of three five-drawer file cabinets at $65.50 each, or $196.50, for a total of $1,333.20. These costs do not incompass such imponderables as savings realized by the elimination of clerical time now spent reviewing, stamping, initialing and filing these duplicates and subsequently purging.

ORIGINAL FILED IN 100-339455

them. Nor do they include savings within the Department of Defense which will no longer need to prepare the duplicate. Conservatively, on the basis of supplies saved, it is felt that these would be about $150. This estimate is figured on the basis of copies prepared on plastiplate, since this is the least expensive of the methods of preparation in which we receive the forms, and costs about $2 per 1,000 sheets (75,780 @ $2 per 1,000). This would bring the total savings to the Government to at least $1,483.20.

Adoption of the suggestion was recommended by the Domestic Intelligence Division and the Training Division concurs in this recommendation. Further, it is felt SA Simpson should be considered for an Incentive Award for his suggestion. While it is recognized that it is the normal policy that supervisors are responsible for the efficiency of operations in their own areas, the suggestion affects not only the work of the Domestic Intelligence Division but also that of the Files and Communications Division and that of another Government agency, the Department of Defense. The suggestion is a good example of interest in the part of our personnel in economy and efficiency of Government operations and is particularly opportune in view of the recent message by the President and the emphasis being placed on such matters during the observance of the 10th Anniversary Year of the Federal Incentive Awards Act.

As a general rule, when the operations of another Government agency are affected by a suggestion, it is forwarded to that agency for additional comment; however, since the foreseeable, tangible benefits to the Department of Defense are nominal, it is believed unnecessary to do so in this case and that the portion of any award should be defrayed by the Bureau. It is felt it would cost more to process the correspondence than it would to defray that part of the award.

Under the suggested scale for incentive awards, tangible savings of $1,483.20 are eligible for an award of $75. However, it is recognized that the suggestion involves a substantial amount of intangible benefits in the way of clerical time saved through the elimination of processing the form in question and it is felt SA Simpson's idea is worth an award of $100.

RECOMMENDATIONS:

E.T. 1-27-64

1. That the suggestion be adopted and SA Simpson be granted an incentive award of $100.

J. J. Casper to Mr. Mohr Memorandum
Re: Procli - General
Suggestion #495-64 Submitted by
Special Agent Roy D. Simpson
Domestic Intelligence Division

2. That the award be handled by the Commendation, Supervisory Approval, and Special Active Unit, Administrative Division in lieu of the usual acknowledgement.

3. On approval, this memorandum will serve as the authority for Domestic Intelligence Division to place the procedure into effect and take appropriate action with respect to the Department of Defense.

The attached file has been called to our attention by personnel in the Consolidation Unit. It consists of 20 sections beginning in 1936. Much of the material is outdated, not of a policy nature and of no historical value, and should be considered for destruction.

Types of mail suggested for destruction are: OF BUREAU RECORDS

1. Letters, over three years old, transmitting copies of the Investigator to prominent individuals, and their acknowledgments thereof. (Serials 294 through 299)

2. Letters submitting material for publication in the Investigator. Current Routing Unit rule is that "any material addressed to Investigator is sent unopened to Crime Research". (Serials 214, 235, 236, 243, 244, 271)

3. Memoranda, over three years old, which forwarded to the Editorial Board for approval proof copies of the Investigator and "roughs" of proposed covers. Note: the enclosure is removed before memo is sent to file. (Serials 1682, 1685, 1690, 1695)

4. Requests, over three years old, from individuals not in the employ of the Bureau, for copies of the Investigator, and the replies to these requests. (Serials 282, 291)

5. Memoranda, over three years old, attaching for approval "In Memoriam" pages to be included in the Investigator. Note: the enclosure is removed before memo is sent to file. (Serials 1674, 1698)

6. Miscellaneous copies, over three years old, originals of which are in other main files. (Serials 292X, 299X)

Mr. [redacted] Security Programs Division, Department of Defense, was advised that in the future, it will be necessary to submit only one copy of this form to the Bureau. Mr. [redacted] stated that this procedure would be put into effect but pointed out that there will be a lag of a few weeks before all military facilities could be advised to do this.

ACTION:

For information.

RECORDS BRANCH

DESCRIPTION OF FILES:
94-1-658; 94-1-1373

The above listed files have been called to our attention by personnel of the Consolidation Unit. These files contain numerous serials that are acknowledgments of a copy of a speech made by the Director. Copies of the speech were sent to all individuals on the mailing list. The files are described as follows:

94-1-658. Speech made at Notre Dame University on January 11, 1937. Speech made at the Commencement exercises of Notre Dame University, May 10, 1942.

6/9/64 file reviewed mail destroyed CMS EHG

94-1-1373. Speech made before the Association of Life Insurance Presidents, New York City, December 3, 1937.

7/7/64 file reviewed + mail destroyed CMS EHG

This mail is all over twenty years old and appears to have no further value. Its destruction would result in saving space in the file room and in eliminating unnecessary cards from the General Index.

Destruction of this category of mail is authorized under the general records schedule and no further archival authority is required.

RECOMMENDATION:

For referral to the Crime Records Division for evaluation to determine of any reason exists which would preclude destruction.

Director, FBI	SA [redacted]	Special Investigative Div.

SUGGESTION

In all applicant-type and all SGE investigations, three months after receipt of an air tel or letter lead destroy the correspondence when no investigation has been conducted by that office and the lead was merely relayed to another office. For example NY receives a lead by airtel from Newark to interview a reference who is now residing in NY territory. NY determines that person is now residing in Buffalo, N.Y. and they RUC by airtel to Buffalo. No necessity for NY to retain the file or correspondence past 3 months. Same applies when for example St. Louis receives a lead to make a record check and then determines the records are located in Washington, D. C. and they RUC by airtel. No necessity for St. Louis to retain this correspondence. A notation could be made on the back of the index card that the file was destroyed.

Current practice or rule (Include manual citation as well as facts)

All offices presently retain permanently all correspondence relating to any lead they receive. It is noted a practice similar (continued 1a)

Advantages of suggestion and annual savings (include basis for estimate)

This would eliminate necessity of retaining correspondence and files which have no future value. Of course the complete file is always retained at the Bureau if it becomes necessary to obtain this information in the future, but this would happen in very few cases since the correspondence in the field would be retained 3 months before destruction.

to that suggested hereis in effect with respect to preliminary inquiry correspondence in Security of Government Employees cases. Section 69F provides that those offices having no leads in preliminary inquiries should place Bureau correspondence in 140-0 file, or appropriate sub file of 140-0 where practical, pending conversion to a full field investigation or receipt of specific leads to be covered during the preliminary inquiry. If no specific lead is received and the case is not converted, all copies of the preliminary inquiry letter, enclosures and the index card are to be destroyed at the expiration of one year of the date of the Bureau letter initiating the preliminary inquiry. Disposition is then noted on the file cover.

SUBJECT: FILING SYSTEM-
RECORDS MANAGEMENT SURVEY
Destruction Of Bureau Property

In response to SAC Letter 64-12 (A), the Crime Records Division would like to offer the following suggestions relative to Records Management for the consideration of the Files and Communications Division.

Memo sent to Tavel 4/6/64 gmm-jfc

1. That consideration be given to destroying correspondence files after a 10-year period.

Memo sent to Tavel 3/23/64 gmm; jfc

2. That files be purged of routing slips to the field after a one-year period.

3. That duplicate copies of reports, letters, airtels and teletypes, appearing in the same file, be removed and destroyed one year after the closing of any case.

The above suggestions are all pertinent to SOG records.

DESCRIPTION OF FILE:
94-3-4-218 ① DESTRUCTION OF BUREAU PROPERTY

The attached file has been called to our attention by personnel of the Consolidation Unit. There are approximately 300 serials in this file that are copies of an outgoing letter sent to individuals on the mailing list in 1938. (see serials 465 thru 546). This mail is outdated and there appears to be no reason for its continued retention. Acknowledgments to the letters are filed and indexed in this file.

Destruction of this mail would result in saving space in the file room. This category of mail is authorized under the general records schedule and no further archival authority is required.

RECOMMENDATION:

For referral to the Crime Records Division for evaluation to determine if any reason exists which would preclude destruction.

By memorandum, 10/1/63, we requested purchase of 6 new copies of the "popular edition" of the Universal Trade Code Book. These code books have now been obtained and prepared for use by making appropriate Bureau inserts in them. Accordingly, this will permit us to dispose of 7 old copies of this book which are badly worn and no longer serviceable.

These code books will be mutilated in the Coding Unit and disposed of in the confidential trash to be burned by Bureau employees.

RECOMMENDATION:

That appropriate adjustments be made to the Bureau, Laboratory Division, and Files and Communications Division inventories reflecting the destruction of 7 copies of the popular edition of the Universal Trade Code Book.

FROM : C. L. ROGERS

SUBJECT: ADMINISTRATIVE DIVISION MATERIAL STORED ON SEVENTH FLOOR IDENTIFICATION BUILDING
DESTRUCTION OF BUREAU PROPERTY

I made the annual check on March 2, 1964, of the material we have in storage at the Identification Building and suggest that disposition be made of the following items:

1. Administrative Reports: We retain these for three fiscal years. Those for the fiscal years 1960, 1961, 1962 and 1963, in addition to those being received during the current fiscal year, are now on hand. It is suggested that those for the fiscal year 1960 (July 1959 through June 1960) be destroyed.

2. Miscellaneous Circulars (cabinet 47): This is a group of varied circulars dated in 1961. The group is made up of Federal Personnel Manual Transmittal Sheets; CSC Bulletins; CSC Mobilization Bulletins; Federal Employee Statistics Bulletins; and CSC Handbook X-118 Changes. Copies of these were made available to the appropriate Divisions at the time of receipt. It is suggested that this group of 1961 circulars be destroyed.

3. Congressional Record: We retain these for the past two calendar years. They are now on hand for 1961, 1962 and 1963. Those dated in 1961 should be destroyed.

4. Federal Register: These, too, are on hand for the 1961, 1962 and 1963 calendar years. In line with our policy of retaining these for only the past two years, the issues dated in 1961 should be destroyed.

5. Senate and House Bills, Testimony Before Appropriations Committees, etc.: We have been keeping such things as Senate and House bills, appropriations bills and printed testimony re appropriations hearings for the past two Congresses. We now have the items on hand from the 86th Congress, the 87th Congress and we are currently accruing the items of the 88th Congress. It would seem that the items from the 86th Congress could be disposed of at this time. These items are:

Destroyed 3-6-64 dms

6. United States Attorneys Bulletin and Department Memos: These are on hand for the calendar years 1961 forward. It is suggested that those for 1961 be destroyed now.

There is a group of mimeographed Department memos advising the Heads of Agencies of varied and sundry things. Copies were made available to the appropriate Divisions upon receipt and it is suggested that the 1961 items be destroyed at this time.

7. Treasury and Department of State Circulars: These are on hand from the calendar year 1961 forward. All were made available to the appropriate Divisions upon receipt. It is suggested that those dated in 1961 be destroyed.

Destroyed 3-6-64 dms

ACTION:

Should you agree, arrangements will be made with the Files and Communications Division for the removal of the items from storage and their destruction.

Destruction of Bureau Property

ALL INFORMATION CONTAINED
HEREIN IS UNCLASSIFIED
DATE 8-18-82 BY SP4 ELW/ cal

The above files have been called to our attention by Records Branch personnel who point out that there is considerable obsolete material in these files. In an effort to streamline procedures and eliminate unnecessary reference to this data, it is suggested that the material be defindexed through removal of the cards from the Bureau's indices and that the obsolete mail be destroyed where the mail is of no further value.

File 66-5424 consists of 27 sections containing 3,477 serials. The file was opened in 1936 and the last piece of mail is dated in 1943. There are numerous serials in this file which are requests from individuals, firms, government agencies, and law enforcement agencies asking for copies of pamphlets pertaining to sabotage and espionage. It is suggested that these serials be defindexed and destroyed in accordance with current procedures for handling this type of correspondence. (See Section 26 attached.)

Sub 1 of 66-5424, which was opened in 1939, consists of 24 sections containing 1,422 serials and the last piece of mail is dated in 1941. This file contains considerable indexing of lists of law enforcement officers who attended field office conferences held with law enforcement agencies to discuss coordination in investigations concerning national defense and internal security matters. (See serial 514.) Administrative reports from the field regarding the number of assigned and unassigned national defense cases are contained therein. (See serials 1314 through 1330.) It is suggested that names of law enforcement officers attending the conferences be defindexed; that letters advising the Bureau of cooperation of the various law enforcement agencies be defindexed and destroyed; and that administrative reports from the field regarding the number of assigned and unassigned national defense cases be destroyed in accordance with authority contained in item 27 of 66-3286-606, which is attached.

Memorandum L. E. Short to Mr. Tavel 3-6-64
Re: WAR (66-5424), et al

Sub 2 of 66-5424 contains numerous communications from field offices in response to outgoing teletypes to all SAC's requesting statistics on complaints received in espionage, counterespionage, subversive sabotage, and neutrality matters. This file was opened in 1933 and consists of 4 sections containing 326 serials, the last piece of mail being dated in 1940. It is suggested that this administrative mail be destroyed in accordance with authority contained in Item 27 or 66-3206-608. Correspondence originating at Seat of Government will be retained for reference purposes.

It is requested that appropriate substantive supervisors review the above-described files to determine if any reason exists for retention of the indexing and mail proposed for deindexing and/or destruction. Notations advising of the decisions reached may be placed on this memorandum. The memorandum should be returned to the Correlation Unit of the Records Branch, Room 6309 JE.

RECOMMENDATION:

For referral to appropriate substantive divisions.

58 MAY 5 1964

105-12752-99 NOT RECORDED

ADDENDUM 4-1-64 HJJ:jmw

Above files are control files concerning three programs covering entrance of Chinese into U. S. One copy of initial communication in each case opened under these programs was placed in appropriate control file. Examination of files shows procedure was not always consistent and sometimes original was placed in control file (as recorded mail) and a copy was used as serial one in subject's main file. In other instances the original was placed in the subject's main file and a copy placed in control file as "not recorded" mail. (For example see Volumes I & VII of 105-76690.) Removal of all "not recorded" mail from this file would leave a meaningless collection of serials, often with a long time span between them, which would not indicate the true activity of the program.

In 105-86568, concerning Chinese who have formerly resided in Communist China entering the U. S. on student visas, the majority of the recorded items in file are letters from the Legat, Tokyo, advising that on his most recent road trip he had checked the files of the U. S. Consulate in Hong Kong for information concerning persons coming under the program. This information was submitted by separate communication under the dual caption of the individual's name and the program title. The copy placed in the control file was not recorded. The removal of all "not recorded" mail from this file would leave only the status letters from the Legat and a few other memoranda, which by themselves would be virtually worthless.

While it is true, none of the "not recorded" mail has been indexed, these files remain the only source from which Bureau can obtain information concerning large segment of Chinese population in the U. S., many of whom have been interviewed by Bureau Agents and who have expressed willingness to be of assistance to Bureau. In the event of a change in international political situation it may be necessary to review these files and the cases investigated under them to obtain leads concerning additional sources of information. For example if the Communist Chinese were to be admitted to the U. N., thus gaining a legal foothold in the U. S., it might be necessary to review these control files and evaluate the results obtained in considering what coverage could be given the Communist Chinese, even reinstituting the programs perhaps.

In file 105-12752 concerning Chinese entering the U. S. claiming U. S. citizenship there are a few serials which could be removed without harming value of the file. These serials are

CONTINUANCE OF ADDENDUM

copies of the second or later, communications in a particular case and need not to have been filed in the control file. However, checking this file thoroughly so that only one communication concerning each individual was in the file would be so time consuming that it is doubted that the saving in space would be worth the time spent to create it.

Recommendation:

For the above reasons the Nationalities Intelligence Section recommends against the removal of the "not recorded" mail from these three files.

2 ENCLOSURES

8 MAY 20 1964

ENCLOSURE

10 MAR 16 1964

Current practice or rule

By letter to Paris dated 10/8/56 entitled "BUPLANS - DESTRUCTION OF FILES IN EVENT OF EMERGENCY" the Bureau set out instructions to be followed by Legal Attaches in the destruction of closed cases in their respective offices. Legal Attaches were instructed to set an annual tickler to reconsider this problem and advise the Bureau between August 1 and September 1 of each year that this has been done and that the files are manageable and that those on hand could be destroyed in the event of any foreseeable emergency.

By letter dated 4/8/59, under the same caption above, the Bureau forwarded to Legal Attaches copies of Paris letter 3/23/59, which suggested the utilizing of the orange tickler copy of assignment cards on closed cases as destruction ticklers, to be filed on a monthly basis. Legal Attaches were instructed to adopt this procedure, in the absence of compelling reasons for not so doing.

Advantages of suggestion

When the above described annual tickler comes up, all old files are automatically considered for destruction, so that any security cases closed for five years or "criminal" and "applicant and other" cases closed for three years would be reviewed. The monthly sorting of orange assignment cards of closed cases according to classification, and setting them up as ticklers for destruction behind the respective dates for consideration, is a time consuming and unnecessary job. It is further complicated by the fact that closed cases are subject to reopening any time new information justifies further inquiry, so that it is quite possible for the case to be closed several times in a few years, and for several ticklers for destruction to accumulate in the file behind different dates. This file is superfluous and maintaining it is a waste of clerical time. It would be difficult to estimate annual savings.

Comments of Legal Attache

We have found that, in actual practice, it works out better for this office to review groups of files for destruction on an annual basis, and more frequently if necessary, going right through from lowest file numbers (earliest openings) up to cut-off date (3 or 5 years ago) in each classification, rather than pulling and reviewing for possible destruction scattered files each day. Since we do follow the first described practice, it is really a duplication to maintain a separate individual file destruction tickler. I therefore concur in recommendation that this administrative device be discontinued, at least for this office, as a further clerical economy.

Destruction of Bureau Records - Genl

SUBJECT: SPACE NEEDS
OUT-OF-SERVICE PERSONNEL FILES
PERSONNEL RECORDS UNIT

At this time the personnel files relating to individuals who have left the Bureau's service occupy approximately 475 five drawer file cabinets. This category of files grows at the rate of approximately 100 cabinet drawers per year. Because of space limitations the out-of-service files are now split and part of the files are housed on the 7th floor of the Justice Building while the remainder are housed in the Personnel Records Unit on the 6th floor.

To provide for future expansion needs we have experimented with and have considered the use of shelf filing for these records. Because of the nature of the available area (corridor space with numerous pillars) shelf filing is not particularly advantageous from the standpoint of gaining filing area and in addition to being extremely expensive, new equipment would be nothing more than a stopgap measure.

The possibility of stripping files of extraneous administrative material, which is not part of the official personnel file insofar as government regulations are concerned, has been discussed in detail with personnel of the Administrative Division. Administrative Division recommends that in addition to retaining documents required by the Federal Personnel Manual we should also retain exit interview forms, separation performance reports, service record letters and memoranda, appointment letters, applicant briefs (or permanent), personnel status forms, all letters and memoranda denoting administrative action and final record of disposition of property. Personnel of the Administrative and Files and Communications Divisions are in agreement that stripping personnel files should initially be confined to clerical files in which the individual has been out of the Bureau's service for ten years or more.

66-3286

A survey of a representative number of file drawers reflects that approximately 50 per cent of each drawer is made up of clerical files in which the individuals have been out of service more than ten years. In addition, it is estimated that approximately one half of each clerical file is made up of administrative material which can be approximately removed from the file and destroyed without losing any of the pertinent data relating to the former employee. Accordingly, through the stripping operation we could

(SEE ADDENDUM OF TRAINING DIVISION ON PAGE 3.)

(See Addendum of Inspection Division, Page 3)

ORIGINAL FILED IN 67-418-5

Memorandum L. E. Short to Mr. Tavel 3-19-64
RE: SPACE NEEDS
OUT-OF-SERVICE PERSONNEL FILES
PERSONNEL RECORDS UNIT

regain the use of approximately 590 file cabinet drawers. This would provide expansion for several years to come in the out-of-service personnel files.

A sample out-of-service clerical personnel file is attached in which the required record material and other material which we would save is filed in the personnel folder. The material which is administrative in nature and not required to be retained as part of the official personnel file and which is not considered pertinent from the Bureau's standpoint is attached to the top of the file. This is the type of material which we propose to remove and destroy.

It is recognized, of course, that if approval is granted for stripping a certain category of out-of-service personnel files it will be necessary to set up specific guide lines to be followed by personnel assigned to the stripping operation. Even then should questions arise as to the advisability of preserving or destroying given documents, a representative of the Administrative Division would be consulted for guidance.

RECOMMENDATIONS:

(1) To provide necessary expansion space for out-of-service personnel files, it is recommended that files relating to former clerical employees who have been out of the Bureau's service for more than ten years be purged of administrative type material, retaining categories of material desired by Administrative Division as set out above.

(2) If the above recommendation is approved, this work will be accomplished with the existing personnel complement at times when the flow of current work will permit.

ADDENDUM OF TRAINING DIVISION: 4/13/64 JJC:hcv

The Training Division concurs with recommendation set forth in above memorandum. It is felt that the items listed to be destroyed are not essential record material which the Bureau would be required to maintain on clerical employees ten years after they have left our employ. The employee's file attached hereto has been carefully reviewed and the Training Division can see no reason for the Bureau to maintain in its files as a permanent record any of the items falling within the category to be destroyed. As in any project of this type, however, the success of the project is contingent upon the fact that qualified personnel conduct the file purge.

I agree - if cost is not too much. L.L.

ADDENDUM OF INSPECTION DIVISION: Upon the completion of the Files and Communications Division inspection 12-24-63 (H. L. Edwards:mbk 4-23-64) the Records Branch had 10 such projects. 4 of which were done on a continuing daily basis. Three of four projects that were operated only when personnel were available were behind the normal 1962 monthly production standards as well as being behind the over-all monthly production since September, 1962.

The Inspection Division agrees with the recommendation to purge out of service personnel files to conserve space; however, the project of purging should be considered in line of importance as it relates to other project-type work which is behind normal monthly production standards.

Employee Suggestion
FD-252 (Rev. 9-11-59)

#715-64

b6
b7C

Date 3/19/64

To:	From: (Suggester's name)	Division of Assignment
Director, FBI		General Investigative Div.

SUGGESTION That those copies of Form FD-192, submitted with Semi-Annual Inventory of Property Acquired as Evidence (SAIP) by each field office, now maintained as enclosures to cover letters in each field office Administrative File, be destroyed, with exception of the most recent submissions (in February, 1964). Also that, in the future, on receipt of a new SAIP the forms FD-192 enclosed with the previous inventory be destroyed.

(Suggestion #691-64, from field, concerns eliminating one copy of FD-192 maintained in field; General Investigative Division comments were made.)

O DESTRUCTION OF BUREAU PROPERTY

Current practice or rule (Include manual citation as well as facts)
Manual of Rules and Regulations, Part II, Section 8E, Page 21, instructs field offices to submit SAIP semiannually in February and August. A form FD-192 is prepared in quintuplicate for each case. (Continued)

Advantages of suggestion and annual savings (include basis for estimate)
Savings of considerable, measurable file space and elimination of unnecessary copies. Most recent inventory had over 3,700 sheets of type suggested to be destroyed; if average of 2,000 sheets for 24 previous inventories eliminated, the total would be 48,000 sheets of paper, plus enclosure envelopes.

Writer has no basis for estimating cash savings.

Current practice or rule (Continued)

in a field office in which evidence is maintained. Two copies are retained in field.

The original FD-192 and two copies are forwarded to Bureau with cover letter. (E.G. Cleveland Division submitted 81 triplicate sets of FD-192 in February '64.) The original FD-192 and one copy are sent to substantive desk and after review the original is initialled for case file; that copy is destroyed if no further action is necessary.

One copy of each FD-192 is kept with the cover letter and filed in the field office Administrative File. The cover letter and attached set of FD-192's are reviewed by Division VI to insure submissions received from all offices and for general format of inventory. Writer checked the last two sections of the Cleveland file, 66-36 sections 14 and 15, and found the following:

Cover Letter from Cleveland re SAIP

Dated	Serial	Enclosures	
2/7/64	2689	81	(behind file)
8/9/63	2650	111	" "
2/20/63	2632	86	" "
8/24/62	2628	54	(attached to cover letter)
2/9/62	2606	50	(behind file)
8/9/61	2597	54	(attached to cover letter)
2/15/61	2584	39	" " " "

Total seven submissions with 475 enclosures.

During the most recent inventory, February, 1964, over 3,700 sets of form FD-192 were submitted to Bureau by all field offices. One copy of each FD-192 is filed with the transmitting cover letter.

Since the original of each FD-192 is filed in the Bureau case file, and the general group serves no apparent purpose once a subsequent inventory is submitted, it is believed these enclosures from each field office pertaining to inventories of August, 1963, and before may be destroyed without affecting Bureau work or records in any way. Also that, on receipt of future inventories, the enclosures to the previous inventory may be destroyed.

Employee Suggestion
FD-252 (Rev. 7-11-59)

#729-64

Date: March 16, 1964

To: Director, FBI

From: (Suggester's name) [redacted] b6 b7C

Division of Assignment: Little Rock

SUGGESTION

All files, with exception of Security files, to be destroyed after being closed ten years provided:

(a) Office is not office of origin
(b) Office is not office of prosecution
(c) File contains no signed statements from witnesses

Files representing cases of an important nature or cases having many ramifications should not be destroyed merely because they are ten years old. If there is any doubt, Bureau to be consulted.

RECEIVED 1964 MAR 18 AM 7:31 FBI

Current practice or rule (Include manual citation as well as facts) Manual of Rules and Regulations, II-3-8 provides: Files in field may be destroyed after become 20 years old. Double zero files for current class. to be retained. Class. 25 and 26 to be destroyed when 10 years old and unsub. files in class. 15,26,52,70 and 87 when 5 years old under stated conditions.

Advantages of suggestion and annual savings (include basis for estimate)

If adopted, it is believed this suggestion would save considerable filing space throughout the field. Savings, if any, would be based on the amount of filing space saved.

Destruction of Bureau Property

ALL INFORMATION CONTAINED HEREIN IS UNCLASSIFIED DATE 8-18-82 BY SP4ELW/cal

Disadvantages of suggestion

It is believed there would be no disadvantages. If it became necessary to obtain background information from one of the files which had been destroyed, it would always be available in the office of origin. b6 b7C

(The use by the United States of my suggestion shall not form the basis of a further claim of any nature by me, my heirs, or assigns upon the United States. I understand that I will be considered for any justified award only if my suggestion is adopted within two years after submission.)

☐ Mr. ☐ Mrs. ☒ Miss [redacted] Chief Clerk
Suggester

Recommendations and comments of Division Head

Believe suggestion has merit. Bureau might want to consider having a control office try for period of six months to a year, then put into effect if justified.

SUBJECT: REHABILITATION PROGRAM
RECORDS BRANCH

DESCRIPTION OF FILE: 1-7
APPLICATIONS AND INQUIRIES FROM PRIVATE
CITIZENS IN REGARD TO FBI NA

The attached file has been called to our attention by personnel of the Consolidation Unit. It consists of 16 sections beginning in 1935. Much of the material is outdated and should be considered for destruction. It is proposed that all requests for information regarding the FBI NA and the replies to these requests, over five years old be destroyed.

Destruction of this mail would result in saving space in the file room and in eliminating unnecessary cards from the General Index. Destruction of this category of mail is authorized under the general records schedule and no further archival authority is required.

It is requested that the Training Division review the above listed file to determine if any reason exists which would preclude destruction. A notation advising of the decision reached may be placed on this memorandum and returned to the Consolidation Unit of the Records Branch, Room 7231.

RECOMMENDATION:

For referral to the Training Division.

SUBJECT: SUGGESTION #709-64, SUBMITTED BY [redacted] CHIEF CLERK, LITTLE ROCK

Destruction of Bureau Property - GEN

Training Division has requested views of Files and Communications Division concerning attached suggestion submitted by [redacted], Chief Clerk, Little Rock, who suggests that all files, except security files, be destroyed by auxiliary offices after ten years providing auxiliary office was not the office of prosecution or file contains no signed statements from witnesses, with restriction that Bureau be consulted on important cases or cases having many ramifications, prior to destruction. She points out that adoption of suggestion would save considerable filing space throughout field. SAC, Little Rock, believes suggestion has merit.

During previous Records Management Program in 1959, several similar suggestions received concerning destruction of files by auxiliary offices prior to present twenty-year retention period (66-18966-397). A number of other suggestions were also received proposing reduction in retention period of field office files. A survey of ten representative field offices was conducted to determine if a lowering of retention period was feasible. Based on results of survey and recommendations of Investigative Division and Domestic Intelligence Division, no change was made in twenty-year retention period for field files (66-18966-543).

It is the feeling of this division that Miss [redacted] suggestion has considerable merit, is highly desirable from a records management standpoint in that maintenance of duplicate records would be decreased, and adoption would save a tremendous volume of filing space and equipment throughout the field. If adopted, even though auxiliary office file would be destroyed after ten years, complete file would be available at office of origin and also Bureau in event information needed by auxiliary office.

Inasmuch as field records continue to grow at a substantial rate, we feel that steps must be taken to reduce growth of records and suggestion submitted by Miss [redacted] offers excellent and logical possibility of

REC-103

10 APR 1964

accomplishing this; accordingly, we recommend re-evaluation be made of current retention period of field office files with the idea of lowering retention period and that consideration be given to adopting suggestion submitted by Miss [redacted]. It is felt that any disadvantages which might be created by adoption of such a procedure would be far outweighed by substantial savings in space and equipment in each field office.

b6
b7C

RECOMMENDATION:

That this memorandum be referred to the Training Division for further consideration of suggestion.

ST
3/25

ADDENDUM OF THE INSPECTION DIVISION JTN:wmj:mbk 3-25-64 :

It is recommended that this suggestion not be adopted for the following reasons:

1. When files are destroyed, normally index cards are destroyed also. There would be nothing available to indicate which office is office of origin should it be necessary to obtain information pertaining to background of subject or case. Only remedy would be to retain the master case card in indices indefinitely and to place thereon the identity of Office of Origin.

2. In all cases this old it is doubtful that an auxiliary office would know the last office of origin, if there have been several changes. This happens frequently and should correspondence become necessary to ascertain information from the file, it may be necessary that several offices become involved. This is undesirable.

3. The delays encountered to obtain necessary information from these files would be unwarranted and perhaps cause the Bureau embarrassment.

Present rule calls for file destruction in the volume classifications at the end of 5 years. This rule has effected maximum destruction and savings commensurate with our needs and responsibilities and current suggestion has little or nothing to offer over and above the present rule.

RECOMMENDATION:

Refer to Training Division.

(3)

COMMENTS OF GENERAL INVESTIGATIVE DIVISION:

It appears that there is nothing contained herein which would alter the position taken by this Division as expressed in 1959 (see 66-18966-397) and as regarding similar suggestions made prior thereto.

SUBJECT: SUGGESTION #715-64
Submitted 3-19-64 by [redacted]
General Investigative Division
Destruction of Bureau Property

Mr. [redacted] suggested that those copies of Form FD-192 (Bulky Exhibit - Inventory of Property Acquired as Evidence), which were submitted with Semi-Annual Inventory of Property Acquired as Evidence (SAIP) by each field office, now maintained as enclosures to cover letters in each field office Administrative File at the Seat of Government (SCG), be destroyed, with exception of the most recent submissions (in February, 1964). Also that, in the future, on receipt of a new SAIP the forms FD-192 enclosed with the previous inventory be destroyed.

When the field submits SAIP in February and August, five copies of Form FD-192 are prepared for each case in which evidence is maintained. Two copies are retained in the field. The original FD-192 and two copies are forwarded to Bureau with cover letter. One copy of each FD-192 is kept with cover letter and filed in the field office Administrative File at SOG. The original FD-192 and one copy are sent to substantive desk. After review the original is initialed for the case file and the copy is destroyed if no further action is necessary.

b6
b7C

Mr. [redacted] stated the SAIP cover letter and attached set of FD-192 forms are reviewed by General Investigative Division to insure submissions are received from all offices and for general format of inventory. However, he feels this general group of FD-192 forms serves no apparent purpose once a subsequent inventory is submitted since the original of each FD-192 is filed in the Bureau case file.

Accordingly, he suggested the destruction of copies of FD-192 forms submitted prior to the February, 1964, SAIP and now maintained as enclosures to cover letters in each field office Administrative File at SOG. Records Branch favors adoption of this suggestion and will handle the destruction of this material if Mr. [redacted] suggestion is adopted. Further, as suggested by Mr. [redacted], it is recommended that upon receipt of future inventories the FD-192 enclosures to the previous inventory be destroyed. If adopted, the procedure for this continuing semi-annual destructions program will be worked out between the Records Branch and General Investigative Division.

3/26

SAC, Tampa (CC-205) March 27, 1964

Director, FBI 66-3286- PERSONAL

PAPER MANAGEMENT -
SUGGESTION BY SAC J. F. SANTOIANA, JR.

Reurlets September 16, 1963, and March 24, 1964, and reBulet September 19, 1963, under same caption.

With respect to the suggestion submitted in urlet of September 16, 1963, receipt of which was acknowledged in reBulet, the matter of preparing summary memoranda of information contained in Forms FD-302 (Channelizing Memoranda) filed in sizable numbers in dead files, and thereafter destroying the channelizing memoranda, was carefully considered as was your additional proposal that a copy of each summary be furnished to the Bureau.

It was decided that your ideas should not be adopted because it was felt the time and personnel needed to review, prepare and dictate the summary memoranda outweighed the amount of space saved. In many of the cases to which you referred, such as Cuban activities, racial activities and Nation of Islam activities, actual investigations are initiated in the future and it would seem doubtful that the summary memoranda would be documented in sufficient detail to assist Agents in preparing reports. This would necessitate reference to informants' files and frequent referrals could have a dilapidating effect on the material contained therein which should remain presentable for possible evidentiary use. Further, present rules permit the destruction of channelizing memoranda after the information has been included in a report and it is felt this is as far as we should go in such destruction.

With respect to sending copies of such summary memoranda to the Bureau, had the idea been adopted, it was felt this procedure would create needless duplication of effort and paper work since, ordinarily, any pertinent data already should have been furnished to the Bureau by report or letterhead memorandum.

SUBJECT: REHABILITATION PROGRAM
RECORDS BRANCH

DESCRIPTION OF FILE: 1-45
MILITARY OFFICERS TRAINING SCHOOL

The attached file has been called to our attention by personnel of the Consolidation Unit. It consists of 6 sections beginning in 1940 and is not currently used. The first three sections contain mail regarding training schools conducted in the Bureau, and the last three sections contain mail regarding schools conducted outside but where the Bureau rendered assistance in connection with same. Following is the type of mail found throughout the file:

1. schedules in connection with the training schools
2. letters to and from the individuals attending the schools
3. information regarding the individuals attending the schools

The material in this file is outmoded and there appears to be no reason for its continued retention. Destruction of this mail would result in saving space in the file room and in eliminating unnecessary cards from the General Index. Destruction of this category of mail is authorized under the general records schedule and no further archival authority is required.

It is requested that the Training Division review the above listed file to determine if any reason exists which would preclude destruction. A notation advising of the decision reached may be placed on this memorandum and returned to the Consolidation Unit of the Records Branch, Room 7338.

RECOMMENDATION:

For referral to the Training Division.

DATE: March 31, 1964

FROM : C. H. Stanley

SUBJECT: SUGGESTION NUMBER 709-64
DESTRUCTION OF BUREAU FILES

Attached is a recommendation by the Little Rock Office that all files, with exception of security files be destroyed after being closed for ten years, provided: (a) Office is not office of origin; (b) Office is not office of prosecution; (c) File contains no signed statements from witnesses. The recommendation also provides that files representating cases having an important nature or cases having many ramifications should not be destroyed merely because they are ten years old. In case of any doubt, the Bureau is to be consulted. The SAC states this suggestion has merit, but the Bureau might want to consider having a control office try for period of six months to a year and then put into effect if justified.

With reference to the suggestion outlined above, it is believed that it has some merit in certain types of cases; however, it is believed as suggested that this system should be tested prior to taking any premature action for the sake of saving space.

The Streamlining Committee of the Special Investigative Division has studied this proposal and feels that the possibility exists that destruction of files in some categories after a ten year period could very well hinder the Bureau's operations. This committee suggests that a control office try this system for a period of time which will point out any weaknesses that may exist.

It is believed it would be undesirable to include for destruction, criminal intelligence files. These files contain intelligence information such as criminal intelligence activity involving La Cosa Nostra organization, waterfront activities files, as well as infiltration by the hoodlums in labor. Criminal intelligence files of this nature should logically be included in the exception to the destruction of criminal files. It is, therefore, strongly felt that files pertaining to Criminal Intelligence Program be specifically excluded from the suggestion.

3-4-64

Memorandum to Mr. Evans
RE: SUGGESTION NUMBER 709-64

It is believed also undesirable to include for destruction certain classifications in the applicant field, specifically those cases that are predicated on subversive loyalty implications. Those classifications include 138, 140 and 151, which are the LEUN Program, the SGE Program and the CSC Referral cases of various Government agencies encompassed in the 151 classification. It is, therefore, felt these files should be excluded from this suggestion, as they are in a sense security-type cases which the Field and other Government agencies might refer to.

Concerning applicant-type cases not included in the above paragraph, it is possible that copy work might be increased under this system, for instance, it would be necessary in certain cases to send a copy of a particular office's report, which had been destroyed, to them in order that they might refer to it if the person was again being investigated.

ACTION:

It is recommended this memorandum be submitted to the Training Division for its information in considering this proposal.

SUGGESTION

That the listing of serials be eliminated and this form 4-94 be revised to read "All serials removed from this file have been destroyed in accordance with authority contained in"
(See attached present form and suggested revision.)

Files

Destruction of Bureau Property General

Current practice or rule (Include manual citation as well as facts)

Serial numbers are listed individually or in scopes, as necessary. (Individual serials purged are checked off the tab card in Numbering Unit).

Advantages of suggestion and annual savings (Include basis for estimate)

Will eliminate a time consuming procedure now used.

Suggester has no basis for estimated savings.

Disadvantages of suggestion

None known.

COMMENTS:

It is felt that serials removed from file should be accounted for. This suggestion would automatically give the impression that any serial not in file had been destroyed whereas this may not be the case. The accuracy in accounting for serials is well worth the time consumed in the current practice.

SUBJECT: DESTRUCTION OF BUREAU PROPERTY -GEN
SUGGESTION #709-64, SUBMITTED BY
MISS [redacted] LITTLE ROCK

"destruction of Files in Field Divisions

SUGGESTION: That all files, except security files, be destroyed after being closed 10 years provided the office is not the office of origin (OO) or office of prosecution and the file contains no signed statements. Files representing cases of an important nature with many ramifications should not be destroyed merely because 10 years old. If any doubt exists, Bureau should be consulted.

PRESENT PRACTICE: Files in the field may be destroyed after they become 20 years old unless they represent important cases with many ramifications which might make their retention desirable. If doubt exists, Bureau should be consulted. Double zero files for current classifications are to be retained. Files in classifications 25 (except Conscientious Objectors) and 26 may be destroyed when 10 years old under certain conditions. Unknown subject files in the 15, 26, 52, 70 and 87 classifications may be destroyed in five years under stipulated conditions.

ADVANTAGES: Such destruction would save a considerable amount of filing space throughout the field.

OBSERVATIONS: SAC Roy K. Moore of the Little Rock Office felt the idea had merit and the Bureau might want to consider a six-month trial in a control office.

Files and Communications Division advised idea had been considered previously and not adopted but they felt it had considerable merit and was highly desirable from a records management standpoint in that it would decrease the maintenance of duplicate records and save a tremendous volume of filing space in the field. They pointed out that, even though destroyed in auxiliary offices, the complete file would still be available if needed at the OO and the Bureau. In view of the growth of field records they believed suggestion offered an excellent and logical possibility to reduce this growth and felt a re-evaluation of the current retention period for field files to reduce such period is in order. The disadvantages would be far outweighed by substantial savings in space and equipment.

SEE PAGE TWO

APR 9 1964

72 APR 16 1964

The Special Investigative Division advised the suggested procedure could very well hinder our operations. Though suggesting selection of a control office to try the procedure and discover any weaknesses, they believed criminal intelligence files should not be included since they contain information on waterfront activities, hoodlum infiltration of labor, "La Cosa Nostra," etc. They also wanted excluded from such destruction applicant-type cases which are, in a sense, security-type matters such as Civil Service Commission referral cases, Security of Government Employees cases etc. In fact, even other applicant-type cases, if destroyed, might increase copy work since, in some instances it might be necessary to supply an office with a copy of its report, which it had destroyed, so they could refer to it if the person were being reinvestigated.

The Inspection Division opposed adoption of the idea. They commented that when files are destroyed, index cards normally are destroyed too and, unless a master case card were kept in the indices indefinitely to identify the OO in case it is necessary to obtain information on the case, there would be nothing available to show where information is located. In cases as old as 10 years, it is doubtful that an auxiliary office would know the last OO if there had been several changes and it might involve several offices to locate necessary information. The delays encountered would be unwarranted and could well embarrass the Bureau. They felt the current provisions for destruction of files in volume cases have effected the maximum destruction and savings commensurate with our needs and responsibilities and the suggestion offered little or no advantages over the present rules.

The General Investigative Division advised the suggestion contained nothing to alter their opposition to such destruction as they expressed in 1959 when they felt such destruction would prove false economy since the proper functioning of a field office requires immediate accessibility of information for purposes of proper evaluation of complaints, informants and other field office operations.

In view of the foregoing comments of the Divisions solicited, Training Division agrees we should retain present procedures. It should be borne in mind that, in some instances, OO would be only one in possession of information in a case as when it has been closed administratively, in which case it would not be available at Bureau. Further, it is not felt much would be gained, in the light of the foregoing comments, by choosing a control office for a trial.

RECOMMENDATION: That suggestion not be adopted. On approval, no further action is necessary; receipt of idea was acknowledged previously.

DATE: 4/7/64

FROM : R. C. Anderson

SUBJECT: RECORDS STORAGE
STATE DEPARTMENT
DESTRUCTION OF BUREAU PROPERTY - GENERAL

Representatives of GSA, who are currently working on the design for the new FBI building, have advised SA John P. Dunphy, Administrative Division, of procedures followed by State Department and GSA warehouse at Franconia, Virginia, of utilizing high shelf storage for inactive records.

Writer accompanied SA Dunphy and SA Norman Stultz of Files and Communications Division to the new State Department building on 4/6/64. State Department has an "interim storage problem," mainly involving records sent from consular establishments which are maintained for varying lengths of time at State Department headquarters before being shipped to Federal record centers. These records are stored in cardboard boxes of approximately one cubic foot volume which will then be placed on steel shelving, seven shelves high. By utilizing one row of shelving, with two rows of boxes back to back and allowing 30 inches aisle space, State Department estimates they can store three cubic feet of records for every square foot of floor space. This is approximately three times the storage per square foot of floor space as obtained through a standard five-drawer file cabinet.

Insofar as Identification Division is concerned, such storage could be utilized for fingerprint cards which are currently being removed from the jackets in Assembly Section and Microfilmed prior to destruction. It is believed, however, that Microfilming, which offers a permanent record, is preferable to maintaining a separate set of files on the excess fingerprint cards in a jacket.

It appears that the type of storage used by State Department would be of particular value to records which can be destroyed after a statutory period rather than records which are permanent such as our identification records and supporting fingerprint cards.

RECOMMENDATION: Information.

SUBJECT: EVIDENCE
SUGGESTION #715-64, SUBMITTED BY
MR. [redacted] GENERAL INVESTIGATIVE DIVISION
Destruction of Bureau Property

b6
b7C

SUGGESTION: That the copies of Form FD-192 (Bulky Exhibit Inventory), submitted with the Semiannual Inventory of Property Acquired as Evidence (SAIP) by each field office and now retained as enclosures to cover letters in the Seat of Government (SOG) administrative file on each field office, be destroyed with the exception of the most recent submission. For example, these semiannual inventories are submitted in February and August of each year; thus, under proposed procedure, all copies of inventories received prior to February, 1964, will be destroyed and, on receipt of the August, 1964, semiannual inventory, the copies from February will be destroyed.

PRESENT PROCEDURE: In connection with these semiannual inventories, Form FD-192 is prepared in quintuplicate by each field office for each case in which evidence is maintained. Two copies are retained in the field office and the original and two copies are forwarded to Bureau with a cover letter. The original and one copy goes to the substantive desk. After review, the original is initialed for the case file and the copy destroyed if no further action is necessary. The other copy, with the cover letter, is filed in the SOG administrative file maintained on the field office.

ADVANTAGES: Suggester feels his idea would effect considerable savings in filing space. Taking the Cleveland Office as an example, it had been necessary for them to submit 81 triplicate sets of FD-192 with the February, 1964, semiannual inventory in question. In fact, going back as far as the inventory submitted in February, 1961, there were a total of 475 enclosures in the administrative file on the Cleveland Office. Under the proposed procedure, 394 of these would be purged. During the most recent inventory (February, 1964), over 3700 such sheets were received from the entire field. If a conservative estimate of 2000 sheets for each of 24 previous inventories were destroyed it would save 48,000 sheets of paper plus enclosure envelopes. Since the original of each FD-192 is filed in the Bureau case file, the suggester feels the general group serves no apparent purpose once each subsequent semiannual inventory is received and could be destroyed without detrimental effect on Bureau's work or records.

OBSERVATIONS: The General Investigative Division recommended that the suggestion be adopted for the advantages cited by the suggester.

JUN 2 1964

Memo Casper to Mohr
Re: Evidence
Suggestion #715-64, Submitted by
Mr. [redacted] General Investigative Division

b6
b7C

The Files and Communications Division also favored adoption of the suggestion as it related to past inventories and the destruction of the current one upon receipt of each subsequent semiannual inventory. They advised that if the suggestion were approved they would handle the destruction of all this prior inventory material in these administrative files and would work out the procedure for the continuing semiannual destruction of this material with General Investigative Division. [redacted]

Training Division agrees that the idea should be adopted since it will save space and, as General Investigative Division has noted, will have no detrimental effect on our operations since the original inventory will be in the case file and the copy in the administrative file will be available until the next one is received and reviewed.

With respect to savings involved, these will be strictly in file space not used hence made available for other storage. The closest estimate that can be made short of actual measurement is based on a figure of 200 sheets to the inch. On this basis, 48,000 sheets would consume 240 inches of space. The average file drawer has 22 inches of space, therefore, including enclosure envelopes, about 11 drawers of cabinet space would be freed. Present file cabinets contain five drawers and cost $63.50 each but they are being replaced with six-drawer cabinets which cost about $85 each and must be obtained on bids since General Services Administration does not carry them. Therefore, space savings would be no less than $127 nor more than $170 and under suggested scale for incentive awards, at either figure, Mr. Mullery could receive an incentive award of $15.

RECOMMENDATION: 1 - That the suggestion be adopted and Mr. [redacted] be granted an incentive award of $15, which is in line with approved scale for such awards, the award to be handled by Commendation, Supervisory Approval and Special Action Unit, Administrative Division in lieu of further acknowledgment. Receipt of the idea was acknowledged previously.

b6
b7C

2 - On approval, this memorandum will be authority for Files and Communications Division to effect the initial purge of the files in question and work out procedure with General Investigative Division for subsequent purges.

Destruction of Bureau Records - Gen

DESCRIPTION OF FILE: 66-9000
GENERAL INTELLIGENCE ASSIGNMENTS

The attached file has been called to our attention by personnel of the Consolidation Unit. It consists of a general file with 3 sections and a sub file for each Field Office. These files were opened in 1940 and discontinued in 1943. This type of mail in most instances is not currently sent to Records Branch for filing. If the supervisor does request the mail be filed, it is classified in the appropriate Field Office administrative file.

These files contain administrative mail regarding statistics of pending cases, assignments of agents, status of plant surveys and other mail of an administrative type. The material is outdated and there appears to be no reason for its continued retention. Mail of a policy nature would not be destroyed but retained in the general file.

Destruction of this mail would result in saving space in the file room. Destruction of this category of mail is authorized under the general records schedule and no further archival authority is required.

It is requested that the appropriate substantive supervisor review the above listed file to determine if any reason exists which would preclude destruction. A notation advising of the decision reached may be placed on this memorandum and returned to the Consolidation Unit of the Records Branch, Room 7231.

RECOMMENDATION:

For referral to the appropriate substantive division.

APR 20 1964

ORIGINAL FILED IN 66-9000-128

ADDENDUM: DOMESTIC INTELLIGENCE DIVISION, 4/17/64, RDS:rbm.

Section 1 of bufile 66-9000 and three subfiles to the same file covering Charlotte, Dallas and Oklahoma City Offices submitted with the above memorandum were reviewed as requested. The material contained in this file relates to administrative data concerning Agents engaged in national defense cases, plant surveys and alien control division in the Bureau. Material also relates to cases turned over to police departments for investigation.

Practically all of the material reviewed in the above files appears to be administrative in nature and is no longer of any value. It appears that all of the information in the above files with the exception of some limited material of historical or policy nature could be destroyed. Much of the information in this file is a duplicate of original material filed elsewhere.

RECOMMENDATION:

It is the recommendation of the Domestic Intelligence Division that this material be carefully reviewed in the Consolidation Unit of the Records Branch and all mail except that of a policy nature or of historical value be destroyed. Since this material also relates to administrative reports submitted in the early 1940s, this memorandum should also be routed to the Administrative Division for its review and comments.

SUBJECT: RECORDS MANAGEMENT
66-18966 Destruction of Bureau Property

Reference is made to SAC Letter #64-12 (A) wherein we requested suggestions and observations to strengthen the Bureau's Records Management Program.

In accordance with this program, SAC, Charlotte, has suggested that field copies of FBI Law Enforcement Bulletin be destroyed when they become five years' old. He points out there is very infrequent reference to these bulletins after five years. He suggests index cards could be retained, and, if needed, bulletins could be obtained from Bureau on data no longer retained after five years.

This suggestion has merit from a records management standpoint, and adoption would undoubtedly result in substantial savings of space throughout field. Manual of Rules and Regulations, Part II, Section 6, Item B, Page 1b, indicates this material is filed in a 66 file to be kept permanently. Observations of Crime Records Division are necessary prior to further consideration of suggestion.

RECOMMENDATIONS:

(1) That this memorandum be referred to Crime Records Division for observations, such observations to be returned to Files and Communications Division for further consideration of suggestion.

(2) That this memorandum be referred to Training Division for review.

L. E. Short to Mr. Tavel Memorandum
Re: Records Management
66-18966

ADDENDUM: (CBF:vcs 4-1-64)

Crime Records is opposed to the suggestion. Twelve copies of the Bulletin require less than one inch filing space. This means that filing drawer space for one copy of each issue of the Bulletin in its 32 years' existence would be approximately 32 inches. It seems rather incongruous that each field division cannot maintain one copy of each issue of the Bureau's official monthly publication. Therefore, we strongly recommend no change be made in the filing procedure of the Bulletin in the field.

(over)

Memorandum L. E. Short to Mr. Tavel
RE: RECORDS MANAGEMENT
66-18966

ADDENDUM: FILES AND COMMUNICATIONS DIVISION 4-7-64

In my opinion, to contend that any material should be maintained indefinitely, increasing year after year, solely because it takes up relatively little space, is about as unconvincing justification as could be advanced. If it is necessary, useful, and frequently referred to, it should be maintained, no matter how much space it requires, and if it is of no use, and seldom referred to, it should be destroyed, no matter how little space it takes up. Actually, for 55 field offices at 32 inches (1 1/2 file drawers) each would amount to 1,760 inches of material or 83 drawers, or over 16 five drawer file cabinets. These cabinets cost $60 each, so we have an investment of about $960 to keep bulletins which at least one field office says are seldom referred to after 5 years. There is no suggestion to destroy current bulletins - only those over 5 years old. Since copies are always available at the Bureau if needed in rare instances, I strongly urge that several offices be asked the frequency of reference to bulletins over 5 years old, and the decision to keep or destroy be based on this survey, rather than solely on the amount of space occupied as suggested above.

CONFIDENTIAL

A review of the file reveals that in 1950 it was felt that there was a possibility the U.S. might recognize the Chinese Communist Government which had just completed the take-over of the Chinese Mainland. If recognition was granted it was thought that most of the staff of the Chinese Embassy, who were Nationalist, would be replaced by communists or communist sympathizers and the Embassy would become the center intelligence operations in the U.S.

With this thought in mind, it was suggested that the groundwork be laid for informant coverage of the Chinese Embassy on the premise that there would be many members of the staff who would defect to the Communists although not in true sympathy with communism or the leadership of MAO Tse-tung. It was felt that a roster of persons employed by the Chinese Nationalists in the U.S. would be of definite value in this endeavor. Ultimately the Bureau obtained from the State Department the lists which now compose the enclosure to 62-55263-50X. These lists contain no identifying information other than the titles of the positions held by the individuals listed and as indicated above the lists are now 14 years old (8)

In April, 1957, the Chinese Ambassador furnished the State Department (in normal course of business) a list of persons other than U.S. citizens who were employed by the Chinese Nationalists in the U.S. This list was current as of 7/1/56. This list is the enclosure to 62-55263-80 and also contains no identifying information other than the titles of the positions held by the various person listed.

RECOMMENDATION:

In view of the age of the lists in question and the lack of identifying information, the Domestic Intelligence Division agrees to the proposal that the names in the enclosures to serials 62-55263-50X and 62-55263-80 be deindexed.

Memorandum

TO : Mr. Tavel

DATE: 4-15-64

FROM : L. E. [illegible]

SUBJECT: RECORDS MANAGEMENT
66-3286
Destruction of Bureau Property

Reference is made to SAC Letter 64-12 (A) wherein we requested suggestions and observations to strengthen the Bureau's Records Management Program.

#797-64
#798-64

In connection with the Program, Legat, Rome, has submitted the following two suggestions relating to destruction of files maintained in all Legat Offices: (1) Legat suggests that the Bureau consider granting approval to all Legat Offices outside the Western Hemisphere to destroy files after the period now allotted to the Bern, Bonn, and Paris Offices. He points out that Section 6K-L (2) of the Foreign Operations Policy Manual permits the Bern, Bonn, and Paris Offices to destroy criminal, applicant, and other files when closed one year and security-type files when closed three years. Other Legat Offices destroy criminal, applicant, and other files when closed three years and security files when closed five years. Legat advised that this shorter retention period for Bern, Bonn, and Paris Offices was formulated because of the geographical location of these offices in relation to Soviet-bloc countries and the greater potential of danger. He advises that in light of the missile-nuclear air transport concept of modern warfare, any country around the globe can be a target of destruction an invasion within a few hours, (2) Legat also suggests that Bureau permit all Legat Offices to destroy files in Foreign Police Cooperation category after one year. He advises that Foreign Police Cooperation cases are quasi-criminal in nature, involving requests from Foreign Police Agencies for investigation in United States, and it is very rare when these files are referred to after a year has elapsed. He indicates that if this suggestion were adopted, all files could be evaluated to avoid destruction of files which would logically be retained for more than one year.

These suggestions desirable from a records management standpoint in that adoption would result in destruction of considerable volume of record material with resultant savings in space. However, since operations

of Legat Offices supervised by Domestic Intelligence Division, observations of that division are necessary prior to further consideration of suggestions.

RECOMMENDATIONS:

(1) That this memorandum be referred to Domestic Intelligence Division for observations concerning merits of above suggestions, such observations to be returned to Files and Communications Division for further consideration.

(2) That this memorandum be referred to Training Division for review.

ADDENDUM BY DOMESTIC INTELLIGENCE DIVISION, MG:mab, 4/17/62

Domestic Intelligence Division concurs with suggestions of Legat, Rome, that (1) Legat Offices located outside the Western Hemisphere be authorized to destroy criminal, applicant and other files when closed one year, and security-type files when closed three years; and that (2) all Legats be authorized to destroy files in the Foreign Police Cooperation (FPC) category after one year. Since practically all FPC cases are of the criminal-type, they would in essence be destroyed after one year if suggestion (1) is adopted. Of course, all files are, and should continue to be, carefully reviewed and evaluated by Legat Offices when they come up on tickler for possible destruction in order to avoid destruction of any files which should be logically retained. Each Domestic Intelligence Division Section was canvassed concerning these suggestions and they concurred with observations set forth above.

Memo L. E. Short to Mr. Tavel 4-15-64
Re: Records Management
66-18966

ADDENDUM: FILES AND COMMUNICATIONS DIVISION 4-21-64

In view of comments of Domestic Intelligence Division who are in favor of adoption of suggestion of Legat, Rome, regarding destruction of files in all Legat Offices similar to procedure approved for Bern, [illegible] and Paris Offices, further comments concerning merits of suggestion necessary from General Investigative and Special Investigative Divisions since destruction as proposed would involve both criminal and applicant files.

RECOMMENDATION:

That this memorandum be referred to General Investigative and Special Investigative Divisions for comments concerning merits of suggestion, such comments to be returned to Files and Communications Division for further consideration.

JWM:ifc
(4)

ADDENDUM BY SPECIAL INVESTIGATIVE DIVISION CLG:rap 4/[illegible]/64

The Special Investigative Division concurs with the Domestic Intelligence Division that ~~one~~ Legat's Offices, located outside the Western Hemisphere, be authorized to destroy criminal, applicant and other files when closed one year. However, it is believed that it should be stated strongly, as pointed out in the Domestic Intelligence Division's comments, that all files which come up for destruction on the basis of time should be carefully reviewed and evaluated in order to avoid destruction of any file which should be logically retained. With reference to the Special Investigative Division's interest, examples of files they might retain would be those of files on notorious American hoodlums who have been deported to their native countries, e.g. Guiseppe Doto (Joe Adonis), who now resides in Milan, Italy. Also there might be a file in a Legat's Office concerning some extremely important figure on whom we have done a special inquiry or security check, which might have a continuing value.

ADDENDUM BY GENERAL INVESTIGATIVE DIVISION LRK:eem 4/27/64

General Investigative Division is in favor of adoption of suggestion of Legat,Rome (as it applies to files under supervisory control of this Division) regarding destruction of files similar to procedure now in effect at Bern, Bonn and Paris Offices.

All Sections of the General Investigative Division have been canvassed and are in agreement that this suggestion should be adopted.

Mr. DeLoach:

Reference is made to the attached memorandum concerning the purging of out-of-service personnel files after the lapse of 10 years.

While this seems to be a fine idea and I would have no objection to this destruction of the material as contemplated, I think the memorandum should set forth just how much this purging would cost. Even though it is done in connection with other work, it will take the time of a lot of people and this will represent a considerable outlay. In addition to the actual purging, they will have to pull abstracts, etc. One would be in a better position to evaluate the entire project if we had some figures in dollars and cents showing just how much it would cost. Then one could make a better decision by weighing the amount of space saved against the actual cost. It may be that in the long run the purging project will not be worth what it would cost in dollars and cents.

The files listed below have been called to our attention by personnel engaged in Name Check work who advise that the frequency of reference to these files causes unnecessary work because in many cases insufficient information is available to effect an identification.

These files contain [redacted] during and for a period following World War II. Many names are surnames or given names only, making positive identification difficult. In an effort to streamline procedures and eliminate unnecessary reference to this data, it is suggested that approval be given for limited deindexing of [redacted] in accordance with authority set out for deindexing of [redacted] which is attached). Identifiable derogatory information will be retained. Sample sections of the following files are attached:

[redacted]

Permission is also requested to deindex the list of persons known to be connected with [redacted] which is filed as enclosure to [redacted]

It is requested that the appropriate substantive supervisor review these files to determine if deindexing may be done as suggested. A notation advising of the decision reached may be placed on this memorandum. The memorandum should be returned to the Correlation Unit of the Records Branch, Room 6309 IB.

RECOMMENDATION:

For referral to the appropriate substantive division.

Memorandum

TO : Director, FBI

DATE: 4/21/64

FROM : Legat, Tokyo (66-78)

SUBJECT: SUGGESTION PROGRAM
TOKYO OFFICE DESTRUCTION OF BUREAU PROPERTY GENERAL

ReBulet 3/30/64.

The practice currently followed by this office in connection with the File Destruction Program permits Legat once and only once each year to consider for destruction, through monthly ticklers, every file in the office which is old enough to be destroyed.

This procedure, which has been gradually developed as a parallel to the individual file destruction-tickler system, and which, after practical testing resulted in the suggestion submitted by Miss [redacted] is felt to have the following advantages over the individual tickler system:

b6
b7C

(1) More often than not, security-type cases are found to have indefinite reference value and considerable indexing. This is especially true in our ChiCom cases. Such files are not routinely destroyed five years after closing, but are, under the current system, reconsidered for possible destruction once each year after the five-year maturity.

(2) We find that under the tickler system, we are constantly pulling and replacing closed files which have been re-opened one or more times during the past five years, and which therefore are not considered appropriate for destruction.

(3) We have found it much more economical of time, both agent and clerical, to review a single adjacently-located group of files one time each month rather than pulling scattered files in numerous bulky consolidated volumes for such review.

The following ticklers in use by this office fully cover all destruction requirements:

3 - Bureau
(1 - Foreign Liaison)
1 - Tokyo
HLC/bje
(4)

(SEE ADDENDUM PAGE 3)

(DOMESTIC INTELLIGENCE DIVISION)

May 15	105-201 thru 105-400 105-1201 thru 105-1300	12/21/56 4/4/60
June 15	105-401 thru 105-600 105-1301 thru 105-1400	8/14/57 7/11/60
July 15	105-601 thru 105-700 105-1401 thru 105-1500	2/4/58 11/30/60
Aug. 15	105-701 thru 105-800 105-1501 thru 105-1600	6/27/58 2/15/61
Sept. 15	105-801 thru 105-900 105-1601 thru 105-1700	11/21/58 5/11/61
Oct. 15	105-901 thru 105-1000 105-1701 thru 105-1800	4/16/59 6/6/61
Nov 15	Classifications 106=162	
Dec. 15	Classifications 163-	

It will be noted that the above schedule provides for consideration for destruction of files not yet old enough to destroy. However, as the ticklers are pulled in subsequent years, the new groups of files will have become applicable for review, and still more recent groups of cases will be added to the ticklers as time goes on.

b6
b7C

As an economy, particularly in clerical effort, it is therefore recommended that the Bureau approve Miss [redacted] suggestion and authorize Tokyo Office to discontinue maintenance and use of copies of assignment cards as file-destruction ticklers.

ADDENDUM: DOMESTIC INTELLIGENCE DIVISION, JJF:mer/bmf, 5/6/64

Suggestion Number 703-64 proposed that the system of retaining orange tickler copies of assignment cards in foreign offices to assist in the file destruction program be discontinued by the Tokyo Office. Current letter from Tokyo furnishes reply to our inquiries as to how file destruction program was to be controlled properly without these orange ticklers.

Foreign offices follow a fixed schedule for reviewing closed files for destruction after prescribed intervals. Retention of orange tickler assignment cards is designed to insure that each file is reviewed for destruction as soon as possible after it reaches destruction age, and the Foreign Operations Policy Manual states, "ticklers should be set to review and destroy files reaching the age limit on a monthly basis." The orange tickler system has been used by all foreign offices since April, 1959.

Tokyo now says that a different method of controlling file destruction procedures would be advantageous to that office and outlines a schedule providing for review of all closed cases once each year and breaking these cases down by classification so that about 1/12 of the work is done on the fifteenth of each month. Legat believes this would be a more orderly approach to the problem but concedes that he would be unnecessarily reviewing many closed cases which have not yet become "ripe" for destruction. Our evaluation is that it would also defeat the purpose of present instructions which provide for review of a closed file within the month after it reaches destruction age.

Since current procedures are considered most suitable for accomplishing the objective of the file destruction program with speed and efficiency and since approval of the suggestion would require a special exception from current instructions for Tokyo, which is not believed desirable or justified, we are opposed to the suggestion and recommend against its adoption.

After a final determination is made, we will furnish appropriate instructions to Tokyo as to procedures to be followed in the future.

Memorandum

TO : Mr. Tavel

DATE: 4-28-64

FROM : L. E. Short

SUBJECT: RECORDS MANAGEMENT
66-18966
#85-64

Reference is made to SAC Letter #64-12 (A) wherein we requested suggestions and observations to strengthen the Bureau's Records Management Program. Odestruction of Bureau Property

In connection with this program, SAC, Honolulu, has suggested that after a criminal-type case has been closed and inactive for three years and a security-type case closed and inactive for five years, these files be microfilmed in the field. He observes that the initial cost of the necessary equipment for each office would be offset by savings made in reduced storage space.

This suggestion recommended unfavorably for adoption. Field has authority to destroy all files after they become twenty years old. Archival authority necessary for approval of microfilming of records and since microfilming is an expensive process, we could never justify from an economical standpoint microfilming records which are scheduled for destruction after an established retention period. Similar suggestions have been previously considered and not adopted (66-18966-355).

RECOMMENDATIONS:

(1) That this suggestion not be adopted.

66-3286-

SUBJECT: REHABILITATION PROGRAM
RECORDS BRANCH

DESCRIPTION OF FILES:
80-7, MOTION PICTURES-P.R. (28 sections)
1-18-1, MOTION PICTURES-TRAINING (23 sections)

The above listed files have been called to our attention by personnel of the Consolidation Unit. Much of the material in these files is outdated and there appears to be no reason for its continued retention.

The 80-7 file was opened in 1933 and 1-18-1 in 1937. These files contain mail regarding showing of films, requests for and letters thanking Bureau for use of film, bookings of film and other miscellaneous types of mail. The majority of the mail in both files is over twenty years old and the type of mail suggested for destruction in most instances is not currently sent to file. Attached is mail removed from a number of sections of the files for examples.

Destruction of this mail would result in saving space in the file room and eliminating unnecessary cards from the General Index. Destruction of this category of mail is authorized under the general records schedule and no further archival authority is required.

It is requested that the appropriate substantive supervisor review the attached mail to determine if any reason exists which would preclude destruction. A notation advising of the decision reached may be placed on the memorandum and returned to the Consolidation Unit of the Records Branch, Room 7231.

RECOMMENDATION:

For referral to the appropriate substantive division.

SUBJECT: RECORDS MANAGEMENT
66-18966
BT 0 DESTRUCTION OF BUREAU PROPERTY-GENERAL

Reference is made to SAC Letter #64-12 (A) wherein we requested suggestions and observations to strengthen the Bureau's Records Management Program.

#967-64 In connection with this program, SAC, Philadelphia, has suggested that when encountered in field office files, photographs of individuals be destroyed if the photograph is over ten years old. He points out this will reduce bulk mass of exhibit envelopes, particularly in old Interstate Transportation of Stolen Motor Vehicle and White Slave Traffic Act ring cases.

Suggestion recommended unfavorably for adoption. Field has authority to consolidate majority of files (applicant, criminal) after they have been closed for six months. Security files may be consolidated at discretion of SAC. At time files are consolidated, they are stripped and any copies of all serials are destroyed. Thus, extra copies of photographs and other material retained in 1A (Exhibit) serials are disposed of. No particular advantage would result in destruction of photographs after ten years and space saved would be negligible. It is conceivable that photograph, even though ten years old or more, could be of considerable value to Bureau in some of our investigations.

RECOMMENDATIONS:

66-3286-

SUBJECT: RECORDS MANAGEMENT
66-18966 DESTRUCTION OF BUREAU RECORDS - Gen'l

Reference is made to SAC Letter #64-12 (A) wherein we requested suggestions and observations to strengthen the Bureau's Records Management Program.

#859-64 In connection with this program, SAC, Charlotte, has suggested that Bureau consider destruction of 67 (Bureau Applicant) files when closed for a ten-year period rather than the present rule of maintaining them for twenty years. He points out Charlotte Office has twenty file drawers containing files which would fall in this category. He suggests that Bureau might also consider the destruction after a one or three-year period of those Bureau Applicant Files which have been closed administratively with no correspondence to Bureau.

Suggestions have merit from records management standpoint and would result in substantial savings of space throughout field. At Seat of Government, Bureau Applicant Files in which no investigation has been conducted, and wherein files contain data of no further value, are destroyed after five years (67-80000-2498). This has resulted in destruction of over 350,000 applicant-type files with tremendous savings in valuable filing space. Files in which investigation conducted are retained permanently at Bureau.

Observations of Administrative Division necessary prior to further consideration of suggestion.

FILES & COMM. REC. UNIT

ORIGINAL FILED IN 66-18966-6

Memo Short to Tavel
Re: Records Management
66-18966

ADDENDUM OF TRAINING DIVISION JER:mlf 4/30/64

Training Division has recorded receipt of [illegible]on and credited it to Charlotte Office under provisions of records management survey.

RECOMMENDATION: That the memorandum be routed to Administrative Division for comments after which it should be returned to Files and Communications Division for evaluation and final recommendations.

ADDENDUM OF ADMINISTRATIVE DIVISION GMM: 5-6-64

Administrative Division sees no objection to destruction of Bureau Applicant files which have been closed for a ten year period (since if any investigation conducted Bureau would have copies regardless). Nor is there any objection to destroying Bureau Applicant files closed administratively (with no investigation conducted) after three year period, especially since this is done at the Bureau after a five year period. It is presumed that in latter category these files would indicate only that an individual applied for Bureau employment and was unfavorably recommended and that, at time of interview, any pertinent information of value to Bureau (other than indicative of personal qualifications for employment) would have been furnished Bureau. Should an individual reapply, following three year period, it is felt that the second interview should be sufficiently thorough to obtain any information previously furnished which would bear on qualifications.

ADDENDUM OF THE STREAMLINING COMMITTEE, ADMINISTRATIVE DIVISION
LDH:ves -- 5-6-64

This suggestion, together with above comments furnished by Applicant Office, were considered by the Streamlining Committee 5-6-64 at which time consensus of opinion was that there be no objection to proposal insofar as Administrative Division is concerned.

RECOMMENDATIONS:

1. That Administrative Division enter no objection to the suggestion contained herein.

2. If approved, that this be forwarded to Files and Communications Division for evaluation and final recommendations.

Mr. Tavel 4-30-64

L. E. Short

RECORDS MANAGEMENT
66-18966

RE: SUGGESTIONS #797-64 AND #798-64
Submitted by Legat, Rome

Reference is made to SAC Letter #64-12 (A) wherein we requested suggestions and observations to strengthen the Bureau's Records Management Program.

By memorandum dated 4-15-64, I set forth two suggestions submitte by Legat, Rome, relating to destruction of files maintained in all Legat Offices. Legat suggested (1) that Bureau consider granting approval to a Legat Offices outside Western Hemisphere to destroy files after period no allotted to Bern, Bonn, and Paris Offices. He pointed out that Section 6K-L (2) of Foreign Operations Policy Manual permits Bern, Bonn, and Paris Offices to destroy criminal, applicant, and other files when closed one year and security files when closed three years, whereas other Legat Offices destroy criminal, applicant, and other files when closed three years and security files when closed five years. Legat also suggested (2) that Bureau permit all Legat Offices to destroy files in Foreign Police Cooperation category after one year. He advised that Foreign Police Cooperation cases are quasi-criminal in nature, involving requests from Foreign Police Agencies for investigation in United States, and it is very rare when these files are referred to after a year has elapsed. Since operations of Legat Offices supervised by Domestic Intelligence Division, these suggestions were referred to that division for observations.

Domestic Intelligence Division concurred with suggestions of Legat. They advised that all files should continue to be carefully reviewed

and evaluated by Legat Offices when they come up on tickler for possible destruction in order to avoid destruction of any file which should logically be retained.

In view of comments of Domestic Intelligence Division and since proposed destruction of files involve both criminal and applicant files, comments of General Investigative and Special Investigative Divisions were solicited concerning merits of suggestions.

General Investigative Division recommended adoption of these suggestions as it applied to files under supervisory control of that division. Special Investigative Division also recommended adoption of suggestions. They pointed out as did Domestic Intelligence Division that all files which come up for destruction on basis of time should be carefully reviewed and evaluated in order to avoid destruction of any file which should logically be retained. They further pointed out with reference to that division's interest examples of files which might be retained would be those of files on notorious American hoodlums who have been deported to their native countries; for example, Guiseppe Doto (Joe Adonis), who now resides in Milan, Italy. They also point out that there might be a file in a Legat's Office concerning some extremely important figure on whom we have done a special inquiry or security check, which might have a continuing value.

Based on the comments as set forth above, it is recommended that these suggestions be adopted, and since operations of Legat Offices supervised by Domestic Intelligence Division, appropriate instructions should be prepared by that division. We have existing Archival authority to destroy files in our field offices.

RECOMMENDATIONS:

(1) That suggestions be adopted.

(Recommendations continued next page)

(2) If Recommendation #1 approved, that this memorandum be referred to Domestic Intelligence Division for preparation of appropriate instructions to Legat Offices.

(3) Upon preparation of necessary instructions, this memorandum be referred to Training Division for review.

66-3286-

PERSONAL

Mr. Robert M. Grant
Federal Bureau of Investigation
Honolulu, Hawaii

Dear Mr. Grant:

I have received your suggestion concerning the microfilming and destruction of case files under certain conditions after they have been closed and inactive for specified periods. As a matter of possible interest to you, archival authority is necessary to microfilm records and, since the field already has authority to destroy all files after they become twenty years old, it is felt that the expense of the procedure you propose could not be justified.

Although your idea was not adopted in this instance, I appreciate your interest in submitting it.

Sincerely yours,

J. Edgar Hoover

NOTE CONTINUED

Division opposed adoption since archival authority is needed to microfilm records and, since field may destroy all files after 20 years, we could never justify expense of microfilming records for which an established period exists for retention and destruction. Training Division agrees.

Employee Suggestion
FD-[illegible] 9-11-59)

#857-64

Date: APRIL 27, 1964

To: Director, FBI

From: (Suggester's name) ROBERT M. GRANT

Division of Assignment: HONOLULU

SUGGESTION

After criminal and applicant type cases have been closed and inactive for three years and selected security type cases closed and inactive for five years, these files could be microfilmed and destroyed in the field offices. Evidence would be maintained separately.

Destruction of Bureau Property

Current practice or rule (Include manual citation as well as facts)

Destroy all files except security after 20 years. Manual of Rules & Regulations, Part II, Sec. 3, page 1.

Advantages of suggestion and annual savings (include basis for estimate)

Advantages include savings of storage space which is continuously expanding, savings of equipment necessary to store files (cabinets, etc.) and in bigger offices, the film would be more readily available. Also the cost of maintaining files would be reduced.

Dollar value of savings of space and labor would vary with the size of the office and cannot be fairly estimated.

66-3286-
NOT RECORDED
176 MAY 6 1964

Disadvantages of suggestion

The original cash outlay for microfilming and reading equipment is a disadvantage but, in many cases, would not exceed the one year cost of leasing the space saved.

(The use by the United States of my suggestion shall not form the basis of a further claim of any nature by me, my heirs, or assigns upon the United States. I understand that I will be considered for any justified award only if my suggestion is adopted within two years after submission.)

☒ Mr. ☐ Mrs. ☐ Miss Robert M. Grant Special Agent
Signature and Title of Suggester

Recommendations and comments of Division Head

Since suggestion would result in space saving, it is worthy of Bureau's consideration. However, objection to the suggestion is that it may be necessary to check material on the microfilm & this requires much more time & involves problems of having proper equipment avail.

Frank P. Rice Sr.

SUBJECT: RECORDS MANAGEMENT
66-18966

Destruction of Bureau Records - GEN

Reference is made to SAC Letter #64-12 (A) wherein we requested suggestions and observations to strengthen the Bureau's Records Management Program.

#912-64

In connection with this program, SAC, Chicago, has suggested that consideration be given to destruction of certain information contained in field office personnel files which has been incorporated in summary into performance ratings; for example, commendations from SAC or outside business, municipal or police officials, regarding Agent's participation at police schools, speeches and similar assignments. He also suggests that other types of records maintained in personnel files such as Agent's firearms record while attending In-Service, inspection examination ratings, etc., could also be destroyed and proposes that these records be destroyed after five years.

This suggestion desirable from a records management standpoint and would result in considerable space savings, particularly in larger offices such as New York, Washington Field Office, etc., where large number of Agent personnel assigned. Since suggestion relates to destruction of records maintained in field office personnel files, observations of Administrative Division necessary prior to further consideration of suggestion.

ALL INFORMATION CONTAINED
HEREIN IS UNCLASSIFIED
DATE 8-19-82 BY SP4 EWW/cal

RECOMMENDATIONS:

(1) That this memorandum be referred to Administrative Division for observations concerning merits of this suggestion, such observations to be returned to Files and Communications Division for further consideration.

Xerox - Mail Room

ADDENDUM ADMINISTRATIVE DIVISION RRB:crt 5-7-64

With regard to items mentioned above such as commendations from SAC and letters of appreciation from businessmen, police officials and the like concerning agents' investigative work, speeches, testimony and police training matters, the Administrative Division feels that it would be appropriate not to file these items in personnel files but that they should be maintained by supervisors in personnel folders. Then, at the time annual performance reports are prepared, these items are summarized in the reports and could be destroyed. This would not only save filing space under our records management program but would save additional clerical time now utilized in filing such items. It is felt that such action should be uniform in all field offices and not just in the larger ones as the saving would be proportionate in each division.

With regard to retention of firearms records, the Administrative Division feels this should be referred to the Training Division which maintains such records and,further,that retention of inspection examination records should be referred to the Inspection Division.

RECOMMENDATIONS:

(1) That this memorandum be referred to the Training Division for comments concerning retention or destruction of firearms records of agents attending In-Service Training.

(2) That the matter also be referred to the Inspection Division for comments on destruction of inspection examination ratings and for their views concerning the above items being retained in personnel folders and destroyed after being summarized in annual performance reports.

(3) That thereafter all observations be forwarded to Files and Communications Division for final evaluation.

DUE 12

ADDENDUM TRAINING DIVISION HLS:pab 5-18-64

With respect to the retention of a Special Agent's In-Service Letter setting out scores fired while attending In-Service, the Training Division feels that these letters may be destroyed after the scores have been entered on each Agent's FD-40 (individual firearms training record). SAC Sloan advises that In-Service firearms scores are retained at the Academy for three years, and this will be ample time to have the information available should a question arise due to error in transcribing scores to the individual firearms training record sheet.

ADDENDUM OF INSPECTION DIVISION JER:mlf 5/20/64

Inspection Division sees no need for retention of inspection examination ratings in field office personnel files beyond five years since failures are commented on in next subsequent performance rating and in summary memorandum prepared for Director reporting inspection as well as in the SOG personnel file.

RECOMMENDATION: 1 - That inspection examination records in field office personnel files be destroyed after five years.

2 - That this memorandum with comments of Inspection Division be referred to Files and Communications Division for final evaluation.

SUBJECT: RECORDS MANAGEMENT
66-18966
Destruction of Bureau Records

Reference is made to SAC Letter #64-12 (A) wherein we requested suggestions and observations to strengthen the Bureau's Records Management Program.

#8912-64
#8913-64

In connection with this program, two suggestions have been received regarding destruction of zero files. SAC, Chicago, suggests that zero files be reviewed and all information contained therein which has had no action or has not been added to in past ten years be destroyed. SAC, Boston, suggests that correspondence in zero files in all classifications be destroyed after five years.

Suggestion to destroy zero files prior to present twenty-year retention period has been considered on a number of occasions and not adopted (66-3286-942, 66-18966-574). On these occasions, observations of appropriate divisions at Seat of Government were secured and it was recommended and approved that no change be made in retention period of these files. Since previous objections to destruction of this material are still valid, suggestions recommended unfavorably for adoption.

RECOMMENDATIONS:

(1) That suggestions not be adopted.

Memo L. E. Short to Mr. Tavel
Re: Records Management
66-18966

ADDENDUM OF TRAINING DIVISION JER:mlf 5/6/64

Training Division agrees with views of Files and Communications Division in the foregoing memorandum. As noted, similar ideas have been considered before and not adopted. Domestic Intelligence, General Investigative and Special Investigative Divisions all opposed adoption in the past. Security material is often of considerable value after several years have passed. Although information filed may seem insignificant when initially received, it may later tie in with other information and result in institution of a full investigation. Memorandum from McGuire to Mohr, entitled, "Lowering Retention Period For Field Office Files," dated 1/19/60, reflects a survey was conducted regarding destruction of certain zero files prior to adoption of current retention period (20 years). This survey determined that no change should be made in current policy in this regard.

RECOMMENDATION: That suggestions not be adopted. On approval, no further action is necessary; ideas have been credited to the Chicago and Boston Offices under the provisions of the Records Management Program.

Mr. Tavel 5-6-64

CALIFORNIA DISTRICT DEFENSE COMMITTEE - I. W. W.
Bufile 61-3125

Description of List: 61-3125-7. Bulletin setting out the financial report of the California Branch of the General Defense Committee, June, 1923.

The attached listing of names has been called to our attention by personnel engaged in Name Check work. They advise that the frequency of reference to this listing causes unnecessary work because insufficient information is available to effect an identification. In an effort to streamline procedures and eliminate unnecessary reference to this data, it is suggested that the material be deindexed through removal of the cards from the Bureau's indices.

It is requested that the appropriate substantive supervisor review the above-listed file reference to determine if any reason exists for retention of the indexing on this listing of names. A notation advising of the decision reached may be placed on this memorandum. The memorandum should be returned to the Correlation Unit of the Records Branch, Room 6309 IB.

RECOMMENDATION:

For referral to appropriate substantive division.

ORIGINAL COPY FILED IN 61-3125-13

ADDENDUM: DOMESTIC INTELLIGENCE DIVISION, 5/8/64, RDS:rbm.

A review of Serial 7 of the above file indicates that it consists primarily of a long list of names of individuals who apparently had contributed various sums of money to the California Branch of the General Defense Committee of the International Workers of the World. This list consists merely of names, many of which are not complete but bear only the first initials. There is no identifying data concerning the individuals listed and the names are obviously not restricted to any particular locality. Some few of the names are followed by the name of a city but most names do not have even this meager identifying data. These names are from the financial report of the organization for June, 1923.

Inasmuch as the list is now nearly 41 years old and contains no identifying data, it does not appear that the continued retention of this list in Bureau indices is warranted.

RECOMMENDATION:

It is recommended that this memorandum be returned to the Records Division in order that it may deindex the names listed in Serial 7 of Bufile 61-3125.

SUBJECT: RECORDS MANAGEMENT PROGRAM
SUGGESTION #755-64, SUBMITTED BY
SAC, CHARLOTTE
Destruction of Bureau Property

Reference is made to SAC Letter #64-12(A) wherein suggestions and observations to strengthen Bureau's Records Management Program were requested from the field.

Files and Communications advised that, in accordance with the program, SAC, Charlotte had suggested that field office copies of the FBI Law Enforcement Bulletin be destroyed when they become five years old. The index cards would be retained so that, if needed, information could be obtained from the Bureau on data no longer retained in the files. He noted that, in his experience, there is infrequent reference to these Bulletins after five years old.

Files and Communications Division commented that the suggestion had merit from a records management standpoint and the adoption of the idea would undoubtedly save considerable space throughout the field. They recommended, however, that the opinion of Crime Records Division be solicited.

Crime Records Division opposed adoption. They stated that 12 copies of the Bulletin require less than one inch of filing space so that the space required for one copy of each issue of the Bulletin in its entire 32 years of existence to date would be about 32 inches. They felt it rather incongruous that each field office could not maintain one copy of each issue of the Bureau's official monthly publication.

In rebuttal to the comments of Crime Records Division, Files and Communications Division pointed out that the space requirements to maintain copies of the Bulletin increase each year and, when multiplied by 55 field offices, 32 years of Bulletins at 32 inches, or one and one-half file drawers, actually would amount to 1760 inches of space or 83 drawers which would be the equivalent of 16 five-drawer file cabinets. They pointed out that Charlotte Office had stated there is little reference to those Bulletins over five years old.

66-32486

NOT RECORDED

167 MAY 27 1964

Training Division solicited the views of seven field offices concerning the merits of the proposal. The Albany, Atlanta, Chicago, Miami, Minneapolis, Newark and Philadelphia Offices were unanimously of the opinion that Law Enforcement Bulletins

ORIGINAL FILED IN

JER:mlf
(2)
Enclosure

8 MAY 26 1964

DATE 8-19-82 BY SP4 ELW/cal

SEE PAGE TWO

over five years old should be destroyed since the references to them were too infrequent to warrant their retention. They felt the retention of the index cards would be sufficient to enable them to obtain the data from the Bureau if needed.

In view of the foregoing results of the canvass of a sampling of field offices, Training Division feels the suggestion advanced by SAC, Charlotte, should be adopted. It is noted the Minneapolis Office requested permission to give their copies of the Bulletin, which would be subject to destruction should the idea be adopted, to the Minneapolis Police Department. If this memorandum is approved, Minneapolis will be appropriately notified.

LPS 5/25/64 JJC

This suggestion was received and credited to the Charlotte Office under provisions of the Records Management survey and no initial acknowledgment was necessary Therefore, it is felt the SAC, Charlotte, should receive a letter of appreciation for his idea.

RECOMMENDATIONS: 1 - That the suggestion be adopted and the attached letter be directed to SAC, Charlotte.

2 - On approval, this memorandum will be authority for the Manuals Desk, Training Division, to make the appropriate changes.

REHABILITATION PROGRAM
RECORDS BRANCH

DESCRIPTION OF FILE: 66-2087
LEAVE ① DESTRUCTION OF BUREAU PROPERTY-GENL.

The above listed file has been called to our attention by personnel of the Consolidation Unit. It consists of 37 sections beginning in 1929. Sections 1 thru 22 contain mail that is outdated and there appears to be no reason for its continued retention. Mail of a policy nature would not be destroyed. Following is the type of mail suggested for destruction:

1. Mail listing statistics and names of employees regarding leave requested, leave taken, leave cancelled and leave lost.
2. Lists of employees requesting advanced sick leave
3. Mail regarding audits of leave records, corrections made on leave records, and inquiries from Field Offices re handling of leave records.

These sections are very bulky and destruction of this mail would result in saving space in the File Room. Destruction of this category of mail is authorized under the general records schedule and no further archival authority is required. Attached is mail removed from a number of sections of the file for examples.

It is requested that the Administrative Division review the attached mail to determine if any reason exists which would preclude destruction. A notation advising of the decision reached may be placed on this memorandum and returned to the Consolidation Unit of the Records Branch, Room 7231.

Bureau Property

DESTRUCTION OF FILES
ADMINISTRATIVE

General

ReSAC Letter Number 64-12 (A) wherein suggestions and observations were requested to strengthen Bureau's Records Management Program.

One of our Legat offices recently submitted two suggestions concerning periods for destruction of files by our foreign offices. After careful study and evaluation, the suggestions were adopted by the Bureau. Henceforth, all Legat offices located outside the Western Hemisphere (European and Far East offices) may destroy criminal, applicant and other related files when closed one year and security-type cases when closed three years. In addition, all Legat offices, irrespective of location, may destroy files in the Foreign Police Cooperation category after they are closed one year.

Each recipient of this communication is expected to use good judgment in accordance with prevailing conditions in your office prior to destruction of any file which in your opinion will be of future use.

You should insure, as in the past, that all files eligible for destruction are thoroughly reviewed and evaluated to avoid destruction of any file which should be logically retained.

Appropriate changes are being made in the Foreign Operations Policy Manual and they will be forwarded to you in the near future.

DESTRUCTION OF BUREAU PROPERTY - GENERAL

SUBJECT: ASSIGNMENT CARDS
SUGGESTION #703-64, SUBMITTED BY
MISS [redacted] TOKYO

b6
b7C

SUGGESTION: That Legal Attaches be authorized, after a case is closed, to discontinue using orange copy of the assignment card as a tickler for destruction of case on a monthly basis. Instead, groups of files would be reviewed on an annual basis and more frequently if necessary to obviate necessity of pulling and review scattered files each day.

PRESENT PROCEDURE: Foreign Operations Policy Manual, Section 6, L, 2, on page 13 provides that ticklers should be set to review and destroy files reaching the age limit on a monthly basis (By letter 4/8/58, Bureau instructed foreign offices to use the orange tickler copy of the assignment cards on closed cases as the destruction ticklers, to be filed on a monthly basis). In addition an annual tickler should be set so that consideration can be given to the destruction of files. The Bureau should be advised between August 1 and September 1 of each year that this has been done, that the files are manageable, and that those retained could be destroyed in the event of a foreseeable emergency.

OBSERVATIONS: Legat Child, Tokyo, advised that they found in actual practice that it was better for them to review groups of files on an annual basis, and more frequently if necessary, going right through from the lowest file numbers, which would be the earliest openings, up to the cut-off date in each classification, rather than pulling and reviewing the eligible files each day for possible destruction.

66-3286

Inspection Division commented that Legat Tokyo made out a good case in support of the suggestion. Considering the total number of files which would have to be reviewed in any Legat Office, it would seem to pose no burden. The suggestion would relieve the administrative detail of the orange tickler and they could see no reason why it should not be adopted.

NOT RECORDED
9 JUN 2 1964

MAY 28 1964

Domestic Intelligence Division advised that the present procedure was set up to prevent a backlog accumulating over a longer period which could cause the File Destruction Program to reach unmanageable proportions and require handling as a special project. Inasmuch as Legat, Tokyo, in commenting on the suggestion, indicated the files are now being reviewed for destruction at less frequent intervals than the Manual provided for, they felt clarification of his comments needed as to the system he was using

JERmlf
(2) 64 JUN 9 1964

ORIGINAL FILED IN

DATE 8-19-82 BY SP4EW/Cal Two-Jr

SEE PAGE TWO

b6
b7C

before they made a decision. By letter dated 3/30/64, Legat, Tokyo, was asked as to how the monthly review of files for destruction is to be accomplished if use of the orange tickler was discontinued.

By letter dated 4/21/64, Tokyo Office replied and outlined a schedule providing for the review of all closed cases once each year and breaking them down by classification and groups within classifications so that about one-twelfth of the total would be done on the fifteenth of each month. They conceded however, that, in using this method, they would be unnecessarily reviewing many closed cases not yet eligible for destruction but stated, that, as ticklers are pulled in subsequent years, the new groups of files will have become eligible for review and still more recent groups of cases would be added to the ticklers as time goes on.

Domestic Intelligence Division considered the reply and commented that the proposed system, in addition to causing unnecessary review of files not yet eligible for destruction, would also defeat the purpose of the present instructions that a closed file be reviewed within the month after it reaches the destruction age. Since the current procedures are considered most suitable for accomplishing the objectives of the file destruction program with speed and efficiency, and since approval of the suggested procedure would require a special exception for Tokyo, which is not felt desirable or justified, Domestic Intelligence Division opposed adoption and advised, if the objection were approved, they would furnish appropriate instructions to Tokyo for future use.

In view of the comments of Domestic Intelligence Division which had the opportunity to evaluate the suggested procedure at length, Training Division agrees that creation of the exception to existing instructions is unwarranted.

RECOMMENDATION: That the suggestion not be adopted and this memorandum be authority for Domestic Intelligence Division to issue necessary instructions to the Tokyo Office. Receipt of the idea was acknowledged previously.

Ltr to Tokyo 5/27/64 - SSF: jas

ADDENDUM, INSPECTION DIVISION: (H. L. Edwards:mbk 3-20-64) The Tokyo Office makes out a good case in support of this suggestion. Considering the total number of files which would have to be reviewed in any Legat Office, it would seem to pose no burden. The suggestion would eliminate the administrative detail of the Orange Tickler. Accordingly, the Inspection Division can see no reason why the suggestion should not be adopted.

RECOMMENDATION:

That these comments be referred to the Training Division for further processing of the suggestion.

SUBJECT: RECORDS MANAGEMENT
66-18966 DESTRUCTION OF BUREAU RECORDS - GEN'L

Reference is made to SAC Letter #64-12 (A) wherein we requested suggestions and observations to strengthen the Bureau's Records Management Program.

#929-64

In connection with this program, two similar suggestions have been received concerning the destruction of channelizing memoranda in security-type cases. SAC, Los Angeles, advises that program of destroying channelizing memoranda in security-type cases, after information has been incorporated in report form, has been in effect about three years and has been most effective in saving space. SAC suggests (1) that Bureau may wish to consider extending program to include destruction of memoranda placed in files back to period in which reports were submitted with full documentation in accordance with SAC Letter #121 (H) dated 12-20-51. SAC, Cleveland, suggests (2) that program of destroying channelizing memoranda be extended to include a review of all pending and closed security-type files for the destruction of channelizing memoranda from which pertinent information has been incorporated in a report. He advised that this suggestion was previously submitted to Bureau 9-26-63.

Suggestion to expand destruction of channelizing memoranda to permit field to review all pending and closed security files and destroy memoranda from which pertinent information has been included in report was considered under Suggestion #211-64. By memorandum from Casper to Mohr dated 10-11-63 (66-3665-3891), suggestion was not adopted based on opposition of Domestic Intelligence Division. It was concluded that while there would be some saving in file space, cost of man power to handle such a program would far outweigh value of any space saved. Domestic Intelligence Division advised any destruction would have to be closely supervised since there are a number of exceptions which would preclude destruction.

Mr. DeLoach:

RE: SPACE NEEDS
OUT-OF-SERVICE PERSONNEL FILES
PERSONNEL RECORDS UNIT

By memorandum dated 3-19-64, the Files and Communication Division submitted for our comment a proposal to purge administrative-type material from files relating to former clerical employees who have been out of service for more than ten years. If approved, this project is slated to be accomplished with existing personnel at times when the flow of current work will permit. Crime Records raised the possibility that in the long run this undertaking might be too expensive even though badly needed storage space would result from the project. It was suggested we might be in a better position to evaluate if we had some idea as to the cost.

By subsequent memorandum dated 5-15-64, the Training Division points out that cost is not the main consideration as it will be accomplished with existing personnel; however, availability of space is a prime objective and that it is imperative that every space-reclamation avenue be explored in order to keep pace with an ever-increasing volume of file material. Figures are cited to show what can be gained through a continuing program of this type.

The Training Division advises that on the basis of the facts and figures provided by Files and Communications, it believes the proposed program is justified and should be authorized.

In light of the additional background material furnished by the current memorandum, I see no further objections to the proposal.

Director, FBI	[redacted]	NEW YORK

SUGGESTION Destruction of Bureau Property

It is suggested that all files in classifications 15, 26, 52, 70 and 87 be destroyed when 5 years old when the last name of the subject is unknown providing there are no stops outstanding; a capital offense is not involved; the file contains no information of an intelligence-type useful on a continuing basis; and the file contains no signed statements obtained from witnesses.

This destruction could be handled in conjunction with the destruction of unknown subject files, provided for in Part II, Section 3, D8d of the Manual of Rules and Regulations.

Current practice or rule (Include manual citation as well as facts)

Presently destroyed when 20 years old - Part II, Section 3, D8a of the Manual of Rules and Regulations.

Advantages of suggestion and annual savings (Include basis for estimate)

Considerable savings in Closed Files space and Indices.

There are numerous files and zero serials on LNU's, and it is felt that if an identity or surname has not been established within five years it is of little value.

SUBJECT: SPACE NEEDS
OUT-OF-SERVICE PERSONNEL FILES
PERSONNEL RECORDS UNIT

By memorandum, L. E. Short to Mr. Tavel, under same caption, dated 3/19/64, Files and Communications Division advised that the captioned personnel files now consume about 475 five-drawer file cabinets (2375 drawers) and continue to expand at the rate of about 100 cabinet drawers a year. Because of limits of available space, they are stored partly on the sixth floor and partly on the seventh floor of the Justice Building. In an effort to provide for future expansion needs the use of open-shelf filing for these records was tried and abandoned because of several disadvantages.

Accordingly, seeking a workable alternative, Files and Communications Division discussed with Administrative Division the possibility of stripping these files of extraneous administrative data which is not part of the official personnel file as far as Government regulations are concerned and it was decided that, in addition to retaining documents required by the Federal Personnel Manual, we should also keep exit interview forms, separation performance reports, service record letters and memoranda, appointment letters, applicant or permanent briefs, personnel status forms, all letters and memoranda denoting administrative action and final record of disposition of property. It was agreed that the stripping should be confined initially to clerical files in which the individuals have been out of the Bureau's service for 10 years or more.

A survey of a representative number disclosed about half of each drawer contains clerical files out of service more than 10 years and about half of each such file is composed of administrative material which could be destroyed without losing any pertinent data of the type mentioned above concerning the employees. Therefore, through the proposed stripping operations, about 25% of the drawer space will be reclaimed or about 590 drawers. Since as noted before these files continue to grow at about the rate of 100 drawers a year, almost six years of space for future growth will be netted. Further, at $63.50 per five-drawer cabinet, about $7500 worth of drawer space would be reclaimed.

Memo Casper to Mohr
Re: Space Needs
Out-of-Service Personnel Files
Personnel Records Unit

Comments of the Training, Inspection, Identification, and Crime Records Division were solicited and all four divisions agreed that the proposed program was worthwhile. However, it was noted that the success of the program would depend on the availability of personnel qualified for the stripping operations. Inspection Division commented the purging project should be considered in line of importance as it related to other project-type work which must keep up with normal monthly production standards. Crime Records Division felt the proposed program would involve a considerable outlay and might cost more than it would save.

Files and Communications advised in answer to the above comments that the cost of the operation is not the main consideration as it will be accomplished with existing personnel in line with the regular destruction program. However, availability of space is a prime consideration and it is only through a diligent program of exploiting every space-saving and space-reclamation avenue that we are able to accommodate the ever-increasing volume of file material. An idea of the results of the continuing destruction program can be gained from the following figures: 1936 five-drawer file cabinets have been reclaimed through microfilming (1000), copy destruction (730) and destruction as permitted in the 25 classification cases (206). Since each cabinet contains four and one-half square feet of space, a total of 8712 square feet were reclaimed. At $63.50 per cabinet, this represents a saving of $122,926. Added to these savings are those resulting from the purging of obsolete index cards of which 3,816,860 have been purged during the last five years representing the contents of 88 fifty-four drawer index cabinets which occupy nine and one-quarter square feet of space each or an aggregate of 814 square feet. At a cost of $466.50 per cabinet, this represents a saving of $41,052. On the basis of the above figures, $163,978 worth of equipment was reclaimed for use but, more important, 9526 square feet of space was salvaged. This does not include 358,336 applicant files destroyed since they are carried in open-shelf filing and monetary savings are somewhat difficult to compute. As an estimate a five-drawer cabinet would accommodate about 1000 such files so an equivalent saving of 358 cabinets (or about $22,733) could be calculated. More important is the fact that, as the normal file load of applicant cases is about 100,000 files, were the aforementioned files not disposed of, four times the present space would be required to house them.

On the basis of the foregoing facts and bearing in mind that the proposed destruction will be accomplished in the normal course of the regular destruction program with the existing personnel, Training Division believes the proposed destruction program is justified and Files and Communications Division should be authorized to include in their overall project the destruction of the out-of-service personnel files subject to the limitations agreed upon between them and the Administrative Division.

RECOMMENDATION: That the proposed destruction of out-of-service personnel files, as modified by the Administrative Division, be approved for implementation by Files and Communications Division.

SUBJECT: Jack Gilbert Graham
SABOTAGE
Destruction of Property

In connection with a regular review of current bulky exhibits being maintained by the Laboratory Division, the bulky exhibit so maintained in captioned case was considered.

This consists of photographs and negatives taken of the plane during its reconstruction after the crash as well as a photograph of subject GRAHAM.

This matter was taken up with SA William R. Heilman, Jr., one of the examiners in the case, and it was determined that in view of the inactive status of this case the photographs should be destroyed and the negatives should be sent to the Bureau file as an enclosure thereto.

In view of the above, the attached negatives should be filed with the Bureau file in this case.

FROM : L. E. Short

~~CONFIDENTIAL~~

SUBJECT: DESTRUCTION OF BUREAU RECORDS - GENERAL
Bufile 66-3286

The files listed below have been called to our attention by Records Branch personnel who advise that the frequency of reference to these files causes unnecessary work because in many cases insufficient information is available to effect an identification. b1

These files contain [redacted] listed during and/or for a period following World War II. Many names are surnames or given names only, making positive identification difficult. In an effort to streamline procedures and eliminate unnecessary reference to this data, it is suggested that approval be given for limited deindexing of [redacted] in accordance with authority set out for deindexing of [redacted] (see 66-3286-989 which is attached). Identifiable derogatory information will be retained. Sample sections of the following files are attached: [redacted] b7E

It is requested that the appropriate substantive supervisors review these files to determine if deindexing may be done as suggested. A notation advising of the decision reached may be placed on this memorandum. The memorandum should be returned to the Correlation Unit of the Records Branch, Room 6309 IB.

RECOMMENDATION:

For referral to the appropriate substantive division.

Memorandum

TO: Director, FBI

DATE: May 19, 1964

FROM: SAC, Minneapolis (66-937)

SUBJECT: ~~Destruction of Bureau~~ ADMINISTRATIVE MATTERS Records - General

#975-64

In connection with the installation of the open-shelf filing system, I am causing a careful review to be made of all old files with a view toward destroying those over 20 years of age, and to additional consolidation.

I refer particularly to Manual of ~~Instructions~~ Rules & Regulations, Part II, Section 3 (8), page 12. During the course of this review, I have had called to my attention a number of files in the 100 and 65 classifications where it appears from our files that virtually all of the investigation was conducted and reported upon more than 20 years ago. In some instances, however, communications have been received by this Division of a more recent date--some in 1947 and 1950, for example. These communications contain no significant information and many of them are administrative in nature.

For example, the attention of the Bureau is referred to Bufile 62-245, entitled "THE SILVER SHIRT LEGION OF AMERICA, INC.; Et Al, IS - G; SEDITION." Our files contain 13 volumes of reports and other communications in this case. The first 12 volumes all contain communications dated more than 20 years ago. The 13th volume contains only one serial of any significance, which is Seattle report dated December 15, 1948. That report indicates that this case was then still pending in the office of origin, Indianapolis. The question in my mind is whether or not the first 12 volumes of this file, all of which are over 20 years of age, may be destroyed in toto. The single serial in volume 13 dated in 1948 contains no leads for this Division or any pertinent information. It would seem that the entire file could be destroyed without loss to this office.

It would seem that in multi-volumed cases which after careful review and in the exercise of good judgment are found to be unimportant and without significant ramifications, the volumes containing material over 20 years in age could well be destroyed provided the cases have not been active in this Division, from an investigative standpoint, for over 20 years. The Bureau's advice is respectfully requested.

FROM : L. E. Short

SUBJECT: RECORDS MANAGEMENT
66-18966
#948-64
Destruction of Bureau Property

Reference is made to SAC Letter #64-12 (A) wherein we requested suggestions and observations to strengthen the Bureau's Records Management Program.

In connection with this program, SAC, Charlotte, has suggested: (1) That Bureau consider eliminating semiannual report of criminal cases pending for one year or more and cases pending prosecution for more than six months; and (2) That Bureau consider eliminating semiannual report of property acquired during investigation (Bulky Exhibit Inventory), keeping in mind that Inspection Staff reviews such material on an annual basis. Comments of General Investigative, Special Investigative, and Inspection Divisions were secured concerning merits of these suggestions.

These divisions recommended that suggestions not be adopted. They advised that reports are necessary to insure adequate supervisory control at Seat of Government. General Investigative Division suggested, however, that field be required to submit only two copies of reports to Bureau rather than three presently being submitted. This is desirable from records management standpoint. Original of report can be filed in office file at Seat of Government and copy, broken down, sent to appropriate substantive desk for review and then filed in case file. On this basis, it is felt third copy to Bureau can be eliminated, thus saving employee time in preparation and some filing space. Special Investigative Division agrees with this suggestion.

66-3286-
RECORDED
JUN 26 1964

General Investigative Division also suggests in connection with submission of semiannual report of criminal cases pending one year or more and cases pending prosecution for more than six months (a combined report), that enclosures to cover letters listing such cases (which are filed in

(Continued next page)

JWM:ifc
(4)

61 JUN 29 1964

11 JUN 17 1964

SEE ADDENDUM OF TRAINING DIVISION ON PAGE THREE

office file at Seat of Government), with exception of most recent submission from each office, be destroyed and that on receipt of each such submission in future, after appropriate review, previous submission be destroyed. Special Investigative Division agrees with this suggestion. Suggestion has merit and will result in some savings in filing space. There appears to be no need to permanently retain this information. Similar suggestion has recently been adopted in connection with handling of semiannual report of property acquired during investigation.

RECOMMENDATIONS:

(1) That suggestions submitted by SAC, Charlotte, to eliminate these reports not be adopted.

(2) That instructions be changed to require field to submit copies of these reports to Bureau in duplicate rather than in triplicate. (If approved, appropriate manual change will be prepared.)

(3) That prior copies of semiannual reports submitted by field maintained in Bureau files concerning criminal cases pending one year or more and cases pending prosecution for more than six months be destroyed and that in future, upon receipt and review of each submission, previous submission be destroyed. (If approved, Files and Communications Division will handle destruction.)

(4) That this memorandum be routed to Training Division for review.

ST
5/22

(OTW)

Memo L. E. Short to Mr. Tavel
Re: Records Management
66-18966

ADDENDUM OF TRAINING DIVISION, ML:mlf 5/22/64

The Training Division agrees with interested divisions that elimination of these reports is not desirable from the standpoint of control at the Seat of Government; however, the alternatives proposed by the General Investigative Division should streamline our paper work management operations without any lessing of supervisory control.

RECOMMENDATIONS: 1 - That the suggestions made by SAC, Charlotte, not be adopted but that the modified versions as proposed by the General Investigative Division be placed into effect. No further action is necessary by Suggestion Desk as suggestions were credited on receipt to Charlotte Office under provisions of the Records Management Program.

2 - That appropriate manual changes be submitted regarding the number of copies of pertinent reports to be submitted by the field.

3 - On approval, that the Files and Communications Division be permitted to destroy prior copies of semiannual reports submitted by field concerning criminal cases pending one year or more and cases pending prosecution for more than six months and that, in the future, upon receipt and review of each submission, the previous submission be destroyed.

Mr. Tavel 5-25-64

L. E. Short

SPANISH SWINDLE
Buffile 62-10861

This file consists of 44 sections and over 2,200 serials, most of which are outside source letters reporting the receipt of letters relating to the "Spanish Swindle." No Bureau investigations were made, and the letters or the correspondents were referred to the U. S. Post Office Department as a matter within its jurisdiction. This material is unindexed.

Destruction of Property

In connection with our Records Rehabilitation Program, it is suggested that the mail described above over three years old be destroyed in accordance with General Records Schedule 14, item 4. Further approval by Archives is not necessary. It is requested that the appropriate substantive supervisor review this material to determine if any reason exists for its retention. A notation advising of the decision reached may be placed on this memorandum. The memorandum should be returned to the Correlation Unit of the Records Branch, Room 6309 IB.

RECOMMENDATION:

For referral to appropriate substantive division.

SUBJECT: DESTRUCTION OF FIELD FILES
#975-64

By letter dated 5-19-64 the Minneapolis Division pointed out that in connection with conversion to shelf filing a question had arisen concerning the possibility of destroying earlier sections of particular files which contained material more than 20 years old and retaining later sections which contained more current information. Bureau regulations permit the destruction of files and records in field divisions after they become 20 years old. The general interpretation of this destruction rule has been that a file may be destroyed when the last piece of correspondence in the file is more than 20 years old. This is by far the simplest criterion and the easiest to administer. It is not believed that the field divisions should circumvent the 20-year destruction rule by destroying those sections of files containing material more than 20 years old and retaining other sections with more current material. Numerous suggestions have been considered by the Bureau relative to a reduction in the 20-year retention period. The most recent was Suggestion #709-64 by an employee of the Little Rock Office who proposed destruction of files by auxiliary offices after 10 years. These suggestions have not been adopted by the Bureau. Accordingly, it is believed that the Minneapolis Division should abide by the current 20-year destruction rule.

RECOMMENDATION:

That the attached letter be forwarded to Minneapolis.

DESCRIPTION OF FILE: 66-2086
HOTELS

DESTRUCTION OF BUREAU PROPERTY-GENL.

The attached file has been called to our attention by personnel of the Consolidation Unit. It consists of 6 sections beginning in 1926 and the majority of the mail is over 20 years old. This type of mail is not currently sent to file and the last mail in the file is dated in 1960. The file contains letters and advertisements from Hotels regarding their rates and services. The material is outdated and there appears to be no reason for its continued retention. In an effort to provide file space for current cases, it is proposed that the file be reviewed and obsolete material destroyed.

It is requested that the appropriate substantive supervisor review the above listed file to determine if any reason exists which would preclude destruction. A notation advising of the decision reached may be placed on this memorandum and returned to the Consolidation Unit of the Records Branch, Room 7231.

DESCRIPTION OF FILE: 66-2120
INTERVIEWS

① DESTRUCTION OF BUREAU PROPERTY-GEN'L.

The attached file has been called to our attention by personnel of the Consolidation Unit. It consists of 82 sections beginning in 1927. Sections 1 thru 50 contain mail dated over 25 years old and there appears to be no reason for its continued retention. Following is the type of mail in these sections:

> Phone calls from individuals giving no indication what the call pertained to. Phone calls regarding personal matters, applicants, salesmen and other miscellaneous matters. Lists of persons shown through the exhibit room. Interviews and calls pertaining to complaints of a non-specific nature not within the investigative jurisdiction of the Bureau.

Names of the individuals calling or interviewed are indexed and in many cases insufficient information is available to effect an identification. Many of the names are surnames only making positive identification difficult.

Destruction of this mail would result in saving space in the file room and in eliminating unnecessary cards from the General Index. Destruction of this category of mail is authorized under the general records schedule and no further archival authority is required.

It is requested that the appropriate substantive supervisor review the above listed file to determine if any reason exists which would preclude destruction of obsolete material in sections 1 thru 50 of this file. A notation advising of the decision reached may be placed on this memorandum and returned to the Consolidation Unit of the Records Branch, Room 7231.

SUBJECT: COMMUNIST PARTY ALBUM
DESTRUCTION OF RECORDS
Bufile 66-3286

BUREAU Records

The Communist Party Album, which was established in 1949, was discontinued by SAC Letter 58-82. During the period that the album was maintained field offices periodically submitted the names and photographs of subjects to be included in the album. This correspondence takes up eleven volumes in Bureau file 100-362719. Several bulky exhibits made up of photographs included in the album have been destroyed.

The Records Branch proposes that the entire Communist Party Album file be reviewed and that all correspondence with field offices relating to the inclusion of names and photographs in the album be destroyed together with the photographs enclosed with such correspondence. Inasmuch as the Communist Party Album has been destroyed and since there are copies of the photographs appearing in field office case files, there does not appear to be any objection to the destruction of this material in the Communist Party Album file. Attached are the last two sections of Bureau file 100-362719.

RECOMMENDATION:

It is recommended that this memorandum be referred to the Domestic Intelligence Division for consideration of the above proposal.

ADDENDUM DOMESTIC INTELLIGENCE DIVISION LTG:pwd 6-12-64

The Domestic Intelligence Division is reluctant to agree to this proposal at this time. It has been communist policy to maintain a legal and illegal apparatus and the Party always maintains a certain skeleton underground. The litigation in the Party case has not been completed and an adverse decision in this case could again drive the Party underground as in the early 1950's. It is, therefore, felt that this material should be retained at present and the proposal re-evaluated in one year.

REC-3

RECORDS MANAGEMENT Destruction of Bureau Property - Gen

Reference is made to your suggestion, submitted in response to SAC Letter #64-12(A) dated February 25, 1964, captioned Filing System - Records Management Survey, in which it was recommended that Bureau applicant files be destroyed in the field after being closed ten years and that those at the Bureau which have been closed administratively be destroyed after one or three years. Bureau Applicant Files be destroyed

After careful consideration, it has been decided these proposals should be adopted and the retention periods reduced to ten years in the field and three years at the Seat of Government. The necessary manual changes are being made and will be distributed shortly. Your office has been credited with submission of the suggestion under the provisions of the Suggestion Program.

SUBJECT: RECORDS MANAGEMENT
66-18966

RE: SUGGESTION #859-64

Reference is made to SAC Letter #64-12 (A) wherein we requested suggestions and observations to strengthen the Bureau's Records Management Program.

By memorandum 4-28-64, I advised that SAC, Charlotte, had suggested that Bureau consider destruction of 67 (Bureau applicant) files in field when closed for a ten-year period rather than present retention period of twenty years. He also suggested that Bureau consider destruction of Bureau applicant files which have been closed administratively with no correspondence to Bureau after a one or three-year period. Since suggestion related to destruction of Bureau applicant files, it was referred to Administrative Division for observations.

Administrative Division interposes no objection to destruction of these files which have been closed for a ten-year period and also agrees that Bureau applicant files closed administratively where no investigation conducted could be destroyed after three-year period.

In view of comments of Administrative Division and since adoption of suggestions will result in substantial savings in space throughout field, it is recommended that suggestions be adopted. We already have Archival authority to destroy all field office files.

RECORDS MANAGEMENT
66-18966
#1045-64

RE: FILE 94-2, ENTITLED "TOURS"

Reference is made to SAC Letter #64-12 (A) wherein we requested suggestions and observations to strengthen the Bureau's Records Management Program.

In connection with this program, Crime Records Division has suggested that material in file 94-2 (Tours) be destroyed after ten-year period. They pointed out there does not appear to be any need for retention of this material after this period has elapsed.

Research concerning this file reflects that file was opened in 1935 and consists of 504 sections, 39,069 serials. Four hundred and 27 sections, 29,609 serials, are over ten years' old. File consists of memoranda and correspondence regarding tours and tour exhibits.

In line with our Records Management Program designed to eliminate valueless and obsolete material from Bureau's records, it is felt this suggestion has considerable merit. It is proposed that all mail in this file over ten years' old be deindexed and destroyed, unless mail contains data pertinent to Bureau's current operations or mail of a policy or historical nature which should be retained. Destruction and deindexing will result in a substantial savings in filing space. Archival authority not necessary for destruction of administrative-type material of this nature.

Re: Records Management
66-18966

RECOMMENDATIONS:

(1) That all mail over ten years' old in file 94-2 (Tours) be deindexed and destroyed, unless mail contains data pertinent to Bureau's current operations or of policy or historical nature which should be retained. (If approved, Files and Communications Division will handle deindexing and destruction.) Sample files attached.

(2) That this memorandum be referred to Training Division for review.

ADDENDUM OF THE TRAINING DIVISION ML:mlf 6/17/64

Since the Crime Records Division and the Files and Communications Division are the only divisions interested in this matter and they are in agreement suggestion should be adopted, the Training Division agrees it is worthwhile and will provide a saving of space.

RECOMMENDATIONS: 1 - That the suggestion be adopted. On approval, this memorandum will be the authority for the Files and Communicatio Division to take the necessary action to place this procedure into effect.

2 - This suggestion has been credited to the Crime Records Division under provisions of the Records Management Program.

Mr. Tavel 5-14-64

L. E. Short

COAST GUARD SCREENING PROGRAM
SUGGESTED DEINDEXING OF LISTS
Bufile 105-13045 Destruction of Bureau Property / General

Captioned file contains a number of lists submitted to the Bureau by the United States Coast Guard of "Merchant Seamen to be Denied Security Clearance." A review of the file reflects considerable duplication of indexing since the periodic submission of such lists by the Coast Guard was apparently for the purpose of updating the list of those denied security clearance. For example, a list appearing in serial 70 which is dated 11-20-50 and contains 1,600 names was checked against a list appearing in serial 1027 dated 10-22-51 and which includes 2,300 names. Over 900 names appearing in the 1950 list reappear in the 1951 list. Attached are files containing serials 70 and 1027. There are several other occasions of duplicate indexing within this file, including amendments to the lists submitted by the United States Coast Guard.

Records Branch proposes that where duplication appears on such lists and no additional derogatory information is furnished that deindexing be accomplished on the older lists. Only names duplicated would be deindexed.

RECOMMENDATION:

It is recommended that this memorandum be referred to the Domestic Intelligence Division in order that appropriate consideration can be given to deindexing proposed by the Records Branch.

SUBJECT: YOUNG AMERICAN MEDAL AWARDS PROGRAM - 1962
Destruction of Bureau Property

With the awarding of the Medals for Bravery and Service on May 6, 1964, and the subsequent tours of the FBI Headquarters by the winners and their families, the activity in connection with the 1962 Medals would appear to be finished. In the past years, the supporting documents in connection with all individuals nominated in both categories were placed in the file for future reference.

Since the beginning of this program, the supporting documents have been filed and continue to be retained. It is believed that all previous supporting documents could be destroyed in that the usefulness thereof has expired. In the event any inquiry is made regarding past nominees, the necessary information could be obtained from the numerous memoranda prepared. It is, therefore, believed that destruction of the voluminous items pertaining to each nominee (maintained as supporting documents behind the file) would result in sound paper management.

RECOMMENDATIONS:

(1) That attached supporting documents of 1962 nominees be filed.

ALL INFORMATION CONTAINED HEREIN IS UNCLASSIFIED DATE 8-19-82 BY SP4 EW/cal

SUBJECT: SUGGESTION #1031-64
Destruction of Bureau Records-General

Comments of the Files and Communications Division requested concerning proposal that Manual of Rules and Regulations be changed to include a statement that files which are old enough for destruction should not be destroyed when they contain outstanding Identification Orders, Check Circulars or Wanted Flyers.

Part II, Section 3, Page 13, Manual of Rules and Regulations, discusses destruction of files and records in field offices and points out that government regulations permit destruction of records that apparently will not have sufficient administrative, legal, research, or other value to warrant their further preservation. Further, the Bureau instructs that files representing cases of an important nature or cases having many ramifications should not be destroyed merely because of age.

In view of the above instructions it is not believed necessary to set up specific categories of material which should not be destroyed.

RECOMMENDATION:

Files and Communications Division recommends against adoption of suggestion.

Suggestion #1031-64
By [redacted]
Charlotte Division

ADDENDUM JBE:swb 6/19/64

Suggestion is to include a specific statement in the Manual relating to destruction of files that files should not be destroyed if they contain outstanding Identification Orders, Check Circulars or Wanted Flyers.

It is felt the present provisions concerning "Files representing cases of an important nature or cases having many ramifications should not be destroyed" is adequate and no further specific statement is needed concerning Identification Order and similar cases.

JBE
Also Case

memo Casper to Mohr 6-23-64 JEH:mfd

Mr Rapp 6-26-64 JEH:mfd

ADDENDUM OF GENERAL INVESTIGATIVE DIVISION RKB/map 6-18-64

It is felt that instant suggestion is sufficiently covered in existing instructions; therefore, adoption is not recommended.

Although the suggestion, as written, is not absolutely clear, it appears that it applies to the destruction of files by an auxiliary office within the established time limit when the subject is still being sought by other offices, and is, in fact, the subject of a Wanted Flyer, Check Circular, or Identification Order.

The Bureau's policy regarding the destruction of files in such instances is succinctly defined in the Manual of Rules and Regulations, Part II, Section 3, paragraph 8(a), "Files representing cases of an important nature or cases having many ramifications should not be destroyed merely because they are twenty years old." Investigation of Identification Order$, Check Circular$, and Wanted Flyer$ would certainly fall into this category, and all offices receive notification upon the apprehension of such subjects. If apprehension information was not contained in the auxiliary office file, the subject should not as yet be in custody, and by the very nature of the above instructions, the file would not be destroyed.

Instant suggestion is therefore not felt to contain merit, and adoption is not recommended.

DESTRUCTION OF BUREAU RECORDS - GENERAL
SUGGESTION #1031-64, SUBMITTED BY
MR. [redacted] CHARLOTTE OFFICE

ALL INFORMATION CONTAINED
HEREIN IS UNCLASSIFIED
DATE 8-19-82 BY SP4 ELW/cal

SUGGESTION: That a specific statement be made in Manual of Rules and Regulations (MRR), Part II, Section 3, D, 8,a and 8, b(2)n pages 13 and 13a to the effect that files should not be destroyed if they contain outstanding Identification Orders (IO), Wanted Flyers (WF) or Check Circulars (CC).

PRESENT PRACTICE: MRR in the sections mentioned above provides that files and records in field divisions may be destroyed after they become 20 years old; however, they should not be destroyed simply because they are 20 years old if they concern cases of an important nature or those having many ramifications.

With respect to files and records which may be destroyed when 10 years old, the portion in question states that those files in classification 26 (Interstate Transportation of Stolen Motor Vehicles) and the index cards relating thereto may be destroyed after 10 years old provided the office is not office of origin or prosecution or they do not contain signed statements from witnesses.

OBSERVATIONS: SAC Kissiah of the Charlotte Office felt the suggestion merited favorable consideration.

Files and Communications Division commented that the suggestion should not be adopted. They pointed out that Part II, Section 3, 8 on page 13 of the MRR discusses the destruction of files and records in field offices and states that government regulations permit such destruction of records that apparently will not have sufficient administrative, legal, research, or other value to warrant their further preservation. Further, the Bureau instructs that files representing cases of an important nature or cases having many ramifications should not be destroyed merely because of age. In view of these instructions they did not believe it necessary to set up specific categories of material which should not be destroyed.

The Special Investigative and General Investigative Divisions subscribed to the foregoing views. General Investigative Division stated in addition that the Bureau's policy is succinctly defined in regard to the destruction of files in instances such as those in which, although the time limit for destruction of files may have been reached in an

NOT RECORDED
191 JUL 30 1964

SEE PAGE TWO

auxiliary office, the subject is still being sought by other offices and is, in fact the subject of an IO, WF, or CC. Quoting the aforementioned instruction that files representing cases of an important nature or those having many ramifications should not be destroyed merely because they are 20 years old, they commented that investigations of IO, WF, and CC subjects would certainly fall into this category. All offices receive notification upon the apprehension of such subjects and the absence of such notification in an auxiliary office file would indicate that the subject was not yet in custody and, under the very nature of the instructions quoted, the file would not be destroyed.

Training Division is in accord with the foregoing comments of the three divisions. However, it is believed that an additional stipulation similar to that appearing with the policy for destruction of files 20 years old would be helpful with respect to those which may be destroyed in 10 years to avoid any misconception that the three provisos noted are the sole criteria for retention of these files.

RECOMMENDATION: 1 - That the suggestion be adopted as modified in the foregoing memorandum and the attached letter of appreciation be directed to the suggester. Receipt of the idea was acknowledged previously.

2 - On approval, this memorandum will be authority for the Manuals Desk, Training Division, to take the necessary action.

6/23/64
SAC LETTER NO. 64-31

(G) IDENTIFICATION ORDERS -- During recent inspections it was determined some offices had destroyed investigative files and index cards pertaining to outstanding Identification Orders in connection with the destruction of files over 20 years old. The Manual of Rules and Regulations provides that files representing cases of an important nature should not be destroyed merely because they are 20 years old, and, if there is any doubt concerning their destruction, the Bureau should be contacted.

Obviously, files and index cards pertaining to outstanding Identification Orders fall within this category, particularly when the destruction of index cards on these files could possibly preclude the apprehension of a fugitive. Accordingly, you should review the procedures for the destruction of files over 20 years old in your office to insure files and index cards representing cases of an important nature are not being destroyed.

SUBJECT: RECORDS MANAGEMENT
66-18966
#1078-64

Reference is made to SAC Letter #64-12 (A) wherein we requested suggestions and observations to strengthen the Bureau's Records Management Program.

In connection with this program, SAC, New York, advises that Part II, Section 3, Paragraph C (8), Item d, of Manual of Rules and Regulations sets out various rules concerning destruction of index cards and suggests that an additional rule be added to permit destruction of index cards on thefts of perishable items such as butter, milk, eggs, cheese, etc., when three years old. He advised that it is very unlikely that after this period of time, such an index card would be necessary to identify a case.

Suggestion has merit from records management standpoint in that adoption will result in destruction of records presently being maintained; however, since suggestion relates to destruction of index cards which would normally be prepared as outgrowth of a Theft from Interstate Shipment case or possibly a Theft of Government Property case, comments of General Investigative Division necessary prior to further consideration of suggestion.

RECOMMENDATIONS:

(1) That this memorandum be referred to General Investigative Division for comments concerning merits of above suggestion, such comments to be returned to Files and Communications Division for further consideration.

ORIGINAL FILED IN 66-18966-693

ADDENDUM OF GENERAL INVESTIGATIVE DIVISION: RIS:AOB 6/26/64

Generally, items in Theft from Interstate Shipment cases are indexed with the name of the carrier and the item stolen or lost. In view of this, it is felt that there would be relatively few cards other than index cards reflecting main file numbers which would be applicable if this suggestion is adopted. In addition, it is felt that there is a possibility that if the suggestion is adopted, clerical personnel seeing index cards relating to perishable items would automatically destroy them and inadvertently could destroy index cards reflecting main files. There would, therefore, be no way in which a main file could be located after the destruction of the index card.

In view of the relatively few instances in which it is felt this suggestion would be applicable, it is recommended that it not be adopted.

ADDENDUM: FILES AND COMMUNICATIONS DIVISION 6-30-64

In view of comments of General Investigative Division, suggestion is recommended unfavorably for adoption.

RECOMMENDATION:

1. That suggestion not be adopted.

2. This memorandum be referred to Training Division for review.

ADDENDUM OF TRAINING DIVISION JER:mlf 7/2/64

Training Division agrees that objections raised by General Investigative Division are valid and their approach is practical.

RECOMMENDATION: That the suggestion not be adopted. On approval, no further action is necessary; receipt of the idea was credited to New York Office under provisions of the Records Management Program.

Mr. Tavel 6-25-64

L. E. Short

RECORDS MANAGEMENT
66-18966

Reference is made to SAC Letter #64-12 (A) wherein we requested suggestions and observations to strengthen the Bureau's Records Management Program.

In connection with this program, Crime Records Division has suggested that material in file 62-0 (Miscellaneous - Subversive) be destroyed after ten-year period. They point out this file contains information of a general nature, a considerable portion of which is correspondence with citizens.

Research concerning this file reflects that file was opened in 1925 and consists of 525 sections, 65,488 serials; 386 sections, 55,660 serials of which are over ten years old. Much of mail in this file up to 1950 has already been destroyed in accordance with authority previously received to destroy miscellaneous correspondence with public involving supply of duplicated informative material to inquirer (66-19087-14). This type of material is no longer filed based on this authority. File consists of miscellaneous correspondence and information of a general nature, much of which appears to be from mentally deranged individuals, in which Bureau is taking no investigative action. Some of material relates to miscellaneous, nonspecific information of a subversive nature. Crime Records Division handles great majority of correspondence placed in this file.

In line with our Records Management Program designed to eliminate valueless and obsolete material from Bureau's records, it is felt this suggestion has considerable merit. Much of mail in this file, particularly

ORIGINAL FILED IN 62-0

older mail, appears to be valueless to Bureau today and suitable for destruction; accordingly, in accordance with suggestion, it is proposed that all mail in this file over ten years old be deindexed and destroyed, unless, of course, mail contains data pertinent to Bureau's current operations or mail of a policy or historical nature which should be retained. Destruction and deindexing will result in a substantial savings in filing space. General Records Schedule 14 issued by National Archives and Records Service authorizes destruction of material of this type after three months.

Crime Records Division which handles majority of material placed in this file has submitted suggestion to destroy material and further comments of that division not necessary. Since some of material being filed in file relates to miscellaneous, nonspecific subversive information, observations of Domestic Intelligence Division believed desirable concerning suggestion.

RECOMMENDATIONS:

(1) That comments of Domestic Intelligence Division be secured concerning merits of suggestion.

(2) That if Domestic Intelligence Division agrees, all mail over ten years old in file 62-0 (Miscellaneous - Subversive) be deindexed and destroyed unless mail contains data pertinent to Bureau's current operations or of policy or historical nature which should be retained. (If approved, Files and Communications Division will handle deindexing and destruction.) Sample files attached.

(3) This memorandum be referred to Training Division for review.

ADDENDUM: DOMESTIC INTELLIGENCE DIVISION, STREAMLINING COMMITTEE, 6/29/64, GWA:rmc

The Domestic Intelligence Division concurs with the recommendation that material contained in 62-0 (Miscellaneous-Subversive) be destroyed after a ten-year period, and it is recommended that this suggestion be adopted.

ADDENDUM OF THE TRAINING DIVISION JER:mlf 7/10/64

Inasmuch as Domestic Intelligence Division agrees with the recommendations by Files and Communications Division that the material in 62-0 (Miscellaneous-Subversive) file be destroyed after 10 years old, Training Division recommends the idea be adopted. Suggestion has been credited to Crime Records Division under provisions of the Records Management Program.

RECOMMENDATION: That the idea be adopted and this memorandum be authority for Files and Communications Division to handle deindexing and destruction of mail over 10 years old in 62-0 files except that which contains data pertinent to Bureau's current operations or of policy or historical value.

SUBJECT: RECORDS MANAGEMENT
66-18966
#5-65 DESTRUCTION OF BUREAU RECORDS - gen'l

Reference is made to SAC Letter 64-12 (A) wherein we requested suggestions and observations to strengthen the Bureau's Records Management Program.

In connection with this program, SAC, New York, suggests that when obsolete cards are deleted from special source of information index, that cards in general index be destroyed.

Manual of Rules and Regulations, Part II, Section 6, item K (1), page 7, instructs that at time obsolete cards deleted from special source of information index, index cards in general office index should not be removed.

Suggestion is recommended unfavorably for adoption. Suggestion has been previously considered on several occasions and not adopted. Although source of information may no longer be in position to furnish information to Bureau or some other situation occurs which justifies deletion from source of information index, fact that he was a source of information pertinent to field office operations, and of potential future value from information standpoint. Retention of index card in general office indices insures record of this information.

RECOMMENDATIONS:

(1) That suggestion not be adopted.

DISPOSED OF

Memo Short to Tavel
Re: Records Management
66-18966

ADDENDUM OF THE TRAINING DIVISION JER:mlf 7/6/64

Training Division agrees with views and recommendations of Files and Communications Division. As noted, same suggestion was previously considered at which time members of the Inspection Staff and General Investigative Division were opposed to its adoption. They believed the cards were not without value even though the source was no longer operable. The possibility always exists of reactivation at a later date and further, should the name of the individual come up subsequently in the course of investigative operations, it would be helpful to know he was once a source of information even in the absence of other identifying data.

RECOMMENDATION: That the idea not be adopted. On approval, no further action is necessary. Suggestion was credited to New York Office under the provisions of the Records Management Program.

SUBJECT: RECORDS MANAGEMENT
66-18966 Destruction of Bureau Records - Gen'l

Reference is made to SAC Letter #64-12 (A) wherein we requested suggestions and observations to strengthen Bureau's Records Management Program.

In connection with this program, two additional suggestions have been received relating to destruction of field office files prior to present twenty-year retention period. (1) SAC, Albuquerque, suggests in some applicant-type cases material could be destroyed when it becomes five or ten years old. (2) SAC, Oklahoma City, suggests 116 (Atomic Energy Act - Applicant) cases be destroyed after ten years where no derogatory information of a security nature developed.

During previous (1959) and current records management program, several similar suggestions have been received and considered concerning destruction of various types of field office files prior to present twenty-year retention period (66-18966-543, 66-18966-657 and 66-18966-933). No change was made in retention period. Since suggestion has been thoroughly considered by Bureau on several occasions and not adopted, these suggestions are recommended unfavorably for adoption.

RECOMMENDATIONS:

(1) That suggestions not be adopted.

ADDENDUM OF TRAINING DIVISION JER:mlf 7/6/64

b6
b7C

Training Division agrees with comments of Files and Communications Division concerning the foregoing suggestions. In consideration of suggestion #709-64 by Miss [redacted] Little Rock, on 3/16/64, with respect to destruction of all files except security-files after being closed 10 years, both Inspection and Special Investigative Divisions were opposed. Concerning applicant-type cases, latter division advised at the time, they are, in a sense, security-type matters and, if prematurely destroyed it might increase copy work in case it should become necessary to supply an office with a report.

RECOMMENDATION: That the suggestions not be adopted. On approval, no further action is necessary. The suggestions have been credited to the Albuquerque and Oklahoma City Offices, respectively, under the provisions of the Records Management Program.

66-18966

Destruction of Bureau Records - General

RE: SUGGESTION #912-64

Reference is made to SAC Letter #64-12 (A) wherein we requested suggestions and observations to strengthen Bureau's Records Management Program.

In connection with this program, SAC, Chicago, suggests that consideration be given to destruction of certain information contained in field office personnel files, such as commendations from SAC or outside business, municipal or police officials regarding Agents' participation at police schools, speeches and similar assignments. He also suggests destruction of other types of records such as firearms records while attending in-service, inspection-examination- ratings, etc., be destroyed after five years.

SAC Letter #64-28 dated 6-2-64, item F entitled "Administration of offices - Designating complete material for individual field personnel files" informed field several instances have been noted during recent inspections wherein there has been a failure to designate communications for field personnel file of individual employees and pointed out existing regulations require that copies of data, favorable or unfavorable to office or its personnel, should be placed in files of individual employees so that anyone reviewing personnel file at a later date would have benefit of this information. These instructions were based on memorandum J. H. Gale to Mr. Tolson, dated 5-28-64.

In view of recent instructions to field instructing them to insure pertinent information filed in field personnel files, suggestion recommended unfavorably for adoption. In regard to destruction of in-service firearms records, inspection-ratings, etc., space saved due to

small volume of this type material would not be commensurate with employee time necessary to review file for destruction of this type material.

RECOMMENDATIONS:

(1) That suggestion not be adopted.

(2) This memorandum be referred to Training Division for review.

ST 7/2

ADDENDUM OF TRAINING DIVISION JER:mlf 7/9/64

Training Division agrees with comments of Files and Communications Division in the foregoing memorandum. It is further noted that, as a result of a suggestion recently adopted, field personnel files of employees separated from the service will be destroyed in the field after three months with the exceptions that all EKG tracings will be forwarded to the Bureau and that the files of employees separated from the Bureau for disciplinary reasons will also be forwarded to the Bureau. It is believed this also militates against the suggestion in that would be another reason why the expenditure of time to review and destroy a relatively small volume of material would not be commensurate with the anticipated saving in space.

RECOMMENDATION: That the idea not be adopted. On approval, no further action is necessary; the suggestion was credited to the Chicago Office under the provisions of the Records Management Program.

SUBJECT: REHABILITATION PROGRAM
RECORDS BRANCH

DESCRIPTION OF FILE: 94-4-2419
POEM "LOYALTY" - "THE TEST"

The attached file has been called to our attention by personnel of the Consolidation Unit. It consists of 6 sections beginning in 1936. The file is currently used but little mail is now put in the file, the majority of the mail being over 20 years old. It is proposed that the file be reviewed and all requests for and acknowledgements of copies of "Loyalty" and "The Test" over five years old be destroyed.

Destruction of this mail would result in saving space in the file room and in eliminating unnecessary cards from the General Index. Destruction of this category of mail is authorized under the general records schedule and no further archival authority is required.

It is requested that the appropriate substantive supervisor review the above listed file to determine if any reason exists which would preclude destruction. A notation advising of the decision reached may be placed on this memorandum and returned to the Consolidation Unit of the Records Branch, Room 7231.

RECOMMENDATION:

For referral to the appropriate substantive division.

RECORDS MANAGEMENT
66-18966

Reference is made to SAC Letter #64-12 (A) wherein we requested suggestions and observations to strengthen Bureau's Records Management Program.

In connection with this program, SAC, New York, advised that during World War II, all passenger vessels entering United States via New York presented passenger manifests containing complete passenger list to New York Office. He advised these names were indexed and material retained. SAC suggests that New York Office be given authority to dispose of index cards and files as information valueless at present time.

Suggestion has merit from records management standpoint in that adoption would result in destruction of files and index cards with commensurate savings in space. Similar material has previously been deindexed and destroyed at Bureau (Memorandum Cartwright to Nichols, 5-6-47, 66-3286-281). Since data valueless to New York Office and since similar material previously destroyed at Bureau, it is recommended that suggestion be adopted giving New York Office authority to deindex and destroy this material. Bureau has Archival authority to destroy all files and related material in field.

RECOMMENDATIONS:

(1) That suggestion be adopted. If approved there is attached hereto letter to SAC, New York, authorizing deindexing and destruction of material.

(2) This memorandum be referred to Training Division for review.

SUBJECT: RECORDS MANAGEMENT
66-18966
DESTRUCTION OF BUREAU RECORDS

Reference is made to SAC Letter #64-12 (A) wherein we requested suggestions and observations to strengthen Bureau's Records Management Program.

In connection with this program, SAC, Tampa, has forwarded suggestion submitted by [redacted] Clerk, who suggests that (1) original Identification Record or FD-9 (Request for Identification Record) be destroyed after information is included in report. She also suggests (2) that RUC letters received from other offices setting forth investigation in their territories be destroyed after information included in report. SAC considers suggestion good.

b6
b7C

Suggestions recommended unfavorably for adoption. When this data received in field office, it is necessarily serialized in appropriate file. Destruction of such material after being included in investigative report would necessitate administrative procedure of recording serials destroyed in order to maintain continuity of file. Volume of instances where this material could be destroyed not sufficient to justify administrative procedure necessary and space saved would not be commensurate with employee time involved in handling and recording destruction.

ALL INFORMATION CONTAINED HEREIN IS UNCLASSIFIED DATE 8-19-82 BY SP4 EWL/cal

RECOMMENDATIONS:

(1) That suggestion not be adopted.

(2) That this memorandum be referred to Training Division for review.

Destruction of Bureau Property
Gen.

Current practice or rule (Include manual citation as well as facts) In connection with the FBI mailing list, it has been the practice to keep the cards of those who are in "inactive" status in the "active" mailing list. These cards have proved most valuable (continued next page)

Advantages of suggestion and annual savings (include basis for estimate)

By removing these "inactive" cards from the mailing list, it would save considerable space and make room for new, active mailing list cards.

ALL INFORMATION CONTAINED
HEREIN IS UNCLASSIFIED
DATE 8-19-82 BY SP4ELW/cal

Disadvantages of suggestion

Reference material valuable from the standpoint of spelling of names, etc., would be lost but in view of the age of the cards this loss would not be too great.

in the past on the spelling of names and in securing related information.

In recent years, the various mailing lists have grown a great deal and at the present time we are beginning to have a space problem. While the "inactive" cards are still most valuable, consideration has to be given to the space situation. It is believed that it would be feasible the next time we check our active mailing list to remove the cards which became "inactive" prior to 1950. These old cards are the least valuable and it is believed they could be destroyed at this time without losing too much. It will mean several drawers of additional space to take care of expansion during the coming months.

SUBJECT: SUGGESTION OF MISS [redacted]
DESTRUCTION OF INACTIVE MAILING LIST CARDS
DELETED PRIOR TO 1950
CRIME RECORDS DIVISION
#13-65

b6
b7C

Miss [redacted] recommends, as a space conservation measure, the destruction of inactive mailing list cards which were deleted prior to 1950. She points out that the mailing lists have grown a great deal in recent years and that a space problem is being experienced at the present time. She states further that the mailing list cards which have been inactive prior to 1950 are the least valuable and that there would be little loss through their destruction.

It is the recommendation of the Crime Records Division Streamlining Committee that this suggestion be adopted.

RECOMMENDATIONS:

1. That this suggestion be forwarded to the Training Division for its consideration.

b6
b7C

2. That if approved, Miss [redacted] be forwarded a letter of appreciation for her suggestion.

TO : MR. TAVEL

DATE: July 29, 1964

FROM : J. H. GALE

SUBJECT: ESTABLISHED TIME PERIODS FOR DESTRUCTION OF BUREAU FILES AND RECORDS

Per your request, surveys were conducted in field offices recently inspected (Portland, Anchorage, Memphis, Richmond, Albuquerque, Detroit and Cincinnati) with respect to captioned matter. With one exception, the recommendations set forth below represent the consensus of SACs, Chief Clerks and other clerical personnel participating in the program and the Inspection Division concurs with these recommendations from examination of procedures in the offices inspected. (The exception, with which Inspection Division does not concur, is a recommendation of SAC, Cincinnati, that the 20-year destruction rule be converted to 10 years as now followed in Classification 25.) The following observations are made pertaining to subsections of Section II-3-D-8 of Manual of Rules and Regulations:

1. The fact that there are many different time periods established for destruction of various types of records constitutes no real problem for field offices. Appropriate ticklers are set by Chief Clerks under each such time period and listed files and records are reviewed and destroyed as ticklers arise. The most cogent problem facing field offices is a saving of space; the saving of time involved in responding to fewer ticklers upon consolidation of time periods is relatively negligible.

66-3286-

2. The 5-year destruction of unknown subject files (subsection d) is of little real value as a space saver inasmuch as most such files are thin, whereas it constitutes an extensive file review procedure, particularly in Classification 26. There is duplication of review for destruction in Classification 26 - once under 5-year destruction as an unknown subject case meeting the listed criteria and again under 10-year destruction meeting different criteria (non-office of origin or prosecution and no signed statements from witnesses). The destruction of certain serials in files under Classification 135 is likewise under a 5-year rule (subsection f), and again represents little value as a savings in space. It is suggested that the 5-year rules applicable to destruction of certain unknown subject categories and to Classification 135 (subsections d and f) be placed under the 10-year rule. The result will be that the only items remaining under a 5-year destruction program will be administrative files relating to space and to Law Enforcement Bulletins which constitute no problem.

3. There is no provision for destruction of material in double zero files. The field should be permitted to destroy all such material over 5 years old, representing a space saving of approximately 4 file drawers, because (1) periodic instructions issued and applicable dates thereof are retained at the Seat of Government for historical purposes and (2) when policy guidance and instructions become 5 years old they are either outdated by more recent instructions or have been incorporated in manual revisions.

FROM : L. E. Short

SUBJECT: ESTABLISHED TIME PERIODS FOR DESTRUCTION OF BUREAU FILES AND RECORDS - RECORDS MANAGEMENT
66-18966

Records - GEN

Memorandum from J. H. Gale to you dated 7-29-64 set forth results of surveys conducted during inspection of seven field offices regarding established time period for destruction of Bureau files and records, which surveys were conducted at your request.

Based on these surveys, it was consensus of offices surveyed and Inspection Staff that fact there are many different time periods established for destruction of various types of records constitutes no real problem for field offices as appropriate ticklers are set and destruction accomplished when ticklers come up.

As a result of these surveys, some observations and suggestions were made concerning destruction of records. These observations and pertinent comments concerning them are set forth below:

66-3286 -
NOT RECORDED
199 SEP 3 1964

(1) Manual of Rules and Regulations (MRR), Part II, Section 3D, Item 8d, Page 13a, authorizes destruction after five years of unknown subject files in 15 (Theft from Interstate Shipment), 26 (~~Interstate~~ Transportation of Stolen Motor Vehicle), 52 (Theft of Government Property), 70 (Crime on Government Reservation), and 87 (Interstate Transportation of Stolen Property) classifications providing certain conditions exist (no stop outstanding, capital offense not involved, files contain no information of intelligence value, and no signed statements from witnesses). MRR, same section, Item 8b, Page 13a, authorizes destruction after ten years of any file in 26 classification providing certain conditions exist (auxiliary office, office not office of prosecution, no signed statements from witnesses). MRR, same section, Item 8f, Page 13b, authorizes destruction after five years of nonpertinent serials in classification 135 (Plant Informants). Based on these surveys, it was consensus of opinion that destruction of

SEE ADDENDUM OF THE TRAINING DIVISION ON PAGE THREE

unknown subject files and 135 files after five years saves little space and constitutes extensive file review procedure, particularly in 26 classification, and there is some duplication of review in this classification under five-year destruction as unknown subject case and again under ten-year destruction period. It was suggested that five-year destruction period in unknown subject cases and classification 135 be extended to ten-year period.

MRR, Part II, Section 3D, Item 5e 7, Page 11b, instructs field that when consolidating files, unknown subject files should be recorded on left side of file cover to facilitate destruction when five years old. This instruction eliminates necessity of file-by-file review to locate unknown subject cases and enables these files to be easily and readily identified. As these files become five years old, great majority fit destruction criteria, are destroyed, and any duplication of review after ten years would be relatively small. Since space in field offices always at a premium, obviously any material destroyed benefits office; accordingly, it is not felt we should extend destruction period from five to ten years in these types of cases. If this were done, just as much employee time would be consumed handling review and destruction as is necessary under present procedure and field would lose benefit for five-year period of space currently being saved. No change in present procedure is recommended.

(2) It was suggested that field be permitted to destroy all material in "double zero" (Policy) files over five years old since (1) instructions issued retained at Seat of Government and (2) when policy guidance and instructions become five years old, they are either outdated by most recent instructions or have been incorporated in manual revisions.

Suggestion to reduce retention period of material in "double zero" files has been considered on a number of occasions in recent years by Bureau and, as recently as 4-7-64 (66-18966-596) in connection with a records management survey, and not adopted. Unfavorable consideration of suggestion based on (1) fact that not everything in "double zero" files maintained in

CONTINUED - OVER

Memo L. E. Short to Mr. Tavel
Re: Established Time Periods for
Destruction of Bureau Files and
Records - Records Management
66-18966

Bureau files, (2) material in "double zero" files, when manual change involved, contains pertinent background data and policy which field would not have benefit of if files destroyed earlier, and (3) even though current Bureau policy may be maintained in Bureau Manual, on occasion, it is necessary to determine how investigation handled at some time in past and "double zero" files provide history of each classification readily available in each field office and occupy relatively little space. No change in present procedure recommended.

RECOMMENDATIONS:

(1) That no change be made in present retention period of unknown subject files in 15, 26, 52, 70, and 87 classifications, in 135 classification, and in "double zero" files for each classification.

(2) That this memorandum be referred to Training Division for review.

ST
8/27

Memo L. E. Short to Mr. [redacted]vel
Re: Established Time Periods for
Destruction of Bureau Files and
Records - Records Management
66-18966

ADDENDUM OF THE TRAINING DIVISION JER:jmn 8/31/64

Training Division subscribes to the views of Files and Communications Division in the foregoing memorandum. With respect to the destruction of unknown subject cases in the five volume classifications in question, it is believed method of identifying them at time of consolidation facilitates their destruction without undue expenditure of clerical time. Since they are volume classifications the saving in space, despite the contention that they contain few serials, would appear to be sufficient justification. Further, to revert to a 10-year destruction period after we have been observing a five-year period since 1961 would be impractical. The destruction of the 135 files (Plant Informants) is now on a permissive basis and it is not believed the rule need be changed. Concerning the destruction of double zero files, as noted by Files and Communications Division, numerous suggestions to reduce the retention period have been considered and not adopted because they contain pertinent background data and policy and their bulk is not such as to occupy much filing space.

RECOMMENDATION: That the retention periods now authorized for files in the 15, 26, 52, 70, 87, 135 and double zero classifications remain unchanged.

SUGGESTION - INDEX SYSTEMS

In connection with the destruction of files and records over 20 years old, field divisions are confronted with the problem of devising an efficient and expedient means of culling the indices of index cards pertaining to files which are destroyed.

Some offices such as Charlotte have completed a systematic review of the entire indices over a period of years which in the case of Charlotte resulted in the destruction of approximately 100,000 index cards. Such an approach is time consuming and entails the use of much clerical assistance which might otherwise be used to greater advantage in other project-type work. (see attached page)

Current practice or rule (Include manual citation as well as facts)

Manual of Rules and Regulations, Part II, Section 3.C.8.f. provides index cards relating to files which are destroyed when they are 20 years old may be destroyed, consistent with the manpower available to do so.

Advantages of suggestion and annual savings (include basis for estimate)

Self explanatory.

AUG 27 1964

ORIGINAL FILED IN 66-3286-83

The indices in each office are constantly expanding and as it expands it occupies more space and requires greater time to perform searches and maintain. In view of this it would appear timely to take a long range view of the control of the indices to insure that at some point in the future the indices could be culled of out-dated index cards on a regular basis with a minimum of clerical effort.

It is therefore suggested the color of the new index cards placed in the indices be changed at five-year intervals. This would permit the culling with a minimum of effort at the expiration of a 20 year period and every five years thereafter. Should such a system be adopted it would provide a uniform control over the indices of all offices and possibly including the general indices at the Bureau.

The feasibility of such a system was preliminarily discussed with experienced Chief Clerks in Charlotte, New Orleans and Miami, and they advised they could offer no objections to the proposed system and felt it would at the expiration of the initial 20 year period effectively control and expedite the culling of the indices in each office.

Dear Mr. [redacted]

I have received your suggestion concerning a method for use in the disposition of files in certain classifications. You may be interested to know that current instructions provide for keeping a list of files which are removed when twenty years old, if of no value; therefore, there appears to be no reason to maintain the file fronts in the 66-0 classification since they fall in this category.

The interest which prompted you to give me the benefit of your observations on this matter is indeed appreciated.

Sincerely yours,
J. Edgar Hoover

2 - Birmingham
1 - Field personnel file
1 - Suggestion file

Files in the 66-0 classification are retained for twenty years and then a list is maintained regarding disposition of those considered to be of no further value. Bureau is interpreting "other administrative-type files" to be those maintained in other 66 classifications; such as, inventory, photographic equipment, et cetera. These files are to be destroyed, if of no value, at certain periods and there is no requirement to keep a record of their destruction provided all file numbers are accounted for. If file numbers are not accounted for, file front should be retained and placed in numerical sequence in the closed files section.

NOTE CONTINUED

Files and Communications Division commented it has a copy destruction program in effect; however, they have been concentrating on security material and have not yet reached the administrative 66 classifications. A spot check was made of Forms File by supervisor of this program, who advised it does not offer any greater potential for saving filing space than material currently being worked on. Accordingly, this file will not be reviewed immediately for destruction of excessive copy material but a note has been made of the file number in order that future consideration may be given to this particular file. Inasmuch as suggestion involves a current program, it was recommended idea not be adopted. Training Division agrees with above views of the Files and Communications Division.

Employee Suggestion

#230-65

Date
September 21, 1964

To:	From: (Suggester's name)	Division of Assignment
Director, FBI	[redacted]	IV, Files & Communications

SUGGESTION

I suggest that in order to conserve valuable filing space the Bureau consider purging excessive copies of the various forms which are filed in the Forms File—66-3482. In many instances there are ten copies of a particular form in file. In one section picked at random, section 39, there are three serials which contain five different forms with a total of 40 copies of these forms in file. A spot check of several other sections of this file reveals the majority of serials containing examples or enclosures of forms have ten copies of each form. The supervisor of the Forms Desk states there is no useful purpose served by having the extra copies kept in file. At the present time there are 171 sections to the Forms File.

Current practice or rule (Include manual citation as well as facts)

The Bureau requests that ten copies or examples be submitted when suggestions are made concerning forms, however the Administrative Division does not desire that all ten copies go to file.

Advantages of suggestion and annual savings (Include basis for estimate)

The main advantage is the saving of space necessary to store our files in the Filing Unit. There would also be a great savings realized when these files have to be repaired by being laminated. Many serials in this file are reaching the stage where repairs are necessary as the inferior paper on which many of the forms are reproduced is rapidly deteriorating. Not only would the expense of laminating these superfluous copies be avoided, but an even greater amount of filing space would be conserved as the process of lamination greatly increases the thickness of the paper. Another advantage would be the saving of employees' time when it is necessary to review this file. Frequently the Forms File has to be

Disadvantages of suggestion

None apparent.

DESTRUCTION OF BUREAU RECORDS

(The use by the United States of my suggestion shall not form the basis of a further claim of any nature by me, my heirs, or assigns upon the United States. I understand that I will be considered for any justified award only if my suggestion is adopted within two years after submission.)

ADVANTAGES OF SUGGESTION (Continued):

reviewed on a serial by serial basis for various projects. The more compact file which would result from this purge would facilitate such reviews.

COMMENTS: Files and Communications Division, 9-24-64

[redacted] is referring to the type of material which is destroyed in the Records Branch in connection with our copy destruction program. We have been concentrating on security material and have not yet reached the administrative 66 classification. The clerical supervisor of the copy destruction program has made a spot check of file 66-3482 and has indicated that this file does not offer any greater potential for the saving of file space than material being currently worked on. Accordingly, this administrative file will not be reviewed immediately for destruction of excessive copy material but a note has been made of the file number in the Correlation Unit in order that future consideration may be given to this particular file.
b6
b7C

Inasmuch as [redacted] suggestion involved a current program within the Files and Communications Division, his suggestion is not being adopted.

RECOMMENDATION:

For referral to the Training Division.

SUBJECT: CRIMINAL INVESTIGATIONS ACCOMPLISHMENTS
O Destructions of Bureau Records - General

By airtel dated 9-23-64, captioned as above, the Bureau requested each field office to advise the Bureau by return communication the number of convictions they would submit prior to 9-30-64. All field office have answered.

This is administrative data of temporary value only and the writer feels that these letters and airtels should not be placed on record but destroyed.

The Records Section, Files and Communications Division, has been contacted, and they agree that this information is of temporary value only and would serve no purpose in the future.

RECOMMENDATION:

If approved, it is recommended that the attached communications be routed to the Records Section, and that they be destroyed by the Records Section, and in lieu thereof this memorandum be placed on record.

Re: DESTROYIT ELECTRIC WASTEBASKET

Dear Mr. [redacted]:

Thank you for your recent request for further information on the DESTROYIT ELECTRIC WASTEBASKET, appearing in GOVERNMENT PRODUCT NEWS.

Enclosed is literature which gives complete descriptive data and specifications -- and we are asking our dealer in your area to get in touch with you. This dealer has a local representative equipped to give you excellent service in your locality.
The name of the dealer is:

Whitaker Brothers & Company
5913 Georgia Avenue, N. W.
Washington, D. C. 20011

Phone: RA 6-3450

Attention: Mr. [redacted]

b6
b7C

We appreciate your interest -- and we are sure our dealer will be able to answer any question you might have regarding this equipment, and to show you how this machine will prove its value to your organization in many ways.

Very truly yours,

b6

ITEM No. 51-126

super-speed series 50, NEWEST ADDITION TO THE destroyit® LINE OF PAPER SHREDDERS

SUPER-SPEED SHREDDING FEATURES

1. Staples and clips do not affect self-sharpening cutters of hardened steel — ball race bearings throughout.
2. Push button operation.
3. All metal construction throughout — No plastics.
4. Shreds are disposed of with great convenience: two steel pull out rods support the shred bag, into which the shreds fall (a supply of plastic shred bags come with each machine).
5. 500 lbs. of shreds per hour, rated capacity; the machine shreds as fast as it is fed — so simple, with its gravity feed table, that it is easy to be fast.
6. Powered by heavy duty ⅝ H.P. electric motor with overload cut out device and powerful reverse mechanism.
7. Gravity feed table 14" wide at its start.
8. Dimensions: 18½" wide x 17" deep x 10½" high. Weight: 84 lbs. (140 lbs. crated).
9. Color and Finish: Two-tone enamel gray with chrome trim and polished aluminum feed tray. Blends tastefully with every modern office decor. (Desk/Table model only).

¼" shred	1/16" shred	1/32" shred

Super Speed Model
ITEM No. 51-125

GUARANTEED FOR ONE YEAR

The DESTROYIT SUPER-SPEED is important equipment wherever there is a great volume of confidential material which must be destroyed regularly and quickly. Its powerful operating speed makes it possible to handle such an impressive volume that this shredder will be able to work for many departments. In fact, it shreds as fast as it is fed. And its ease of handling makes it almost fun to use. Simply drop any confidential matter onto the gravity feed table; it will then slide quickly into the shredding mechanism, which jets the unreadable shreds into the conveniently attached shred bag. CONFIDENTIAL CORRESPONDENCE, DESIGNS FOR NEW PRODUCTS, OLD CONTRACTS, ESTIMATES, IBM CARDS AND CHECKS ARE THOROUGHLY DESTROYED. Even paper many times the size of the throat is easily handled — quickly pulled into the shredding mechanism over the gravity feed table which is 14" wide at its start. The DESTROYIT SUPER-SPEED is in the vanguard of its field; there's no finer equipment available at its price, size, speed and powerful production.

THE OFFICE PAPER SHREDDER

destroyit DESTROYS DAILY

all this information which might get to the wrong people:

Important supplier's names ▪ Customer's lists ▪ Designs for new products ▪ Old contracts ▪ Old ledger sheets ▪ Confidential correspondence ▪ Payrolls ▪ I.B.M. cards ▪ Pencilled profit and loss figures ▪ Memos ▪ Government Orders and Instructions ▪ Estimates ▪ Microfilm ▪ Cost figures ▪ Computer Printouts ▪ Confidential interviews (Medical, Government, Business) ▪ Bids.

IMPORTANT INFORMATION CANNOT LEAVE YOUR ORGANIZATION IF YOU HAVE A destroyit

Losses can be enormous when private information gets into the wrong hands. The handy, handsome DESTROYIT Paper Shredder is essential office equipment, not only for the officers and executives of company, but wherever records of importance become obsolete and must be thrown away. (See listing above).

What the DESTROYIT Paper Shredder does is to make available, within reach, the continued and immediate destruction of essential papers meant for waste, which might otherwise "hang around", possibly long enough to "backfire". Daily destruction of waste paper in the DESTROYIT is efficient, careful office practice, preventing losses and troubles that occur when you least expect them. **There are four DESTROYIT cabinet models, differing only in the width of the shreds and the quantity of paper that the machine will take at one time. A table model (identical machine without cabinet) is available for $50.00 less. Model 6MM destroys up to 16 sheets of 16 lb bond paper at once, while Model 1MM will make the thinnest shreds of any shredder available, especially important to some organizations with highly secretive or confidential material.**

The DESTROYIT is the only two-way office paper shredder with a second outside door for quantity shredding. In one hour, Model 6MM will destroy over 150 lbs. of paper or card stock, otherwise the main door has its own removable waste-bin enclosed in a unit attractively designed for the modern office.

For EXTRA strength the cutting mechanism and motor operate on ball bearings. An ALL METAL (no plastic) housing protects the entire mechanism. Paper clips and staples cannot damage the cutters or cutter shaft, which are made of core-to-surface-hardened steel. And there are push-button controls for "on", "off" and "reverse".

The DESTROYIT is utterly simple—anyone can operate it. Riding on casters, it is easily moved to favorable working spots in the office or plant. Each model comes with a protective plastic cover.

GUARANTEED FOR 1 YEAR

SPECIFICATIONS ON 4 MODELS

Model	Size of Shreds	*Quantities of Paper Shredded	Price fob N.Y.
No. 1 mm	3/64"	4 sheets

ELECTRIC WASTEBASKET

Obsolete, important papers can be sorted out for shredding.

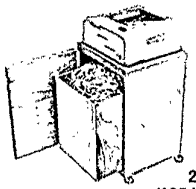
Shreds your papers, silently, automatically... never to be read again!

Your wastebaskets may be a source of important information easily misused by the "disgruntled", the "trouble-maker", or even an unethical competitor. Shred your papers, correspondence, memos, estimates, designs, stenographic notes – all forms of "essential" papers—with a **destroyit Electric-Wastebasket.**

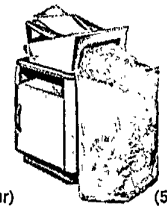
So simple to use. Place the paper into the opening. Starts automatically. Stops by itself. No start or stop buttons! Paper is shredded into unreadable widths 1/8" thin.

No bigger than the average wastebasket, the **destroyit Electric-Wastebasket** is elegantly designed to complement any office decor. Ideal for the executive, secretary, every office worker. Plugs into any outlet. By way of a separate spring-door there is also room for ordinary waste which need not be shredded. Shreds or no shreds—a completely modern wastebasket.

The **destroyit Electric-Wastebasket** is indispensable to prudent business management. It requires no maintenance other than emptying the bin when full. Yet it could be one of your wisest business investments – capable of preventing trouble when you least expect it. It's always time to change to safety! So **destroyit** if it should be!



Starts, stops automatically! Shreds in just seconds!



Convenient, attractive indispensable.

TO : Mr. Mohr

DATE: November 27, 1964

FROM : J. J. Casper

SUBJECT: MAILING LIST
SUGGESTION #439-65 SUBMITTED BY
MISS [redacted]
CRIME RECORDS DIVISION
Destruction of Bureau Property

b6
b7C

SUGGESTION: That the Cross Reference File of the Bureau's mailing list which is kept in the Crime Research Section be disposed of.

CURRENT PROCEDURE: A duplicate card is now filed in the Crime Research Section for every card on the Bureau's mailing list. This is kept in the Cross Reference File which is set up alphabetically according to state, city, and name. Bureau mailing list is filed alphabetically according to name.

ADVANTAGES: Suggester states the principal advantage would be the saving of employee time by those individuals who must type these cards every time an addition or change is made in the mailing list. There are approximately 700 changes each month. With the transfer of the mailing list plates to magnetic tapes, which are arranged alphabetically according to city and state, this would serve as a cross reference for the mailing list.

The Cross Reference File as it now stands is used infrequently. Elimination of this file would also give about nine more drawers of filing space to the Crime Research Section Front Office. Miss [redacted] estimates that approximately two weeks of the time of a GS-3 clerk (at $1.93 per hour) is spent each month in performing this task. This would represent approximately $154 per month, or $1,848 per year, which would be saved by elimination of the file in question.

b6
b7C

OBSERVATIONS: The Crime Records Division recommended suggestion be adopted. It was pointed out the mailing list now on magnetic tapes would serve as a suitable cross reference and advantages as stated by the suggester are valid.

The Voucher-Statistical Section, Administrative Division advised it is maintaining the file referred to by the suggester and it was the understanding of that

DEC 1 1964

Memo Casper to Mohr
Re: Mailing List
Suggestion #439-65 Submitted by b6 b7C
Miss [redacted]
Crime Records Division

section that an average of only one or two references will be made to this file each month. It was felt, therefore, that the idea had merit and should be adopted.

Training Division is in agreement with these divisions that suggestion is very practical and no need exists to keep the Cross Reference File in the Crime Records Division when the same information is being maintained on magnetic tapes in the Administrative Division. This is unnecessary duplication of effort. It is believed the suggester should be granted an award based on the savings which will be realized in employee time since no method can be used for computing the saving in filing space. Based on an annual savings of $1,848, Miss [redacted] is entitled to an incentive award of $95. This is in accord with the approved scale for such awards. The Inspection Staff has reviewed the matter and it concurs. b6 b7C

RECOMMENDATIONS: (1) That the suggestion be adopted and that the Commendation, Supervisory Approval and Special Action Unit, Administrative Division, handle the $95 incentive award in lieu of further action by the Suggestion Desk. Receipt of the idea was acknowledged previously.

Incentive Award 12-8-64 pkb

(2) On approval, this memorandum will serve as the authority for the Crime Records and Administrative Divisions to place the proposed procedure into effect.

SUBJECT: REHABILITATION PROGRAM
RECORDS BRANCH

DESCRIPTION OF FILE 80-1
GENERAL MATTERS AND NEWSPAPER CLIPPINGS
① DESTRUCTION OF BUREAU PROPERTY GEN'L.

The above listed file has been called to our attention by personnel of the Consolidation Unit. The file consists of 7 sections beginning in 1937 and is currently not used. Most of the material in this file is outdated and there appears to be no reason for its continued retention. Following is the type of mail suggested for destruction:

Statistics re speaking engagements. Memos re declined invitations to speak. Lists of scheduled speaking engagements. Memos re changes in mailing list. (See section 4)

Field Office letters replying to SAC letters of 4/28/53 and 8/16/55. (See section 6)

Destruction of this mail would result in saving space in the file room and eliminating unnecessary cards from the General Index. Destruction of this category of mail is authorized under the general records schedule and no further archival authority is required.

It is requested that the appropriate substantive supervisor review the attached mail to determine if any reason exists which would preclude destruction. A notation advising of the decision reached may be placed on the memorandum and returned to the Consolidation Unit of the Records Branch, Room 7231.

RECOMMENDATION:

For referral to the appropriate substantive division.

ADDENDUM: CRIME RECORDS DIVISION MAJ:JRH:rs 12-15-64

The Crime Records Division has no objection to the destruction of mail contained in Bufile 80-1 which pertains to speaking engagement statistics, lists of scheduled speeches, memos re speech declinations, memos re mailing list changes or field office letters replying to SAC Letters. Crime Records Division, however, does feel that any policy-type data, such as instructions or observations of the Director, that are contained in this file, should not be disposed of.

DESCRIPTION OF FILE: 1-35
DIRECTORY OF GRADUATES - FBI NA
© DESTRUCTION OF BUREAU PROPERTY - GENL

The above listed file has been called to our attention by personnel of the Consolidation Unit. The file consists of 8 sections beginning in 1938. The majority of the mail is outdated and in most instances is not currently sent to file. Following is the type of mail suggested for destruction:

Letters acknowledging receipt of the Directory and typewritten copies of the Directory (See section 2)

News items concerning FBI NA associates (See section 5)

Corrections of titles, addresses etc. of graduates for current Directory. It is suggested that this type of mail be destroyed after a period of 2 years. (See section 8)

Destruction of this mail would result in saving space in the file room and eliminating unnecessary cards from the General Index. Destruction of this category of mail is authorized under the general records schedule and no further archival authority is required.

RECOMMENDATION:

For referral to the Training Division to determine if any reason exists which would preclude destruction of this material. A notation advising of the decision reached may be placed on this memorandum and returned to the Consolidation Unit of the Records Branch, Room 7231.

GUNS FOR DISPOSITION

The guns listed below are no longer of evidentiary value. Authorization for their disposition has been granted by the interested offices and has been coordinated with the appropriate case supervisors. These weapons are of no value to the Reference Firearms Collection and are in excess of the Bureau's needs.

In accordance with authorization granted (memorandum 10/1/64, 80-14 Sub 1), the weapons have been destroyed by sawing them into pieces. The pieces are being forwarded to Quantico for disposal at the Marine Corps Salvage Yard.

DESCRIPTION OF FILE: 36-0
MAIL FRAUD - GENL.

(1) DESTRUCTION OF BUREAU PROPERTY-Genl

ORIGINAL FILED IN 36-0-2957

The above listed file has been called to our attention by personnel of the Consolidation Unit. It consists of 31 sections beginning in 1921. The file is currently used but little mail is now put in the file, the majority of the mail being over 25 years old. The mail in the file relates to matters not within the investigative jurisdiction of the Bureau and in most cases has been referred to the Post Office Department. This material is outdated and there appears to be no reason for its continued retention. It is proposed that the file be reviewed and all obsolete mail over five years old be destroyed. Mail of a policy or historical nature would not be destroyed.

Destruction of this mail would result in saving space in the file room and in eliminating unnecessary cards from the General Index. Destruction of this category of mail is authorized under the general records schedule and no further archival authority is required.

It is requested that the appropriate substantive supervisor review the above listed file to determine if any reason exists which would preclude destruction. A notation advising of the decision reached may be placed on this memorandum and returned to the Consolidation Unit of the Records Branch, Room 7231.

RECOMMENDATION:

For referral to the appropriate substantive division.

GUNS FOR DISPOSITION

The guns listed below are no longer of evidentiary value. Authorization for their disposition has been granted by the interested offices and has been coordinated with the appropriate case supervisors. These weapons are of no value to the Reference Firearms Collection and are in excess to the Bureau's needs.

In accordance with authorization granted (Memorandum 10/1/64, 80-14 Sub 1) weapons have been destroyed by sawing them into pieces. The pieces are being forwarded to Quantico for disposal at the Marine Corps Salvage Yard.

DESCRIPTION OF FILES - 25-1644 thru 25-11609

DESTRUCTION OF BUREAU PROPERTY

The above-listed files have been called to our attention by personnel of the Correlation Unit. These files refer to violators of the Selective Service Act during World War I.

The Bureau has archival authority to destroy files, index cards, and related material covering investigations under the Selective Service Act of 1940 and 1948 in which delinquency was not willful and prosecution was declined. Records to be destroyed after ten years old (66-19087-34).

The above files are on microfilm and consist of 22 reels. A review of reel 14 indicates approximately 800 cards can be deindexed or a total of approximately 17,500 cards can be purged from the General Indices. It is believed these files can be deindexed on the same basis as those approved by memorandum 66-19087-34. Those names where willful intent or information of a derogatory nature is given will, of course, not be purged.

It is requested that the appropriate substantive supervisor advise by notation on this memorandum the decision reached and return this memorandum to Correlation Unit, Records Branch, Room 6309 IB.

RECOMMENDATION:

For referral to the appropriate substantive division.

CHAMBER OF COMMERCE-NY
SPEECH MADE 2-7-35

DESTRUCTION OF BUREAU PROPERTY - GEN.

The above listed file has been called to our attention by personnel of the Consolidation Unit. The file consists of 12 sections beginning in 1933. The majority of the mail in the file is outdated and should be considered for destruction. It is proposed that all yellow copies of outgoing letters enclosing a copy of an address made in 1935 and all acknowledgements of these letters be destroyed.

Destruction of this mail would result in saving space in the file room. Destruction of this category of mail is authorized under the general records schedule and no further archival authority is required.

It is requested that the Crime Records Division review this file to determine if any reason exists which would preclude destruction. A notation advising of the decision reached may be placed on this memorandum and returned to the Consolidation Unit of the Records Branch.

BUREAU RECORDS
DESTRUCTION OF CLOSED CRIMINAL FILES
GENL
#6 32-65

By letter dated 1-26-65, SAC, Cincinnati, recommended that Bureau consider destruction of files in criminal categories which have been closed ten years, in line with President's recent economy directive concerning disposition of old material and banning purchase of new filing cabinets. SAC referred to previous letter dated 12-18-59 wherein he made similar proposal.

Suggestions to destroy criminal files and various other types of field office files prior to present twenty-year retention period have been considered on a number of occasions in past. During a Records Management Program conducted in 1959, a number of suggestions were considered along this line, including prior suggestion SAC refers to in referenced letter. A survey of ten representative field offices was conducted to determine if a lowering of retention period was feasible. Based on results of this survey and recommendations of Investigative Division and Domestic Intelligence Division, no change was made in twenty-year retention period for field files (66-18966-543).

During most recent Records Management Program conducted in 1964, several additional suggestions were received and considered concerning reduction of twenty-year retention period. These suggestions were not adopted (66-3286-983, 66-18966-657 and 695).

Since suggestion to lower retention period of field office files has been thoroughly considered by Bureau on several occasions and not

Dear Miss [redacted]

I have received your suggestion regarding the disposition of extra copies of serials in applicant-type cases when the file is closed. You may be interested to know that similar proposals have been considered previously and not adopted. It was decided that it is more feasible, from a work standpoint, to strip the files at the same time they are consolidated.

Although your idea was not adopted in this instance, the interest which prompted you to submit it is indeed appreciated.

Sincerely yours,

J. Edgar Hoover

NOTE CONTINUED

has authority to consolidate majority of files after they have been closed for six months. Security files may be consolidated at discretion of SAC. At time files are consolidated, they are stripped and any copies of all serials are destroyed. From work standpoint, it is more feasible to perform consolidation and stripping functions simultaneously. Suggested procedure would provide for double review project to purge cases at time of referral upon completion and six months later when consolidating cases.

Employee Suggestion
FD-253 (Rev. 9-11-59)

#635-65

b6
b7C

Date: 1/28/65

To: Director, FBI

From: (Suggester's name)

Division of Assignment: DALLAS

SUGGESTION

That extra copies of serials in applicant-type cases be destroyed before placing file in closed section. Auxiliary offices have such authorization in connection with security files, and such authorization could logically be extended to applicant files.

DESTRUCTION OF BUREAU RECORDS - GEN

Current practice or rule (Include manual citation as well as facts)

No provision except that file to be stripped when consolidating after closed six months.

Advantages of suggestion and annual savings (include basis for estimate)

Make it unnecessary to review and strip at time of consolidation. Applicant-type files are rarely re-opened subsequent to closing, thus only one copy of serial is no hazard.

Signature and Title of Suggester: File Clerk

Recommendations and comments of Division Head

It would appear that this suggestion has merit as the destroying of all copies except one could be done at the same time the case is closed, and would thereby avoid having to strip this type of case on the project.

Special Agent in Charge

SAC, Cincinnati (66-1659) February 3, 1965

Director, FBI 66-3286

DESTRUCTION OF CLOSED CRIMINAL FILES

Reference is made to your letter of January 26, 1965, under the same caption requesting consideration be given to destruction of files in criminal cases after they have been closed ten years.

As a matter of possible interest to you, the same or similar suggestions were considered and not adopted during the recent survey conducted on records management. It was decided such destruction would be false economy since the proper functioning of a field office requires immediate accessibility to information for proper evaluation of complaints and for background in criminal intelligence and fugitive matters. These and other considerations militate against any reduction of the present retention period.

Your office has been credited with submission of this idea under the provisions of the Suggestion Program.

SUBJECT: RECORDS MANAGEMENT
66-18966
Bureau Records: General
DESTRUCTION OF CRIMINAL FILES
#1165-65

By letter dated 3-11-65, SAC, Dallas, submitted suggestion made by Chief Clerk of Dallas Office, who suggests that all serials in criminal cases which have been RUC'd more than ten years be destroyed except one copy of serial RUCing case. SAC advises retention of one copy of RUC serial would furnish caption of case, identify office of origin, and any time background information was essential to current investigation, it could be obtained from office of origin.

Suggestions to destroy criminal files and various other types of field office files prior to present twenty-year retention period have been considered on a number of occasions in past. During a Records Management Program conducted in 1959, a number of suggestions were considered along this line. A survey of ten representative field offices was conducted to determine if a lowering of retention period was feasible. Based on results of this survey and recommendations of Investigative Division and Domestic Intelligence Division, no change was made in twenty-year retention period for field files (66-18966-543). 66-3286

During most recent Records Management Program conducted in 1964, several additional suggestions were received and considered concerning reduction of twenty-year retention period. These suggestions were not adopted (66-3286-985, 66-18966-657 and 695). By memorandum dated 1-29-65, suggestion made by SAC, Cincinnati, to destroy criminal files after ten

SUBJECT: REHABILITATION PROGRAM
RECORDS BRANCH

DESCRIPTION OF FILE: 1-3437
FBI NA NEWS LETTER ∅ DESTRUCTION OF BUREAU PROPERTY-GENL

ORIGINAL FILED IN 1-3437-2363

The above listed file has been called to our attention by personnel of the Consolidation Unit. It consists of 43 sections beginning in 1944. Currently there is very little mail filed in this file other than a copy of the bi-monthly News Letter. Items for the News Letter from the Field Offices are submitted by routing slip and sent to Division Two where any enclosures containing information of no value will be destroyed. Memos for filing will be returned to the Records Branch and will be filed in the individual "1" file on the NA graduate. Prior to this ruling, the Field Offices submitted a cover letter and an original and copy of the memos. The originals were filed in the "1" files and the cover letter and the copies of the memos were filed in file 1-3437.

It is proposed that this file be reviewed and all cover letters and copies of memos be destroyed where a notation appears on the mail that the original memo was filed in the individual "1" file.

Destruction of this mail would result in saving space in the file room. Destruction of this category of mail is authorized under the general records schedule and no further archival authority is required.

It is requested that the Training Division review the file to determine if any reason exists which would preclude destruction. A notation advising of the decision reached may be placed on this memorandum and returned to the Consolidation Unit of the Records Branch, Rm. 7231.

RECOMMENDATION: 6/18/65 file review + material destroyed EHG

For referral to the Training Division.

FROM : C. L. ROGERS

Division Three

SUBJECT: ADMINISTRATIVE DIVISION MATERIAL STORED ON SEVENTH FLOOR IDENTIFICATION BUILDING

Destruction of Bureau Property.

I made the annual check on April 13, 1965, of the material we have stored at the Identification Building and suggest that disposition be made of the following items:

1. Administrative Reports: We retain these for three fiscal years. Those for the fiscal years 1961, 1962, 1963 and 1964, in addition to those being received during the current fiscal year, are now on hand. It is suggested that those for the fiscal year 1961 (July 1960 through June 1961) be destroyed. 1 dr.

2. Congressional Record and Federal Register: We retain these for the past two calendar years. They are now on hand for 1962, 1963, 1964 and thus far in 1965. It is suggested that the issues dated in 1962 be destroyed. 22 dr.

3. Senate and House Bills, Testimony Before Apprcpriations Committees, etc.: We have been keeping items in this general category for the past two Congresses. We have these items on hand for the 87th Congress, the 88th Congress, and we are currently accruing the items of the 89th Congress. It is suggested that the items from the 87th Congress be disposed of at this time. These items are:

a. Printed testimony re appropriations hearings.
b. Public and private laws.
c. House and Senate Bills.
d. House resolutions and documents.
e. Senate resolutions and documents.

6 APR 29 1965

15½ dr.

4. United States Attorneys Bulletins: There is a small batch of these on hand for 1958 and 1962. It is suggested these be destroyed. ¾ dr.

5. Standardized Regulations: There is a batch of these on hand for 1962. They should be removed and destroyed. THREE

66-3286-

1 - Miss Louise Kirwan (sent direct)

ALL INFORMATION CONTAINED HEREIN IS UNCLASSIFIED EXCEPT WHERE SHOWN OTHERWISE.... DATE 8-2-82 BY SP4 ELW/cal

ORIGINAL FILED IN 66-1953-E-2

6. Copies of Sale Bids and Copies of Procurement Bids: These items cover the sale of such things as old tires, miscellaneous surplus property and cars. They cover the procurement of such services as auto repair and auto storage. The original of the bids, both sale and procurement, went to the General Accounting Office at the time of the transaction.

Unless there is something unusual surrounding the transaction (amounts to more than $25,000 and deviates from established precedents) the disposal period according to General Services Administration regulations is six years for transactions of $2,500 and more and three years for those under $2,500, after final payment. Since it is difficult to separate transactions as to dollar categories we hold these copies for a longer than necessary period of about 10 years. We have procurement bids on hand beginning with the fiscal year 1953. It is suggested that those for the fiscal year 1953 be removed and destroyed.

We have sale bids on hand beginning in 1951. It is suggested that those issued during the fiscal years 1951, 1952 and 1953 be disposed of at this time.

ACTION:

Should you agree, arrangements will be made with the Files and Communications Division for the removal of the items from storage and their destruction. In this regard, it is suggested that Supervisor C. L. Rogers go through the sale and procurement copies of bids described in item 6 above to make certain that there are no large, unusual items among them that should be retained on a permanent basis.

SUBJECT: DESTRUCTION OF BUREAU Property
ADDRESSOGRAPH PLATES

For the past several months we have been converting our mailing list to the Automatic Data Processing systems of the Voucher-Statistical Section. This conversion is now complete and we have no further use for approximately 60,000 addressograph plates bearing the Bureau mailing list.

In the past, destruction of deleted plates was done by mutilating them by hand and putting them in the trash to be burned. Obviously 60,000 plates are too many to destroy by hand.

RECOMMENDATION:

Property Section arrange for plates to be taken to a local foundry accompanied by a Mechanical Section employee to be destroyed.

From: (Suggester's name)

Division of Assignment
PHILADELPHIA

SUGGESTION

Auxiliary office to forward statements to office of origin of the closed files of the 26 classification (ITSMV) in those instances where file meets other requirements permitting destruction after ten years of age, ie. office destroying file is not office of origin nor office of prosecution.

DESTRUCTION OF BUREAU RECORDS - GEN'L

Current practice or rule (Include manual citation as well as facts)

Retain file if it contains signed statements from witnesses. MR&R, Part II, Section 3, b 2 (c).

Advantages of suggestion and annual savings (include basis for estimate)

In many instances a fairly thick closed file of 26 classification could be destroyed when ten years of age meeting the requirements that we were not office of origin or office of prosecution. However, in reviewing exhibit envelope of the file, it would contain one or two statements thereby requiring that the entire file be retained in the auxiliary office. If the statements were forwarded to the office of origin, the file could be destroyed and additional file space saved in auxiliary office. No additional space would be required. Further advantage, the file would be more complete at office of origin.

Disadvantages of suggestion

Clerical time required to send statement to office of origin and clerical time taken at office of origin to file statement in exhibit envelope.

SUBJECT: RECORDS MANAGEMENT
#130-65

DESTRUCTION OF BUREAU RECORDS - GEN'L

BACKGROUND :

Instructions regarding liaison with groups sponsoring integration were recently included in the Manual of Instructions, Volume IV, Section 130, "Racial Informants." Among other things, these instructions provided for the submission of a monthly letter on Form FD-373, copy enclosed. By memorandum from Mr. Short to Mr. Tavel, dated 6/18/64 on "Records Management" (Bufile 66-18966-708) and memorandum from Mr. Casper to Mr. Mohr, dated 7/21/64 on "Records Management" (Bufile 66-18966-707), approval was given to the destruction of copies of monthly progress letters on criminal informants and racial informants maintained in the field after inspection by the Seat of Government.

PROPOSAL:

That the same destruction period be applied to the monthly progress letters on liaison sources; that is, copies of the monthly progress letters be destroyed in the field after the field office inspection by Seat of Government inspectors. It seems logical to use the same destruction period for the monthly letters on liaison sources. There appears to be no apparent reason why these letters cannot be destroyed after the Seat of Government inspection. Enclosed is a proposed change for the Manual of Rules and Regulations so providing.

ORIGINAL FILED IN 66-18966-

ALL INFORMATION CONTAINED HEREIN IS UNCLASSIFIED DATE 8-2-82 BY SP4 EWJ Cal

Dear Mr. [redacted]

Thank you for the suggestions concerning the disposition of zero files after a particular period of time and a method which would permit auxiliary offices to dispose of material in a certain classification when the current requirements have been met. It may interest you to know the same proposal regarding zero files has been considered previously and not adopted since it was decided this material has continuing value for an indefinite period. Your second idea is being considered and I will let you know if it is adopted.

Your continued interest in seeking ways to improve our operations is indeed appreciated.

Sincerely yours,

J. Edgar Hoover

SUGGESTION

Authorize destruction of "0" files of all classifications after five years of age.

Re: DESTRUCTION OF BUREAU RECORDS

Current practice or rule (Include manual citation as well as facts)

MR&R Part II, Section 3,8 - page 13. MR&R authorizes destruction of all files after 20 years of age and for some types at various ages prior to 20 years.

Advantages of suggestion and annual savings (Include basis for estimate)

"0" files are used only for a depository for information and/or complaints over which the FBI has no jurisdiction. Information is of little or no value to office and after five years of age possibly never referred to.

Under the Records Management Program it is felt destruction of this material would come under category of disposing of records when value has ceased (SAC letter 64-12CA). In office size of Philadelphia, 31 linear feet of file space would be gained or equivalent of over three 5-drawer file cabinets. Estimating volume of these Accumulation in all other divisions (See page 2)

Disadvantages of suggestion

None

HEREIN IS UNCLASSIFIED

DESCRIPTION OF FILE: 48-0
POSTAL VIOLATIONS-GENL. ① DESTRUCTION OF BUREAU PROPERTY-GENL.

The above listed file has been called to our attention by personnel of the Consolidation Unit. It consists of 22 sections beginning in 1922. The file is currently used but little mail is now put in the file, the majority of the mail being over 20 years old. The mail in the file relates to matters not within the investigative jurisdiction of the Bureau and in most cases has been referred to the Post Office Department. This material is outdated and there appears to be no reason for its continued retention. It is proposed that the file be reviewed and all obsolete mail over three years old be destroyed. Mail of a policy or historical nature would not be destroyed. (See serial 48-0-2764, page 2 for current rule).

Destruction of this mail would result in saving space in the file room and in eliminating unnecessary cards from the General Index. Destruction of this category of mail is authorized under the general records schedule and no further archival authority is required.

It is requested that the appropriate substantive supervisor review the above listed file to determine if any reason exists which would preclude destruction. A notation advising of the decision reached may be placed on this memorandum and returned to the Consolidation Unit of the Records Branch, Room 7231.

RECOMMENDATION:

For referral to the appropriate substantive division.

J. J. Casper

DESTRUCTION OF BUREAU RECORDS - GENERAL

SUPERVISION - INTERSTATE TRANSPORTATION
OF STOLEN MOTOR VEHICLE
SUGGESTION #900-65 SUBMITTED BY
MR. [redacted] PHILADELPHIA OFFICE

b6
b7C

SUGGESTION: That auxiliary offices be permitted to forward signed statements to the office of origin from closed files in the above-mentioned classification in those instances where the file meets all other requirements permitting destruction of file after ten years.

CURRENT PRACTICE: Manual of Rules and Regulations, provides that except in important cases or where a case has many ramifications, the files, records and index cards relating to the Interstate Transportation of Stolen Motor Vehicle cases can be destroyed when ten years old provided: (a) Office is not office of origin.
(b) Office is not office of prosecution.
(c) File contains no signed statements from witnesses.

ADVANTAGES: Suggester advises in many instances a fairly thick closed file in this classification could be destroyed when ten years of age meeting the requirements; however, the exhibit envelope of the file would contain one or two signed statements thereby requiring that the entire file be retained in the auxiliary office. If the statements were forwarded to the office of origin, the file could be destroyed and additional file space saved in auxiliary offices. No additional space would be required at office of origin since it must retain the file under present regulations. The file would be more complete at the office of origin.

DISADVANTAGES: Some clerical time would be needed at auxiliary offices to send statements to office of origin and in office of origin to file statements in exhibit envelopes.

OBSERVATIONS: SAC Jamieson, Philadelphia, advised this procedure would result in saving a substantial amount of filing space and does not appear to have any disadvantages.

66-3286-

General Investigative Division advised that the removal of this obstacle to the destruction of the auxiliary office file after ten years by sending the signed statement to the office of origin would in no way adversely affect the case.

Enclosure
(1 - Bufile 66-3286)
ML:wls
(3)

NOT RECORDED
125 MAY 28 1965

CONTINUED - OVER

ORIGINAL FILED IN 66-0-0

REVIEWED
DATE 8-2-82

The office of origin with the acquisition of the signed statement would then have a complete file and there would be no necessity to retain the auxiliary office file. This procedure would be in line with the continuous attempt on the part of the Bureau to conserve space by purging unnecessary and duplicate material. This division recommended adoption.

Inspection Division recommended favorable consideration be given this proposal since, if adopted, auxiliary offices which are not offices of prosecution could destroy additional files in this category, thereby saving additional space without jeopardizing any evidentiary material now being retained. This could be accomplished with a minimum of additional clerical time by forwarding signed statements to the office of origin at the time of file destruction.

Training Division also feels proposed procedure is worthwhile and will be an aid to the field in saving much needed space. It is believed the suggester's alertness is worthy of commendation.

RECOMMENDATIONS: (1) That the suggestion be adopted and the attached letter of commendation forwarded to the suggester. He has been thanked by prior letter.

(2) On approval, this memorandum will serve as the authority for the Manuals Desk, Training Division, to make the necessary manual revs revisions.

SUBJECT: DEPARTMENT OF JUSTICE HEARINGS
FOR FISCAL YEAR 1966
HOUSE APPROPRIATIONS COMMITTEE
Destruction of Bureau Property - General

Memorandum N. P. Callahan to Mr. Mohr, 5-17-65, points out that pages 50 and 51 of captioned hearings contain information concerning the records retirement program within the Department. Page 51 contains the following explanatory notation: "Note. - Due to late reporting by FBI, Immigration and Naturalazation Service, and Bureau of Prisons; biennial reporting pursuant to GSA regulations 3-1-1-02-07."

Pursuant to the Federal Records Act of 1950 and GSA regulations the Bureau submits to the Department information concerning volume of records material destroyed. This is a biennial report to be submitted within 30 days after the end of each even numbered fiscal year. Last Bureau report submitted to the Department was dated July 28, 1964, which is within the required deadline.

Mr. Armando Di Girolamo, Chief, Records Administration Office, Administrative Division, of the Department, advised on this date that the notation on page 51 of the hearings is poorly worded. It was meant to convey that exact records destruction figures are not available each year inasmuch as regulations require reporting at the end of every two years. He stated that in the future the notation used to explain discrepancies between actual figures and previous estimates would be changed to delete the word "late" and insert therefore the word "biennial." This will remove the connotation that the Bureau is delinquent in reporting records disposal statistics.

66-3286-

Mr. Di Girolamo, after checking with his subordinates, stated that the Bureau is always extremely prompt in reporting records retirement figures.

NOT RECORDED
191 MAY 27 1965

ALL INFORMATION CONTAINED HEREIN IS UNCLASSIFIED DATE 1958-2-82 BY SP4EW Cal

RECOMMENDATION:

Inasmuch as future notations regarding the records retirement matter will be changed to accurately record the fact that the Bureau submits figures every two years in accordance with regulations, no further action appears necessary.

I am not satisfied with the Director's written STV explanation in the Congressional hearings pointing out the inaccuracy of the above statements and why the facts are.

SUBJECT: DESCRIPTION OF FILE: 17-0
VETERANS ADMINISTRATION MATTERS-GENL.

The above file has been called to our attention by personnel of the Consolidation Unit. It consists of 30 sections beginning in 1921. The first 12 sections of the file contain mail that relates to matters not within the jurisdiction of the Bureau and in most cases was referred to the Veterans Administration. This type of mail is not currently filed. The mail in file is outdated and there appears to be no reason for its continued retention. It is proposed that these sections be reviewed and obsolete mail be destroyed.

Destruction of this mail would result in saving space in the file room and eliminate unnecessary cards from the General Index. Destruction of this category of mail is authorized under the general records schedule and no further archival authority is required.

It is requested that the appropriate substantive supervisor review the above listed file to determine if any reason exists which would preclude destruction. A notation advising of the decision reached may be placed on this memorandum and returned to the Consolidation Unit of the Records Branch, Room 7231.

RECOMMENDATION:

For referral to the appropriate substantive division.

EHG:lmd

DESTRUCTION OF BUREAU PROPERTY-GENL.

May 24, 1965

BY SPECIAL MESSENGER

66-3286-

Honorable John J. Rooney
House of Representatives
Washington, D.C. 20515

My dear Mr. Chairman:

A notation appears on page 51 of the Hearings Before the House Appropriations Subcommittee for the U.S. Department of Justice for Fiscal Year 1966 which infers that this Bureau was late in reporting records disposal figures reflected in the report on the Records Retirement Unit, U.S. Department of Justice.

A report on records disposal is made to the Department of Justice on a biennial basis within 30 days after the close of each even-numbered fiscal year. This is in accordance with the Federal Records Act of 1950 and General Services Administration regulations. The Department of Justice has advised that the FBI is always prompt in submitting this report and that the notation referred to in the Subcommittee Hearings was not intended to imply any delinquency. According to the Department of Justice, this notation was meant to convey that exact records destruction figures are not available each year inasmuch as regulations require the reporting of such figures at the end of every two years. They indicate it will be more clearly stated in future reports.

BY COURIER SVC.
12 MAY 24

This matter is being brought to your attention so that you may be aware of the inaccuracy of the notation referred to and of the true facts pertaining thereto.

Sincerely yours,

J. Edgar Hoover

(Based on memo F. W. Waikart to Mr. Mohr 5-21-65 captioned "Department of Justice Hearings for Fiscal Year 1966, House Appropriations Committee, Error in Referring to 'Late' Reporting of Data by FBI," prepared by FWW:bpr)

DATE: 6/8/65

FROM : W. D. Griffith

SUBJECT: DESTRUCTION OF OLD PHOTOGRAPHIC NEGATIVES

The Administrative Division has been relieved of the responsibility for maintaining photographic negatives in sixty-one file cabinets situated on the 8th Floor of the Justice Building per memorandum from Mr. Felt to Mr. Tolson 5/13/65. This responsibility was transferred to Files and Communications Division. The memorandum states that Mr. Tavel feels the cabinets will have to be removed to the Identification Building if Files and Communications Division is to adequately fulfill maintenance obligations under this transfer arrangement. The memorandum instructs "The Laboratory Division must not allow the removal of these files to the Identification Building to restrict a continued aggressive program of purging these files."

There is in existance an approved and effective purging procedure. This procedure was worked out among Laboratory, Records and Communication, Identification, Administrative, Investigative and Domestic Intelligence Divisions in 1958 (memo Griffith to Parsons 8/14/58). At the request of Records and Communications Division (memo Eames to Nease 9/5/58) certain refinements to the original procedure were initiated (memo Griffith to Parsons 10/7/58) to facilitate handling by Records and Communications Division employees.

In essence, the agreed upon procedure provides that each year lists are prepared of photographic negative file numbers of cases ten years old or older by the division having maintenance responsibility. Records Section searches the lists against abstracts for any activity in the case within the past ten years. With the exception of certain specified classifications, if no activity in ten years, the negatives are automatically destroyed. If no activity in ten years, the files of "exception" cases (cases of national interest, major kidnaping, cases where life sentences were imposed and all cases supervised by Domestic Intelligence Division) are first routed to substantive supervisor and thereafter to Laboratory Division and Latent Fingerprint Supervisor for review regarding destruction of negatives.

UNRECORDED COPY FILED IN

Memorandum to Mr. Conrad
Re: Destruction of Old Photographic Negatives

Since Files and Communications Division is taking over the Administrative Division's former maintenance responsibility, and that division along with the Laboratory and other concerned divisions participated in working out the purging procedure, and thus all concerned divisions are aware of the specifically defined purge functions to be performed by each, there should be no obstacle to the continued effective functioning of the existing aggressive purging program. The Laboratory will, of course, continue to handle promptly its existing responsibilities under the approved program, and in compliance with the approved Inspection Division instructions, will exercise every precaution to see that possible removal of the cabinets to the Identification Division does not restrict in any way the aggressive discharge of the Laboratory's responsibilities under the existing program.

RECOMMENDATION:

DESCRIPTION OF FILE: 55-0
COUNTERFEITING-GENL. ODESTRUCTION OF BUREAU PROPERTY-GENL.

The above listed file has been called to our attention by personnel of the Consolidation Unit. It consists of 24 sections beginning in 1921. The file is currently used but little mail is now put in the file, the majority of the mail being over 20 years old. The mail in the file relates to matters not within the investigative jurisdiction of the Bureau and in most cases has been referred to the Treasury Department. Also filed in the first few sections are outdated circular letters describing counterfeit money.

This material is outdated and there appears to be no reason for its continued retention. It is proposed that the file be reviewed and all obsolete mail over three years old be destroyed. Mail of a policy or historical nature would not be destroyed.

Destruction of this mail would result in saving space in the file room and in eliminating unnecessary cards from the General Index. Destruction of this category of mail is authorized under the general records schedule and no further archival authority is required.

It is requested that the appropriate substantive supervisor review the above listed file to determine if any reason exists which would preclude destruction. A notation advising of the decision reached may be placed on this memorandum and returned to the Consolidation Unit of the Records Branch, Room 7231.

RECOMMENDATION:

For referral to the appropriate substantive division.

ADDENDUM GENERAL INVESTIGATIVE DIVISION 6-16-65 RJG:tmt

The material referred to is not concerned with any matters being handled by this division. The General Investigative Division has no interest in the retention of this material.

ADDENDUM CRIME RECORDS DIVISION 6-18-65 RWE:ncr

Crime Records Division feels that this type mail can definitely be destroyed. As pointed out, counterfeiting does not fall within the Bureau's jurisdiction. The reason very little mail is being placed in this file currently is the fact that such inquiries are referred by a referral form to Secret Service and a card is maintained in the Correspondence and Tours Section noting the action taken with each piece of mail. It would be filed only if there were some necessity to write a letter over the Director's signature.

It is not felt that any other Division would have sufficient interest in this proposal to make a decision. It is, therefore, recommended that the mail be destroyed in accordance with the method outlined in the memorandum.

DESCRIPTION OF FILE: 1-49
FBI CIVILIAN DEFENSE COURSE FOR POLICE
(1) DESTRUCTION OF BUREAU PROPERTY-GEN'L.

The above listed file has been called to our attention by personnel of the Consolidation Unit. It consists of 3 sections of general mail and a sub file for each Field Office. The file is not currently used and the mail is dated in 1941 and 1942. The material in the Field Office sub files pertains to lectures and conferences, schedules, lists of individuals attending the schools and other administrative type of mail. It is proposed that the file be reviewed and all mail that is of no permanent value be destroyed. Mail of a policy or historical nature would not be destroyed and would be filed in the general file.

Destruction of this mail would result in saving space in the file room. This category of mail is authorized under the general records schedule and no further archival authority is required.

It is requested that the Training Division review the above listed file to determine if any reason exists which would preclude destruction. A notation advising of the decision reached may be placed on this memorandum and returned to the Consolidation Unit of the Records Branch, Room 7231.

RECOMMENDATION:

For referral to the Training Division.

DESTRUCTION OF BUREAU RECORDS

Rerep SA JOHN E. HOWARD 7/27/42 in captioned matter.

In connection with the investigation of captioned matter, the bulky exhibit file contains two enlarged prints and the negatives. Prints pertain to the minutes of the National Resident Board, YCL, USA, 2/26/38. They also pertain to a meeting of the National Resident Board, YCL, USA 9/3/38, and also contain a letter from the program manager of a Madison radio station, WIBA, dated 10/13/41 enclosing a copy of an address given by JAMES HUDSON of Milwaukee, Wis., state representative of the CP. (S) (U)

Inasmuch as this matter has been in a closed status since 1942 and the above-mentioned bulky exhibits serve no useful purpose, Bureau permission is requested to destroy these exhibits.

DESTRUCTION OF BUREAU PROPERTY - GENL

SUBJECT: MOVEMENT OF NATIONALS
SUGGESTION #47-66 SUBMITTED BY
SA [redacted]
DOMESTIC INTELLIGENCE DIVISION

b6
b7C

SUGGESTION: For records management purposes, suggests files at the Seat of Government pertaining to movement of Communist-bloc nationals (from the countries of Albania, Bulgaria, Czechoslovakia, East Germany, Hungary, Mongolia, Poland, Rumania, USSR and Yugoslavia) be purged of form-type data pertaining to visitors for pleasure entering the United States and similar data regarding transit (C-visa) visitors. This would not affect data concerning investigative results or any data in files pertaining to Communist-bloc diplomats or officials who have been assigned to the U.S., East-West Exchange Program visitors, or immigrants. It would not affect data pertaining to persons regarding whom we have conducted investigations since such data, if pertinent, would be in separate or individual case files. This procedure would bring Bureau files and indices in line with current practice in effect since 1/8/65, and will eliminate several thousand serials and index cards not having any real current value to our investigative work. Data which could be purged would include Form FD-210 (Notice of Arrival into or Departure from the United States of a Communist-bloc National); Immigration and Naturalization Service visa waiver notice; State Department Form FD-257 (Visa Data Slip with Photo); State Department name check request forms; and copies of State Department telegrams or airgrams containing notice of arrivals. Purging could be effected by having Records Section review all general files pertaining to movement of Communist-bloc nationals to eliminate and de-index all such communications pertaining to B-2 or C-visa visitors. The State Department name request form would be eliminated on all those where it is indicated the individual is a nonimmigrant and destination is shown to an individual and/or as "transit." The record of serials destroyed could be printed in ink on the inside of front cover of the file or by some similar procedure such as one typewritten page at top of file.

CURRENT PRACTICE: Manual of Instructions, Section 105E, pages 4e through 4g, was revised as of 1/8/65, and indicates as of that date Bureau will no longer maintain or index such form-type data on temporary visitors for pleasure from Communist-bloc countries.

"CONTINUED - OVER"

Memo Casper to Mohr
re: Movement of Nationals
Suggestion #47-66

ADVANTAGES: Proposed procedure would reduce filing space as well as eliminate unnecessary searching and file reviews in future, particularly as it pertains to name check procedures. It would reduce filing space for files; filing space for indices; eliminate costly listing of unnecessary references on future search slips; and, eliminate unnecessary handling of files that would otherwise be furnished for file reviews since the nonpertinent, nonderogatory data would be eliminated. The saving could only be estimated by Records Section and possibly only after purge of files and indices has been completed. Suggester lists as an example seven files containing 81,559 serials to which this idea would apply.

DISADVANTAGES: Suggester advised since all pertinent data would have been incorporated in separate case files and/or is already available in field offices no disadvantage is involved.

OBSERVATIONS: Domestic Intelligence Division advised idea has merit since it would save Agent as well as clerical time in addition to the space made available. This division requested views of Files and Communications Division be obtained regarding the feasibility of such a plan and an estimate of savings which would result from its adoption.

Files and Communications Division favored adoption of this proposal. It pointed out it has an active program of purging obsolete material from Bureau's master indices and in destroying extraneous material contained in Bureau files. During the first six months of 1965, approximately 380 file cabinet drawers have been reclaimed through destruction of obsolete material. A procedure along these lines has been in effect for many years in the Records Branch. The Supervisors' Manual points out the desirability of supervisory personnel advising the Records Branch of material which is no longer of value, in order that such material may be removed from the records system. There is no question concerning the fact that purging our records of such extraneous outdated material has been beneficial. However, no dollar and cent cost figure is available to use in estimating savings resulting from this procedure.

The Training Division agrees suggestion has merit and should be adopted. Since it has been ascertained, a saving cannot be estimated for this procedure it is felt the suggester should be given a letter of commendation for bringing this type of material to the attention of the Bureau.

Memo Casper to Mohr
re: Movement of Nationals
Suggestion #47-66

RECOMMENDATIONS: (1) That the suggestion be adopted and the attached letter of appreciation forwarded to the suggester. He has been thanked by prior letter.

(2) On approval, this memorandum will serve as the authority for the Files and Communications Division to purge our files and indices of the type material described by the suggester.

Re: TECHNICAL EQUIPMENT
BRIEFCASE RECORDERS

Dear Sir:

Destruction of Bureau Property

The following concerns the technical equipment of your office:

Bureau records indicate the following tape recording equipment is assigned to your office:

Cub Corder Model S 1001

Inasmuch as it is becoming increasingly difficult to keep this equipment in good operating condition due to scarcity and cost of parts, these units are being removed from service. The above equipment should be returned to the Bureau, attention Electronics Section, for destruction.

A decision will be made later as to a replacement for this equipment. Adjust your inventory accordingly and submit the proper forms to the Property Management Section of the Bureau. A copy of the letter transmitting these forms will suffice for a package invoice.

DESTRUCTION OF BUREAU RECORDS

Comments of this Division requested concerning proposal of SA [redacted] to purge Bureau files of certain material pertaining to movement of communist-bloc nationals.

b6
b7C

This material is no longer being placed in Bureau files.

Personnel of the Files and Communications Division favor adoption of SA [redacted] proposal. The Records Branch has an active program of purging obsolete material from the Bureau's master indices and in destroying extraneous material contained in Bureau files. For example, during each of the past three years approximately 500,000 index cards have been removed from the Bureau's master index. During the first six months of 1965 approximately 380 file cabinet drawers have been reclaimed through destruction of obsolete or extraneous material.

The procedure of eliminating extraneous material from the Bureau's master indices and central files has been in effect for many years in the Records Branch. The Supervisors' Manual points out the desirability of supervisory personnel advising the Records Branch of material which is no longer of value, in order that such material may be removed from the Bureau records system. There is no question concerning the fact that purging our records of extraneous outdated material has been beneficial. However, no dollar and cent cost figure is available to utilize in estimating ~~it~~ savings which result from this procedure.

b6
b7C

RECOMMENDATIONS:

(1) That SA [redacted] suggestion be adopted.

FROM : LEGAT, BONN (66-16)

SUBJECT: BUPLANS - DESTRUCTION OF FILES
Destruction of Bureau Records

The file destruction program of this office has been considered and there appears to be no reason to recommend any change in the schedule for periodic destruction of files here. I regard the volume of files presently in this office to be manageable and believe that they could be destroyed in the event of any foreseeable emergency.

Dear Mr. [redacted]

Reference is made to your suggestion concerning the disposition of certain material contained in the files at the Seat of Government. I am pleased to advise you this proposal is being adopted and steps are being taken to place it into effect.

It is indeed gratifying to note the improvements that have been made in our operations as a result of the ideas which have been submitted. You are to be commended for the initiative you displayed in giving me the benefit of your thoughts on this matter.

Sincerely yours,
J. Edgar Hoover

SUBJECT: GEORGE JOHN GESSNER
ATOMIC ENERGY ACT

Destruction of Bureau Records - Gen.

In my memo, August 26, 1965, (attached), pertaining to the question of immunity promised subject by Army interrogators, it was pointed out that Special Agent [redacted] first advised the San Antonio Office of the Army's promise of immunity by routing slip dated April 27, 1961, which is now destroyed. Director asked why such a document was destroyed.

b6
b7C

The routing slip submitted by SA [redacted] was an informal accounting and in the nature of a summation of what he overheard. On May 9, 1961, he submitted a memorandum to the Special Agent in Charge, San Antonio Office, detailing such conversation pertaining to possible immunity promises. The routing slip was destroyed only after the information had been placed in a formal Bureau communication. It is noted that the routing slip in question did not contain the type of written information which it is necessary to retain under current policy of the Justice Department. Moreover, it is not expected that the routing slip will, in any way, become an issue in connection with this case.

ACTION:

For the Director's information.

Destruction of Bureau Property - Genl.

(A) RETENTION OF PROPERTY -- In an important security investigation a hotel registration card was obtained as an item of possible evidence. Subsequently, this item was not used as evidence during the trial. Thereafter, the card was retained in the files of a field office for a period of approximately ten years and then destroyed without consultation with the Bureau or the United States Attorney. This should not have been done and the action may cause great embarrassment to the Bureau since the registration card may be of interest in future legal action.

All personnel of your Office should be completely familiar with Part II, Section 8, Subsection E, pages 19 and 20, of the Manual of Rules and Regulations relating to the retention and destruction of property. I want to make it clear that no such action should be taken in the future without prior consultation with the United States Attorney.

DESCRIPTION OF FILE: 23-0
PROHIBITION-GENL. DESTRUCTION OF BUREAU PROPERTY - GENL.

The above listed file has been called to our attention by personnel of the Consolidation Unit. It consists of 27 sections beginning in 1923. The file is currently used but little mail is now put in the file, the majority of the mail being over 20 years old. The mail in the file relates to matters not within the investigative jurisdiction of the Bureau and in most cases has been referred to the Alcohol Tax Unit, Treasury Department.

This material is outdated and there appears to be no reason for its continued retention. It is proposed that the file be reviewed and all obsolete mail over three years old be destroyed. Mail of a policy or historical nature would not be destroyed.

Destruction of this mail would result in saving space in the file room and in eliminating unnecessary cards from the General Index. Destruction of this category of mail is authorized under the general records schedule and no further archival authority is required.

It is requested that the appropriate substantive supervisor review the above listed file to determine if any reason exists which would preclude destruction. A notation advising of the decision reached may be placed on this memorandum and returned to the Consolidation Unit of the Records Branch, Room 7231.

RECOMMENDATION:

For referral to the appropriate substantive division.

L. E. Short to Tavel Memo
RE: REHABILITATION PROGRAM
RECORDS BRANCH

DESCRIPTION OF FILE: 23-0
PROHIBITION-GENL.

ADDENDUM: 10-7-65 RWE:ncr

Sections 15 and 22 of the 23-0 file were reviewed as a sampling of the type material located in this category.

It was determined that it is not necessary to retain this type mail as it does not generally pertain to matters within the jurisdiction of the Bureau.

It is noted that very little mail is sent to this file at the present time as a system has been evolved whereby any materials pertaining to the Alcohol and Tobacco Tax Division are referred to that agency by means of a form referral slip. A copy of the information referred is retained by the Correspondence and Tours Section for a period of 90 days and the data is not sent to file as it is unnecessary.

It is, therefore, recommended by the Crime Records Division, which handles the bulk of the material normally appearing in this file, that the nonpertinent mail be destroyed. Care should be taken, however, to retain any mail of a policy or historical nature and mail less than three years old should not be destroyed.

Mr. Tavel 10-21-65

L. E. Short

Destruction of Bureau Records - General

DEINDEXING OF GERMAN RESIDENTS IN BOLIVIA
Bufile ~~64-2998-Sub A~~

Various serials in this file contain approximately five hundred references. Serials 26, 28, and 48 are lists of leading Nazis in Cochabamba, Bolivia. Serial 46 is a list of members of the German Club in Oruro, Bolivia.

The attached file contains lists of names which have been called to our attention by personnel engaged in Name Check work. They advise the frequency of reference to these listings causes unnecessary work because insufficient information is available to effect an identification. In an effort to streamline procedures and eliminate unnecessary reference to this data, it is proposed that the material be deindexed through removal of these cards from the Bureau's indices.

It is requested that the appropriate substantive supervisor review the above-listed file references to determine if any reason exists for retention of the indexing on these listings of names. A notation advising of the decision reached may be placed on this memorandum. The memorandum should be returned to the Correlation Unit of the Records Branch, Room 6309 Identification Building.

RECOMMENDATION:

For referral to the appropriate substantive division.

DESCRIPTION OF FILE: 12-0
NARCOTICS-GENL. DESTRUCTION OF BUREAU PROPERTY-GENL

The above listed file has been called to our attention by personnel of the Consolidation Unit. It consists of 57 sections beginning in 1921. The mail in sections 1 thru 30 is all over 20 years old. The mail in these sections relates to matters not within the investigative jurisdiction of the Bureau and in most cases was referred to the Bureau of Narcotics, Treasury Department. Much of this old mail is inter-office and was referred to the Narcotics Bureau from the Field Offices.

This material is outdated and there appears to be no reason for its continued retention. It is proposed that the file be reviewed and all obsolete mail over 20 years old be destroyed. Mail of a policy or historical nature would not be destroyed.

Destruction of this mail would result in saving space in the file room and in eliminating unnecessary cards from the General Index. Destruction of this category of mail is authorized under the general records schedule and no further archival authority is required.

It is requested that the appropriate substantive supervisor review the above listed file to determine if any reason exists which would preclude destruction. A notation advising of the decision reached may be placed on this memorandum and returned to the Consolidation Unit of the Records Branch, Room 7231.

RECOMMENDATION:

For referral to the appropriate substantive division.

Destruction of Bureau Records - General

DEINDEXING OF JAPANESE RESIDENTS IN BOLIVIA
Bufile ~~64-2908-B-4~~

This serial consists of approximately two hundred names of Japanese living in La Paz, Bolivia, in 1943.

The attached listing of names has been called to our attention by personnel engaged in Name Check work. They advise that the frequency of reference to this listing causes unnecessary work because insufficient information is available to effect an identification. In an effort to streamline procedures and eliminate unnecessary reference to this data, it is proposed that the material be deindexed through removal of the cards from the Bureau's indices.

It is requested that the appropriate substantive supervisor review the above-listed file reference to determine if any reason exists for retention of the indexing on this listing of names. A notation advising of the decision reached may be placed on this memorandum. The memorandum should be returned to the Correlation Unit of the Records Branch, Room 6309 Identification Building.

RECOMMENDATION:

For referral to the appropriate substantive division.

DESCRIPTION OF FILE: 98-0-sub 2
STRIKES REPORTED BY WAR DEPARTMENT
@ DESTRUCTION OF BUREAU PROPERTY - GENL

The above listed file has been called to our attention by personnel of the Consolidation Unit. It consists of 62 sections beginning in 1941 and ending in 1945. The file contains memos from the War Department listing names of Companies where strikes and labor disputes occurred affecting War Department Procurement.

This material is outdated and there appears to be no reason for its continued retention. It is proposed that the file be reviewed and all obsolete mail be destroyed. Mail of a policy or historical nature would not be destroyed.

Destruction of this mail would result in saving space in the file room. Destruction of this category of mail is authorized under the general records schedule and no further archival authority is required.

It is requested that the appropriate substantive supervisor review the above listed file to determine if any reason exists which would preclude destruction. A notation advising of the decision reached may be placed on this memorandum and returned to the Consolidation Unit of the Records Branch, Room 7231.

ADDENDUM: Domestic Intelligence Division, 10/26/65, RDS

The file referred to in the above memorandum consists primarily of memoranda from the War Department during the war years which lists the names of companies where strikes and labor disputes occurred which in some manner affected War Department procurement. All of this data is now completely outdated, refers to the World War II period, and there does not appear to be any valid reason for its continued retention.

The Files and Communications Division has advised it has guide lines for the review and destruction of outdated material and if the destruction of this file is approved it will be carefully reviewed by trained personnel and all serials contained in the file determined to be of a policy or historical nature will not be destroyed.

RECOMMENDATION:

It is recommended that the Files and Communications Division make arrangements to have this file carefully reviewed and to destroy those serials which are determined to be lists of companies received from the War Department in which strikes or labor disputes were involved. All other mail should be retained, including all mail of a policy or historical nature.

DESCRIPTION OF FILE: 1-2639
FBI WAR TRAFFIC SCHOOL ①

DESTRUCTION OF BUREAU PROPERTY-GENERAL

The above listed file has been called to our attention by personnel of the Consolidation Unit. It consists of a general file and a sub file for each Field Office. The sub files were used only during 1942 when the Bureau conducted a War Traffic School for Police. The material in the Field Office sub files pertains to lectures and conferences, schedules, lists of individuals attending the schools and other administrative type of mail. It is proposed that the sub files be reviewed and all mail that is of no permanent value be destroyed. Mail of a policy or historical nature would not be destroyed and would be filed in the general file.

Destruction of this mail would result in saving space in the file room. This category of mail is authorized under the general records schedule and no further archival authority is required.

It is requested that the Training Division review the above listed file to determine if any reason exists which would preclude destruction of the Field Office sub files. A notation advising of the decision reached may be placed on this memorandum and returned to the Consolidation Unit of the Records Branch, Room 7231.

RECOMMENDATION:

For referral to the Training Division

BUREAU CODES - DISPOSITION OF SURPLUS CIPHER PADS

Buded

Each field office is currently required to maintain a minimum of five enciphering and five deciphering one-time cipher pads.

Bureau has determined this number can be reduced to two enciphering and two deciphering pads of the newer 100-page type. Some offices have only one of this type and therefore should retain, in addition, two of the 50-page type.

Your office should retain deciphering pads numbers _____, _____, and _____; and enciphering pads numbers _____, _____, and _____.

Return to Bureau, attention FBI Annex by cover letter, deciphering pads numbers _____, _____, and _____; and enciphering pads numbers _____, _____, and _____.

Additional pads to be retained or returned to Bureau are listed on attachment to this letter.

SUBJECT: DESTRUCTION OF PROPERTY - GEN'L
BUREAU CODES -
DISPOSITION OF SURPLUS CIPHER PADS

By memorandum 9/17/65 we obtained approval to dispose of a portion of the cipher pads presently held by each field office and each Legal Attache.

Attached is a proposed letter format which we desire to use to effect the disposition of cipher pads surplus to the needs of each individual office or Legal Attache. With approval of the attached plastiplate master and Mechanical Section requisition Communications Section will forward individually addressed letters to the offices and Legal Attaches. The file copy of each letter will be retained in the appropriate field office file at Seat of Government.

RECOMMENDATION:

That the attached plastiplate master and Mechanical Section requisition be approved for printing sufficient copies of proposed letter format to effect the disposition of surplus cipher pads.

DESCRIPTION OF FILE: 65-2540
ESPIONAGE-INDIVIDUALS OFFERING SERVICES

The above listed file has been called to our attention by personnel of the Consolidation Unit. It consists of 52 sections beginning in 1938. The majority of the mail is dated in 1941 and 1942 and all of the mail in the file is over 20 years old.

The file contains letters from the general public offering their services and suggestions regarding the National Defense program during that period of time. No investigations resulted from these communications and they serve no useful purpose. This material is outdated and there appears to be no reason for its continued retention. It is proposed that the file be reviewed and all obsolete material be destroyed.

Destruction of this mail would result in saving space in the file room and in eliminating unnecessary cards from the General Index. Destruction of this category of mail is authorized under the general records schedule and no further archival authority is required.

It is requested that the appropriate substantive supervisor review the above listed file to determine if any reason exists which would preclude destruction. A notation advising of the decision reached may be placed on this memorandum and returned to the Consolidation Unit of the Records Branch, Room 7231.

RECOMMENDATION:

For referral to the appropriate substantive division.

SUGGESTION

I suggest that the Purge Unit purge all main cards made up on city and state or county and state from the 95 files where main cards have been made on name of subject and victim.

I suggest that as a continuing program of purge of these cards that Form #7-39 and other mail be routed to Consolidation by G. I. and Classifying when subject has been circled on city or county and state if the name of subject and or victim is given.

DESTRUCTION OF BUREAU RECORDS - Gen'l

Current practice or rule (Include manual citation as well as facts)

Classifiers circle city or county and state on unknown subject cases in the 95 classification. The Laboratory sends out Form #7-39 (example attached) to law enforcement agencies requesting the name of subject

Advantages of suggestion and annual savings (include basis for estimate)

cont. page 2

This procedure will eliminate unnecessary main cards from the index. There are approximately 150 main cards made up on Washington, D. C. under the 95 classification.

0 Towson, Maryland
95-125700

Suggestion by [redacted]

b6
b7C

COMMENTS:

Suggestion recommended unfavorably for adoption. A survey has been conducted of 91 files in 95 (Laboratory matters) classification, which reflected only three cards would have been suitable for purge. In view of results of survey which reflects purge of these files would be relatively unproductive, suggestion to set up specific program to purge these files is not recommended. Of course, any files reviewed in 95 classification incidental to our normal purge operations will be purged of any references not deemed necessary for permanent retention.

RECOMMENDATION:

That this suggestion be referred to Training Division for appropriate acknowledgment.

DESCRIPTION OF FILES:
94-4 MAIN FILES

ALL INFORMATION CONTAINED
HEREIN IS UNCLASSIFIED
DATE 8-2-82 BY SP4ELW/cal

The above listed files have been called to our attention by personnel of the Consolidation Unit. The 94-4 classification was discontinued in 1944 at which time the 94 classification was used for this type of material and other general correspondence. The files run from #1 through #7009. The files contain the following types of mail:

> requests to be placed on mailing lists, requests for pamphlets, requests for autograph photograph of the Director, requests for tours and other miscellaneous information.

This material is outdated and there appears to be no reason for its continued retention. It is proposed that the files be reviewed and all files containing the above type of mail where all of the mail in the file is twenty years old be destroyed. Records Branch has approval to destroy mail re mailing lists, requests for pamphlets and information re tours in a number of general type files.

Destruction of this mail would result in saving space in the file room and in eliminating unnecessary cards from the General Index. Destruction of this category of mail is authorized under the general records schedule and no further archival authority is required.

66-3286

It is requested that the appropriate substantive supervisor review the above listed file to determine if any reason exists which would preclude destruction. A notation advising of the decision reached may be placed on this memorandum and returned to the Consolidation Unit of the Records Branch, Room 7231.

Dear Miss [redacted]

I have received your suggestion that certain main cards be purged from the indices when the names of the subject and victim are known and that a continuing program be established along these lines. A survey has been made regarding this matter and the results indicate a specific program is not warranted due to the small amount of cards which would fall in this category.

The interest and thoughtfulness which led you to submit your idea to me are indeed appreciated.

Sincerely yours,

J. Edgar Hoover

SUBJECT: [redacted]
GS-5, File Review Unit
EOD 6-15-53

SUGGESTION # 394-66 Destruction of Bureau Property

Captioned employee who is assigned to the File Review Unit of the Files and Communications Division has suggested through this division's Streamlining Committee that the material in file 105-16424 and subs be destroyed. She pointed out that the mail in this file contains no derogatory information and consists of forms on persons entering the United States for an indefinite period of time. She states this material takes up 62 cabinet drawers of space.

In researching this material, it has been determined that although the mail is no longer going in this file, the current active mail for this file is now being placed in file number 105-1 and subs. The mail consists of United States Immigration and Naturalization forms I-57 and are on diplomatic persons or other individuals in official capacity who are visiting the United States from foreign countries. The subs separate these forms according to the particular country the person is representing. It is felt that since the forms are still being submitted to the Bureau there appears to be no way to deindex these forms at the present time. In view of this, Streamlining Committee feels that this suggestion should not be adopted which opinion is shared by supervisory personnel of this division.

RECOMMENDATION:

For referral to the Training Division.

SUBJECT: WOMEN'S CLUB CONTACTS GENERAL SUGGESTION 42-66 SUBMITTED BY MRS. [redacted] FILES AND COMMUNICATIONS DIVISION

b6
b7C

Destruction Gen

SUGGESTION: That the file on Women's Club contacts 66-8080 with subsections 1 through 53 be consolidated into the main 94 files on Women's Clubs since such mail is now filed in this main 94 file.

ADVANTAGES: Proposed procedure would save some filing space and this information is of no real value since material in this file is over 20 years old.

OBSERVATIONS: The Streamlining Committee, Files and Communications Division recommended the idea be carried further than proposed and that the material contained in this file be reviewed and destroyed if the Crime Records Division had no objection.

Crime Records Division posed no objection to the action recommended by the Files and Communications Division that the mail which is 20 years old in the 66-8080 file with subsections be reviewed for destruction, if of no value.

The Training Division agrees this idea merits adoption as extended by the Files and Communications Division. The material which is over 20 years old in the 66 file in question would be reviewed for destruction and what is of value would then be consolidated into the main 94 file on Women's Clubs.

SUGGESTION

4-22-66 (GEN)

Captioned employee who is assigned to the Service Unit, Files and Communications Division, has suggested through this division's Streamlining Committee that the file on Women's Club contacts 66-8080 with subs 1-53 be consolidated into the main 94 files on Women's Clubs. Mrs. [redacted] advises that the mail is now filed in the main 94 file on the Women's Clubs. Streamlining Committee is of the opinion that the 66 file with its subs has no real valuable information contained therein and feel this suggestion should be carried further to review that material and destroy same if possible. It is noted that all material in this file is over 20 years old. Streamlining Committee recommends that this material be reviewed and destroyed if the Crime Records Division has no objection. Supervisory personnel of this division agree with this recommendation.

RECOMMENDATION:

For referral to the Training Division. Destruction of Bureau Property

SUBJECT: MAIL
SUGGESTION 440-66 SUBMITTED BY
SA [redacted]
CRIME RECORDS DIVISION

Destruction of Bureau Property
Gen
Memorandum to mail be photographed for file in lieu of filing

SUGGESTION: That in the future when correspondence is received from an individual on whom a card is maintained in the mental indices in the Correspondence and Tours Section and this correspondence indicates a change of address, a notation be made on a plain sheet of bond paper, 8 1/2 inches by 11 inches in size, showing the following information: The fact that a letter dated _____ was received; the address differed from the one on the existing mental card; the card was changed and setting out the new address and file number (sample attached). This sheet would then be filed and the letter destroyed.

CURRENT PRACTICE: A small slip similar to that proposed is placed on the incoming mail and it is sent to file.

ADVANTAGES: These incoming letters, which are usually rambling and incoherent, need not be filed. They are usually very long and sometimes reach 25 to 30 pages in length. Proposed procedure would save considerable filing space over a period of years.

OBSERVATIONS: Crime Records Division recommended adoption. It advised this appeared to be an excellent idea for the conservation of filing space and filing time. A basis already exists in file for the mental card and additional mail serves no purpose. All mental mail is read by a Special Agent Supervisor prior to destruction and any needed action is taken.

Files and Communications Division did not oppose this idea; however, it believed the correspondence sent to file in lieu of the letter from the individual should be in the form of a regular memorandum rather than having the necessary information typed on a blank sheet of paper.

Memo Casper to Mohr
re: Mail
Suggestion 440-66

The Training Division agrees with the Files and Communications Division that it would be desirable to have this information set forth on the regular office memorandum form (OF-10) for better appearance and records management. It appears this could be accomplished by having the memorandum directed to the Section Chief from the Unit Chief where it could be initialed directly for file without necessity for going through channels for initialing. By using the memorandum form, a date would also be included showing preparation date and this is desirable. It is felt this type of memorandum could be prepared without need for an abstract and this would facilitate handling this procedure.

RECOMMENDATIONS:

(1) That the suggestion as modified be adopted and the attached letter of appreciation forwarded to the suggester. He has been thanked by prior letter.

(2) On approval, this memorandum will serve as the authority for the Crime Records Division to place the modified procedure into effect.

Destruction of Bureau Property

This makes record of two letters received 1-15-66 and 2-1-66 which show Mrs. [redacted] is currently confined in the Central Islip State Hospital, also using captioned post office box in New York City. Mrs. [redacted] has been a chronic correspondent of the Bureau over a period of time, and these communications contain nothing else of interest to us. Because of the rambling nature and bulk of these communications, they are being destroyed by the Correspondence and Tours Section. Reference card on Mrs. [redacted] has been brought up-to-date.

SUGGESTION 536-66

Destruction of Bureau Records

Captioned employee who is assigned to the General Index Unit suggested through the Files and Communications Division Streamlining Committee that copies and portions of the Congressional Record which are filed as enclosures in the 66-1731 file be destroyed. She notes that this file is made up of cover memoranda which set out brief summaries of information appearing in the Congressional Record which may be of interest to the Bureau. The enclosures are the clipped portions of the Congressional Record which are referred to in the memo. She notes that the sections of this file occupy approximately 8 1/2 cabinet drawers in the Filing Unit. Employee points out that the Congressional Record is public source material.

Streamlining Committee of this division feels that this a noteworthy suggestion and favors adoption of same. Supervisory personnel of this division have no objection to the adoption of this suggestion, but feel that the opinions of the Administrative Division and any substantive divisions should be obtained.

RECOMMENDATION:

For referral to the Training Division.

DESTRUCTION OF BUREAU PROPERTY

GENL

CONGRESSIONAL RECORD
SUGGESTION 536-66 SUBMITTED BY
MISS [redacted] b6 b7C
FILES AND COMMUNICATIONS DIVISION

SUGGESTION: That copies and portions of the Congressional Record which are filed as enclosures in the 66-1731 file be destroyed. This file is made up of cover memoranda which sets forth brief summaries of information which has appeared in the Congressional Record that may be of interest to the Bureau. The enclosures are clipped portions, pages and, in some instances, the entire Congressional Record. The sections of this file occupy approximately 8 1/2 cabinet drawers in the Filing Unit. Suggester pointed out that the Congressional Record is public source material.

OBSERVATIONS: Files and Communications Streamlining Committee felt this was a noteworthy idea and favored adoption. It noted opinions should be obtained from the Administrative Division as well as the substantive divisions regarding this proposal.

The Administrative, General and Special Investigative Divisions opposed adoption. The Administrative Division advised the Congressional Record is reviewed daily and a memorandum is prepared summarizing items of interest to the Bureau. On a selective basis these memoranda, along with clippings supporting items summarized therein, are sent to the Records Branch for indexing and filing. (Based on memorandum of Mr. Travers to Mr. Mohr 2/3/55) (66-1731-1029). Through the selectivity practice, memoranda containing material along with supporting data considered to be of permanent value to the Bureau become readily available in Bureau files. This division recognized the Congressional Record is public source material and it understood that bound volumes of the Record are maintained in the Justice Library. Pages in the bound volumes are not necessarily the same as those appearing in individual daily Congressional Records and accordingly, in order to locate an item, it would be necessary to resort to detailed searching of a general index of the Congressional Record. In the event there was an immediate need for information which had been included in summary form in a memorandum, it would be necessary to contend not only with searching the index of the Congressional Record but also with the problem of accessibility to this material in the Justice Library. The present practice of selective filing of memoranda on the

Memo Casper to Mohr
Re: Congressional Record, Suggestion 536-66 Submitted By
Miss [redacted] Files and Communications Division

Congressional Record and clippings therefrom permits indexing on Bureau terms and affords ready access to this material. General and Special Investigative Divisions had approximately the same views and pointed out the small saving of space would not overcome the advantage of having the enclosure on hand when future research is required. If the enclosures were not attached to the memoranda, valuable time would be required in obtaining the Congressional Records needed from another location.

Domestic Intelligence Division felt the brief summaries which are made of these items would not be sufficient for the Director or other official if a question was raised regarding a particular point in the Congressional Record. This division proposed all these memoranda with enclosures be retained for a period of three years and then destroyed.

Crime Records Division felt we should retain this material for a period of at least two years as it is very valuable as reference material and when information is ne needed therefrom it usually is required in a hurry. This is particularly true while Congress is in session.

The Training Division agrees with the three divisions which felt this material should be retained. Index cards are made on the items appearing in these publications and would serve no purpose whatsoever once they were destroyed. Also, it is possible that, years after the printing of one of these publications, a question could arise as to the intent with regard to proposed legislation as well as Congressional feeling regarding a particular matter and these files would afford readily accessible reference material.

RECOMMENDATION:

That the suggestion not be adopted. On approval, no further action is necessary with regard to the suggester. She has been thanked by prior letter.

Obscene Property - Gen.

(H) MAINTENANCE AND DESTRUCTION OF OBSCENE EVIDENCE - INTERSTATE TRANSPORTATION OF OBSCENE MATTER -- Because of the large volume of obscene evidence being regularly received in the FBI Laboratory and the urgent need for careful handling, the basic rules for maintenance and destruction as set forth in Section 57C, page 3, of the Manual of Instructions are restated.

"Obscene material is submitted to the Laboratory in order that it may be:

a. Reviewed at the Bureau with regard to its character as an obscene exhibit
b. Compared with specimens already in the obscene matter file of the FBI Laboratory, and any latent fingerprints developed thereon searched

66-3286
NOT RECORDED

through the obscene matter dealers section of the single fingerprint file, to determine its source

c. Compared with specimens already in the obscene matter file of the FBI Laboratory for information that may indicate that the questioned obscene material has moved in interstate commerce

d. Included as a permanent part of the obscene matter file or destroyed where no purpose could be served by filing the exhibit."

The manual instructs that in all cases exhibits returned to the submitting division must ultimately be returned to the FBI Laboratory for filing or destruction and that no obscene material is to be permanently maintained in any field office. There are instances, however, involving huge quantities of pornography seized in certain cases where there is considerable expense in shipping the evidence back to the Laboratory for final disposition. In these instances the Bureau's advice should be sought as to whether it should be returned to the FBI Laboratory or whether Bureau permission may be granted to destroy the material in the field division under the personal supervision of the SAC. If little or none of the bulky evidence is needed for the Obscene File and common sense suggests, the Bureau may authorize destruction of the useless portion of the material in the division office under rigid controls, personally supervised by the SAC.

While obscene material which may arouse the curiosity of employees is in the office, it must be maintained in either the gun vault or the SAC's safe. At no time should it be kept in a place which is readily accessible to other employees, such as the stock room or mail room.

While this material is in the office, it must not be shown to other personnel of the office who have no need to observe it. Of course, personnel handling the case may have need to observe it for investigative purposes or for packaging and wrapping purposes. However, there should be no undue curiosity about such filth.

Very truly yours,

John Edgar Hoover

Destruction of Bureau Property

SUBJECT: REHABILITATION PROGRAM
RECORDS BRANCH

DESCRIPTION OF FILE: 62-36434 SUB A
WESTBROOK PEGLER

The above listed file has been called to our attention by personnel of the Consolidation Unit. It consists of 42 sections beginning in 1935. All of these sections contain Pegler's columns clipped mostly from the Washington Post and the New York Journal American. No clippings have been placed in file since 1962. There has been limited correspondence with Mr. Pegler with the last outgoing dated 12/4/64. The majority of these clippings do not contain any indexing.

Destruction of this mail would result in saving space in the file room. This category of mail is authorized under the general records schedule and no further archival authority is requested.

Attention is called to the memorandum from F. W. Waikart to Mr. McGuire dated 2/23/61 (66-1897-710) to the effect that back issues of Pegler's columns are maintained at the Library of Congress. It is requested that the Crime Records Division review the above listed file to determine if any reason exists that would preclude destruction of these clippings. A notation advising of the decision reached may be placed on this memorandum and returned to the Consolidation Unit of the Records Branch, Room 7231.

RECOMMENDATION:

For referral to the Crime Records Section.

EOD 11-2-53

SUGGESTION #1022-66

O DESTRUCTION OF BUREAU PROPERTY - GENERAL

Captioned employee is assigned to the File Review Unit, Records Branch. She has called to the attention of the Streamlining Committee the fact that the enclosure to file 100-273457 consists of two books which are published in a foreign language. These books have not been translated and are not indexed. Miss [redacted] believes that these publications could be destroyed.

A review of Bureau files reflects that suggestion 349-60 deals with the destruction of foreign publications and destruction of this material was authorized if they were: (1) old; (2) in a foreign language; (3) untranslated; (4) not indexed; and (5) never called by Agent Supervisors. The material referred to by Miss [redacted] did not come to light during the processing of suggestion 349-60 or it would have been destroyed at that time. b6 b7C

The material called to our attention by Miss [redacted] will be appropriately disposed of. She has been orally thanked for calling this material to the attention of the Streamlining Committee. Written acknowledgment to Miss [redacted] is not deemed necessary.

RECOMMENDATION:

For referral to the Training Division.

SUBJECT: DISAPPROVED NEGATIVES OF PHOTOGRAPHS MADE IN THE DIRECTOR'S OFFICE

Destruction of Bureau Property

Under our operating procedure the photographer working in the Director's office makes two photographs of each group. Proof prints are made from the resulting negatives and submitted to the Director for his selection. The finished photographs are made using the negative for the proof selected by the Director. The approved negative is retained permanently in the Photographic Unit for record purposes. The disapproved proof print is destroyed. However, as a matter of procedure, over the years we have also retained the negative for the disapproved photograph. These negatives are marked so as to indicate they were not approved for printing and are filed in the Photographic Unit.

Photographer [redacted] has advised that only on one occasion since he began taking pictures in the Director's office in 1952 has a request been made to prepare photographs from disapproved negatives. On this one occasion the request was made on the day after the photographs were made and the photographs were subsequently returned to him for destruction. Retention of these disapproved negatives for an extended period of time does not appear to serve any useful purpose and destruction would relieve a storage problem. This would in no way affect the retention of negatives of approved photographs. They would continue to be retained indefinitely in the Photographic Unit.

b6
b7C

66-32846-

NOT RECORDED
151 APR 14 1966

RECOMMENDATIONS:

1. That disapproved negatives over 90 days old be destroyed at this time.

DONE - 4-8-66 CQS

2. That at the beginning of each month any disapproved negatives in file over 90 days old be destroyed. This will amount to purging the file of disapproved negatives on a monthly basis, retaining only those made within the last 90 days.

By letter dated April 29, 1966, received May 9, 1966, ARNOLD RAUEN, Chairman of the Federal Executive Board, Chicago, Illinois, advised that this board was starting a major offensive in the President's "War on Waste" through the establishment of "Operation Purge". This operation consists principally in a vigorous attack on unneeded records and reference papers now held in office space and equipment.

Included in the announcement was the fact that representatives from the larger agencies would be coached in planning and pursuing the attack until near the end of June, when a final report for each agency and a summary report for the Federal Executive Board would be made.

The letter then requested information concerning the number of letter and legal file cabinets in our office space and asked that a person be designated as liaison along with information as to whether this person had attended a Records Disposition Workship.

UACB, this letter will be answered that the FBI has a long established and continuously operating plan of records disposition which is administered on a national basis and, therefore, no useful purpose would be served in our participation in "Operation Purge".

b6
b7C

The above listed file has been called to our attention by Mrs. [redacted] of the Consolidation Unit. It consists of 25 sections beginning in 1922.

The file contains numerous copies of Inter-office memoranda which are no longer received, letters from the general public, etc. reporting possible Income Tax Evasion on the part of individuals or companies. Copies of such correspondence are sent to the Director Of Internal Revenue and the original placed on record in the file. No investigations result from these communications and there appears no reason to retain it. It is proposed that the file be reviewed and all mail over 10 years old be destroyed. Any material of a historical nature would be retained.

Destruction of this mail would result in saving space in the file room and in eliminating unnecessary cards from the General Index. Destruction of this category of mail is authorized under the general records schedule and no further archival authority is required.

It is requested that the substantive supervisor review the above listed file to determine if any reason exists which would preclude destruction. A notation advising of the decision reached may be placed on this memorandum and returned to the Consolidation Unit of the Records Branch, Room 7231.

RECOMMENDATION:

For referral to the substantive division.

DESCRIPTION OF FILE: 5-0
INCOME TAX GENERAL

Reference is made to the memorandum dated 5/18/66, from L. E. Short to you relative to the proposal to destroy all mail over ten years old contained in the Income Tax General File 5-0.

The General Investigative Division has no substantive supervisor who supervises income tax matters which are within the jurisdiction of the U. S. Treasury Department. If File 5-0 contains no more information than the tax data as mentioned in Mr. Short's memorandum there would be no reason on the part of the General Investigative Division to object to the destruction of the mail ten years old.

DESCRIPTION OF FILE: 62-23441
PEACE OFFICERS' ASSOCIATION

The above file has been called to our attention by personnel of the Consolidation Unit. It consists of five sections beginning in 1930 and no mail has been placed in the file since 1951.

The file contains correspondence between the Bureau and the Field Offices regarding the Peace Officers' Associations located in the various states. Letters requesting the names of the Associations and replies listing them along with the names of the Officers. There are numerous copies where the original was recorded in another file. Some indexing was done.

Destruction of this mail would result in saving space in the file room and eliminating unnecessary cards from the General Index. Since all of this mail is of an administrative nature it is not felt that archival authority is required.

It is requested that the appropriate substantive supervisor review the above listed file to determine if any reason exists which would preclude destruction. A notation advising of the decision reached may be placed on this memorandum and returned to the Consolidation Unit of the Records Branch, Room 7231.

RECOMMENDATION: REC-61 66-3286-1004

For referral to the appropriate substantive division.

SUBJECT: OBSCENE MATERIAL FILE
DESTRUCTION OF BUREAU RECORDS - GEN.

A review has been made of the physical and administrative files (80-662) relating to obscene material.

The physical file of obscene material is subdivided as follows:

1. Obscene and nude art motion picture films - 1364
2. Phonograph records - 321
3. Readers and pamphlets - 3020
4. Obscene books, nudist publications and questioned periodicals - 898
5. Cartoon booklets - 5611
6. Playing cards - 183
7. Miscellaneous cartoons, printed matter and novelties mounted on 373 cards
8. Obscene and strip type photographs mounted on 1593 cards
9. Advertising literature (by companies involved) - 163

Memorandum to Mr. Conrad
Re: Obscene Material File
80-662

The following index files are maintained as a part of the Obscene File:

1. Motion picture film titles, subtitles and categories
2. Book titles
3. Photograph code numbers
4. Phonograph record titles
5. Name of models who have posed for obscene and/or strip type photographs
6. Advertising literature by company or producer names
7. Opinions of the Department of Justice relative to obscenity of evidence

A total of 10,458 specimens were received in the fiscal year of 1965-66 and searched in the Obscene File. Of this number, 5,431 specimens were identified with material previously submitted to the Laboratory, which amounts to 51.9% identifications.

It is noted that the bulk of the material in the Administrative file (80-662) consists of yellow copies of Laboratory reports. These copies are designated for 80-662 to afford a double check on the statistical record of identifications made. Since our monthly statistical report is now automated, it has not been necessary to refer to these yellow copies and accordingly, unless advised to the contrary, the practice of designating copies of Laboratory reports setting forth Obscene File identifications for 80-662 will be discontinued. (This procedural change has been co-ordinated with the ITOM Desk in the General Investigative Division.)

The Obscene File and obscene evidence which is being held for examination or disposition, pending completion

of the investigation by the contributor, are stored in Room 7610. The facilities are adequate at this time.

RECOMMENDATION: 1. The Obscene File be maintained in its present condition.

2. Discontinue adding yellow copies of Laboratory reports to 80-662 file and destroy yellow copies of Laboratory reports which are presently a part of 80-662 file.

Destruction of Bureau Records - General

DESCRIPTION OF FILE: 79-1 Sub A
MISSING PERSONS GENERAL - NEWSPAPER CLIPPINGS

The above file has been called to our attention by personnel of the Consolidation Unit. It consists of 17 sections beginning in 1934. No indexing was done on these clippings until approximately the middle of section 15 in 1944.

The file contains newspaper clippings only. Since indexing was started on these clippings, the name of the Missing Person has been cross-indexed into this file and sometimes there are five or more separate clippings on one person received at different times or on different newspapers and each time the name is indexed. So many of these clippings are on young children and teen-agers and even a person who was found dead. The clippings are from newspapers throughout the country and are mostly on the average individual and not a prominent person.

Destruction of this mail would result in saving in space in the file room and in eliminating unnecessary cards from the General Index. Destruction of this category of mail is authorized under the general records schedule and no further archival authority is required.

It is requested that the appropriate substantive supervisor review the above listed file to determine if any reason exists which would preclude destruction. If there is no reason for retaining this material, then it is further suggested that as current clippings are received they be reviewed and if no reason exists for retaining them, that they no longer be sent to the Records Branch for filing. A notation advising the decision reached may be placed on this memorandum and returned to the Consolidation Unit of the Records Branch, Room 7231.

SUBJECT: LEE HARVEY OSWALD
INTERNAL SECURITY - RUSSIA - CUBA

Property of FBI
Destruction of Bureau Records

During the course of our intensive investigation of Lee Harvey Oswald and the assassination of the late President John F. Kennedy, the Soviet Section maintained one copy of all reports submitted by our field offices in the Oswald investigation and also maintained a photographic copy of all of the items of evidence that were photographed by the FBI Laboratory. These data were maintained as working papers and were extremely useful in handling day to day inquiries by the President's Commission, inquiries by Bureau officials, or leads that have been set out since the assassination based upon receipt of additional information, allegations and the like.

The Soviet Section feels that retention of these extra copies of reports and duplicate copies of photographs of evidence by the Soviet Section is no longer necessary. The originals of the reports in question and copies of all the photographs of the evidence in the case are being maintained permanently by the Records Branch. In the event such data would be necessary for review by the Soviet Section, such review could be arranged by reviewing the original data maintained by the Records Branch.

This matter has been discussed with Assistant Director Ivan W. Conrad of the Laboratory and Supervisor John W. Marshall of the Records Branch.

ACTION:

If you approve, Soviet Section will destroy its duplicate copies of reports and photographic copies of exhibits. This will release two filing cabinets for return to supply.

STREAMLINING PROCEDURES
CHANNELIZING MEMORANDA

1 - Mr. DeLoach
1 - Mr. Sullivan
1 - Mr. Bland
1 - Training Division
1 - Mr. Rushing

Reference is made to your letter dated 5/13/66 captioned "Report Writing - Destruction of Channelizing Memoranda in Security Cases."

In connection with the destruction of channelizing memoranda, the Bureau's principal interest is in the preservation of the original recording of the information contained in such memoranda and the specifics of its location in field office files. Channelizing memoranda received from other field offices may be destroyed when their retention serves no useful purpose provided one copy together with the communication of transmittal is maintained in your office. The cover pages to the report containing the information therefrom should clearly show the field office and field office file number in which the original recording is located. In addition, the cover pages should list the location in your files of the retained copy. Of course, the other restrictions against the destruction of channelizing memoranda such as serial one of a file regardless of its nature, serials containing indexing and serials showing "action" information will still be retained regardless of the origin of the channelizing memoranda.

Appropriate manual changes are being prepared.

NOTE: See memorandum Bland to Sullivan, 5/24/66, same caption, TDR:fhd.

Memorandum

TO : DIRECTOR, FBI

DATE: 5/13/66

FROM: SAC, NEW YORK (66-7568)

SUBJECT: REPORT WRITING - DESTRUCTION OF CHANNELIZING MEMORANDA IN SECURITY CASES
#873-66

DESTRUCTION OF BUREAU PROPERTY — GENERAL

The Bureau's attention is invited to the report of the recent inspection of the New York Office 4/5-29/66, specifically to a trend memorandum prepared by the Inspector captioned "DESTRUCTION OF UNNECESSARY COMMUNICATIONS AND REDUCING BULKINESS OF FILES." On page 4 of that memorandum, which is page 444 of the inspection report, paragraph numbered 5, reference is made to present policy as outlined in the Manual of Rules and Regulations, Part II, Section 3, Page 15b, which prohibits destruction of channelizing memoranda in security cases where the original is not maintained in this office. As the Bureau is aware, we are permitted to destroy copies of channelizing memoranda following submission of investigative reports. The Inspector noted that the NYO receives numerous channelizing memoranda from other offices because New York is origin in cases concerning so many subversive organizations. The Inspector notes two specific examples wherein we received 71 copies of a channelizing memorandum in one case and 33 copies in another case, all of which were channelized to various New York files on individual subjects. In many of these individual files reports were subsequently written, but the channelizing memoranda could not be destroyed because of the present Manual provision prohibiting destruction of channelizing memoranda if the original is not contained elsewhere in this office. The Inspector suggested that New York request Bureau authority to permit destruction of channelizing memoranda received from other offices when their retention serves no useful purpose.

It is the view of the NYO that this suggestion is an excellent one, and it is believed the spirit of the current rule would be preserved if we were permitted, in such

cases as noted by the Inspector, to destroy copies of channelizing memoranda even though the original is not contained in the files of this office, provided we maintain at least one copy of the channelizing memoranda in the NYO, which copy would, of course, show the location of the original to be in the office of origin or submitting office.

It is recommended the Bureau consider this suggestion and, if approved, authorize the field in such cases to destroy all but one copy of channelizing memoranda received from other offices.

1 - Mr. Rushing

SUBJECT: STREAMLINING PROCEDURES
CHANNELIZING MEMORANDA

#893-66
DESTRUCTION OF BUREAU RECORDS - GENERAL

In the interest of conserving file cabinets and file space, the field has been permitted to destroy channelizing memoranda following submission of reports in security cases since February, 1961. Appropriate safeguards were established to insure the retention of the original recording of the information produced by the various sources.

In connection with the recent New York inspection, the Inspector noted that New York was retaining all channelizing memoranda received from other field divisions since the original recording of the information was not contained in the file in the New York Office. The Inspector suggested that Bureau authority be requested to permit destruction of channelizing memoranda received from other offices when their retention serves no useful purpose.

New York suggests that it be permitted to destroy all but one copy of channelizing memoranda received from other offices following reports. Since our principal interest is in the preservation of the original recording, the Domestic Intelligence Division agrees that channelizing memoranda received from other offices can be destroyed in line with New York's observations. Since other offices are also involved, appropriate manual changes are being prepared.

DESCRIPTION OF FILE 54-0
CUSTOMS LAWS AND SMUGGLING

Destruction of Bureau Property

The above listed file has been called to our attention by personnel of the Consolidation Unit. It consists of 11 sections beginning in 1921.

The file contains numerous copies of Inter-office memoranda which are no longer received, letters from the general public reporting possible smuggling on the part of individuals and companies, etc. Copies of such correspondence are referred to the Customs Bureau and the original placed on record in the file. No investigations result from these communications and there appears no reason to retain it. It is proposed that the file be reviewed and all mail over 10 years old be destroyed. Any material of a historical nature would be retained.

Destruction of this mail would result in saving space in the file room and in eliminating unnecessary cards from the General Index. Destruction of this category of mail is authorized under the general records schedule and no further archival authority is required.

It is requested that the substantive supervisor review the above listed file to determine if any reason exists which would preclude destruction. A notation advising of the decision reached may be placed on this memorandum and returned to the Consolidation Unit of the Records Branch, Room 7231.

Dear Miss [redacted]

Thank you for the suggestion concerning a method for handling certain correspondence which pertains to matters that do not fall within the Bureau's jurisdiction. This proposal has been carefully evaluated and it has been decided it should not be adopted since it is desirable to maintain a record of the disposition of such items.

I appreciate the interest which led you to submit your idea to me for consideration.

Sincerely yours,

J. Edgar Hoover

jurisdiction, form letters be set up to handle this procedure. One letter to notify correspondent information does not come within Bureau's jurisdiction and is being forwarded to appropriate agency. The other letter would be used to forward letter to agency. No record would be retained in Bureau files. Field could transmit letterhead memoranda directly to agency involved and to correspondent.

Files and Communications Division advised this mail is addressed to the FBI or Mr. Hoover and, although matters not within our jurisdiction, it is believed essential Bureau maintain a record in files for a reasonable period reflecting disposition of matters referred to in correspondence Direct dissemination by field offices of this type of correspondence without communicating with SOG is not feasible. Training Division discussed this idea with Inspection Division and both agree with views expressed by Files and Communications Division; therefore, it is recommended idea not be adopted.

Employee Suggestion
FD-252 (Rev. 9-11-59)

[redacted] b6 b7C #70-67 [redacted]

Date: 7-28-66

To:	From: (Suggester's name)	Division of Assignment
Director, FBI	[redacted]	Files & Communications

SUGGESTION Bureau approval has been received to destroy mail in the following files:

5-0 Income Tax General - Mail over ten years old (66-3286-1005). File contains 1837 serials of which 1611 are over the time.

12-0 Narcotics General - Mail over twenty years old (12-0-6715). Contains 6783 serials of which approximately 4000 have been destroyed.

54-0 Customs Laws & Smuggling - Mail over ten years old (54-0-627*). Contains 628 serials of which 491 are over the time.

All of the above files contain correspondence from private individuals either

(Continued on attached page)

Current practice or rule (Include manual citation as well as facts)

0 DESTRUCTION OF BUREAU RECORDS - GENERAL

Advantages of suggestion and annual savings (Include basis for estimate) In view of the President's stress on economy in Government, if the above suggestion were adopted there would be a saving in the cost of making copies, index cards and abstracts. It would save time spent by all employees who are involved in typing the outgoing letters and all employees in the Records Branch who process mail. This would involve at least one employee in each of the Processing Units of the Records Branch. There would be a saving in space both in the General Index and in the Filing Unit. I realize that this is a drastic change in Bureau procedures, but if we are to eventually destroy the correspondence after a certain period of time as set out above and the mail involved is really of no interest or concern to the Bureau, it seems unnecessary to retain it as it is received.

SUGGESTION: Con't

calling the Bureau's attention to these matters or complaining about them. In more recent mail, the files contain letterhead memoranda from the field by cover letter.

Since the above type of material is not within the Bureau's jurisdiction, it is suggested that instead of having copies prepared to be forwarded to the agencies handling such matters and placing the originals in Bureau files, that form letters be set up, one to notify the correspondent that information does not come within the Bureau's jurisdiction and is being forwarded to the appropriate agency and the other used to forward letter to the agency; and that no record be retained in Bureau files. If adopted, the same suggestion could be applied to the present policy used in the field where they forward by cover letter letterhead memoranda on this same type of material and the Bureau in turn transmits the letterhead memoranda to the appropriate agency and places the cover letter and the copies of the letterhead memoranda in file. The field could transmit letterhead memoranda direct to the agency and to the correspondent. If the contents of the correspondence involved any other information that would be of interest to the Bureau, then it should be retained in Bureau files.

Over

Employee Suggestion, FD-252
Submitted by [redacted]
Files and Communications Division

COMMENTS:

Personnel of the Files and Communications Division recommend that suggestion not be adopted. Authority has been obtained to destroy certain types of correspondence after specified periods of time. In view of this authority, Miss [redacted] is suggesting that the Bureau dispose of the correspondence immediately without making a record in Bureau files. A review of the correspondence in question reflects that it is addressed specifically to the FBI or to Mr. Hoover and, although the matters mentioned in the correspondence are not within the Bureau's jurisdiction, it is believed essential that the Bureau maintain a record in Bureau files for a reasonable period reflecting the disposition of the matters referred to in the correspondence. Miss [redacted] is also proposing direct dissemination by the field divisions of certain types of correspondence without communicating with the Seat of Government. This aspect of her suggestion is not believed feasible.

SUGGESTION

Form FD 210, INS Form NE 281, State Dept. FForms FS-257 and INS reports of admissions and departures of aliens and nationals of Soviet bloc countries be destroyed along with related index cards as the material becomes one year old. Forms relate to unofficial visitors to the U.S. and governed by Manual of Instructions, Section 105E, Item 3. Forms maintained in control file where no investigation conducted.

Current practice or rule (Include manual citation as well as facts) Permanent maintenance. May be considered for destruction under twenty year rule.

Advantages of suggestion and annual savings (include basis for estimate)

Annual savings - none.
Advantageous to augment Bureau's record management program save space. Five drawers of records could be destroyed in this office alone. Reference to these records is extremely infrequent.

Division of Assignment: philadelphia

SUGGESTION

I suggest consideration be given to include Deserter Files, (42 Classification) to list of files that may be destroyed less than after being closed 20 years. Seldom is reference necessary to a "42" file closed over 5 years or even less. Chronic deserters keep deserting every few months, further, draftees serve only for two years and leads to locate career men who desert could be obtained from Army records regardless of number of times they desert. Very few files are voluminous, but volume of files is great.

30
EXP. PROC.
39 AUG 29 1966

Current practice or rule (Include manual citation as well as facts)

"42" Classification Files are presently included with those to be retained for 20 years. MRR, Part II, Section 3, 8a.

Advantages of suggestion and annual savings (include basis for estimate)

Saving of file cabinet space which in turn saves floor space. In Philadelphia Division, ten five-drawer file cabinets would be gained. Equivalent savings in file space would be gained in other divisions in large cities such as Philadelphia. Each cabinet saved would be a $52.00 saving (approximately 50% less in those offices having shelf filing.) Conservatively it is estimated two or three thousand dollars in equipment or space would be gained.

None.

DESCRIPTION OF FILE: 62-26725
STATE-WIDE LAW ENFORCEMENT AGENCIES

The above listed file has been called to our attention by personnel of the Consolidation Unit. It consists of three sections beginning in 1932 and no mail has been placed in the file since 1939.

The file consists mostly of two letters to all SACs (serials 13 and 74 dated 1/7/36 and 3/11/38 respectively) requesting the Field obtain from appropriate authorities certain information regarding state-wide law enforcement organizations in the various areas and the replies from the Field containing this information. Some indexing was done.

Reference is made to a memorandum from Mr. L. B. Nichols to Mr. Tolson, dated 4/18/38 (serial 147) setting out a summary outline of the State-wide law enforcement organizations operating in the United States plus a brief summary of the National organizations in the territories and possessions of the United States. This summary seems to be a summation compiled from the information furnished by the Field and was, I believe, published in the FBI Law Enforcement Bulletin dated 7/1/38. It is proposed that the file be reviewed and that the SAC letters and replies from the Field be destroyed since serial 147 covers all of the information submitted by the Field. All material of an administrative or historical nature would be retained, as well as the summary. The present policy is to maintain individual files on Law Enforcement Agencies.

Destruction of this mail would result in saving space in the file room and in eliminating unnecessary cards from the General Index. Destruction of this category of mail is authorized under the general records schedule and no further archival authority is required.

DESTRUCTION OF BUREAU RECORDS - GEN'L

SUBJECT: MOVEMENT OF NATIONALS
SUGGESTION 118-67 SUBMITTED BY MR. [redacted] ALBANY OFFICE

SUGGESTION: That Form FD-210, INS Form NE 281, State Department Form FS-257 and INS reports of admissions and departures of aliens and nationals of Soviet-bloc countries be destroyed along with related index cards as the material becomes one year old. Forms relate to unofficial visitors to the United States and are governed by the Manual of Instructions, Section 105E, Item 3. Forms maintained in a control file when no investigation is conducted.

CURRENT PRACTICE: Suggester states these items are maintained on a permanent basis and may be considered for destruction under the twenty-year rule.

ADVANTAGES: Mr. [redacted] feels this procedure would aid the Bureau's Record Management Program by saving space. In the Albany Office, five drawers of records could be destroyed. Reference is made to these records very infrequently so no disadvantage should be encountered by use of this procedure.

OBSERVATIONS: SAC, Albany, believed the suggestion has merit and recommended it be adopted.

The Domestic Intelligence Division advised the value of the aforementioned forms cannot be determined at the Bureau. Such forms are not retained in Bureau files. The value of these items to the field depends upon what has been derived from their retention up to this time. If these forms in the past have been the source of data pertinent to Bureau investigations, serious consideration should be given to their retention; however, if this information has not contributed to our investigative efforts and is simply occupying much needed file space, it should be destroyed in accordance with suggested procedure. This division recommended inquiry be made of a representative number of field offices handling a volume of security work as to whether they concur with instant idea.

Due to these views, the Training Division feels this matter should be referred to a representative number of offices for their observations.

RECOMMENDATIONS:

(1) That the attached letter be approved and sent to appropriate offices for their views and recommendations.

(2) That further action with regard to the suggester be held in abeyance pending the results of this survey.

VIEWS OF THE DOMESTIC INTELLIGENCE DIVISION RE: SUGGESTION 118-67

ADDENDUM DOMESTIC INTELLIGENCE DIVISION 9/7/66 VER:er

Suggestion recommends Form FD-210, INS Form NE-281, State Department Form FD-257 and INS reports of admissions and departures of nationals of Soviet-bloc countries be destroyed when material becomes one year old. Related index cards would also be included in this destruction.

The value of the aforementioned forms cannot be determined at the Bureau. Such forms are not retained in Bureau files. The value of such forms to the field depends upon what has been derived from their retention to date. If these forms in the past have been the source of data pertinent to Bureau investigations, serious consideration should, of course, be given to their retention. However, if this information has not contributed to our investigative efforts and is simply occupying much needed file space, it should be destroyed in accordance with instant suggestion.

Domestic Intelligence Division recommends inquiry be made of a representative number of field offices handling a volume of security work as to whether they concur with instant suggestion.

SUBJECT: BUREAU CODES

Property Management Unit, Administrative Division, is holding in safe storage 194 copies of Bureau Code C Books, 5 large Universal Trade Code Books and 11 small Universal Trade Code Books, which now appear to constitute some unnecessary excess. These code books were accumulated when Code C and Universal Trade Code were part of Bureau's primary coding systems. They now serve strictly as back-up to KFSAM 7 cipher machine in event of latter's breakdown and with implementation of new on-line KW 7 cipher machine, requirements for above-mentioned code books are further reduced. It would therefore seem appropriate to dispose of excess items and retain only a sufficient number for future stocking of new offices and replacements for badly worn copies. (S) U

SUBJECT: BULKY EXHIBIT DESTRUCTION PROGRAM FORM

DESTRUCTION OF BUREAU PROPERTY

The Records Branch conducted a review of bulky exhibits during the period 1958-1960 for the purpose of determining which bulky exhibits were no longer of value and could be destroyed. Form 4-341 was used for that purpose but was deleted from the form book in 1962 inasmuch as it would not be used again until the next Bulky Exhibit Destruction Program. We are reinstituting the Bulky Exhibit Destruction Program again and an initial supply of 1,000 copies of the attached proposed form (formerly 4-341) will be needed.

RECOMMENDATIONS:

(1) That the attached proposed form be approved and assigned form number 4-341.

Destruction of Bureau Records - General

SUBJECT: HANDLING OF MAIL IN FIELD DIVISIONS
SUGGESTION 222-67 SUBMITTED BY
SA [redacted], WASHINGTON FIELD OFFICE

b6
b7C

Mr. [redacted] proposed that auxiliary offices be permitted to destroy annually all referred upon completion (RUC) nonsecurity files over ten years old except those of Identification Order (IO) subjects. Any others desired to be retained for good and sufficient reason should have memorandum setting forth appropriate facts placed as top serial in the file subject to review by Inspectors. The age of the case would be determined by the date of the top serial in file. Prior to destruction, a new index card would be prepared containing the office of origin (OO), file number of Bureau, OO and the auxiliary office, name, race, date and place of birth, and FBI number, if available, of the subject. It should also contain the date of the most recent serial and the date of destruction.

SAC Purvis, Washington Field Office, recommended serious consideration and solicitation of opinions from other offices. The matter was considered by the General Investigative, Special Investigative, Files and Communications, Administrative and Inspection Divisions. All except General Investigative Division favored a canvass of a representative number of field offices. Special Investigative Division would exempt criminal files containing results of intelligence investigations and would cause original FD-302s and signed statements to be forwarded to OO by auxiliary offices prior to destruction. General Investigative Division opposed the idea because it would have too many exceptions and would require maintenance of index cards not now necessary. It could also cause delay when auxiliary offices were asked for information and had to contact OO for the data.

Memorandum J. J. Casper to Mr. Mohr
Re: Handling of Mail in Field Divisions
Suggestion 222-67 Submitted by
SA [redacted] Washington Field Office

b6
b7C

In view of fact that four of five divisions felt idea had merit and a field survey should be done, Training Division proposes that the opinions of a representative number of field offices should be obtained prior to any final decision on the suggestion.

RECOMMENDATIONS:

(1) That the attached letter to a dozen field offices, three from each case-load grouping, asking for their opinions, be approved.

(2) On approval, final decision on suggestion will be withheld until views of field are received and analyzed.

Assistant Director in Charge, New York October 19, 1966

Director, FBI

HANDLING OF MAIL IN FIELD DIVISIONS
SUGGESTION 222-67
BUDED 11/4/66

DESTRUCTION OF BUREAU RECORDS — GENERAL

DESTRUCTION BY

Attached for each office is a copy of a suggestion now under consideration at the Bureau. In brief, the proposed procedure would have auxiliary offices destroy annually all nonsecurity cases, except Identification Order subjects, which have been referred upon completion more than ten years, the age to be determined by the date of the most recent serial in file. Prior to destruction an index card containing appropriate data would be prepared.

In addition to the items noted by the suggester, criminal files containing results of intelligence investigations should also be excluded from such destruction. Any original FD-302s or signed statements would, of course have to be forwarded to the office of origin.

All offices to which copies of this letter are directed are requested to submit their views as to the feasibility of the suggestion amended to include the additional restrictions set forth above. In evaluating the merits of the proposal you should consider:

MAIL ROOM TELETYPE UNIT

Letter to Assistant Director in Charge, New York
Re: Handling of Mail in Field Divisions
Suggestion 222-67
Buded 11/4/66

(1) How often it is now necessary to refer to RUC nonsecurity files except criminal intelligence-type files. (Of the 10-year old cases.)

(2) How the suggested procedure would affect applicant-type investigations in which the Bureau is origin with respect to delays it might cause and extra correspondence between offices it might necessitate.

(3) What savings in space and equipment might be anticipated from the proposed procedure.

In addition to the foregoing specific items you should, of course, submit any other advantages or disadvantages you might foresee.

Submit your replies to reach the Bureau, Attention: Training Division, by close of business November 4, 1966.

SUGGESTION

It is suggested that auxiliary offices annually destroy all non-security files more than 10 years old, to be determined by date of top serial in the file; files at Seat of Government and Office of Origin to be retained. Prior to destruction, a new index card would be prepared on each file, reflecting Office of Origin; file numbers of Bureau, Office of Origin and auxiliary office; name; race; date and place of birth; and FBI Number, if available, of principal subject; date of most recent serial and date of file destruction. Identification order subjects should be excluded and no others unless good and sufficient reason exists to retain, in which case a memorandum setting forth appropriate facts should be placed as top serial in the file, subject to review by inspections concerning such matters as important unsolved

Current practice or rule (Include manual citation as well as facts)

Destroy only after 20 years. This is a United States Government regulation.

Advantages of suggestion and annual savings (include basis for estimate)

Current figures are not available, but several yeers ago a survey was made which showed an average field office acted as auxiliary office in 68.5% of its total cases, which would make possible considerable potential savings in cost of file cabinets and leased space. Destruction of files 10 years old would dispose of literally thousands of files in the first year in large offices such as New York. On a field-wide basis, there would be an annual savings of many thousands of dollars, which cannot be estimated without figures from the various offices concerning files to be destroyed. While this would result in additional project work, it

Disadvantages of suggestion

Extra Cost - The work necessary to place the program into effect would entail extra employee time; however, the destruction work would only be a disadvantage for the period of time it took to destroy these files until the project could be handled on a current basis, which is already

ALL INFORMATION CONTAINED
HEREIN IS UNCLASSIFIED

66-3286-1010

ENCLOSURE

Suggestion (Cont.)

kidnapings, bank robbery matters, anti-racketeering with criminal intelligence data and intelligence information of the GIIF type.

In applicant cases it might be said that this could be unsuccessful because of short deadlines; however, the shortest deadline cases in the applicant field are set by the Bureau, which at all times would have copies of all pertinent investigations and, for this reason, if the suggestion is adopted, there should be no resulting delays in investigations.

In considering other type criminal cases, there should be no extra correspondence between auxiliary offices and the Bureau since auxiliary offices, if necessary, should correspond with the Office of Origin, which would be known to them from the index card, as suggested. Photographs and identification records, for example, more than 10 years old, are of no use to the investigator since the latest photograph and identification are necessary for maximum results, and this must come from local police departments or FBI Identification Division.

It is also pointed out that since auxiliary offices are required to furnish all pertinent information to Office of Origin, there cannot be any loss of pertinent information by the destruction of auxiliary office files.

Advantages (Cont.)

would more than pay for itself in savings in space and cost of equipment.

Disadvantages (Cont.)

being done in connection with the 20-year destruction of files by all field offices.

SUBJECT: SUGGESTION NUMBER 222-67
Submitted by SA [redacted]
Washington Field Office — DESTRUCTION OF BUREAU RECORDS — GENERAL

DESTRUCTION OF AUXILIARY OFFICE NON-SECURITY FILES

DESTRUCTION OF Training Division has requested our observations concerning attached suggestion submitted by SA [redacted] Washington Field Office, who suggests that auxiliary offices be authorized to destroy all non-security files more than ten years old on an annual basis. He advised destruction of such files throughout field would result in considerable savings in file cabinets and space.

b6
b7C

BY AUXILIARY OFFICES

Suggestions to destroy criminal files and various other types of field office files including auxiliary office files prior to present twenty year retention period have been considered on numerous occasions in past. During a Records Management Program conducted in 1959, a number of suggestions were considered along this line. A survey of ten representative field offices was conducted to determine if a lowering of retention period was feasible. Based on results of this survey and recommendations of Investigative Division and Domestic Intelligence Division, no change was made in twenty-year retention period for field office files (66-18966-543).

During most recent Records Management Program conducted in 1964 and since that time, several additional suggestions have been received and considered concerning reduction of twenty-year retention period including suggestion submitted by Chief Clerk, Little Rock Office, similar to current suggestion. These suggestions were not adopted (66-3286-985, 66-18966-657, 695, 714, and 722). As we have pointed out in past, we feel suggestion has merit from a records management standpoint in view of tangible savings which would result

memo Casper - Trotter 11/16/66 ML-memo

throughout field. Accordingly we propose that matter be re-evaluated at present time, and that survey be conducted of representative number of field offices and interested divisions at Seat of Government to determine current observations prior to further consideration of suggestion for adoption.

RECOMMENDATION:

That this memorandum be referred to Training Division for appropriate action.

ST
10/4

ADDENDUM OF THE INSPECTION DIVISION RGJ:wmj 10/3/66

The suggestion appears to have merit. However, prior to adoption feel that views of representative number of field divisions of each class be secured.

The success of this project which would be a space saver is of course contingent upon available manpower to handle it.

10- Read

ADDENDUM GENERAL INVESTIGATIVE DIVISION RJG:cmh 10/4/66

The suggestion provides for the destruction by auxiliary offices of all nonsecurity files more than ten years old. Prior to destruction, a new index card would be prepared on each file reflecting the office of origin, the Bureau and office of origin file numbers, name and residence of the subject, date and place of birth, FBI number of principal subject, date of destruction of the file. The suggestor presents several exclusions wherein the file would be retained.

The General Investigative Division recommends against the adoption of this suggestion and recommends that the present rule, which provides for destruction after twenty years, be retained.

There are numerous instances wherein it is necessary to secure information for dissemination purposes to answer allegations against Agents, and to answer inquiries. Under the proposed suggestion it would be, on many occasions, necessary to contact the auxiliary office which, in turn, would have to contact the office of origin for the desired information. In addition, this suggestion has exclusions to be determined by the auxiliary office. It is felt that if the rule were to be changed, it should be changed in a manner that would cover all violations and all situations. The proposed suggestion would have too many exceptions, and would require the maintenance of index cards which are not necessary under the present system.

In view of the above, it is recommended that this suggestion not be adopted.

-2a-

4

memo Cooper-Mohr 11/16/66 MLimone

ADDENDUM SPECIAL INVESTIGATIVE DIVISION ARW:djg 10/6/66

This suggestion has considerable merit and is worthy of favorable consideration to reduce the file space in the field offices. Criminal files containing results of intelligence investigations, as well as security files, should be excluded from this procedure. It would also be necessary to consider retention of original FD 302's which may be found in any files scheduled for destruction. Such FD 302's could be forwarded to the office of origin for storage.

SUBJECT: DESTRUCTION OF BUREAU PROPERTY
SUGGESTION 117-67 SUBMITTED BY
MR. [redacted] PHILADELPHIA

Destruction of Bureau Property

ALL INFORMATION CONTAINED HEREIN IS UNCLASSIFIED DATE 8-3-82 BY SP4 CLW/cdl

SYNOPSIS

Mr. [redacted] suggested that Deserter cases (42 classifications) be destroyed in the field earlier than the present 20-year period, preferably after five years. He advised this would save at least ten five-drawer cabinets in the Philadelphia Office with commensurate savings throughout the field of about $3,000. He noted space saved in open-shelf filing would be about 50% less than where cabinet filing was used. SAC, Philadelphia, favored adoption since reference to Deserter files over five years old is not frequent enough to warrant their retention and loss of storage space.

Special Investigative Division favored destruction of these files after five years unless the office was origin in the case or the deserter was also involved in some other criminal activity of interest to the Bureau or which would have to be disseminated to some other interested agency.

Files and Communications Division, Inspection Division, and the Baltimor and Washington Field Offices felt the suggestion as modified had merit. SAC, New Haven and ASAC, Tampa also saw nothing objectionable in the proposed procedure. Training Division ascertained the idea would affect at least 140,000 files and estimated savings of a minimum of $3564 since 41 offices use open-shelf filing and 16 use cabinet filing. On this basis, suggester could be granted an incentive award of $180.

RECORDED COPY FILED IN 66-1934-42

RECOMMENDATIONS:

(1) That the suggestion be adopted as modified by the Special Investigative Division and the suggester be granted an incentive award of $180.

Casper to Mohr memo continued: b6
Re: DESTRUCTION OF BUREAU PROPERTY b7C
SUGGESTION 117-67 SUBMITTED BY
MR. [redacted] PHILADELPHIA

DETAILS

SUGGESTION: That Deserter cases (42 classification) be destroyed in the field earlier than the present 20-year retention period, preferably after five years. The suggester stated that reference is seldom made to one of these files which had been closed for five years or even less. Recurrent offenders keep deserting every few months and draftees serve only two years. Leads to locate career men who desert could be obtained from the service records of the particular branch of the service regardless of the number of times they desert. Very few of these files are voluminous but the number of files is great.

PRESENT PRACTICE: Manual of Rules and Regulations, Part II, Section 3, 8a provides that these cases may be considered for destruction after 20 years.

ADVANTAGES: The suggester advised that there would be a saving of file-cabinet space which in turn would save floor space. The Philadelphia Office has ten five-drawer cabinets of these files. Savings would be approximately 50% less in those offices having open-shelf filing. He estimated that, conservatively, about $3,000 in equipment and/or space would be saved throughout the field by the proposed action.

OBSERVATIONS: SAC, Jamieson, Philadelphia, recommended the idea be adopted. He stated reference to Deserter files of five years old in the field is not frequent enough to warrant their retention and occupation of storage space involved.

Files and Communications Division favored adoption of this suggestion.

Special Investigative Division pointed out this idea applies only to Deserter files in the field and not at the Seat of Government. While it is true that, most often, a subsequent desertion by an individual would occur within the five-year period that the field file would be available under the suggested procedure, there would be exceptions where the file would have been destroyed. In these latter instances, information would have to be extracted from the files at the Seat of Government and forwarded to the field. The destruction of these field files would remove information from the office files when the deserter may subsequently be involved in some other criminal case. In spite of these drawbacks, the idea has merit in the area of records management to provide additional space; therefore, the division approved of the suggestion with these two

b6
b7C

exceptions: (1) office is not office of origin. (2) That the file does not pertain to a deserter who has been involved in some other criminal activity or activity where the Bureau would be obligated to disseminate information to another agency.

Training Division discussed the matter with the Inspection Division which saw no objection to the suggestion particularly in view of the safeguards insisted upon by Special Investigative Division.

Training Division believes the procedure proposed by Special Investigative Division is a practical modification of the suggestion. The matter was also discussed with the SAC, New Haven and the ASAC, Tampa who were attending In-Service and both advised they saw no objection to the proposed procedure.

In order to get some idea of the volume of cases involved if the two exceptions noted by the Special Investigative Division were applied, Training Division contacted the Baltimore and Washington Field Offices (WFO). WFO advised that, as of the latest tabulation, they had 349 pending Deserter cases, the greater majority of which were cases in which they were an auxiliary office. Baltimore advised that it had 145 such cases and was origin in but 56 of them, none of which involved any other Bureau violation. Neither of these offices could see anything objectionable in the suggestion. It was ascertained from Special Investigative Division that its total of Desertion cases received during August, 1966, was 2442 and the indication was that September would be about the same. For the period from April to August, 1966, 9186 cases were received for an average of 1837 per month. Using this as a base, our files in this classification are currently growing at the rate of over 22,000 a year, doubtless due to the Vietnam situation. It has been determined, however, that from 1946 to the present there have been 187,052 cases received in this classification for an average of about 9350 which will be eligible each year for at least consideration for destruction under the 20-year rule. Under the proposed five-year destruction year, three-quarters of that number, or 140,000 cases could be considered for destruction immediately with an average of 9000 additional cases eligible each succeeding year. Since, more often than not, these cases involve auxiliary offices, the potential number of files that could be considered for destruction could be much greater than 140,000 even with the two exceptions recommended by Special Investigative Division. To be conservative, it is believed that the base figure of 140,000 should be used to estimate savings.

Casper to Mohr memo continued:
Re: DESTRUCTION OF BUREAU PROPERTY
SUGGESTION 117-67 SUBMITTED BY
MR. [redacted] PHILADELPHIA

b6
b7C

At the request of the Training Division, the Filing Unit of Files and Communications Division conducted a random sampling of five separate drawers of 42 in classification cases and found each drawer averaged 180 files. On this basis 140,000 files would take up 777 drawers or a minimum of 155 five-drawer cabinets. These cost $65.50 each for a total saving of $10,152.50; however, 41 offices use open-shelf filing which consists of seven-shelf units of 36 3/4-inch wide shelves at $54 each. If each 22-inch file drawer holds 180 files, a 36 3/4-inch shelf holds about 300 files; therefore, the minimum saving for open-shelf filing would be 466 shelves or 66 seven-shelf units at $54 each for a total of $3,564. The true figure on savings would probably fall somewhere between the $10,152.50 and $3,564 totals; however, this would be conjecture at best so it is proposed the lower figure be arbitrarily assumed and the suggester be granted an incentive award of $180 which is in line with the suggested scale for such awards.

VIEWS OF THE SPECIAL INVESTIGATIVE DIVISION RE: SUGGESTION 117-67

ADDENDUM SPECIAL INVESTIGATIVE DIVISION 9/12/66 WJG:lab

Philadelphia Office has suggested that field deserter files, when closed over five years, should be destroyed. The advantages are the saving of file cabinet space and floor space. Philadelphia points out that it has ten five-drawer file cabinets which could be eliminated. Each cabinet would represent a $50 saving in the Philadelphia Office and other large cities such as Philadelphia. They estimate a savings of $2,000 to $3,000 field wide in equipment and space.

This suggestion applies only to deserter files in the field and would not effect the files at the Seat of Government. While it is true that in most instances, a subsequent desertion by an individual would fall within the five-year period that the field file would be available, there would be exceptions where the file would have been destroyed. In the latter instances this would necessitate this information being extracted from the files at the Bureau and forwarded to the field. The destruction of these field files would remove information from the office file where the deserter might subsequently be involved in some other criminal case.

In spite of these drawbacks, the suggestion has merit in the area of records management which would allow considerable savings in space. Due to this overriding factor, the Special Investigative Division agrees with the suggestion under the following conditions:

(1) Office is not office of origin.

(2) That the file does not pertain to a deserter who has been involved in some other criminal activity or activity where the Bureau would be obligated to disseminate information to another agency.

I agree 9/27/66

b7C

Date
September 27, 1966

To:	From: (Suggester's name)	Division of Assignment
Director, FBI	[redacted]	WFO

SUGGESTION

It is suggested that auxiliary offices annually destroy all non-security files more than 10 years old, to be determined by date of top serial in the file; files at Seat of Government and Office of Origin to be retained. Prior to destruction, a new index card would be prepared on each file, reflecting Office of Origin; file numbers of Bureau, Office of Origin and auxiliary office; name; race; date and place of birth; and FBI Number, if available, of principal subject; date of most recent serial and date of file destruction. Identification order subjects should be excluded and no others unless good and sufficient reason exists to retain, in which case a memorandum setting forth appropriate facts should be placed as top serial in the file, subject to review by inspections concerning such matters as important unsolved

Current practice or rule (Include manual citation as well as facts)

Destroy only after 20 years. This is a United States Government regulation.

Advantages of suggestion and annual savings (include basis for estimate)

Current figures are not available, but several years ago a survey was made which showed an average field office acted as auxiliary office in 68.5% of its total cases, which would make possible considerable potential savings in cost of file cabinets and leased space. Destruction of files 10 years old would dispose of literally thousands of files in the first year in large offices such as New York. On a field-wide basis, there would be an annual savings of many thousands of dollars, which cannot be estimated without figures from the various offices concerning files to be destroyed. While this would result in additional project work, it

Disadvantages of suggestion

Extra Cost - The work necessary to place the program into effect would entail extra employee time; however, the destruction work would only be a disadvantage for the period of time it took to destroy these files until the project could be handled on a current basis, which is already

(The use by the United States of my suggestion shall not form the basis of a further claim of any nature by me, my heirs, or assigns upon the United States. I understand that I will be considered for any justified award only if my suggestion is adopted within two years after submission.)

[X] Mr. [ ] Mrs. [ ] Miss [redacted]
Signature and Title of Suggester

Recommendations and comments of Division Head

I think such a procedure should receive serious consideration and suggest that views of several other offices would be in order.

DESCRIPTION OF FILE: 62-65855
RATIONING OF TIRES

The above listed file has been called to our attention by personnel of the Consolidation Unit. It consists of seven sections beginning in 1942 and no mail has been placed in the file since 1945. There is also a small Sub A section to the file.

The file was opened with an SAC letter advising the Field that the Compliance Section, Priorities Division, Office of Production Management in Washington, D. C. desired to be advised concerning alleged violations of the order barring the sale of tires. The file consists mostly of correspondence to and from the field and to and from private individuals regarding alleged violations of such sales and letters to the Office of Price Administrations referring complaints to them. Some de-indexing has been done in the file. This material seems to be of no value to the Bureau today since tire rationing is no longer in existence. It is recommended that this material be de-indexed and destroyed with the exception of investigations and inquiries conducted by the Bureau.

Destruction of this mail would result in saving space in the file room and in eliminating unnecessary cards from the General Index. Destruction of this category of mail is authorized under the general records schedule and no further archival authority is required.

It is requested that the substantive supervisor review the above listed file to determine if any reason exists which would preclude destruction. A notation advising of the decision reached may be placed on this memorandum and returned to the Consolidation Unit of the Records Branch, Room 7231.

RECOMMENDATION:

For referral to the substantive division.

ADDENDUM: OLD:DC 10/21/66

General Investigative Division concurs with the recommendation of the Records Division that the material in 62-65855 be de-indexed and destroyed with the exception of investigations and inquiries conducted by the Bureau in captioned classification.

October 28, 1966

PROPOSED CHANGE IN THE MANUAL OF INSTRUCTIONS

1 - Mr. E. W. Smith
1 - Mr. W. A. Branigan
1 - Mr. F. A. Tansey

Volume 4, Section 105 (Internal Security - Nationalistic Tendency), [illegible] 3 concerning "Visiting tourists and other nonofficial aliens" should be amended on page 4f under subparagraph (d) to add paragraph before subparagraph (e). It should be amended to add the portion underscored:

(d) Form FD-210, notice of arrival into or departure from the United States of a communist-bloc national.....
.....
.....

Forms FD-210 and INS Forms 221 which are used to prepare FD-210's reporting arrivals and departures of nonofficial communist-bloc visitors handled under [illegible] may be destroyed after [illegible] cards which one year old in accordance with following instructions:

In instances where no investigation is involved and the FD-210's or Forms 221 are maintained in control files, all offices except New York and Washington may destroy those cards and related index cards after two years. This applies even in the offices in the offices covering points of entry as an auxiliary office since New York and Washington maintain copies of the FD-210's. New York and Washington should not retain INS Forms 221. Where volume of receipt of Form 221 in any offices is such that practice is to destroy [illegible] time of receipt and not on FD-210, [illegible] procedure is permissible.

(e) Information from CIA .....
.....
.....

1 - 100-354139 (Movement of Satellite Nationals)
1 - 100-300748 (Movement of Soviet Nationals)
MMF:bfl (8)

NOTE: This change is based on memorandum from Mr. J. J. Casper to Mr. Mohr dated 10/20/66 captioned "Movement of Nationals [illegible] Suggestion 118-67 Submitted by Mr. [redacted] Albany." It was approved and referred to Domestic Intelligence Division for necessary Manual changes. Other Manuals and Handbook [illegible] not involved.

DESCRIPTION OF FILE: 62-24074
STATE POLICE GENERAL

The above listed file has been called to our attention by personnel of the Consolidation Unit. It consists of six sections beginning in 1930 and no mail has been placed in the file since 1943.

The file consists mostly of three letters dated 8/4/33, 6/14/34, and 6/27/34, to all Field Offices in existence at that time requesting certain information regarding State Police in their particular area and the replies from the Field. It also contains letters from private individuals requesting various types of information regarding State Police organizations generally. Serial 53 appears to be a compilation of all information received from the Field in answer to the first letter. The remainder of the file consists mostly of replies from the second two letters. The material in the file is obsolete and does not appear to have any great value to the Bureau. All material of an administrative or historical nature would be retained.

Destruction of this mail would result in saving space in the file room and in eliminating unnecessary cards from the General Index. Destruction of this category of mail is authorized under the general records schedule and no further archival authority is required.

It is requested that the substantive supervisor review the above listed file to determine if any reason exists which would preclude destruction. A notation advising of the decision reached may be placed on this memorandum and returned to the Consolidation Unit of the Records Branch, Room 7231.

~~CONFIDENTIAL~~ b6 b7C

SYNOPSIS

Mr. [redacted] proposed that Forms FD-210, INS (Immigration and Naturalization Service) Forms 281, State Department Forms FS-257 and INS reports of admissions and departures of aliens and nationals of Soviet-bloc countries be destroyed along with related index cards when one year old. The suggestion concerns only those forms on which no investigation is involved and are now maintained in control files under the 20-year destruction rule. If investigation is required, they become part of the appropriate case file.

Views of five offices (Chicago, Miami, New York, San Francisco and Washington Field) which handle large volume of security work were sought inasmuch as these forms are maintained only in the field and not at the Seat of Government. All offices canvassed favored adoption of the idea. Washington Field Office, however, believed some restrictions were necessary since these records are often valuable in security investigations particularly in identifying unknown subjects who are alleged illegal agents. Training and Domestic Intelligence Divisions considered replies of field offices and, based on them, favor modification of suggestion. FD-210s should continue to be retained by New York and Washington Field Offices since they have copies of each one executed. Other offices may destroy those in control file after one year. There is no need to retain copies of INS forms more than one year since data is incorporated on FD-210s. FS-257s should be retained by offices covering destinations of nationals since they contain valuable background data plus photograph and description. Offices covering ports of entry, if acting only as auxiliary offices, should be permitted to destroy this material after one year. Border offices should retain forms on nationals destined for locations within their jurisdictions since they are offices of origin in these cases.

DETAILS

SUGGESTION: That Form FD-210, INS (Immigration and Naturalization Service) Form NE 281, State Department Form FS-257 and INS reports of admissions and departures of aliens and nationals of Soviet-bloc countries be destroyed along with related index cards as the material becomes one year old. These forms relate to unofficial visitors to the U. S. and are governed by Manual of Instructions, Volume IV, Section 105E, item 3. When no investigation is conducted, these forms are maintained in a control file.

PRESENT PRACTICE: These forms now fall within the 20-year rule for consideration for destruction.

ADVANTAGES: Suggester believes this procedure would aid the Bureau's Records Management Program by conserving space. In Albany Office, five drawers of records could be purged. He advised that reference is made to these items very infrequently.

OBSERVATIONS: Domestic Intelligence Division stated Bureau could not determine value of these records since they are not maintained here. Their value to the field would depend on what has been derived from them up to this time. They recommended a survey be made of representative offices handling a large volume of security work.

A canvass was made of the New York, Chicago, Miami, San Francisco and Washington Field Offices. The first four of these offices favored the destruction without reservations and foresaw no obstacles to investigation. They pointed out that if investigation of the visitor or his sponsor was necessary, the form was incorporated in a case file and not maintained in a control file. Miami realized that conceivably the identity of a Soviet-bloc agent could be facilitated through a review of these forms, particularly the FS-257 which contains a photograph; however, they believed this to be a remote possibility and not reason enough to warrant retention since, in most instances, the information could be obtained from the agency which originally furnished the information.

Washington Field Office (WFO) took a more cautious approach. It commented the New York Office (NYO) and itself handle the bulk of national internal security investigations. It stated that it has found the control files on the movement of nationals

~~CONFIDENTIAL~~

to be a valuable asset in such investigations and particularly so in connection with the identification of unknown subject agents of Soviet-bloc intelligence where, as in the past, information has been received belatedly from highly sensitive sources regarding the arrival and/or departure of an enemy agent identified only by a code name.] It saw no reason for all offices to maintain the FD-210s for more than one year since NYO and WFO receive and maintain copies of FD-210s on all Soviet-bloc visitors. With respect to INS Form 281 which is used to report to local FBI offices the arrivals and departures of Soviet-bloc nationals, WFO noted that data furnished by INS are incorporated on FD-210s; therefore, little purpose would be served by maintaining any INS forms in the control files. State Department Forms FS-257, commonly called a visa data slip, contain the visitor's name, date and place of birth, nationality, occupation, identity and address of his US sponsor, length and purpose of his stay, his photograph and physical description. It is the only source providing the photograph and description of the visitor and is kept in the field office covering the visitor's destination and not any central repository; therefore WFO felt they should be retained in the control file of the covering office at least five years.

WFO further recommended that offices covering ports of entry into the US should be authorized to destroy the forms at the end of a year when they are auxiliary offices. Further when these nationals are destined to locations within the jurisdiction of a border office, the office should retain the records since it is office of origin in such cases.

Training and Domestic Intelligence Divisions discussed the views of the offices which were canvassed. [Noting the comment of the Miami Office that conceivably the identification of an alleged Soviet-bloc intelligence agent could be facilitated and the exposition furnished by WFO, it was decided that the recommendations of WFO had merit. Since these forms are often the only record on an individual they could be valuable as references in connection with the detection of possible illegal agents and should be retained as recommended by WFO, namely that the FD-210s should continue to be retained by WFO and NYO and the FS-257 should be retained by the office covering the destination of the visitor. Also that border offices should retain the records in question when the nationals are destined for locations within their jurisdictions. Offices covering ports of entry, if they serve only as auxiliary offices, need not retain the forms in control files more than a year.]

SUBJECT: PROPOSED CHANGE IN MANUAL OF RULES AND REGULATIONS

FIELD CONTROL FILES ON RECORD CHECKS OF BALTIMORE SOURCE 4 AND OTHER CHECKS

DESTRUCTION OF BUREAU RECORDS - GENERAL

To permit inspection review of administrative record checks requested by a field office of Baltimore Source 4, House Committee on Un-American Activities and Passport Office, Department of State, copies of correspondence requesting such record checks are required to be placed in a control file. During each inspection, this control file is carefully reviewed.

In the interests of good records management, the field office is instructed in the inspection letter to purge the control file of material dated prior to the inspection.

The proposed change in Manual of Rules and Regulations is to make this purging automatic after each inspection thereby eliminating the need for this stereotyped instruction in each inspection letter.

RECOMMENDATION

That the attached proposed change in the Manual of Rules and Regulations be approved. If approved, to be handled by the Training Division.

SUBJECT: REHABILITATION PROGRAM
RECORDS BRANCH

DESCRIPTION OF FILE: 98-0
SABOTAGE GENERAL

The above listed file has been called to our attention by personnel of the Consolidation Unit. It consists of 99 sections beginning in 1939.

The file is still being used currently but from Section 1 through part of Section 56, the file contains mail that concerns World War Two and the building up to the War. It contains letters from and to private individuals who either requested information regarding Sabotage or submitted suggestions on how to prevent it. These sections also contain Interoffice memoranda that are no longer received at the Seat of Government and mail where the original was recorded into another file. Since World War Two has long been over, this mail is obsolete and does not appear to have any great value to the Bureau. It seems that the first 56 sections of this file could be reviewed for possible destruction. All material of an administrative or historical nature would be retained.

Destruction of this mail would result in saving space in the file room and in eliminating unnecessary cards from the General Index. Destruction of this category of mail is authorized under the general records schedule and no further archival authority is required.

It is requested that the substantive supervisor review the above listed sections of the file to determine if any reason exists which would preclude destruction. A notation advising of the decision reached may be placed on this memorandum and returned to the Consolidation Unit of the Records Branch, Room 7231.

RECOMMENDATION:

For referral to the Substantive division.

ALL INFORMATION CONTAINED HEREIN IS UNCLASSIFIED DATE 8-3-82 BY SP4 EW/cal

DESCRIPTION OF FILE: 62-1
CORRESPONDENCE GENERAL

The above listed file has been called to our attention by personnel of the Consolidation Unit. It consists of thirteen sections beginning in 1940 and no mail has been placed in it since 1957.

The file contains letters, notes, postcards, etc. from private individuals, the majority of which are commendatory of the Director. There are some Anonymous Communications and some letters that received no reply. The majority, of course, were answered by the Director. The names of the writers were indexed. Some of the correspondence is, however, on the critical side. This file is no longer used and similar type correspondence is filed in 62-0, 63-0, or 94-5. Authority was granted to destroy all mail over 10 years old in the 62-0 files (see memorandum Mr. Short to Mr. Tavel, 6/25/64). Since authority for destruction of mail over ten years old has been granted for the 62-0 file and all but two serials in 62-1 are now over ten years old, it seems that the same authority could be applied to the 62-1 file.

Destruction of this mail would result in saving space in the file room and in eliminating unnecessary cards from the General Index. Destruction of this category of mail is authorized under the general records schedule and no further archival authority is required.

It is requested that the substantive supervisor review the above listed file to determine if any reason exists which would preclude destruction. A notation advising of the decision reached may be placed on this memorandum and returned to the Consolidation Unit of the Records Branch, Room 7231.

DESCRIPTION OF FILE: 62-122
FUGITIVES GENERAL ODestruction of Bureau Property

The above listed file has been called to our attention by personnel of the Consolidation Unit. It consists of 64 sections and is still used currently. Serial 1 is dated in October 1921, but there is mail behind this serial that is dated as far back as April 1920.

This file contains an old SAC letter dated 8/27/1923 and 29 individual letters to the Field Offices existing at that time, dated 11/17/26. The individual letters and the one SAC letter requested the Field to send in the list of Fugitives in their area and the replies from the Field listing the names. Some lists were indexed and some were not Those listed had very little identifying information on the name. This file also consists of numerous serials where the original is filed in another file and inter-office memoranda that are no longer sent to the Bureau. Mr. E. A. Tamm apparently advised the Director each week , the names of the 12 outstanding fugitives wanted. (See serials 450, 454, and 560 for examples.) There was a letter dated 7/5/38 sent to the Field instructing them to contact the officials at the home offices of major insurance companies with reference to the searching of Identification Orders against the card index files in their offices. Replies from this letter were received and some of the names of the officials and some of the companies were indexed. Some of the names of the fugitives that were indexed would be either dead or in age anywhere from eighty to over a hundred years. It is suggested that at least the first ten sections of this file be reviewed for possible destruction. All mail of a policy nature, memoranda with the Director's notations, suggestions and Executive Conference memoranda and mail of a historical nature would be retained.

12 NOV 22 1966

Destruction of this mail would result in saving space in the file room and in eliminating unnecessary cards from the General Index. Destruction of this category of mail is authorized under the general records schedule and no further archival authority is required.

Destruction of Bureau Records - general

SUBJECT: HANDLING OF MAIL IN FIELD DIVISIONS
SUGGESTION 222-67 SUBMITTED BY
SA [redacted] WASHINGTON FIELD OFFICE

b6
b7C

SYNOPSIS

Mr. [redacted] proposed that auxiliary offices be permitted to destroy annually all referred upon completion (RUC) nonsecurity files over ten years old except those of Identification Order (IO) subjects. Any others desired to be retained for good reason should have memorandum setting forth appropriate facts placed as top serial in the subject file for review by Inspectors. The age of the case would be determined by the date of the top serial in file. Prior to destruction, a new index card would be prepared containing the office of origin (OO), file number of Bureau, OO and the auxiliary office, name, race, date and place of birth, and FBI number, if available, of the subject. It should also contain the date of the most recent serial and the date of destruction.

General Investigative, Special Investigative, Files and Communications, Administrative and Inspection Divisions considered this idea and four of these divisions favored a field survey of a representative number of offices. General Investigative Division opposed the idea because there would be too many exceptions and would require maintenance of index cards not now necessary. Special Investigative Division would exempt criminal files with results of intelligence investigations and would cause original FD-302s and signed statement to be forwarded to OO by auxiliary offices.

Results of field survey reflect, while four offices recommended adoption due to saving of space, several valid objections were raised regarding procedure and especially the fact that a tremendous amount of clerical time would be needed to prepare the new index card, review material involved, and follow through with the destruction phase of this idea. Applicant-type cases would be affected by this procedure in that they might be

b6
b7C

delayed in order to obtain necessary material from the SOG which is OO in these cases. The majority of the offices felt that it was doubtful whether the space to be saved, while substantial, would offset employee time necessary to handle the work involved.

RECOMMENDATION: That the suggestion not be adopted. On approval, no further action is necessary with regard to the suggester. He has been thanked by prior letter.

b6
b7C

Casper to Mohr memorandum continued:
Re: HANDLING OF MAIL IN FIELD DIVISIONS
SUGGESTION 222-67 SUBMITTED BY
SA [redacted] WASHINGTON FIELD OFFICE

DETAILS

SUGGESTION: That auxiliary offices be permitted to destroy annually all RUC nonsecurity files more than 10 years old, to be determined by the date of the top serial in the file. The files at the SOG and the OO should be retained. Files on IO subjects should be excluded and no others unless a good and sufficient reason exists to retain them in which case a memorandum setting forth the appropriate reasons should be placed as the top serial in the file. This would be subject to review during inspections concerning such matters as important unsolved Kidnappings, Bank Robbery Matters, Anti-Racketeering with criminal intelligence data, and intelligence information of the General Intelligence Information File (GIIF) type.

Prior to destruction, a new index card would be prepared on each file, reflecting the OO, file numbers of the Bureau, OO and the auxiliary office, name, race, date and place of birth, and FBI number, if available of the subject, plus the date of the most recent serial and date of destruction of the file.

PRESENT PROCEDURE: These files are eligible for destruction after 20 years.

ADVANTAGES: Suggester notes that current figures are not available but several years ago a survey was made which showed an average field office acted as an auxiliary office in 68.5% of its total cases; therefore, suggested procedure would make possible considerable potential savings in cabinets and leased space in the field.

DISADVANTAGES: The work necessary to place the suggested procedure into effect would entail extra employee time; however, the destruction work would only be a disadvantage for the period of time it took to destroy these files until the project could be handled on a current basis which is already being done in connection with the 20-year destruction of files by all field offices.

OBSERVATIONS: SAC Purvis, Washington Field Office, recommended serious consideration and solicitation of opinions from other offices. The matter was

b6
b7C

Casper to Mohr memorandum continued:
Re: HANDLING OF MAIL IN FIELD DIVISIONS
SUGGESTION 222-67 SUBMITTED BY
SA [redacted] WASHINGTON FIELD OFFICE

considered by the General Investigative, Special Investigative, Files and Communications, Administrative and Inspection Divisions. All except General Investigative Division favored a canvass of a representative number of field offices. Special Investigative Division would exempt criminal files containing results of intelligence investigations and would cause original FD-302s and signed statements to be forwarded to OO by auxiliary offices prior to destruction. General Investigative Division opposed the idea because it would have too many exceptions and would require maintenance of index cards not now necessary. It could also cause delay when auxiliary offices were asked for information and had to contact OO for the data.

In view of the fact that four of the five divisions felt the idea had merit, approval was granted by memorandum dated 10/18/66 for a field survey.

The views received as a result of this survey of 12 representative offices (New York, Buffalo, Cincinnati, El Paso, Jacksonville, Kansas City, Los Angeles, Miami, Philadelphia, Salt Lake City, San Diego, and Savannah) have now been evaluated. Cincinnati, El Paso, Jacksonville, and Savannah Offices felt the idea was worthy of adoption due to the saving of space to be realized and visualized no insurmountable problems involved. Most of the 12 offices could visualize no need for the preparation of a new index card to be placed in the general indices and recommended against this procedure. They pointed out the tremendous amount of work which would be involved in making these new cards. Cincinnati advised the FBI number would be available for the subject and the identification record would give a lead as to the field office in which additional information regarding a particular subject is located. In the event it was decided index cards are desirable, Cincinnati proposed a different color of card stock be used, i.e., green. Card should contain the date it was prepared. With regard to the transmittal of pertinent data to the OO, Cincinnati proposed a preprinted form be used which would contain spaces showing material forwarded to OO. This would call attention of OO to the fact that the form letter had material enclosed which was to be placed in file. No copy of the form letter would be retained by the auxiliary office since the substantive file has been destroyed.

New York also opposed making the new index card because of work involved since an existing card is already in the indices with as much descriptive data as appeared in original correspondence. The fact the file is subsequently marked destroyed would be indicative to a reviewing Agent that it came within the purview of the idea, if

adopted. There would be a saving of 135 five-drawer file cabinets in New York alone. New York as well as the majority of other offices canvassed pointed out the number of times these files would be referred to would be few with the exception of the criminal intelligence type. They also noted adoption would have an effect on applicant-type investigations in which Bureau is the OO since a certain percentage of the cases are in the "bring-up-to-date" category. Short deadlines are set in these cases and a certain amount of delay would be experienced in obtaining the necessary Bureau copies of those reports which have been destroyed in the field. The field offices did not mind this part of the procedure since they pointed out the responsibility and work in furnishing the field material in these cases would fall on the SOG. New York stated the preparation of the index card could conceivably outweigh any saving of space and equipment. Several of the offices mentioned the work involved in this procedure might cause them to need an additional employee or possibly two employees. San Diego expressed the opinion the new card should not be made but the one in file be pulled and necessary information added to it. Also, that all alias cards should either be destroyed or similar information placed on them and, if information placed on them, they should be purged from indices since there would be no point in matching new incoming mail with nonexistent files. Idea would entail a review of consolidated files each year to insure they are now ready for destruction, it being noted that reopened cases frequently result in substantial variance in date of the top serial in different closed cases in a consolidated volume.

Salt Lake City raised an objection in connection with the necessity to refer to these RUC criminal cases, particularly when the need for the background data and prior criminal history of a subject is needed by some person or agency outside of the Bureau and the information is needed "right now!" An example of this would be a U. S. Attorney in making his decision as to whether a subject should be prosecuted. Sometimes the amount of time required to obtain the desired information from the Bureau or the OO would be just enough time for a reluctant U. S. Attorney to decide to allow local authorities to prosecute, and thus a possible statistic is missed. This would be particularly true where local authorities are holding a subject awaiting the decision of the U. S. Attorney as to whether the Federal authorities will assume jurisidction of the subject.

Casper to Mohr memorandum continued:
Re: HANDLING OF AMIL IN FIELD DIVISIONS
SUGGESTION 222-67 SUBMITTED BY
SA [redacted] WASHINGTON FIELD OFFICE

Training Division recommends idea not be adopted. The views of the offices solicited, it is believed, offer a fair cross section of the field's opinion and disclose that, while the idea has its merits, the disadvantages involved either cancel them out or militate against them. The principal and obvious advantage is, of course, the saving of space and filing equipment which is becoming an increasingly nettlesome problem; however, the cost factors of time, manpower, and reference value cited by the various offices are very persuasive and, in combination outweigh the space-saving features. For these reasons, it is believed the disadvantages of the suggestion outweigh the advantages and the 20-year rule should be retained.

SUBJECT: REHABILITATION PROGRAM
RECORDS BRANCH

DESCRIPTION OF FILE: 65-2078
ESPIONAGE - VOLUNTEER CIVILIAN CORPS

The above listed file has been called to our attention by personnel of the Consolidation Unit. It consists of 17 sections beginning in 1938 and the last serial 891 is dated in March of 1943. There is also a Sub A to this file.

The file contains letters from private individuals suggesting that groups be formed to help the Bureau in connection with the National Defense Program during that time and letters from various organizations and companies offering their services to help out for the same reason. No investigations resulted from these communications and since this material is outdated, there appears to be no reason for its continued retention. This file is quite similar in nature to file 65-2540 which is "Espionage - Individuals offering services" for which destruction approval was given. (See Memorandum L. E. Short to Mr. Tavel dated 11/9/65, in 65-2540-2768). Partial de-indexing has been completed in the file. All mail of a policy nature, memoranda with the Director's notations, and mail of a historical nature would be retained.

Destruction of this mail would result in saving space in the file room and in eliminating unnecessary 3 x 5 cards from the General Index. Destruction of this category of mail is authorized under the general records schedule and no further archival authority is required.

It is requested that the substantive supervisor review the above listed file to determine if any reason exists which would preclude destruction. Annotation advising of the decision reached may be placed on this memorandum and returned to the Consolidation Unit of the Records Branch, Room 7231.

SUBJECT: DESTRUCTION OF Bureau RECORDS - "CLEANOUT CAMPAIGN"

ALL INFORMATION CONTAINED HEREIN IS UNCLASSIFIED DATE 8-3-82 BY SP4EWJ/cal

By Department Memorandum No. 488 received in Bureau 12-9-66, Ernest C. Friesen, Jr., Assistant Attorney General for Administration, advised period 1-15-67 through 2-28-67 has been set for "Cleanout Campaign." This is described as concentrated effort over fixed period of time to transfer from office space, or destroy, records not needed in daily business in order to save space and equipment.

By way of background, President previously placed moratorium on purchase of file cabinets. President's memorandum to heads of all departments and agencies dated 9-22-66 referred to in above memorandum cites successful "cleanout" campaigns by several agencies in response to moratorium in which average amount of paper held by agencies in work space was reduced by twenty per cent. President then instructed all departments and agencies to conduct such campaigns to dispose of unneeded records, publications, and reference material as well as furniture, equipment, and supplies used in record keeping; to destroy records authorized for disposal; to send noncurrent records to Federal Records Centers; to redistribute record-keeping equipment and supplies to points of need; and to report results achieved to President through Budget Director. Agencies conducting such campaigns since 1-1-65 are exempted.

66-3286-
NOT RECORDED
121 JAN 3 1967

Friesen states all records authorized for disposal should be destroyed and authority obtained for disposal of obsolete records for which authority not yet obtained and that inactive records be transferred to ~~Federal Records Centers~~. He stated that special emphasis should be placed on disposition of nonrecord material. He said prominent publicity should be given and that special attention should be given to President's instruction that "every official, every supervisor, and every employee in each organization dispose of unneeded records, publications, and reference material." Friesen stated that following statistics in cubic

ORIGINAL FILED IN 62-97214-

feet desired: records destroyed; records transferred to Federal Records Centers; and nonrecord material destroyed. He concluded he believed Department has efficient regular program for disposition of obsolete records; however, he felt much can be achieved in this "one-shot" campaign.

We have always been active in destroying obsolete records and, since implementation of Federal Records Act of 1950, we have continued to develop strong destruction program. Wherever possible, retention periods have been established for all records at Seat of Government and in field. We have been destroying records such as extra copies with Bureau approval on a daily basis and, as a result of this continuing program, the volume of records which can be destroyed during this campaign period will not be large. Our last report on volume of records destroyed was for two-year period ending 6-30-66. While this "Cleanout Campaign" is, undoubtedly, directed at those agencies which have not complied with prior instructions of General Services Administration, we should, in view of President's directive, attempt to participate by instructing all divisions at Seat of Government and field divisions, including Legal Attaches, to attempt, consistent with availability of personnel, to destroy as many records as possible during established period for which destruction authority has been granted. In our report, we will advise Department that greater accomplishments were not possible because of our continuing Records Destruction Program.

RECOMMENDATION:

That the attached SAC Letter and Memorandum to All Bureau Officials and Supervisors be approved.

All offices have previously submitted statistical data on records destroyed for two-year period ending 6-30-66. Each office should, consistent with availability of personnel, attempt to destroy during campaign period as many records as possible for which authority to destroy exists in Manual of Rules and Regulations. In addition, for reporting results of this campaign, efforts should be made to also destroy unnecessary nonrecord material such as obsolete publications, reference books, et cetera.

Following statistics should be reported in cubic feet: (1) single, over-all total of volume of records destroyed during period 7-1-66 through 1-14-67; (2) estimated volume of records on hand at beginning of campaign; (3) estimated volume of records at end of campaign.

Following accomplishments of campaign should be set forth in cubic feet or as indicated: (1) volume of records destroyed; (2) volume of nonrecord material destroyed; (3) number of drawers of file cabinets released for re-use; (4) number of index cabinet drawers released for re-use; (5) number of running feet of open-shelf file space released for re-use; (6) square footage of space recovered.

Referenced SAC Letter contains a table of equivalents for use in determining volume of records requested.

Foregoing data should be submitted to Bureau, under this caption, by 3-8-67 marked for the attention of the Files and Communications Division.

Very truly yours,

John Edgar Hoover

SUBJECT: DESTRUCTION OF RECORDS - BUREAU - GENERAL
DEPARTMENT OF JUSTICE

b6
b7C

On 1/5/67, Mr. [redacted] of the Employee Relations Office, Personnel Office, Administrative Division of the Department, telephonically contacted the Suggestion, Forms and Manuals Unit, Training Division, concerning a suggestion adopted by the Department.

Mr. [redacted] advised the Department had adopted a suggestion concerning its record operations to purge excess material. He stated the Department receives duplicate copies of lengthy reports from the FBI primarily in Civil Rights and Espionage Matters, such as Vietnam protest reports, which are generally classified in nature and are routed variously to the Criminal, Civil Rights, and Internal Security Divisions. The adopted suggestion proposed that they keep but one copy of these reports plus the "title page" which would show whatever routing it had received, and destroy any duplication. Although the suggestion had been adopted he felt, because the material was classified and because we had not been consulted in the matter, he had best check with us to determine if there might be some unforeseen objection.

b6
b7C

Mr. [redacted] was advised that if the Department chose to destroy material it considered excess consistent with the provisions of Executive Order 10501 and its own Regulations Relating to the Protection of Defense Information, it was its decision to make and the Bureau could not comment on it.

RECOMMENDATION: None.....for information and record purposes.

SUGGESTION

That at the end of each Congress copies of House and Senate bills and resolutions of no interest to the Bureau be destroyed instead of being sent to file.

DESTRUCTION OF BUREAU RECORDS - GENL

Current practice or rule (Include manual citation as well as facts)

At the present time, the Administrative Review Unit maintains copies of all House and Senate bills and resolutions for the current Congress (2 years). At the end of Congress, those bills of no interest to the Bureau are sent to file. (continued on pg 2)

Advantages of suggestion and annual savings (include basis for estimate)

This will provide a savings in space. At present the Records Section has 16 drawers of 88th Congress material. An additional 18 drawers of material for the 89th Congress were just sent to Records Section. Inasmuch as this material is maintained by the Records Section for a limited time, employee time can be saved in preparing this material for transportation to the Records Section, transporting, and the refiling of the material by Records Section employees. A yearly savings of employee time will be $112.93. (1 GS-2, 1 hour, @ $1.89 per hour; 1 GS-7, 16 hours, @ $3.10 per hour; and 2 GS-5, 24 hours, @ $2.56 per hour.) The savings of filing space is a big item.

102 JAN 27 1967

SEE ADDENDUM OF THE TRAINING DIVISION ON PAGE TWO

Current practice or rule - - continued

Bills on which memoranda have been prepared are maintained in this unit for the duration of an additional Congress before being sent to file. All measures not enacted into law by a Congress are considered dead items and must be reintroduced in a future Congress before action can be taken. All material sent to Records Section is not recorded and is filed in bulk form and maintained two years and then destroyed.

b6
b7C

ADDENDUM OGA:ekc 1-9-67

It is felt Mrs. [redacted] suggestion is a good one and will save valuable file space. Once a particular Congress has gone out of session, there is no need to retain bills and resolutions for which the Bureau has no interest. Those of interest to the Bureau, including those which have been subject of Bureau memoranda or correspondence, will be retained.

ADDENDUM OF THE TRAINING DIVISION, ML:mem, 1/12/66

Training Division has ascertained the Administrative Division has complete control of these records and when they can be destroyed, etc. It appears the idea does merit approval since it will save work and there should be no reason for maintaining records which do not pertain to any of the Bureau's operations. Based on the saving of $112.93 to be realized from this proposal the suggester is entitled to an incentive award of $15. This is in line with the current scale for such awards.

RECOMMENDATIONS: (1) That the suggestion be adopted and the suggester granted an incentive award of $15 to be handled by the Commendation, Supervisory Approval and Special Action Unit, Administrative Division, in lieu of a first letter of acknowledgment.

(2) On approval, this addendum will serve as the authority for Administrative Division to place proposed procedure into effect.

FROM : C. L. Rogers

SUBJECT: ADMINISTRATIVE DIVISION MATERIAL STORED ON SEVENTH FLOOR IDENTIFICATION BUILDING

Destruction of Bureau Property

I made the annual check on January 14, 1967, of material stored at the Identification Building and suggest the following be disposed of at this time.

1. Administrative Reports: We retain these for about three fiscal years. They are on hand beginning with the fiscal year 1963. It is suggested that those for the fiscal year 1963 (July 1962 through June 1963) be destroyed. 2 legal drawers of material destroyed.

2. Congressional Record and Federal Register: We retain these for the past two calendar years. They are now on hand beginning with 1964. It is suggested the issues dated in 1964 be destroyed. Can destroy all of these on 7th floor per O.G. Ausen to C.D. Hagan 2/27/67, cls

46 legal + 7 letter = 53 drawers destroyed

3. Senate and House Bills; Hearings Before Appropriations Committees; Etc.: We have retained items in this general category for the past two Congresses. We have them on hand for the 88th Congress, the 89th, and are currently accruing them for the 90th. It is suggested that items from the 88th Congress be disposed of now. These items are:

12 legal + 10 letter = 22 drawers destroyed 1-58

a. House and Senate Bills
b. Public and Private Laws, including a few from the 87th Congress
c. House Resolutions and Documents 66-3286-
d. Senate Resolutions and Documents

NOT RECORDED
167 APR 19 1967

4. United States Attorneys Bulletins; Civil Service Commission Transmittal Sheets; Etc: There is a small batch of U. S. Attorney

SUGGESTION

It is suggested that when the Field Office advises that a firearm or other article, exclusive of bait money in bank robbery cases, has been recovered and which requests cancellation of the "stop" in the National Stolen Property Index the initial letter which requested that the stop be placed in the NSPI also be destroyed. This would be only Field Office mail which deals solely with request that Bureau place a stop in the NSPI.

Destruction of Property

Current practice or rule (Include manual citation as well as facts)

The letter which requests cancellation of the "stop" is destroyed if it deals solely with the cancellation. The cards made on the recovered items are pulled from the NSPI and destroyed.

Advantages of suggestion and annual savings (include basis for estimate)

Mail of no future value could be destroyed.

ALL INFORMATION CONTAINED HEREIN IS UNCLASSIFIED DATE 8-3-82 BY SP4EW/cal

Disadvantages of suggestion

Time used to place purge sheet in file and Numbering Unit for the particular serial being destroyed.

b6
b7C

(The use by the United States of my suggestion shall not form the basis of a further claim of any nature by me, my heirs, or assigns upon the United States. I understand that I will be considered for any justified award only if my suggestion is adopted within two years after submission.)

Employee Suggestion, FD-252
Submitted by [redacted]
Files and Communications Division

COMMENTS:

Requests from field to list article in National Stolen Property Index (NSPI) are usually contained in one- or two-page letter and, as a one-page "purge" sheet must be inserted if the first letter is to be destroyed, there would be no practical saving of space and there would be additional work in preparing the "purge" sheet and pulling and destroying the abstract for the serial. It is accordingly recommended suggestion not be adopted as submitted.

An analysis of procedures as result of her suggestion reveals the cancellation process could be streamlined.

Routing Unit routes letters from field requesting cancellation in NSPI to substantive division and to Consolidation Unit. Mail is not blocked. Upon receipt in Consolidation, clerk pulls the stop card from NSPI; prepares charge out for serial on which card prepared; requests serial by sending charge out to Filing Unit; upon receipt of file containing serial, writes "destroyed (date) per (field) letter dated _____"; places black check mark over original indexing symbol to indicate deindexing; and gives incoming letter and stop card to supervisor, who, after insuring correct card pulled, destroys card and incoming letter.

It is recommended that, in future, we pull and destroy the stop card and letter from field instructing stop be removed but that we not pull file and make notation that card was destroyed. NSPI's effectiveness is governed only by whether or not article is listed therein and, if no card is present, fact card has been destroyed is not necessary on mail.

Dear Miss [redacted]

Your suggestion has been received concerning the disposition of initial letters placing stops in the National Stolen Property Index when they have been canceled. After careful consideration, it has been decided the procedure as proposed should not be adopted. It is a pleasure for me to advise you, however, that as a result of the analysis of present methods it has been determined the cancellation process can be streamlined.

I want to take this opportunity to express my appreciation to you for bringing this matter to my attention.

Sincerely yours,

J. Edgar Hoover

Files and Communications Division opposed adoption as presented since there would be no practical saving of space and would be additional work in preparing the "purge" sheet and pulling and destroying abstract for serial. An analysis of procedures due to suggestion revealed the cancellation process can be streamlined. It recommended in the future, the stop cards be pulled and destroyed and letters from field requesting stops be removed also be destroyed but that files not be pulled and notations made that card was destroyed. It pointed out the effectiveness of this index is governed only by whether or not article is listed therein and, if no card is present, fact card has been destroyed is not necessary on mail. On approval, this letter will serve as authority for the Files and Communications Division to place the recommended procedure into effect.
